SARL NEWS - SUNDAY 19 FEBRUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with deep regret that the passing of Victor le Grange, ZR6VLG, on Tuesday 14 February 2012 at the age of 71 is announced.

We extend our sincere condolences to his family and friends.

In the news today:

AMATEUR RADIO GETS A NEW BAND AND AN AGENDA ITEM ON THE WRC-2015 AGENDA

SARL NATIONAL CONVENTION BOOKING NOW OPEN

SAAMSAT TO UPDATE ON KLETSKOUS CUBESAT NOW ONLINE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

AMATEUR RADIO GETS A NEW BAND AND AN AGENDA ITEM ON THE WRC-2015 AGENDA

It's official! Delegates attending the 2012 World Radio Communication Conference have approved a new 7 kilohertz wide secondary allocation between 472-479 kHz for the Amateur Radio Service. Agenda Item 1.23 had both its first and second readings in Plenary Session on Tuesday, February 14; to become part of the ITU's Radio Regulations, each Agenda Item must be read twice in Plenary Session. While the Final Acts was signed on Friday, February 17 at the close of the Conference, the new allocation will not take effect until it is entered into the Radio Regulations. No date has been set for this, but it is unlikely to be earlier than January 1, 2013. No amateur may use the band until ICASA

has revised and published the table of amateur frequency allocations.

"This is a fantastic achievement for the Amateur Radio Service," IARU President Tim Ellam. VE6SH, said. "A new allocation for spectrum is always something that should be celebrated. The success on this issue is due to the hard work over the last four years from our IARU representatives, as well as the volunteers from the numerous IARU Member-Societies who have worked within the ITU process on behalf of their national administrations. This is excellent work from our team in Geneva, and from those who have assisted from their home countries."

Agenda Item 1.23 originally called for a 15-kilohertz-wide spectrum in parts of the band 415-526,5 kHz, taking into account the need to protect existing services. The initial idea was 495-510 kHz, but according to ARRL Chief Executive Officer David Sumner, K1ZZ, this was in conflict with the Maritime Mobile Service. WRC-12 delegates approved Agenda Item 1.10, which called for a worldwide exclusive allocation to the Maritime Mobile Service of 495-505 kHz. Discussion of this allocation to Maritime Mobile "has been in the works throughout the conference preparation (i.e. since 2008)," Sumner explained, "and was the reason why the MF amateur allocation could not be made in this band as some amateurs had hoped. That's why we had to look elsewhere and is what put us in conflict with aeronautical radio navigation."

According to Colin Thomas, G3PSM, CEPT Coordinator for Agenda Item 1.23, WRC-12 delegates moved forward early in the Conference with what he called a "compromise proposal" for the new allocation. "Progress was made with a compromise proposal on Agenda Item 1.23, drafted to take into consideration the views of those for and those against an Amateur Service allocation around 500 kHz. This proposal suggested a 7-kilohertz segment between 472-479 kHz, very close to the CEPT position of 472-480 kHz."

The new allocation calls for a worldwide secondary allocation to the Amateur Service at 472-479 kHz, with a power limit of 1 W EIRP. A provision has been made, however, for administrations to permit up to 5 W EIRP for stations located more than 800 km from certain countries that wish to protect their aeronautical radio navigation service (non-directional beacons) from any possible interference.

One of the responsibilities of each WRC delegation is to set the agenda for the next WRC. WRC-12 delegates approved an Amateur Radio-related agenda item for the upcoming WRC-15: To consider the possibility of making an allocation of an appropriate amount of spectrum, not necessarily contiguous, to the Amateur Service on a secondary basis within the band 5 250-5 450 kHz. This will be Agenda Item 1.4 at WRC-15.

"It is always a challenge to have items placed on the agenda for future WRCs," IARU President Tim Ellam, VE6SH, said. "I am pleased that we were successful in having an Agenda Item for a potential allocation at 5 MHz on a secondary basis. There will be much work to do over the next

ITU study group cycle. Much appreciation is owed to the IARU and the national delegation teams in Geneva for their hard work on this issue."

SARL NATIONAL CONVENTION BOOKING NOW OPEN

Book now for the SARL National convention which will be held in Pinetown from 20 to 22 April 2012. Full details are now online at www.sarl.org.za, including the registration form. On the Friday evening, at the "getting to know you" finger supper, there will be an interesting presentation on how South Africa's electronics Industry started in Pinetown. The Saturday afternoon session will include two presentations covering the building of VHF antennas and the Logbook of the world.

SAAMSAT TO UPDATE ON KLETSKOUS CUBESAT NOW ONLINE

Download an interview with Hannes Coetzee, ZS6BZP reporting on the progress made on SA AMSAT's KletsKOUS CubeSat project, from www.amsatsa.org.za. SA AMSAT has launched a fundraising campaign and is asking Radio Amateurs to make financial contributions to the project.

TEXAS AMATEURS MAKE WORLD RECORD BALLOON ATTEMPT

A group of Radio Amateurs hopes to establish a world distance record for an unmanned helium-filled balloon. The BLT-28 balloon will undertake a journey across the Atlantic and the Mediterranean, and then on to Nanjing, China. The South Texas Balloon Launch Team released the balloon on 11 February from Katy, Texas, just outside of Houston.

During the trans-Atlantic crossing, when out of range of shore based stations, the balloon's APRS beacon will operate on the International Space Station (ISS) packet digipeater frequency of 145,825 MHz. The balloon payload package weighs only about 5 ounces and contains a high altitude GPS tracking system and a 144 MHz FM APRS Amateur Radio transmitter. To conserve weight and battery life, no camera equipment is on board. The maximum altitude is expected to be above 26 km, with horizontal speeds of between 160-180 km per hour.

NEW SATELLITES REACH ORBIT

On 13 February a European Space Agency Vega rocket lifted off from Kourou, French Guiana on its inaugural flight. It carried the Laser Relativity Spacecraft to orbit, along with eight student-built MicroSats and CubeSats. The student satellites will transmit telemetry in the VHF, UHF and microwave amateur bands, with one satellite also including a voice repeater.

Here are the details: ALMASat-1 from the University of Bologna, Italy, transmitting 1 200-baud packet data at 437,465 and 2 407,850 MHz. Xatcobeo, a collaboration between the University of Vigo and INTA, Spain, transmitting telemetry at 437,365 and 145,940 MHz. Robusta, from the University of Montpellier, France transmitting 1 200-baud packet telemetry at 437,325 MHz with one 20-second data burst every 3 minutes.

E-St@r, a project of Politecnico di Torino, Italy, sending 1 200-baud packet telemetry at 437,445 MHz. Goliat, from the University of Bucharest, Romania, transmitting 1 200-baud packet data at 437,485 MHz. PW-Sat from the Warsaw University of Technology, Poland, which includes a voice repeater mode in addition to its telemetry functions. The voice repeater will listen for transmissions at 435,020 MHz FM and retransmit at 145,900 MHz SSB. PW-Sat telemetry will be sent as 1 200-baud packet and CW at 435,020 MHz. MaSat-1 from the Budapest University of Technology and Economics, sending 625/1 250 bps GFSK data at 437,345 MHz. Ground station software is available here. UniCubeSat GG from the University of Rome, which will transmit 9 600-baud data at 437,305 MHz.

South African Radio Amateurs are encouraged to listen out for the satellites and send reports to amsatsa@intekom.co.za.

AMERICAN AMATEURS ARE LOOKING FOR CONTACT WITH ANY ONE IN SOUTH AFRICA ON 17 METER

Recently amateurs in the USA have been requesting contacts with South Africa on 17 meter, as it is a long time since some of them heard any one in Africa or South Africa on 17 meter. The 17 meter band is normally quite open to USA from 21:00 till 23:00 CAT. Sometimes 17 meter is open for longer periods. Recently US stations have been heard in South Africa with signals of between 59 and 44 depending on the station. 17 meter is also open from South Africa to the Far East and Europe between 16:00 and 18:30 CAT.

COMPETITION NEWS

SARL Digital Contest. The first in the series of SARL Digital Contests will be on the air on Sunday 26 February from 13:00 to 16:00 UTC with PSK and RTTY activity on 20, 40 and 80 metres. The exchange is a RST report and a serial number starting at 001 and stations maybe contacted twice per band, once on PSK and once on RTTY. Find the full set of rules on page 57 of the 2012 SARL Contest Manual.

SARL National Field Day logs. The closing date for logs for the February leg of the SARL National Field Day is midnight Sunday 19 February - that is tonight! By Friday 17 February logs had been received from ZS6XT, ZS6A, ZS6BNE, ZS2EC, ZS4BFN, ZS6STN, ZS4B, ZS3R, ZS5ZLB, ZS6WR, ZS6AWW and ZS4BS.

If you made 1 QSO or 100 QSOs, please submit your log by midnight. Send it by e-mail to zs4bfn@netactive.co.za. You may have the winning entry!

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is expected to be at low levels with a slight chance of M-class activity. Hopefully old region 1 408 will improve matters when it rotates into view in the next couple of days.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 50.

All the bands from 20 to 10 m and especially 15 m will provide lots of DX fun with 10 m only opening sporadically due to the low solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

19 February, Today! - last day for submitting logs for SARL field day contest. 20 February, Tomorrow! - Last day for submission of logs for Antique Wireless Association ty day. 26 February - SARL digital contest. 29 February - Leap year Challenge from 00:01 till 23:59. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

Remember, nominations for SARL awards, which will be presented at the gala dinner which will take place over the weekend of the 2012 SARL AGM may still be submitted. Send nominations to secretary@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 19th February 2012

Echo Ireland

Members will receive the February issue of Echo Ireland within the next few days. A number of events associated with the society's 80th anniversary celebrations are covered, including the upcoming CQIR contest, the EI80IRTS Award and, of course, details of the 80th Annual General Meeting weekend, taking place on 21st/22nd April.

Anthony EI2KC brings us up to date with DXing, propagation and band conditions with his "HF Happenings" column, while another regular column "Excerpts from the HX Files" deals with the construction of a 23cms transceiver for ATV use.

John EI7IG, among others, writes about the results of research into networking protocols used in emergency communications. Communications of an entirely different type are the subject of an article by Steve EI5DD on QRSS (very slow CW) experiments and their value in propagation studies. Meanwhile Paul EI5DI has a very forthright article on amateur radio, remote control and the Internet.

The new Echo Ireland also includes details of the revised HAREC examination format, updates from radio clubs, details of forthcoming activities and plenty more.

IRTS 80th Anniversary AGM & Rally

Tickets for the AGM dinner on Saturday April 21st are selling fast. The event this year is hosted by Dundalk Amateur Radio Society, www.ei7dar.com. Dinner tickets are just 32, this is a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors. This is a must attend event in the 80th Anniversary year of your national society, www.irts.ie.

Dinner tickets can be bought now by contacting Thos, EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie.

Success at WRC-12

With the signing of the Final Acts of WRC-12 on Friday last, 17th February, the amateur service had a new global secondary allocation at 472 to 479 kHz. This is the culmination of ten years of lobbying of Administrations by IARU Societies worldwide which started when the question of an MF allocation was raised at the IARU Region 1 Conference in 2002 in San Marino.

The maritime mobile service is the primary user in the band 435 to 495 kHz and the aeronautical radio navigation service also uses the band 415 to 495 kHz . The amateur service must cause interference to these services. Ensuring the protection of these services by a block of countries was one of the reasons why the proposal had a very difficult passage through the WRC decision making process. In fact the proposal was not agreed until it had reached Committee 4, the final authority before the Plenary sessions.

There is a fairly long list of countries that signed up to a footnote permitting them not to allow amateur operation in the 472 to 479 kHz segment

The power level is to be 1 watt EIRP but countries more than 800 kilometres from a list of specified countries can increase this to 5 watts EIRP at their discretion. While the new allocation became effective on the signing of the Final Acts of the Conference it will be a matter for each Administration to determine when amateurs will have access to the new band as well as the modes and bandwidths that may be used.

Another bit of good news from the Conference is that a first reading of the Graft Agenda for WRC-15 was approved. It includes item 1.4 which proposes consideration of an amateur service allocation around 5.3 MHz at the next WRC.

Credit must be given to the IARU societies throughout the world that have worked on these two projects for the best part of 10 years. We should make special mention of Colin Thomas G3PSM, Chairman of the IARU Region 1 External Relations Committee, who was appointed CEPT Coordinator for the MF allocation item and who has done tremendous work in this capacity over a number of years to achieve a CEPT Common Position on the item which contributed in no small way to the successful outcome at WRC-12.

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2012.

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 27 February at 8:00 p.m. in the Roanmore GAA Club, Cleaboy Road, Waterford. Members are asked to attend and as always, visitors are welcome.

Please note that membership renewals for 2012 are now due. Membership costs 30 Euro and is available at a reduced rate of 20 Euro for pensioners, students and the unemployed. Please pass your payment on to any committee member or you can renew at the AGM on 27 February. Those who paid in November or December are fully paid up for 2012.

For information about the group, visit www.searg.com and you can also follow SEARG on Facebook and Twitter.

IRTS Region 4

Radio theory classes will be starting in February depending on numbers. If you are interested please contact Ger McNamara EI4GXB on 087-2532512 or ei4gxb / at/ gmail/ dot/ com

---

Limerick Radio Club.

The following officers were elected at the Limerick Radio Club AGM held on 8 February: Chairman: Simon Kenny EI7ALB Hon Sec: Ger McNamara EI4GXB Treasurer: Tony Condon EI2AW Committee: Dermot Gleeson EI2GT John Edgeworth EI6IW Mike Griffin EI4FMB Alan Cronin EI8EM

Trustees Michael Kingston EI2IX Dermot Gleeson EI2GT Tom O'Sullivan EI3AL

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

GI HF Conference and DiGIcon in 2009,

West Tyrone Amateur Radio Club is planning another Conference to be held on Saturday 16th June, 2012. A few speakers have already been secured for the Conference and we are currently working on the program for the day. As there are still a few slots available, if you feel that you could enhance the program by giving a talk, demonstration or workshop, please contact Philip MI�MSO to express your interest. Contact details are mi0mso /at/ yahoo.co.uk or 077 9338 6795

DX News

EA5BYP and EA5KM will be active as 3C6A from Bioko Island in the DXCC entity of Equatorial Guinea from 22 - 26 February. They will then travel to the separate DXCC entity of Annobon Island where they will sign 3C0E from 28 February until 11 March. For the IOTA chasers the reference numbers are AF-010 for Bioko Island and AF-039 for Annobon Island. QSLs go via EA5BYP.

Bill W0OR is at present in Guatemala studying Spanish and in his spare time gets on the air as TG/W0OR. He will be there until 26 March.

Two operators are very QRV from Ascension Island from now until 28 February. They are Jim N6TJ signing ZD8Z and Rick N6ND signing ZD8R.

Dave G3TBK will be active again as J88DR from St Vincent in the Caribbean. He will be there until 14 March on the HF bands with emphasis on 30, 17 and 12 metres. QSL to his home call.

Phil G3SWH and John EA5ARC will be QRV as 3DA0PW in Swaziland from 21 - 29 February . This will be a CW only expedition. The QTH which is the Hawane Resort is the same location as the 2007 IRTS DXpedition to

Swaziland.

Summits On The Air

Perhaps it's a sign of Spring: we have heard a number of summit activations over the past week. Victor GI4ONL and Victor MI0JST were on the Antrim hills last weekend, firstly on Knocklayd and then they QSYed to Trostan, the highest of the Antrim Hills. Operation was on both VHF and HF, with the HF operation from both summits producing pile-ups. The two Victors have announced that they plan to be active this weekend from the Sperrins.

Meanwhile Phil ON4TA is back in Ireland for the third year running. Phil was active from the Wicklow hills this week and plans to activate some of the Connemara summits later in the month.

Talk on Amateur Television

As Part of Engineers Week members of South Dublin Radio Club will be giving a talk on Amateur Television on Thursday 1st of March. Rather than taking place where the club normally meets this will take place as part of a range of talks on Technology and will be held in Dublin city centre. More details are on the venues website: http:///www.tog.ie

Every Tuesday the club will continue to demostrate the new television repeater as part of the normal weekly meetings.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

177. [RAC-Bulletin] RAC Bulletin 2012-012E - ARES reflector address changes

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-20 02:21:18 UTC
From: rac-bulletins@eton.ca
Message-ID: <4F41ADA6.9030104@rac.ca>
Source record: 3694
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2012-012E - ARES reflector address changes
2012-02-19

To more accurately correspond to the names we use for our reflectors,
the following changes are announced effective immediately. Thanks to
Neil Herber, VE3PUE for his efforts on our behalf.

- ares_alerts@eton.ca *remains the same*

- ares_sec_dec_ec@eton.ca is changed to ares_chat@eton.ca

- racamberalert@eton.ca is changed to raran_on@eton.ca

- racamberalertbc@eton.ca is changed to raran_bc@eton.ca

Please note that Neil has created aliases so that the "old" addresses
will work until everyone is changed over. There will be no changes for
persons receiving these bulletins except for those who filter their
incoming mail.

73

Doug Mercer, VO1DTM/VO1DM
Chief Field Services Officer - Radio Amateurs of Canada Inc.

Vernon Ikeda - VE2MBS/VE2QQ
Pointe-Claire, Qu&#65533;bec

GB2RS NEWS

Sunday 19th February 2012

The news headlines:

New worldwide 472kHz band created

David Aslin, G3WGN leaves RSGB Interim Board

GI HF Conference and DiGIcon announced for June

After more than ten years work by the RSGB, other national societies and a huge effort by IARU, the World Radio Conference has created a new amateur band at 472 to 479 kHz. In addition, the Amateur Service has secured an agenda slot for WRC 2015 to consider a band near 5.3MHz. These achievements are in the same category as work which, in past years, resulted in the WARC bands, the extension of 7MHz, and the 136kHz band. The Society is beginning discussions with Ofcom on how and when the new 472kHz band might be implemented. We will also address the question of the existing 500kHz NoVs that expire at the end of February. The Society will shortly begin work with the IARU to prepare for the 5MHz agenda item.

RSGB Chairman Bob Whelan, G3PJT, reports that David Aslin, G3WGN, has decided to leave the Interim Board. David has reluctantly concluded that the heavy demands of the RSGB cannot be reconciled with his other responsibilities. During his short time on the Board, David has been able to bring his wide experience to bear on the challenges facing the Society, for which we are grateful. He leaves with our very best wishes for the future.

Following the success of DiGIcon in 2009 and last year's GI HF Conference, West Tyrone Amateur Radio Club is planning another Conference. It will be held on Saturday 16 June 2012. A number of speakers have already been secured for the Conference, and the organisers are currently working on the programme. There are still a few slots available. Do you feel that you could enhance the program by giving a talk, demonstration or workshop? If so, contact Philip, MI0MSO on 07793 386 795, or email mi0mso@yahoo.co.uk to express your interest.

ESA's Vega launcher made its maiden flight at 10:00 UT on Monday 13 February. The payload included eight Cubesats with amateur radio downlinks. Reception reports started coming in within two hours of launch; the first reports from the UK were at about 12.07. One of the Cubesats, PW-Sat, includes a voice repeater. Its uplink is on 435.020MHz

and the downlink is at 145.900MHz. More details on the satellite missions, including operating frequencies, can be found at www.uk.amsat.org.

And now for the details of rallies and events for the coming week

We are not aware of any rallies planned for this weekend.

On Sunday 26 February the Rainham Radio Rally takes place at the Rainham School for Girls, Derwent Way, Rainham, Gillingham ME8 0BX. The opening tim is 10am. Details from Trevor, G6YLW, on 07717 678 795.

A reminder that the Swansea Rally, planned for 26 February, has been cancelled. Details from Roger, GW4HSH, on 01792 404 422.

Now for the news of special events

GB2PP will be operating today on 80, 40 and 2m from Co Londonderry, in support of the Phoenix Project for ADHD. Details can be found on QRZ.com.

Coventry Amateur Radio Society will be operating GB4WWR on 26 February to commemorate the Daventry Experiment. The station will be at the Birth of Radar memorial in Litchborough, on the Northampton Road, approximately 2.5 miles South of Weedon. The NGR is SP650 557. Activity will be on 80, 40 and 20m, SSB. More information from G8GMU on 07801 862 686.

And now the HF DX news compiled from 425 DX News and other sources

Chris Dimitrijevic, VK3FY, has announced the permanent cancellation of the 2013 VK0HI Heard Island DXpedition.

Dave, G3TBK will be active from the Caribbean Island of St Vincent as J88DR until 15 March. This will include an entry in the Commonwealth Contest, as well as both the CW and SSB sections of the ARRL DX Contest. Operation will be on CW, SSB and RTTY, on all bands from 1.8 to 28MHz. QSL to G3TBK, either direct or through the RSGB Bureau. Please ensure bureau cards are marked via G3TBK.

Laura, F4GEJ, Mathias, F0GQX and Eric, F5NBK will be on a family DXpedition to the Dominican Republic from 22 to 29 February. They will be signing HI7/homecall. Operation will be mainly SSB and digital, from Punta Cana on the island's east coast. QSLs to home call, direct or via the French bureau. Details are on QRZ.com.

Now the contest news

Today is the second day of the ARRL International DX Contest, which takes place for the whole 48 hours of the weekend. Operation is CW only, from the 1.8 to 28MHz bands. The exchange is RST plus TX power, although W stations send their State and VE stations send their Province.

Tuesday the 21st sees the 1.3GHz UKAC, running from 2000 to 2230 on the 23cm band. Operation is all mode, and the exchange is RST, serial number

and locator.

The 80m Club Championships CW leg continues on Thursday 23rd from 2000 to 2130. RST and serial number form the exchange.

The CQ WW 160m DX Contest runs for 48 hours from 2200 on Friday 24th. Operation is on 160m only, SSB, and the exchange is RS, serial number and CQ Zone, which is 14 for the UK. W stations send their State and VE stations send their Province.

The French REF Contest runs for 36 hours from 0600 on Saturday 25th. Work French stations only, sending a report and serial number. Expect to receive a report and a Department code, or a prefix from French overseas territories.

Sunday 26 February sees the first 70MHz Cumulative, which runs from 1000-1200, 70MHz only, on all modes. The exchange is RST plus serial number and locator.

And now the solar factual data for the period from Friday the 10th to Thursday the 16th of February, compiled by Neil Clarke, G0CAS on Friday the 17th of February.

First this week the latest smoothed monthly sunspot numbers which are for May, June and July 2011 and are 47.6, 53.2 and 57.2 respectively.

Sunspot groups were visible every day, with five visible on the 12th. Most groups were small and quiet, even the larger groups were magnetically simple. Due to this solar activity was only low at first and then declined to very low levels from the 13th. Solar flux levels declined from 112 units on the 11th to 103 by the 16th. The average was 108 units. The 90 day solar flux average on the 16th was 132 units, that's four units down on last week. In fact, at the start of the year the 90 day solar flux average stood at 145 units. X-ray flux levels averaged B2.1 units and varied little day to day. Geomagnetic activity started at quiet levels with an Ap index of only 3 units on the 12th, but by the 14th a coronal mass ejection had arrived and lasted all of the next day. Even thought the disturbance was weak, a respectable Ap index of 25 units was recorded on the 15th, this was due to a long period of southward orientation of the magnetic Bz component of the solar wind. The average was 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 470 kilometres per second. Particle densities were very low every day throughout the period. Bz varied between minus 3 and plus 5 nanoTeslas on the quietest day and between minus 9 and plus 4 nanoTeslas on the 15th. From early evening of the 14th and again from noon to late evening on the 15th, a radio aurora took place for European operators, though largely confined to high latitudes. MUFs dropped by some 30 per cent below recent values, with east-west and high-latitudes paths particularly degraded. Recovery was under way during the 16th, though the higher bands were still very patchy.

And finally the solar forecast. This week will see the quiet side of the Sun rotating into view. Therefore, solar activity is expected to be very low to low. Solar flux levels should be not much higher than 100 units. Geomagnetic activity is expected to very quiet for the first half of the week but towards next weekend, activity could increase slightly due to a small coronal hole. MUFs during daylight hours at equal latitudes should be around 27MHz for the south and 24MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 31MHz. The optimum working frequency with a 90 per cent success rate will be around 25MHz. The best time to try this path will be between 1200 to 1700 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

On Monday 20 February Gloucester Amateur Radio & Electronics Society is having a newcomers night and informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 20 February Lincoln Short-Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 20 February South Birmingham Radio Society is holding a committee meeting. Contact Don, on 01214 581 603.

On Monday 20 February Welland Valley Amateur Radio Society is having a talk by Andy Thomas, entitled A Russian Odyssey. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 21 February Derby & District Amateur Radio Society is holding a video night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 21 February Lincoln Short-Wave Club is taking part in the 1.3GHz UKAC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 21 February Loughborough & District Amateur Radio Club is flying paper planes. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 21 February Wythall Radio Club is having a visit by P R Hall Embroidery to discuss club merchandise. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 22 February Lincoln Short-Wave Club is holding a formal meeting from 20.15. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 22 February Midland Amateur Radio Society is making field day plans, checking equipment and running training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 22 February South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 22 February Telford & District Amateur Radio Society invites members to bring and explain any physics oddities they may know. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 23 February Lincoln Short-Wave Club is running its simplex club net on 145.375MHz and taking part in the 3.5MHz Club Contest CW. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 23 February Salop Amateur Radio Society is watching John's home movies. Details on the club website at www.salop-ars.org.uk.

On Thursday 23 February Solihull Amateur Radio Society is having presentation and discussion on electric vehicles by Phil�Barber, M0PBA. Details from P T Gaskin, G8AYY, on 01216 287 383.

On Thursday 23 February South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 24 February Coventry Amateur Radio Society is having a radio workshop evening for HF, VHF and UHF. Contact John, G8SEQ, on 07958 777 363.

On Friday 24 February South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 25 February Friskney and East Lincolnshire Communications Club is running a field day using the club callsign M0LFC. Contact Chris, M0MFP, on 01507 442 240.

On Saturday 25 February Lincoln Short-Wave Club is in the shack from nine till noon. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND

On Monday 20 February Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 20 February Bolton Wireless Club Local is having a talk on QRM cancellation by Stephen, G3OAG. For details, send an email to boltonwireless@gmail.com.

On Monday 20 February Sheffield Amateur Radio Club Talk is having a talk on fossils by John Collins, G8JHG. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 20 February Thornton Cleveleys Amateur Radio Society is having a talk on power supply design by G3WBB. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 21 February Chester & District Radio Society is having a talk on antennas and propagation from VLF to VHF by Dr Brian Austin. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 21 February Halifax & District Amateur Radio Society is having a talk on the Special Operations Executive by Bill, G4IOD. Details from Anthony Vinters, G0WFG, on 01422 822 636.

On Tuesday 21 February Morecambe Bay Amateur Radio Society is having a film night. Contact Sheila, on 07867 516 836.

On Tuesday 21 February Stockport Radio Society is having a talk on avionics by Kieron Murphy, M5KJM and Peter Ridley, M1PTR. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 22 February Hambleton Amateur Radio Society is having an operating night. More information from Tony Wilson, G3MAE, on 01609 881 530.

On Wednesday 22 February Hornsea Amateur Radio Club is looking at component behaviour with frequency. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 22 February Maltby & District Amateur Radio Society is holding its AGM. More information from Keith, G1PQW, on 07801 156 678.

On Wednesday 22 February Mid-Cheshire Amateur Radio Society is holding a committee meeting. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Thursday 23 February Hornsea Amateur Radio Club is taking part in the RSGB 80m Club Contest CW. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 23 February Sheffield Amateur Radio Club is taking part in the RSGB 80m Club Contest from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 23 February South Manchester Radio and Computer Club is having a talk on Magical Morse by Bill, G4NOL. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 23 February Wakefield & District Radio Society is holding a committee meeting is on the air. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 24 February East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 24 February Tynemouth Amateur Radio Club is looking at the vertical Moxon antenna. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 25 February Wakefield & District Radio Society continues its Foundation course from 13:30. Contact Dr David Lockwood, G4CLI, on 07748

221 855.

NORTHERN IRELAND

On Thursday 23 February Greenisland Electronics Amateur Radio Society is having an enrolment night for its new 10-week Intermediate Course. The meeting is at Knockagh Lodge, 236 Upper Road, Greenisland. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND

On Tuesday 21 February Livingston & District Amateur Radio Society is holding Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 22 February Glenrothes & DRC is having a chaired discussion to highlight members' radio interests and activities. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Wednesday 22 February Lothians Radio Society is having a talk on modifying PC PSUs for radio applications by Brian Flynn, GM8BJF. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 23 February Aberdeen Amateur Radio Society is on the air and holding a Morse class. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with advance notice that The South Essex Amateur Radio Society is changing its meeting day and moving to a new venue next month. From 13 March, meetings will be at the Members Bar of the Island Yacht Club, Point Road, Canvey Island, SS8 7TX. The monthly meetings will be on the second Tuesday of the month, instead of Wednesdays. For more information contact Dave Speechley, G4UVJ, on 01268 697 978 or see www.southessex-ars.co.uk.

On Monday 20 February Braintree & District Amateur Radio Society is having a construction evening. For more information contact John, M5AJB, on 01787 460 947.

On Monday 20 February Burnham Beeches Radio Club is having part 2 of the BBC talk by Tony Crake, G0OVA. Contact Dave, G4XDU, on 01628 625 720.

On Monday 20 February East Kent Radio Society is having a talk by Bob, 2E0ATZ. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 20 February Norfolk Amateur Radio Club is running its club net on GB3NB from 19.30. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 20 February Surrey Radio Contact Club is having a discussion on auto ATUs, led by Pat, G4FDN. Contact John, G3MCX, on 02086 883 322.

On Tuesday 21 February Bedford and District Amateur Radio Club is chatting with its twin town radio club, Ortsverband Bamberg, B05, on 7.127 +-QRM. Details from Bob Leask, G3XNG, by email to

g4ceo@talk21.com.

On Tuesday 21 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 21 February Bromley & District Amateur Radio Society is planning the programme for 2012. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 21 February Chelmsford Amateur Radio Society is running its club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 21 February Verulam Amateur Radio Club is holding its AGM. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 22 February Hastings Electronics and Radio Club is holding its AGM and having an SDR demo by Wilf, M0GYE. Details from Gordon, on 01424 431 909.

On Wednesday 22 February Newbury & District Amateur Radio Society is having a presentation on satellite communications and project OSCAR by Chris, M0DQO. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday 22 February Norfolk Amateur Radio Club is having a talk on the bells and whistles of the modern transceiver by Malcolm, G3PDH. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 23 February Bittern DX Group Club is holding an event planning meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404 154.

On Thursday 23 February Echelford Amateur Radio Society is having an illustrated talk on the T32C story by Justin Snow, G4TSH. Contact John, G4GSC, on 01784 451 898.

On Thursday 23 February Edgware & District Radio Society is having a talk on the Wright Brothers and others by Mike Stewart, G4RNW. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 23 February Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 23 February Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Championship CW. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 23 February Reading & District Amateur Radio Club is having a talk on Bletchley Park by G4JTR and G4JNU. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 23 February Shefford & District Amateur Radio Society is having a talk by Gary M6PLT on TCP/IP and DNS. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 24 February Cambridge & District Amateur Radio Club is having a talk by Mark, G4AXX on T32C propagation. Contact Ron, G3KBR, on 01223 501 712.

On Friday 24 February Itchen Valley Amateur Radio Club is having a talk by Graham, M0NSA on APRS. Details from Liz, M0ACL, on 02380 254 599.

On Friday 24 February Radio Society of Harrow is holding a technical clinic for checking the state of your transmitter at The Elsie Fischer Room, St Lawrence Centre, St Lawrence Church, 2 Bridle Road, Eastcote, Pinner HA5 2SJ. More information from Linda, G7RJL, on 02083 868 586.

On Friday 24 February Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Sunday 26 February Horsham Amateur Radio Club is holding a fox hunt. Details are on the web at www.harc.org.uk.

NEWS FOR THE SOUTH WEST

I want to assist in stamping out hunger worldwide. I am
asking people to utilize the services of Amazon.com using
my referral link. Net profits earned will be donated to one
or more charitable organizations chartered to help those
people in need. The plan is described in more detail at
http://www.Amazon.MyUseOnline.com/hungerproject

181. [RAC-Bulletin] RAC Bulletin 2012-013E - Volunteers needed for Dayton Hamvention.

RAC Bulletin 2012-013E - Volunteers needed for Dayton Hamvention.
2012-02-20

The Radio Amateurs of Canada will be at Dayton for Hamvention 2012 May 18th to 20th. Last year, after a decade long wait, the Radio Amateurs of Canada operated a Booth at the Dayton Hamvention. RAC officers and RAC members met with many existing members, signed up new members, introduced themselves to soon to be members, and spoke to hams from the United States and around the world including hams from China, Quatar, Germany, Japan and Great Britain.

RAC is returning to Dayton for 2012 and we are once again looking for volunteers to operate the Booth over May 18 to 20th. Last year we organized a single three hour slot for each volunteer. Your availability will determine your slot and flexibility is the watchword. Please forward your contact information and availability by email to ve4baw@rac.ca. with a cc: to our office at rachq@rac.ca. Looking forward to seeing you in Dayton!

Geoff Bawden, VE4BAW
President and Chairman of Radio Amateurs of Canada

NZART Headquarters Infoline Special Issue 33s

21 February 2012
NZART Website: www.nzart.org.nz

NZART President Roy Symon ZL2KH Resigns

I regret to inform you that Roy Symon ZL2KH has resigned as President of our Association on Monday 20 February. Roy has served as President for the last five years and was completing his last term, due to finish at the 2013 Annual General Meeting where he had planned to hand over to his successor.

Roy has tendered his resignation to Council and the Association for personal reasons and in accordance with Section 4.2c of the Constitution, as Vice-President, I have now become the new President. Your Executive Council will now have to elect a new Vice-President.

I would like to thank Roy very sincerely for the time and energy he has put into leading the Association for the last five years. He has not had an easy time, but has met the challenges that have arisen with a certain flair and leadership style tempered with his unique sense of humour. Thank you for all you have done Roy and I am sure you will enjoy our great hobby all the more now that you will have a little more time to devote to it.

My taking on the position of President has created a casual vacancy in the Northern electoral district. I will be seeking Council’s advice on filling this vacancy and will let you all know the outcome.

73

Vaughan Henderson ZL1TGC

NZART President.

DXNL 1768 (Feb 22, 2012)

DXNL 1768 - Feb 22, 2012
DX Newsletter

a free and weekly service of

DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-Mail: dxnl@dxhf.darc.de)

translation by: Mike, DJ5AV
(e-Mail: dj5av@darc.de)

3W, Vietnam:
Wayne, K6ZSJ/3W7W, and his wife will change their QTH every 6 month
from California to Nha Trang City. Currently they are in Vietnam.
QSL via W3HNK, direct only, LoTW.

8P, Barbados:
Mike, W1USN (8P9CI), and Bob, AA1M (8P9CK), will be active February
23rd - March 8th on Barbados (NA-021)using SSB, CW, and PSK31. The log
of 8P9CI will be updated daily on LoTW. QSL 8P9CK via homecall, LoTW.

A6, United Arab Emirates:
Ed, A65BT, Joel, A65BX, and Obaid, A61QQ, plan to be active from
Sa'diyyat Island (AS-021) February 24-25th. using mainly CW and some
SSB. QSL direct only, via A65BT, P.O. Box 60926 - Abu, Dhabi - U.A.E.

C5, The Gambia:
Look for Alan, G3XAQ, transmitting from Gambia February 27th - March
15th as C56XA on HF on CW, also in RSGB Commonwealth Contest (10./11.
March). QSL via G3SWH (OQRS), LoTW after returning home.
http://www.g3swh.org.uk/c56xa.html

C6, Bahamas:
Members of Yankee Clipper Contest Club Tom, N1GN, Bill, NE1B, and
Karney, W2AFC, will be in CQ 160-meters SSB Contest (24.-26. February)
M/S as C6ANM from Nassau (Gambier Village), New Providence Island
(NA-001, WLOTA 1115, WW Loc. FL15GB). QSL via LoTW preferred, or
- direct only - via WA2IYO.

CE, Chile:
"The Three Stars DX Group" members Carlos, CE6AMN, Roberto CE6UFF,
Alejandro, CA6WKD, and Irma, CA6UTF, will be active during the South

American Lighthouse Weekend (24. - 26. February) as XR4CA from Cabo
Carranza (WLOL CHI-005). Look for them on 40, 20, and 10 meters using
SSB. QSL via CE6AMN.
http://www.actiweb.es/ce6amn
http://www.grupodxbb.com.ar/faros2012/

Stations also in South American Lighthouse weekend:
XR2FPC Faro Punta Caraumilla CHI-014
XR1FC Faro Punta Caldera CHI-065
3G3L Faro Punta Lutrin CHI-071
CE1DY Faro Concordia Directional CHI-101
XR2BPA Baliza Puerto Aldea NAC-135
XR4LR Baliza Espigon Puerto Rapel NAC-208A
XR4AC Baliza Alto Capellania Norte NAC-208B

CO, Cuba:
Find Luis, CO6LP, from Santa Clara on Cuba (NA-015, WLOTA 0032) in
CQ World-Wide 160m Contest SO. QSL via EA5GL, direct only.

DL, Germany:
Robert, DK2RO/p, will be on Spiekeroog Island (EU-047) February
20th - 24th holiday stile depending on propagation on HF.
QSL via homecall, LoTW.

EA, Spain:
Fernando, EA1GHT, Juan Carlos, EA1AUM, Dani, EB1LA, Javi, EC1KV, Carri,
EA1CUB, Juanjo, EA1WX, and Luis, EA1CS, will be inCQ WW 160m SSB
Contest as AO1POL. QSL via EA1GHT.

F, France:
TM8AAW operated by Francois, F8DVD from Macon is taking part in 9th
Antarctic Activity Week (20. - 26. February) on 10 - 40 meters, mostly
on SSB. QSL via homecall.

FO, French Polynesia:
Fred, FO/AB1OC, and Anita, FO/AB1QB, are operating holiday stile
through February 24th using IC 7000, verticals and a 2ele beam for
10 and 12 meters on 40 - 10 meters on PSK, RTTY, SSB, and JT65HF on
Bora Bora Island (OC-067, DIFO FO-003, WLOTA 0430). QSLs via homecall,
LoTW, eQSL.

HI, Dominican Republic:
Find Laura, HI7/F4GEJ (14 years), Mathias, HI7/F0GQX (10 years), and
father Eric, HI7/F5NBK, during their "Family DXPedition" 22. - 29.
February mainly on SSB and digital modes. Be patient with them in their
first DXpedition experience. QSLs via homecalls.

J7, Dominica:
Brian, K1LI, will be on Dominica (NA-101) 25. February - 13th March
as J7Y, for ARRL DX SSB Contest (3./4. March). QSL via homecall,
direct only.

LU, Argentinia:
Members of "Radio Club Mar Del Plata" (LU2DT) will be in the South American Lighthouse Weekend (24. - 26. February) as LT5D from Punta Mogotes (WLOL ARG-005, WW Loc. GF11fv). QSL via LU2DT.
http://www.lu2dt.org.ar/

Rick, LU9DA, will also be in the South American Lighthouse Weekend as LU9DA/D from Lighthouse Baliza Escollera Norte Mar Del Plata (WLOL ARG-123) and from Lighthouse Baliza Escollera Sur Mar Del Plata (WLOL ARG-124). QSL via LU9DA, direct only.
http://lu9da.dyndns.org/

OA, Peru:
Look for some activity of Fred, OA4/DL1NL, through early March from Lima using CW on 10 - 160 meters from Radio Club Peruano (OA4O).
QSL via homecall. www.oz1bii.dk/dxpedition1.htm

P4, Aruba:
After their PZ5RO activity Redd, AI2N, and Dave, WJ2O, go to Aruba (SA-036, WLOTA 0033) and will operate P40/homecall on HF holiday stile.
QSLs via homecalls.

T8, Palau:
Kazue, JJ0LUH (T88XG), and Kiyoshi, JA0EKI (T88XH), will be active February 26th - March 2nd on Palau (OC-009) on 160 - 10 meters, CW, SSB, RTTY, PSK61, and JT65. QSLs via JA0EKI.

TG, Guatemala:
Beacon TG9SIX is tested as TG9ADV/B on the original frequency 50.011,00 MHz. Another beacon TG9TEN is operated on 28.228.3 MHz with 5 Watts, and beacon TG9TWO will soon be ready on 144 MHz.
Position of all of them is in EK44 high up aside of a summit.

V3, Belize:
Guenter, DL2AYK, intends to be "on the other side of the pile up" and will be active as V31YK February 27th - March 11th on 80 - 10 meters (if propagation also 6 meters) using CW, SSB, RTTY, and maybe some PSK31), also in ARRL International DX Contest (3./4. March).
QSL via homecall.

There will be another activation by Bob, N7MSU, February 26th - March 15th as V31SU on 40 - 20 meters mainly, using CW, SSB, and PSK31.
He will operate from several islands and the main land, inluding Caye Caulker (NA-073), Orange Walk Town, San Ignacio and Gales Point.
QSL via homecall.

V2, Antigua And Barbuda
Before his activity from Montserrat (look up there) Bert, DL2RNS, goes to Antigua and Barbuda as V25NS. QSL via homecall.

VK, Australia:
Luke, VK3HJ, will look for Europe on 160m during the next weeks before his sun rise.

VP2M, Montserrat:
Find Norbert, DL2RNS (VP2MSN), Olaf, DL7JOM (VP2MOM), and Olaf, DM2XO (VP2MXO), 27. February - 10. March from Montserrat (IOTA NA-103) active on HF bands February 27th - March 10th. QSLs via homecalls.

XU, Cambodia:
Bernhard, DK7TF, will remain active as XU7DLH through March 15th. QSL via homecall.

YA, Afghanistan:
Jorgen "Joe", 5Q2J/OZ2JBC, might appear on 160 - 10 meters in late February as T6JP. Joe is an Electronics Technician with the Danish Army. depending on propagation he will operate a Yaesu FT-857D (100W) on RTTY, PSK, and SSB. QSL via 5Q2J. http://oz2jbc.dk/page3.html

ZF, Cayman Is.:
Look for John, K6AM, as ZF2AM in the CQ 160-meters SSB Contest (24. - 26. February) from Savannah on Grand Cayman Island (NA-016, WLOTA 1042) SO-HP from CQ Zone 8. QSL via homecall, LoTW.

African-Tour:
Luc, F5RAV, will activate 6V7T from the QTH of 6W7RV in Somone February 24th - March 7th and take part in the REF- and ARRL-Contests. Find him February 27th - March 2nd as C5LT from Kololi. He might be acompanied by Francisco, EA1BT. He will operate SSB and PSK. QSL via homecall, direct only.

Cluster-Spots:
An official homepage of "Slovenia World Castles Award" (S5 WCA) presents spots with their reference numbers and an option to spot with WCA number in cooperation with S50CLX-DX-Cluster
http://forum.hamradio.si/viewtopic.php?f=64&t=12284

DVD:
Fred Curtis, G3SVK, professionelly produced a DVD about the T32C-DXpedition 2011. It includes avideo about the FSDXA DXpedition to St. Brandon (3B7C) in September 2007. The income will contribute to the "Five Star DXers Association" for the next project.
http://www.t32c.com

Ham Radio on TV:
In US-Television they present sitcom "Last Man Standing" with a real shack.
http://www.dxcoffee.com/eng/2012/02/13/last-man-standing-ham-radio-prime-time-television/?utm_source=feedburner&utm_medium=eMayl&utm_campaign=Feed%3A+dxcoffee%2Feng+%28DxCoffee+-+Hamradio+Magazine%29

CW without key:
Find a new way to operate on CW at:
http://www.youtube.com/watch?v=mEz_home callYumQI&feature=g-u-u&context=G2a7d7f5FUAAAAAAASAA

New Band:
At the WRC-12 in Geneva ham radio representatives finally came to a

consensus on an allocation to the amateur service in the region of
500 kHz. 472 kHz through 479 kHz will become a new amateur band
as soon as the PTT administrations concerned have edited their rules.
The band is shared with Air Traffic Services which have priority.
Power mostly is limited to 1 Watt (EIRP).

Not QSL Manager:
DF8OL and/or DF9OL are not and never were QSL manager for EX2A.
According to qrz.com EX2A has no manager. QSL via buro is ok.

5 MHz for Dominican Republic:
Radio amateurs in the Dominican Republic got permission to transmit
on 7 channels in 60m band, the same channels as in the U.K..
SSB and CW my be used.

UA9-Prefix:
In DXNL 1759, Dec 21. 2011, there was a message from ARRL about a
change on the rules about UA prefixes. ARRL has changed its message
without notice. There was no change on the official homepage of IARU
concerning the rules of WAC since July 13th, 2010. Also there was no
change on the ARRL DXCC list of July 2011, the list for all ARRL DX
Contests. Therefor UA9 still may be counted for Asia.

AD1C with his "cty.dat" of 17.02.2012 took over that UA9-Oblasti
F, G, and X are counted for Europe.
UcxLog took over this allocation to avoid communication`s problems.

Silent Key:
Livio Zenti, I1ZL passed away February 11th after a long illness
at 81 years of age. He was founder and former president of ARI Asti.
He was fond of DXing and a IOTA hunter for 50 years.

Suchart Peusakhorn (HS1BA), Romano Cartoceti (I4FAF), Dipti Prakash Dey
(VU2DPD), Michael De Cheff (W0NS), Gary R. Schmidt (W5ZL), and Joseph
F. Keese (W8VSK) are also silent keys.

Our condolences and compassion to the families and friends.

UPCOMING CONTESTS

24.-26.2. CQ World-Wide 160m Contest
25./26.2. REF-Contest
25./26.2. UBA DX Contest
25./26.2. North American QSO Party
26.2. HSC-Contest

IOTA compiled by Klaus, DL7UXG (e-Mayl: iota@dxhf.darc.de)

Island activities:
AF-014; CT3; Madeira Archipelago:
Adam/DJ0IF and Mek/SP7VC will hit the airwaves from Madeira Island
(AF-014, DIP MA-001, PIP MD-001, WLOTA 0053) February 29th through
March 7th as CT9/homecall. They will be in ARRL DX SSB Contest
(3. - 4. March) as CR3L. QSL for CR3L via DJ6QT. QSL for CT9/DJ0IF
and CT9/SP7VC via homecall (d/B).

AF-042; EA9; Alboran Island:
The IOTA expedition had to be postponed due to problems on transport.

NA-018; OX; Greenland:
Henning/OZ1BII will be on Kangerlussuaq, Groenland, as XP2I February
24th - 27th during the hours 15 - 03 UTC on HF bands, CW only, using
the QTH of Jesper/OX3KQ. QSL via OZ1BII. Actual information at qrz.com.
www.oz1bii.dk/dxpedition1.htm

NA-066; W6; California State South:
Ray/N6HE, Jeff/K6JW, Joe/NZ6L, Bob/AB6SY, Clay/AB9A, Diana/AI6DF, and
Bill/KG6WVF will present K6PV/6 from Santa Catalina Island (USI CA016S,
WLOTA 2912) February 23rd through 26th, on 20m SSB mainly. There will
be participation in NAQP RTTY- and CQWW 160m SSB - Contest.
There also will be activity on 160/80/40/20/15/10 meters on CW, SSB,
RTTY, and possibly PSK31. QSL direct via K6PV (qrz.com).
http://www.palosverdes.com/pvarc/index.htm

SA-028; PY2; Sao Paulo State East group:
Orlando/PT2OP and Fred/PY2XB will visit Sao Sebastiao Island (ARLHS
BRA-223, WLOTA L-1007, DFB SP-14, DIB SP-02) 23. through 27. February
operating as PV2PC and ZX2S on the IOTA- and DX frequencies on 40-10m.
QSL: PV2PC via PT2OP and ZX2S via PT7WA (d/B).

SA-055; LU; Buenos Aires (Delta del Parana) Province group:
LU1EEZ/D, Mark LU7CAW/D, Alberto, LU4DIS/D, and Mariano, LU9ACJ/D, will
visit Martin Garcia Island, resp. Martin Garcia Lighthouse, (ARLHS
ARG-045, TWLHD WLH LU-005, Admiralty G0791, WW Loc. GF05VT) for the
South American Lighthouse Weekend using all HF bands.
Website: http://www.lu1eez.8m.com/

QSL via Ezequiel, Alicia M de Justo 3442, Lomas del Mirador,
Bs AS 1752, Argentina (d).

SA-057; CX; Colonia Department group:
Also in LH-Weekend is CX2FAA on Isla de Farallon/Faro de la Isla
Farallon (ARLHS URU-003, WLOTA 2561). QSL via LU7DSY.

SA-064; CE7; Aisen Region Centre group:
IOTA-activation of CE1TBN/7 had to be postponed to February 24th.
Expect him with 100 Watts on 20, 15. and 10m using SSB and some CW.
QSL via homecall (d/B).

South American Lighthouse Weekend
Many stations (actually more than 60 light houses) are announed to
be active for this event. They are listed at

:Product: Weekly Highlights and Forecasts
:Issued: 2012 Feb 21 2202 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
13 - 19 February 2012

Solar activity was very low to low all week. The largest flare of
the entire period was a C1 on 19 February at 0851 UTC from Region
1422 (N15, L=177, class/area = Dai/60 on 19 February). B-class
flares dominated the rest of the summary period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during the summary period.

Geomagnetic activity began on 13 February with quiet to unsettled
conditions at mid latitudes and active to minor storm levels at high
latitudes, associated with a small coronal hole high speed stream
(CH HSS). 14 February saw a brief return to quiet conditions. The
respite was short-lived, however, when a slow CME observed on 10
February finally arrived at Earth on 15 February. Active to minor
storm levels were observed at mid latitudes throughout the day,
while high latitude activity peaked at major storm levels. The
remainder of the week was quiet until late on 18 February when a
co-rotating interaction region preceded a geoeffective CH HSS.
Unsettled to active conditions with isolated minor storm periods
were observed during 19 February due to CH HSS effects.

Forecast of Solar and Geomagnetic Activity
22 February - 19 March 2012

Solar activity is expected to be at low levels throughout the
forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at high levels to begin the period due to effects
from a recurrent CH HSS. Normal to moderate levels are expected to
prevail from 23 February - 19 March.
```

Geomagnetic field activity is expected to be mostly quiet on 22 February. Quiet to unsettled conditions are expected on 23 - 25 February due to the onset of a recurrent CH HSS. A return to mostly quiet levels is expected on 26 February through 01 March. A CH HSS is expected to become geoeffective on 02 - 03 March, thus increasing activity to quiet to unsettled levels. Predominately quiet conditions are expected from 04 - 06 March before another CH HSS provides unsettled conditions on 07 March. Conditions are expected to return to mostly quiet levels from 08 March - 10 March, before another recurrent CH HSS is expected to become geoeffective on 11 March, with unsettled conditions expected for the day. A return to mostly quiet conditions is forecast from 12 - 16 March, before another CH HSS is expected to produce quiet to unsettled conditions with a chance for isolated active to minor storm levels at high latitudes for the remainder of the period.

** Attention ** Beginnning Monday, March 12, 2012, the Weekly bulletin will now be issued and available on the SWPC web page every Monday morning by 1500 UTC.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

187. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2012-02-22 07:05:00 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1329894300@panix.com>
Source record: 3554
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

** The Eric Jamieson Indian Ocean Awards Announced **

*Date : 19 / 02 / 2012
Author : Michael Owen - VK3KI*

The WIA Board, meeting in Melbourne over the weekend of 18/19 February
2012 accepted the offer of Eric Jamieson VK5LP /(pictured right)/ to
sponsor awards for the first amateur radio contacts on the two metre
band spanning the Indian Ocean between Australia and Africa. There will
be three awards, for voice, CW and digital modes and will be known as
the Eric Jamieson Indian Ocean Awards.

In presenting a sum of money to the Wireless Institute of Australia
Foundation to fund the Awards, Eric said "I acknowledge that spanning
the Indian Ocean will not be easy but one cannot say that it will never
be accomplished. The degree of difficulty may be judged from the so far
inability to span the much shorter Atlantic Ocean despite concerted
attempts in order to win the Brendan Atlantic Ocean trophies."

The very simple Rules for the Award provide that contacts made by EME,
or with the assistance of meteor scatter, satellites, aircraft
enhancement or the like will not be eligible.

The WIA Board acknowledged the generosity of Eric in making this Award
available, and expressed the hope that it will encourage amateurs to
attempt a truly difficult challenge.

** DXCC: J5; square IK21DT; start 2012-03-23

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm
and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

** DXCC: 4U_ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the
year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing
something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never
been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: F; square IN99; start 2012-04-07

>From April 7 to 21, 2012, the North Contentin area ARC, F6KFW,
will be active all bands and mods as TM5MGY.
This project is part of the official Commemoration activities ,
lead by the Cherbourgand neighbour cities , for the 100th anniversary
of the HMS TITANIC stopover , on April 10, 1912, a few days before
its shipwreck.
Cherbourg was usually, until the 60s, the last stopover from England
for the British lines before the Atlantic crossing to America.
Demo Amateur stations HF, VHF, SHF, operating in CW/SSB/Datas,
will be set up in the City de la Mer, in Cherbourg.,
Among the CW tools, a Titanic telegraph key copy of that used by
Harold Bride and Jack Philips in 1912 will be put in service.
The suffix of the special callsign TM5MGY has been choosed in
souvenir of " MGY" which was the TITANIC callsign, in the Marconi
ships radio system.

QSL via F6KFW, direct or bureau. Tks Jean-Yves, F8LDX

SOURCE: tnx to Maurice, F5NQL, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire (PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make Moonbounce QSO's

from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in Kenya (5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is requested.
If all ok we will have a small 70cm setup with us.

>From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near Kampala on the equator.

The plan is to leave May 21st and build up the station before the weekend. It's just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit insecure but we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a update via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through Twitter: http://twitter.com/#!/PA3CEE and http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We have to come back as often as possible. We can't resist....

==> + LEGISLATIVE NEWS: PAYROLL TAX BILL INCLUDES PROVISION FOR AMATEUR
RADIO STUDY

A bill that passed both the House and the Senate on February 17 -- and
signed into law by President Obama on Wednesday, February 22 --
includes a provision for a study of the uses and capabilities of
Amateur Radio Service communications in emergencies and disaster
relief.

Section 6414 of the Middle Class Tax Relief and Job Creation Act of
2012 mandates the completion of the study, with a report of the
findings to the House Committee on Energy and Commerce and the Senate
Committee on Commerce, Science, and Transportation. This study would
"use the expertise of stakeholder entities and organizations" to
recommend how to best use radio amateurs in emergency communications

and disaster relief efforts, and how to best utilize the Amateur Radio Service in coordination with the federal government in these efforts. In addition, the study would also discuss the effects of unreasonable or unnecessary private land use restrictions on residential antenna installations and recommend ways to remove such impediments.

The bill passed in the House by a vote of 293-132. In the Senate, it passed by a 60-36 vote. Read more here <http://www.arrl.org/news/payroll-tax-bill-includes-provision-for-amateur-radio-study>.

==> + ON THE AIR: REPUBLIC OF SOUTH SUDAN ASSIGNED Z8 PREFIX

After a wait of more than seven months after being accepted as a member of the United Nations <http://www.arrl.org/news/the-republic-of-south-sudan-is-now-a-dxcc-entity>, the Republic of South Sudan received its prefix block from the International Telecommunication Union <http://www.itu.int/online/mms/glad/cga_callsign.sh?lang=en> (ITU): Z8. On July 14, 2011 -- after South Sudan's admittance to the UN -- the new country became a DXCC entity by way of Section II, 1(a) of the DXCC rules <http://www.arrl.org/rules>. -- Thanks to The Daily DX for the information

==> + ON THE AIR: ONE DOWN, ONE TO GO: THE ARRL INTERNATIONAL DX CONTEST GEARS UP FOR SSB

With the CW portion <http://www.arrl.org/news/the-2012-arrl-international-dx-cw-contest-takes-to-the-air-next-weekend> of the ARRL International DX Contest <http://www.arrl.org/arrl-dx> now a series of fading dits and dahs in the memories of participants, preparations for the SSB portion of the DX Contest -- the weekend of March 3-4 -- are already underway.

According to ARRL Contest Branch Manager Sean Kutzko, KX9X, for this contest, stations in the US and Canada work only DX stations, and DX stations work only the US and Canada; Alaska and Hawaii are considered DX for this contest. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with.

"The CW portion had a lot of twists and turns," Kutzko recounted. "The solar flux index was down considerably from the great conditions we experienced in the last quarter of 2011. We were also dealt a blow with a solar storm on Saturday afternoon, generating some strange phenomena on the bands. Ten meters -- which earlier in the contest season was open to Europe and Asia for hours at a time -- barely showed up this past weekend. Despite all of this, hams worked tons of DX on 15 and even 10 meters."

Will these conditions improve? It's hard to say -- the SFI remains around 100, and just a week before the contest, the A and K indices are reasonably low. "Check the K7RA Solar Update each Friday on the ARRL website for the most current solar forecast," Kutzko advised. "But one thing is for certain: The number of participants in the 2011-2012 contest season has exploded, and more activity means lots of DX."

The ARRL International DX SSB Contest <http://www.arrl.org/arrl-dx> runs from 0000 UTC Saturday, March 3 to 2359 UTC Sunday, March 4. Complete rules and forms can be found online <http://www.arrl.org/contest-rules>. Electronic logs should be submitted via e-mail <dxphone@arrl.org>; paper logs can be sent to ARRL DX SSB Contest, 225 Main St, Newington, CT 06111. Paper logs must be postmarked no later than 0000 UTC Tuesday, April 3, 2012.

==> +HAM RADIO IN HOLLYWOOD: BLOCKBUSTER MOVIE FEATURES MORSE CODE, HOMEBREW EQUIPMENT -- AND SEA MONSTERS!

In the movie Journey 2: The Mysterious Island, Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist. Sean decides to follow the signal with the unwilling assistance from his stepfather Hank (played by Dwayne "The Rock" Johnson).

The movie opens in Dayton, Ohio with Sean on his motorcycle, being chased by police officers. Sean had been caught breaking in to a "satellite facility." When questioned by Hank, Sean confesses that he had received a coded message from his grandfather (played by Michael Caine), but his equipment was too weak to copy it; he decided to go somewhere where there were bigger antennas. The message -- a string of one and two syllable words taken from the books of Jules Verne -- makes no sense to Sean. Hank, a former US Navy cryptographer, offers to help decode the message; he feels this will be a good chance to bond with his stepson.

Immediately, Hank figures out that the message is really in Morse code: each one syllable word is a "dit," while each two syllable word is a "dah." Hank translates the message, which gives clues to the location of the grandfather's whereabouts. Read more here <http://www.arrl.org/news/hollywood-movie-features-morse-code-homebrew-equipment-and-sea-monsters>.

==> + W1AW: MARCH QUALIFYING RUNS

The W1AW and West Coast Qualifying Runs were inadvertently left out of the March 2012 issue of QST. Here is the missing information:

W1AW Qualifying Runs are 10 PM EST Friday, March 9 (0300 UTC March 10) (10-40 WPM) and 7 PM EDT (2300 UTC) Tuesday, March 20. The West Coast Qualifying Run will be transmitted by station K6KPH on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz at 2 PM PDT (2200 UTC) Saturday, March 17. Unless indicated otherwise, speeds are from 10-35 WPM. You can find the upcoming schedule here <http://www.arrl.org/qualifying-run-schedule>.

==> + SECTION MANAGER WINTER ELECTION RESULTS

Two ARRL Sections -- Eastern Pennsylvania and Louisiana -- will get new Section Managers as of April 1, 2012. Two other Sections -- San Diego and Virginia -- will keep their incumbent Section Managers. Ballots for these races were counted Tuesday, February 21 at ARRL Headquarters. Read more here <http://www.arrl.org/news/section-managers-winter-election-results>.

==> SOLAR UPDATE

Tad "Behind the clouds the Sun is shining <http://www.youtube.com/watch?v=7b6fBnPmhmc>" Cook, K7RA, reports: We don't know if this is a significant trend, but solar activity has really leveled off recently. Not everyone is unhappy about this: During the recent long minimum, 160 and 80 meter operators were very excited about conditions, and that enthusiasm seems to have increased of late. The average indicators this week were almost exactly the same as last. The average daily sunspot number rose from 55.6 to 55.7, while the average daily solar flux declined 2.6 points to 105. In an unusual coincidence, the average planetary A index and mid-latitude numbers were the same this week as last, 8 and 6.7 The latest prediction shows solar flux at 105 on February 23-24, 100 on February 25, 95 on February 26-29, 100 on March 1-4, 105 on March 5-11, 110 on March 12-13, and rising to 115 on March 14-19. The prediction also sees planetary A index at 8 on February 23, 5 on February 24-28, 7 on February 29, 5 on March 1, 8 on March 2-3, and 5 on March 4-6. Look for more information on the ARRL website on Friday, February 24. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Disney's Cars <http://en.wikipedia.org/wiki/Disney_Cars>.

==> THIS WEEK IN RADIOSPORT

This week:

- February 24 -- NCCC Sprint Ladder
- February 24-26 -- CQ 160 Meter Contest (SSB)
- February 25-26 -- Mississippi QSO Party; North American QSO Party (RTTY); REF Contest (SSB); UBA DX Contest (CW)
- February 26 -- High Speed Club CW Contest; SARL Digital Contest
- February 26-27 -- North Carolina QSO Party
- February 27 -- CQC Winter QSO Sprint

Next week:

- March 3 -- Wake-Up! QRP Sprint
- March 3-4 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>
- March 4 -- DARC 10 Meter Digital Contest
- March 6 -- ARS Spartan Sprint; AGCW YL-CW Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. RAC Bulletin 2012-014E - Volunteers Needed for RAC Band Planning Committees
2012-02-23

The VHF/UHF Band Planning Committee and the SHF Band Planning Committee are looking for additional volunteers to help with review and update of the band plans to reflect new modes and current practice. At this time, the 0-30 MHz (formerly HF) Band Planning Committee has sufficient members to carry out its work.

Why is band planning needed? Band plans provide guidance to minimize interference between different users. The famed ham tradition of "self-policing" or "gentlemen and gentlewomens" agreements. is what band plans are all about. For example, weak signal satellite users and EME really can't coexist with high powered DX stations without an understanding of who operates where to ensure adequate separation so both can enjoy their respective operations. Another example is the separation of CW, digital, and phone modes in the HF bands.

The immediate need is for filling out the VHF/UHF band Planning Committee. Their mission in 2012 is to review and update the band plans for 6 meters, 2 meters, 220 MHZ, and 440 MHz after wide consultation with the Canadian amateur community. In addition to including digital modes and changes to reflect international allocations, one other factor that makes this a "let's get it done now" project is the dramatic growth in 6m activity with the bands inclusion on many of the newer HF rigs and rising sunspot numbers. Having casual local rag chewing separated from DX calling frequencies reduces interference for everyone, allowing DXers to "work a new one" when the band opens, without disrupting a local QSO, satellite work, repeaters, or support for a public service event.

The current chair of the VHF/UHF Band Planning Committee is Dana Shtun, VE3KU. He's looking for volunteers to join the committee to help with the review process. Qualifications are an active interest in the VHF/UHF bands and being a RAC member in good standing. If you.re interested, please contact Dana at: ve3dss-1.rogers.com and provide a very brief summary of your operating interests and activities on the VHF/UHF bands.

Steve Kavanagh ve3sma@rac.ca is chair of the SHF Band Planning Committee. They are currently looking for volunteers to join this committee, especially someone with specific interest in satellite

operations and also those knowledgeable with interference issues that
can arise in the shared bands above 2 GHz. If either is your expertise
and you.re a RAC member in good standing, please contact Steve with a
brief summary of your experience and activities.

Correction: RAC Bulletin 2012-014E - Volunteers Needed for RAC Band Planning Committees
2012-02-23

The VHF/UHF Band Planning Committee and the SHF Band Planning Committee are looking for additional volunteers to help with review and update of the band plans to reflect new modes and current practice. At this time, the 0-30 MHz (formerly HF) Band Planning Committee has sufficient members to carry out its work.

Why is band planning needed? Band plans provide guidance to minimize interference between different users. The famed ham tradition of "self-policing" or "gentlemen and gentlewomens" agreements. is what band plans are all about. For example, weak signal satellite users and EME really can't coexist with high powered DX stations without an understanding of who operates where to ensure adequate separation so both can enjoy their respective operations. Another example is the separation of CW, digital, and phone modes in the HF bands.

The immediate need is for filling out the VHF/UHF band Planning Committee. Their mission in 2012 is to review and update the band plans for 6 meters, 2 meters, 222 MHZ, and 440 MHz after wide consultation with the Canadian amateur community. In addition to including digital modes and changes to reflect international allocations, one other factor that makes this a "let's get it done now" project is the dramatic growth in 6m activity with the bands inclusion on many of the newer HF rigs and rising sunspot numbers. Having casual local rag chewing separated from DX calling frequencies reduces interference for everyone, allowing DXers to "work a new one" when the band opens, without disrupting a local QSO, satellite work, repeaters, or support for a public service event.

The current chair of the VHF/UHF Band Planning Committee is Dana Shtun, VE3KU. He's looking for volunteers to join the committee to help with the review process. Qualifications are an active interest in the VHF/UHF bands and being a RAC member in good standing. If you.re interested, please contact Dana at: ve3dss-1.rogers.com and provide a very brief summary of your operating interests and activities on the VHF/UHF bands.

Steve Kavanagh (ve3sma@rac.ca) is chair of the SHF Band Planning Committee. They are currently looking for volunteers to join this committee, especially someone with specific interest in satellite

operations and also those knowledgeable with interference issues that
can arise in the shared bands above 2 GHz. If either is your expertise
and you.re a RAC member in good standing, please contact Steve with a
brief summary of your experience and activities.

George Gorsline VE3YV

RADIO LAW: A PERMANENT 5 MHZ HAM ALLOCATION TO BE DISCUSSED AT WRC-15

Some more good news out of Geneva, Switzerland. Somewhat overshadowed by last weeks announcement of the approval of a new ham radio band from 472 to 479 kHz at the now concluded WRC-12 comes word that yet another possible new ham radio allocation near 5 MHz. One that could become a reality at the next World Radio Communications Conference to be held in 2015. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

The band being proposed is from 5.250 to 5.450 MHz. According to ARRL Chief Executive Officer David Sumner, K1ZZ, who attended WRC-12, the original proposal came from Cuba.

In the ARRL Letter Sumner is quoted as saying that the International Amateur Radio Union team worked hard to line up support for this item. He said that the factor that worked most in their favor was that at W-R-C 07, a proposal for a 5 MHz agenda item for WRC-12 failed to gain enough support. As such, there was a feeling that the Amateur Service deserved better treatment this time around.

Sumner noted that there was active support from a number of administrations in Latin America which helped a lot, but a lot of others also had to agree to get it on the agenda. The coordinators of future Agenda Items on behalf of the regional telecommunications organizations, such as CITEL and CEPT, eventually agreed on a package of Agenda Items that included this item.

Tim Ellam, VE6SH, is the President of the International Amateur Radio Union. He noted that it always a challenge to have things placed on the agenda for future World Radiocommunication Conferences. As such Ellam says that that he is pleased that we were successful in having an Agenda Item for a potential allocation at 5 MHz on a secondary basis on the agenda.

Ellam does however caution that there will be a lot of work to do over the next International Telecommunications Union study group cycle. He adds that there is much appreciation is owed to the International Amateur Radio Union and the national delegation teams in Geneva for their hard work on this issue.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Pittsburg Pennsylvania.

--

The permanent 5 MHz amateur band proposal will be Agenda Item 1.4 at WRC-15. More about it and the rest of what took place at the 2012 conference is on line at the ARRL website. A direct link to the story is at tinyurl.com/wrc-2012-wrapup. (ARRL)

**

RADIO LAW: REPUBLIC OF THE SOUTH SUDAN AWARDED Z8A TO Z8Z CALL SIGN BLOCK

The International Telecommunication Union has announced the official callsign allocation prefix block for the newly crated nation of the Republic of South Sudan will be Z8A through Z8Z. The Republic of South Sudan joined the United Nations on July 14, 2011 at which time it became the 193rd member of that august world body. (Facebook DX Forum)

**

RADIO FUNDING: FCC ASKS $346,000,000 BUDGET FOR FISCAL YEAR 2013

The Federal Communications Commission is asking Congress for more money to ramp up its operations including enforcement. Its also talking new license fees. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

The FCC has asked Congress to approve a 2013 fiscal year budget of $346 million. That compares to an approximate $6 million increase over the approximate $340 million the agency received for fiscal year 2012.

If approved as is by Congress, there would be 141 new FCC staff members, bringing the total to 1,917 over the current 1,776. The number of full-time staffers at the Media Bureau would increase from 197 to 213. The Enforcement Bureau would go from 276 to 299 and the Office of Engineering & Technology would increase from the current 81 to 87 staffers.

Part of the money would also be used for eight new vehicles and to replace obsolete signal analysis equipment with new direction-finding and wireless monitoring gear in existing vehicles. These are the mobile units that field agents use to detect unauthorized transmissions and resolve interference issues.

The commission would also have new authority to set user fees on un-auctioned spectrum licenses as a spectrum management tool. Fees would be phased in over time to determine the appropriate application and the monetary amount.

The FCC tentatively plans to begin levying such fees sometime this year, and estimate those could total $4.8 billion through 2022. Its unknown if such licensing fees would or even could be applied to Amateur Service, FRS or 11 meter Citizens Band operations. The latter two would be highly unlikely due to the non-licensed nature of operations on those bands. Amateur Radio is already bringing in a profit through the Vanity Callsign program.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The agency's budget request is part of President Obama's total budget submission of $3.8 trillion for fiscal year 2013, which begins October 1st. (RW)

**

RADIO FUNDING: BROADCAST BOARD OF GOVERNORS SUBMITS REDUCED BUDGET

The United States Broadcasting Board of Governors which oversees government supported broadcasts to other parts of the world has sent its 2013 fiscal year budget request to congress. The $720 million request is lower than its 2012 budget and includes program, transmission and staffing reductions at the Voice of America, Office of Cuba Broadcasting, Radio Free Europe, Radio Liberty, Radio Free Asia and the Middle East Broadcasting Network. Four broadcast language services are proposed for elimination including both Greek and Chechen. The 2013 request also calls for another $21 million in cuts in administrative and technical support services costs across the agency and of the board itself.

But what's not going into on the air operations has another destination. Referring to the so called new media, the 2013 budget request contains $9 million in increases for elevated social media and building out the agency's digital infrastructure. It also asks for $11.6 million in fighting Internet censorship.

The Broadcasting Board of Governors estimates the five government funded civilian broadcast networks it oversees currently reach 187 million people each week. Its 2013 budget request contains an overall 4 point 2% decrease over current spending levels that the Board hopes

will be enough to meet the approval on Capitol Hill in this era of extreme economic austerity. (B&C)

**

COMMUNICATIONS LAW: NHTSA PROPOSES VOLUNTARY ANTI DISTRACTED DRIVING GUIDELINES

Ham radio operators and other two-way radio users can breathe a proverbial sigh of relief. At least for now. This with word that the National Highway Traffic Safety Administration will not seek mandatory regulations regarding what types of technology controls will be placed on auto makers to help thwart distracted drivers. Instead they are issuing voluntary guidelines to the auto makers as we hear from Amateur Radio Newsline's Cheryl Lasek, K9BIK.

--

The National Highway Traffic Safety Administration has proposed voluntary safety guidelines for auto manufacturers, including a recommendation that they design dashboards so that distracting devices are automatically disabled unless the vehicle is stopped and the transmission is in park.

The guidelines, which are directed at passenger cars and sport utility vehicles, would exempt safety devices such as electronic warning systems that alert drivers to potential collisions or lane changes. GPS and other navigation devices that provide directions also would be permitted while driving, but the safety administration is asking that the systems be designed so drivers can't manually enter a destination unless the car is in park.

Other dashboard technologies recommended for automatic disabling include text-messaging, Internet browsing, social media browsing, phone dialing and computer screen messages of 30 characters or more that are unrelated to driving.

The guidelines would make exceptions for these devices if they are designed only for use by passengers and can't be accessed or seen by the driver. Also there is no mention of any cutoff to external power receptacles such as cigarette lighters which are used by many hams, CB'ers and G-M-R-S operators to power low-power two way transceivers.

David Strickland is the groups Administrator. He told the press that while his agency recognizes that manufacturers want to build vehicles that include the tools and conveniences expected by today's American drivers, that the guidelines they are proposing would offer real-world guidance to automakers. Also that it would help them develop electronic devices that provide features consumers want without disrupting a driver's attention or sacrificing safety.

Manufacturers also are urged to take steps to improve the safety of technologies that drivers are allowed to use while driving. That

includes reducing to two seconds or less the amount of time drivers must divert their eyes from the road to use a device. Devices should be designed so drivers don't have to use more than one hand or glance through extraneous information.

According to Transportation Secretary Ray LaHood, one reason National Highway Traffic Safety Administration decided to pursue voluntary guidelines instead of mandatory rules is that officials wanted to do something quickly. He noted that the process for writing federal rules often takes years to complete.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, near Zion Illinois.

--

The final impact these new guidelines on the ability of hams to permanently install after-market two way radio gear in their vehicles will not be known until the new designs appear in car showrooms. And that's likely several years away. (NHSTA release, other published reports)

YHOTY: NOMINATIONS SOUGHT FOR 2012 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR

The nominating season for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open.

Created in 1986, this award is offered to recognize the accomplishments of a radio amateur age 18 or younger for his or her accomplishments in service to the nation, his or her community or to the advancement of the state of the art through amateur radio.

Nominees must reside in the United States 50 states or its possessions or in any of the 10 Canadian provinces.

As in years past, Yaesu USA will transport the winner to the Huntsville Hamfest in Huntsville , Alabama, where the award will be formally presented. Yaesu will also provide Hotel accommodations as well as convention tickets and a prize of amateur radio equipment to the winner. CQ Magazine will again treat this year's recipient to a week at Spacecamp-Huntsville. Heil Sound Ltd. will be presenting this year's winner with an additional prize. Amateur Radio Newsline will present

the winner with the official Young Ham of the Year Award plaque which again this year is underwritten by Dave Bell, W6AQ, of DBA Entertainment in Hollywood, California.

If for some reason the person selected is unable to travel to the Huntsville Hamfest, Amateur Radio Newsline will attempt to arrange a special award ceremony where the recipient resides, such as at his or her school or amateur radio club.

Please note that the prizes given to the recipient are second in nature to the actual Young Ham of the Year Award. All nominations and materials required by the official rules must be received by ARNewsline before May 30, 2012.

Complete details, rules and a required nominating form in Adobe .pdf format are available on our website at www.arnewsline.org/yhoty. Nominating forms can also be obtained by sending a self addressed stamped envelope to Amateur Radio Newsline Inc., Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California, 91350.

Please note tat all nominating forms and support materials become the property of the Amateur Radio Newsline and cannot be returned.

Again the cutoff date for nominations is May 30, 2012. Nominating forms are on-line at www.arnewsline.org/yhoty. (ARNewsline(tm))

**
ENFORCEMENT: FCC WANTS ANSWERS ABOUT WISCONSIN FM TRANSLATOR

The commission's Media Bureau wants answers from Radio Power Inc. about W250BN, a translator on 97.9 MHz in Wisconsin. The translator started out in the city of Beloit is now living on the air in West Allis. This after a series of moves in the last two years. Amateur Radio Newsline's Don Carlson, KQ6FM, is in Reno, Nevada, where Power Radio has its headquarters:

--

Last November the Milwaukee Free Radio Group wrote to the FCC, calling Radio Power's actions in relocating its translator from site to site a preconceived scheme to move a translator a distance of 69 miles from Beloit to Milwaukee. It insinuated that Radio Power was trying to accomplish this by using minor changes so as to circumvent the requirement to wait for a window for filing a major change.

Now the FCC is acting. Peter Doyle is the chief of the FCC's Audio Division of the Media Bureau. He has sent what is described as a strongly worded, certified letter to Radio Power in Reno, Nevada. In part the letter states that the Media Bureau is investigating potential statutory and rule violations and related instances of potential misrepresentation and/or lack of candor on the part of Radio Power Inc. Specifically, it is alleged that the licensee abused commission processes by effectuating a major change in the facilities of Station

W250BN, now licensed to West Allis, Wisconsin by a succession of serial minor change applications.

The FCC told Radio Power to answer its questions within 30 days. It wants to know if Radio Power had a reasonable assurance that the specified sites would be available for the intended use. It demanded a copy of all documents relating to the securing of reasonable assurance of site availability; and it wants to know the precise length of time during which the licensee broadcast from each of the facilities.

The FCC also wants a copy of any documents relating to the station's operation for each of the locations The FCC also wants to know the precise length of time during which the station was silent for more than 30 days, and why.

For the Amateur Radio Newsline I'm Don Carlson, KQ6FM, in Reno.

--

The FCC also wants to know what community the licensee of W250BN ultimately intends to serve, the primary station it intends to rebroadcast along with copies of all documents relating to the relocation of the station away from the city of Beloit. (FCC, RW)

**

RADIO LAW: CONGRESS TO INVESTIGATE FCC OVER LIGHTSQUARED FAST TRACK

The FCC appears to be on the hot seat with congress over the way its been handling the entire matter of the licensing of LightSquared's proposal to create its high speed Internet service in spectrum adjacent to that used by the Global Positioning System or GPS.

In an e-mailed press statement, Iowa Senator Charles Grassley who has been investigating the FCC's interactions with LightSquared, said that the agency put this project on a fast track for approval with what appears to have been completely inadequate technical research. As a result, Grassley is blocking two Obama administration Commission nominees until he gets more documents about the matter from the FCC.

Now the House of Representatives is also about to look at the LightSquared matter. Oregon Representative Greg Walden, W7EQI, chairs the House Subcommittee on Communications and Technology. He has said that he plans a hearing on how the agency's handling of the LightSquared application for its broadband network led to a year of dispute. (Published reports)

**

ENFORCEMENT: SOME PEOPLE DO NOT LEARN THE FIRST TIME

>From the some people never learn file comes a story you may find hard to believe. It's about a person to who after being accused of running an unlicensed station and then paying a reduced fine apparently went

right back on the air again. Jim Damron, N8TMW, reports:

--

ENFORCEMENT: FCC ISSUES A FLURRY OF FLORIDA FINES

There's been a lot of unlicensed radio station fines issued by the FCC's Enforcement Bureau to Florida residents in recent weeks.

The Commission has issued a new $25,000 Notice of Apparent Liability against Whistler Fleurinor of Ft. Lauderdale, Florida. This for allegedly operating an unlicensed transmitter on 99.5 MHz in 2011.

The agency says that it raised the fine by $15,000 over the base amount because Fleurinor continued operating an illegal station on the same frequency from the same commercial property after he was issued an earlier fine of $20,000. In that instance, the FCC lowered the penalty to $500 based on Fleurinor's proof of inability to pay the higher assessment.

In issuing the new forfeiture order the FCC noted that the fact that Fleurinor had again committed the same violation, and did so multiple times after he had already been found to be in serious violation in the first N-A-L. It said that this action by Fleurinor demonstrated not only the egregiousness nature of the violations, but also his deliberate disregard for the Communications Act and for the FCC's rules.

For the amateur Radio Newsline, I'm Jim Damron, N8TMW, reporting.

--

Fleurinor was given the customary 30 days to pay the fine or to file an appeal. If he does the latter and basses his appeal on his inability to pay, it will be very interesting to see the FCC's response this time around. (FCC)

**

HAM HAPPENINGS: W7W CELEBRATES ARIZONA STATEHOOD CENTENNIAL FEB 25

Arizona's Superstition Amateur Radio Club will be operating a special event station W7W on February 25th as in the city of Mesa. This is the annual celebration of The Lost Dutchman Mine story at the museum in Apache Junction. It is also in observance of the Arizona Statehood Centennial . More information can be found on line at WB7TJD.org. (K2DFE)

**

HAM HAPPENINGS: SEVHFS CONFERENCE REGISTRATION OPEN

Registration is now open for the 2012 Southeastern VHF Society Conference slated for Charlotte, North Carolina, from April 20th to the 21st. The meeting will feature technical programs, noise figure and

antenna gain testing, banquet prizes, vendor displays, and an equipment auction. ARRL President Kay Cragie, N3KN, will be the banquet speaker. A downloadable registration form in Adobe .pdf format is on-line at tinyurl.com/southeastern-vhf (WA2ODO, VHF Reflector)

**

HAM HAPPENINGS: IOTA DINNER AT THE INTERNATIONAL DX CONVENTION

The 17th annual Islands on the Air or IOTA Dinner will be held in conjunction with the 63rd annual Visalia International DX Convention on Friday evening April 20th. The venue will be the Plaza Room of the Holiday Inn Hotel on Airport Drive in Visalia, California

This dinner is open to all who are active in the Islands on the Air program or who just want to see beautiful pictures of far away islands. Also, as at previous IOTA dinners, admission is free for those wishing to watch the programs without dining but paid attendees will receive priority seating.

At this time, buffet service is set for 50 attendees. The cost is $33 per person. Reservations must be prepaid by April 10th and go to Ray Benny, N6VR, 462 South Reed Road, Chino Valley, Arizona, 86323.

More about this years International DX Convention is on-line at dxconvention.org. (IOTA)

**

NAMES IN THE NEWS: ZL1TGC ASCENDS TO NZART PRESIDENCY

Some names in the news: First up is Vaughan Henderson, ZL1TGC, who has assumed the presidency of New Zealand's national society, the NZART. This following the resignation of Roy Symon ZL2KH on Monday, February 20th.

According to a press release, Symon had served as NZART President for the last three years and was completing his last term. He was due to finish at the 2013 Annual General Meeting where he had planned to hand over to his successor. Instead he tendered his resignation to the NZART citing personal reasons.

In accordance with the organization's constitution, ZL1TGC who was serving as Vice-President became the new President. The NZART Executive Council will now have to elect a new Vice-President. (NZART)

**

NAMES IN THE NEWS: WA6ILE AND KG6YPI TO SPEAKER MONTEREY RADIOFEST

Back in the United States, Scott Avery, WA6LIE and Brandon Hansen, KG6YPI will be guest speakers at the New Ham Forum at his years Radiofest being held in Monterey, California, on March 3rd. The two will be discussing remote radio operations and its applications. More information is on-line at www.raiofest.org. (WA6LIE)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: D-STAR COMES TO NAMIBIA

D-Star is truly going places where it has never been before. This with word that radio amateurs in Windhoek, Namibia now have their own D-Star repeater operational and on the air.

Reportedly, the biggest challenge to getting the system operational was obtaining a stable data connection to the internet. This was solved with a 3G connection and the help of the biggest cellular telephone service provider in Namibia.

Right now the system is at a temporary low level location. According to V51JP, the Repeater will be moved to its final site as soon as everyone is satisfied that it is performing correctly. V51JP also says that he thanks DL1YBL and DL5DI for their assistance in getting the new D-Star repeater up and running.

More about this new D-Star system in Namibia is on-line www.qsl.net/narl. (V51JP)

**

WORLDBEAT: QF RADIO TO SWITCH FORMATS ON FM

QF Radio will launch an all-English broadcast on 91.7 FM in Quatar. The station is an operation of the Qatar Foundation, a social and educational foundation based in Qatar. It delivers its programs across all segments of society by means of on-air broadcasts, the Internet, smart-phones and other developing technologies. In addition to music and news, the station airs programs for students, featuring cultural and scientific issues. The station will also switch to an all Arabic format on 93.7 FM, where it currently airs a mix of Arabic and English-language programming. (MN)

**

WORLDBEAT: ITU ENACTS NEW RULE TO STOP SATELLITE JAMMING

The International Telecommunication Union has called upon the world's nations to take all 'necessary actions to stop intentional interference with satellite transmissions. The change in regulations, which was approved at the just concluded World Radiocommunication Conference came after numerous complaints that international satellite TV programs in

the Persian and Arabic languages were suffering from deliberate interference.

The new rule says that administrations shall ascertain the facts and take the necessary actions when they encounter jamming. What actions these might be were not spelled out in the document.

The two satellite operators that have been targeted are Eutelsat and Arabsat. They claim that the jamming signals originate from Iran and Syria. The interference, which has increased since September, 2011, has affected numerous broadcasters including programming from the British Broadcasting Corporation, Germany's Deutsche Welle, and RFE's Radio Farda.

Joining in backing the revised ITU anti-jamming rule to fight this willful and malicious interference to satellite transmissions were Radio Netherlands Worldwide and the European Broadcasting Union. (MN)

**

WORLDBEAT: PHILIPPINE ARC CELEBRATES GOLDEN ANNIVERSARY

The Philippine Amateur Radio League is celebrating its Golden Anniversary in 2012. To commemorate this milestone the organization is sponsoring an on-the-air operation that will award a special commemorative certificate to hams world-wide who make contact with its members.

Also throughout 2012 the club will be operating with the special event call sign of 4G0LD. QSL information along with the rules to qualify for the Golden Anniversary award can be found at www.dx1l.dxhams.net/Awards.htm (DU1XX, NZART)

**

RADIOSPORTS: SARL DIGITAL CONTEST FEBRUARY 26

>From the Radiosports file comes word that the first in the series of South African Radio League sponsored digital contests will be held on Sunday, February 26 from 13:00 to 16:00 UTC with PSK and RTTY activity on 80, 40 and 20 meters. The exchange is a simple R-S-T report and a serial number starting at 001. Stations maybe contacted twice per band, once on PSK and once on RTTY. Other contests date will be announced in the future. More is on-line at www.sarl.za. (SARL)

**

HAM TECHNOLOGY: COLORADO 6 METER BEACON BACK ON FREQUENCY

Dave Clingerman, W6OAL, reports that the Colorado 6 meter beacon is back up and running on its published frequency of 50.065 MHz. The beacon had gone into wander mode for a few days after a suspected crystal oven failure had it sliding around its normal operating frequency.

According to W6OAL, a spare local oscillator unit can sometimes come in handy. Installing it apparently was the fix. Dave adds that beacon reports are appreciated whenever the band is open. (VHF Reflector)

**

DX

In DX, word that W5JON will once again be active as V47JA from his vacation home at Calypso Bay, St. Kitts from February 28th through March 28th. His activity will be on 80 through 6 meters using SSB. While on the island he plans to operate during the ARRL International DX Contest on March 3rd and 4th and the CQ WPX SSB Contest March 24th through the 25th. ALL QSL's to W5JON either direct

ON4AVT will be on the air as C5AVT from Gambia from February 28th to March 20th. He will be active mostly on 15 meters using the digital PSK mode. QSL via home call.

G3SWH and G3OLU will be operational from western Swaziland as 3DA0PW through February 29th. Their main objective is to work as many European and North American stations on as many different bands as possible and hope to make at least 15,000 QSOs. QSL via G3SWH, either direct, via the bureau or using the facility on www.g3swh.org.uk.

Members of the Malaysian Amateur Radio Transmitter Society and the 9M4SDX Team will be active as 9M0L from Pulau Layang Island from April 10th to the 24th. If you work them QSL direct to 9M2TO either direct or via the bureau to Malaysian Amateur Radio Transmitter's Society. More details will be forthcoming shortly.

DF7ZS, will be on the air from Aruba stroke P4 from P40V's QTH between March 21st to the 27th. Activity will be casual but he will operate during the CQ WPX SSB Contest using the callsign P41P. QSL P4/DF7ZS via DF7ZS. QSL P41P via W3HNK.

Nine members of the 'A DX Group' will be active from Coloane Island between May 17th and the 23rd. Operations will be on 160 through 6 meters, including the 30, 17 and 12 meter bands. Modes used will be CW, SSB and RTTY. There will be at least three stations on the air at the same time on different bands and modes. The group's callsign will not be announced until the beginning of their operations. QSL via EB7DX, direct or by the Spanish Bureau. All QSO's will be confirmed electronically via Logbook of the World.

Lastly, DL1NL will be operational portable OA4 from Lima, Peru, until early March. His activity is only in his spare time on 160-10 meters CW, with some SSB, from the Radio Club Peruano station. QSL via DL1NL, either direct or via the bureau. No electronic QSL's are accepted by this station.

(Above from various DX news sources)

THAT FINAL ITEM: THE AMPLION SPEAKER FROM 1926 VIDEO

And finally this week, the history of the early 20th century Amplion loudspeaker is a story told in a recently released video by Trilith Films in the United Kingdom. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Titled "A Tale Retold" the video tells the story of UK radio amateur Frank Marshall who in 1998 told Trilith pictures about a collection of old motion picture films that had been stored under his workbench for decades. He thought that among them might be one film he had particularly enjoyed as a boy. It was an advertisement for an early loudspeaker called the Amplion. One that had been used in local cinemas in the 1920's and by his father's pioneering radio business on the Isle of Portland.

When rescued from the pile of rotting nitrate film it was discovered that the film entitled "The Tale of the Amplion" was a here to fore unknown work by the famous illustrator William Heath Robinson. It is almost certainly the only animated cartoon that Robinson ever made.

The tale is retold by Frank Marshall who preserved the film, Gerry Wells of the Vintage Wireless Museum in London and Geoffrey Beare of the William Heath Robinson Trust. Included is the film as it originally appeared but with a especially composed musical sound track created by composer Stephen Deutsch.

A very interesting 20 minutes indeed.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This video was shot and edited by John Holman for Trilith and now appears on Transition Vision's Heritage Channel. Its available for world-wide viewing on-line at YouTube. It can be found at tinyurl.com/amplion. (Southgate, ARNewsline(tm), others)

RADIO LAW: A PERMANENT 5 MHZ HAM ALLOCATION TO BE DISCUSSED AT WRC-15

Some more good news out of Geneva, Switzerland. Somewhat overshadowed by last weeks announcement of the approval of a new ham radio band from 472 to 479 kHz at the now concluded WRC-12 comes word that yet another possible new ham radio allocation near 5 MHz. One that could become a reality at the next World Radio Communications Conference to be held in 2015. Amateur Radio Newsline☐s Heather Butera-Howell, KB3TZD, has the details:

//
Mont. Radio Operator Hams It Up from His Home:

Posted: 23 Feb 2012 04:21 PM PST
http://www.eham.net/articles/27782

LIVINGSTON, Mont. (WTW) -- There are not many hobbies where you can relay messages for emergency personnel during an unfolding disaster one day, talk to astronauts on the International Space Station another, then talk to your buddies in Morse code at a rate of 35 words per minute, well, every day. But that's Shields Valley resident Doug Dunn's hobby. Dunn, a retired 65-year-old, is an amateur radio -- more commonly known as "ham radio" -- operator. And like so many ham radio aficionados around the world, he is passionate about the hobby. A small den in Dunn's home 16 miles north of Livingston is dominated by radio gear. On a recent afternoon, it crackled with activity as Dunn, whose call sign is K7YD, communicated with friends using voice and rapid-fire Morse code, tapped out at a blinding pace on a semi-automatic Morse key set -- the descendant of the old telegraph set of the 1800s.

//
Arlington Seeking Licensed Ham Radio Users:

Posted: 23 Feb 2012 04:19 PM PST
http://www.eham.net/articles/27781

Arlington is putting out a call for a local licensed ham radio operator to help the town with a back-up emergency communication system. The town has issued a notice seeking an amateur radio operator to volunteer with Arlington's public safety departments in case communications systems, such as police and fire radios and telephones, fail during an emergency. Arlington Fire Chief Robert Jefferson said it would likely have to be a very extreme scenario for the town to resort to using a ham radio, but the medium does offer some extra redundancy to other communication methods. "You never know," the chief said. Several years ago Arlington used a grant from the U.S. Department of Homeland Security to purchase a ham radio for emergency use. But Jefferson said the town was relying on other communities in the Battle Road Regional Emergency Planning Committee to supply someone who was trained at using the equipment.

The ARRL International DX Contest Gears Up for SSB:

Posted: 23 Feb 2012 01:01 PM PST
http://www.eham.net/articles/27770

According to ARRL Contest Branch Manager Sean Kutzko, KX9X, for this contest, stations in the US and Canada work only DX stations, and DX stations work only the US and Canada; Alaska and Hawaii are considered DX for this contest. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with.

SARL NEWS - SUNDAY 26 FEBRUARY 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Quintin Jannasch, ZS6FM, became silent on February 13th, 2012.

Our sincere condolences go to his wife, children, grand children,other relatives and friends.

(PAUSE)

In the news today:

REPUBLIC OF SOUTH SUDAN ASSIGNED Z8 PREFIX

SARL COUNCIL MEETS AT NARC

ITU ENACTS NEW RULE TO STOP SATELLITE JAMMING

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

REPUBLIC OF SOUTH SUDAN ASSIGNED Z8 PREFIX

After a wait of more than seven months after being accepted as a member of the United Nations, the Republic of South Sudan received its prefix block Z8 from the International Telecommunication Union (ITU). On July 14, 2011 -- after South Sudan's admittance to the UN -- the new country became a DXCC entity by way of Section II, 1(a) of the DXCC rules.

SARL COUNCIL MEETS AT NARC

The SARL Council met this weekend at the National Amateur Radio Centre for its annual strategy indaba to review plans for the coming year. The draft plans will be presented at the National Convention to be held in Pinetown from 20 - 22 April. The two days session is the only face to face meeting of Councillors other than a brief meeting after the AGM. Throughout the year Council meetings are held via teleconference.

The meeting spent a considerable amount of time on changes and additions to the constitution which are necessary to comply with SA Revenue Service's rules for non profit associations. The proposed changes will be published in the AGM Agenda booklet for discussion at the AGM .

The SARS regulations will impact also on clubs, the SARL is in the process of developing guidelines for use by clubs to assist them to comply.

ITU ENACTS NEW RULE TO STOP SATELLITE JAMMING

The International Telecommunication Union has called upon the world's nations to take all necessary actions to stop intentional interference with satellite transmissions. The change in regulations, which was approved at the just concluded World Radio Communication Conference came after numerous complaints that international satellite TV programmes in the Persian and Arabic languages were suffering from deliberate interference.

The new rule says that administrations shall ascertain the facts and take the necessary actions when they encounter jamming. What actions these might be were not spelled out in the document.

The two satellite operators that have been targeted are Eutelsat and Arabsat. They claim that the jamming signals originate from Iran and Syria. The interference, which has increased since September, 2011, has affected numerous broadcasters including programming from the British Broadcasting Corporation, Germany's Deutsche Welle, and RFE's Radio Farda.

Joining in backing the revised ITU anti-jamming rule to fight this willful and malicious interference to satellite transmissions were Radio Netherlands Worldwide and the European Broadcasting Union.

THE AMPLION SPEAKER FROM 1926 VIDEO

The history of the early 20th century Amplion loudspeaker is a story told in a recently released video by Trilith Films in the United Kingdom. In "A Tale Retold" the video tells the story of UK radio amateur Frank Marshall who in 1998 told Trilith Pictures about a collection of old motion picture films that had been stored under his workbench for decades. He thought that among them might be one film he had particularly enjoyed as a boy. It was an advertisement for an early loudspeaker called the Amplion, one that had been used in local cinemas in the 1920's and by his father's pioneering radio business on the Isle of Portland.

When rescued from the pile of rotting nitrate film it was discovered that the film entitled "The Tale of the Amplion" was a here to fore unknown work by the famous illustrator William Heath Robinson. It is almost certainly the only animated cartoon that Robinson ever made.

The tale is retold by Frank Marshall who preserved the film, Gerry Wells of the Vintage Wireless Museum in London and Geoffrey Beare of the William Heath Robinson Trust. Included is the film as it originally appeared but with an especially composed musical sound track created by composer Stephen Deutsch.

The video was shot and edited by John Holman for Trilith and now appears on Transition Vision's Heritage Channel. It's available for world-wide viewing on-line at YouTube. It can be found at tinyurl.com/amplion.

ERIC JAMIESON INDIAN OCEAN AWARDS

The Wireless Institute of Australia Board meeting in Melbourne over the weekend of 18-19 February 2012 accepted the offer of Eric Jamieson, VK5LP, to sponsor awards for first amateur radio contacts on the two metre (144 MHz) band spanning the Indian Ocean between Australia and Africa. There will be three awards, for voice, CW and digital modes and will be known as the Eric Jamieson Indian Ocean Awards.

In presenting a sum of money to the WIA Foundation to fund the Awards, Eric said: "I acknowledge that spanning the Indian Ocean will not be easy but one cannot say that it will never be accomplished. The degree of difficulty may be judged from the so far inability to span the much shorter Atlantic Ocean despite concerted attempts in order to win the Brendan Atlantic Ocean trophies."

The Indian Ocean Award is designed to encourage experimentation in propagation and long distance communication techniques in the two metre amateur band.

COMPETITION NEWS

2012 SARL QRP Contest

16 logs and 1 check log were received. According to the logs, 303 contacts were made between the 81 stations who took part. 63 stations operated SSB only, whilst 10 stations did CW only and 8 stations operated in both SSB and CW modes.

The results are as follows:-

1st ZS6XT 936 points 2nd ZS2ACP 930 points 3rd ZS6PX 408 points 4th ZS6A 400 points

The full results have been posted on the forum.

SARL Digital Contest

The first leg of the SARL Digital contest takes place and lasts from 13:00 UTC till 16:00 UTC [15:00 till 18:00 CAT]. The rules can be found

in the 2012 Contest Manual

SARL 80 Metre Club Contest.

The first contest in this series was a CW contest and logs were received from the Sasolburg ARC and the West Rand ARC.

1st West Rand ARC, 7 points from 3 logs 2nd Sasolburg ARC, 2 points from 1 log

SARL National Field Day.

The February leg of the 2012 SARL National Field Day was held on 11 and 12 February and 20 logs were received.

Class A - Multi Operator Field Station: 1st West Rand ARC, ZS6WR, 117 240 points 2nd Bloemfontein RAC, ZS4BFN, 64 044 points 3rd Magalies ARC, ZS6MRK, 60 840 points

Class B - Multi operator Field Station QRP: 1st Centurion ARC, ZS6CEN, 23 310 points

Class C - Single Operator Field Station: 1st Marius, ZR6MS/4, 28 320 points 2nd Bryan, ZS2SS, 10 584 points

Class D - Single Operator Field Station QRP: 1st Raoul, ZS1REC, 35 424 points 2nd Eddie, ZS6BNE, 1 620 points

Class E - General Stations: 1st Pieter, ZS6XT, 36 720 points 2nd Christo, ZS3R, 27 840 points 3rd Wessel, ZS6AWW, 7 680 points

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is expected to be at low levels. Sunspot 1 422 remains the largest visible sunspot but remains stable. Old sunspot 1 410 rotated back into view and was renumbered 1 423. It is also stable with very little chance of flares.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 42.

All the bands from 20 to 10 m and especially 15 m will provide lots of DX fun with 10 m only opening sporadically due to the low solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today, 26 February - SARL Digital Contest, 15:00 to 18:00 CAT. 29 February - Leap year Challenge from 00:01 till 23:59. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to

www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

WIANEWS WEEK COMMENCING FEBRUARY 26 2012.

WIA Board Meets

HIGHER POWER

Brazilian national amateur radio society LABRE

REWIND VOA

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING FEBRUARY 26 2012.

WIA Board Meets

The WIA Board met at the Bayswater, Victoria offices over last weekend, the 18 and 19 February 2012.

Because the Board only meets face to face two or three times a year, one of which is at the Annual General meeting, there is a great deal of works todo, and very many matters were discussed, and some just not reached.

WIA Treasurer John Longayroux and Secretary Sarah Thomson were also present and WIA Manager Mal Brooks kept the minutes.

Let me identify some of the issues that were addressed by the Board. Onewas the appointment of a new RD Contest Manger, to replace Peter Harding VK4OD. Alan Shannon VK4SN, who will be supported by the Lockyer Valley Radio & Electronics Club was appointed RD Contest Manager, and others who had

expressed a willingness to help, were thanked for their interest.

The Board made it clear that while it expected that there would be some rule changes for the 2012 contest, and it expected these changes to be placed on the WIA web site to allow comment, it hoped that there would not be further changes for some years.

Trent Sampson VK4TI is now the Director responsible for contests.

Concern was expressed at the number of members not renewing.

The Board agreed to attempt better communication with the clubs, continuing to provide the services it could to help them and at the same time seeking their support in attracting and retaining members of the WIA.

The Board consulted with Peter Mill the Beacon and Repeater Coordinator, and understood some of the difficulties he faced. It was agreed to use a new method of tracking beacon and repeater applications, so the office, once it was implemented, would be able know the precise stage each application was at, and advise the applicants accordingly.

Considerable time was devoted to reviewing WIA Awards. A number of changes are contemplated and the Director responsible for Awards Chris Platt will be reporting on that directly, after he has consulted with the AwardsCommittee.

The Board agreed with the general approach of the ACMA to the higher power trials, and while the ACMA will not accept any applications for licence variations before 1 March. The WIA website will provide additional information, hopefully some time later next week.

A design for a travelling badge based on the design suggested by Murray de Plater VK1MDP was chosen, and production will now be investigated.

Time was spent discussing the Commonwealths propose uniform health and work safety laws, as yet to be adopted by many of the states. These laws require a duty of care to volunteers and create offences for not discharging that duty.

Among the many other matters discussed and decided were a budget for the current year, the implications of result of the WRC-12, including agenda for the next WRC, the ongoing discussion with the ACMA on a number of matters, including the inspection of stations and the possession of transmitters by amateur licensees, the magazine, the Mildura Annual Conference, a new award for the first person to make a contact on two metres between Africa and Australia presented by Eric Jamieson VK5LP.

The Board will now resort to communicating daily by email.

It was one of the best and most constructive Board meetings I have attended.

Michael Owen VK3KI President.

To all WIA Clubs.

Ted Thrift VK2ARA our WIA Clubs Co-ordinator has come up against a brickwall regards having WIA affiliated clubs replying to him with insurance details

As Ted said in a recent 'reminder' communication, "it is very disappointing to see less than 50% of clubs respond to requests for information so that I can save them costs on Liability insurance.

I ask you, to ask if your club has done all that was asked. If not, I urge you to ask why.

After all it is for the benefit of your club that the group cover offer is made."

50 Years of anticipation all worked out on the day we celebrated John Glenn's orbit in Friendship 7 in Perth last Monday.

We had John Glenn, the Premier of WA, the Lord Mayor of Perth, Lyn Beazley the WA Chief Scientist and many other dignitaries on hand to celebrate. We even managed to squeeze in some David Bowie and a video on how to become an astronaut.

The crowds filled the Northbridge Piazza and much anticipation culminated at 10:24 UTC. Orbital calculations all worked out and the International Space Station made it across the horizon. There were some chilling seconds when Mike was calling from Honolulu, but in the end, the contact was a great success.

Of course, an event like this could not have been possible without a little help from some friends, Captain Dan Burbank on the International Space Station, the WA State Records Office, the WA Museum, the City ofPerth, ARISS, NASA and the Hills Amateur Radio Group.

A full credit list is being prepared on the Hills Amateur Radio Group website, but two people require a special mention, Tony VK5ZAI the Australian ARISS mentor and Meg VK6LUX who energetically kept the multitude of interested parties moving along making it all possible.

We managed to get Amateur Radio into the news on ABC Online, ABC radio and local television, who knows we might pick up some more amateurs along the way.

Alex VK6FLOL and Donald VK6PDS scored a place in history as prize winners for the contact.

Perhaps you can help a local school in your area for an ARISS contact next year.

Onno Benschop

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

So Have you registered to attend to the WIA Annual Conference being held in Mildura?

It's the weekend 25th - 27th May.

Saturday afternoons Technical Symposium - Technology To The Future. Hear what the experts have to say, learn about the cutting edge technology and what our Australian Amateurs have been working on, and the bright future for our hobby.

One of the presenters will be Peter Cossins, VK3BFG Peter Is a digital ATV guru having been involved with the ATV repeater VK3RTV since 1977. Peterwill talk on his experience with digital ATV - Peter's talk is titled "DVB-T what it is, and where its all going"

It's going to be a very special weekend of activities, and there is much more in store that we will continue sharing with you in upcoming broadcasts and don't forget the registration page on the WIA Website.

Up up and away, see you in Mildura this has been Robert VK3DN

TAKE IT TO A HIGHER POWER

>From 1 March 2012, the ACMA will accept applications from amateur advanced licensees to use transmitter output power of up to 1,000 watts peak envelope power (Permissible Output Power Level) from nominated fixed locations.

Here is WIA President VK3KI Michael Owen.

ACMA Publishes Details of Amateur Higher Transmitter Power Trials

The ACMA has published on its website details of the trial of higher power transmitter output for Advanced amateur licensees.

The trial will commence on 1 March 2012 and will continue til 31 August 2013. The ACMA has advised the WIA that the 18 month authorisation is intended to provide the ACMA with time to evaluate the success of the trial after a 12 month period and to consider permanent regulatory arrangements, if warranted, while avoiding dead air between the evaluation time and the implementation of permanent arrangements, ifappropriate

The paper is in the part of the ACMA site dealing with amateur matters and is an information paper.

A brief article also appears on the Engage part of the ACMA website, where anyone can record their comments.

The ACMA will not accept applications for a variation of licence conditions to allow higher power before 1 March 2012.

The WIA hopes to publish some additional material on its website before the end of next week.

The WIA Board, in considering this trial at its meeting on 18/19 February thought it very important to point out to every amateur consideringobtaining a higher power permit that this is a trial, and if problems do emerge, this could affect whether Australian amateurs will continue to be able to use the higher power, if they wish.

In particular, if interference is caused to others, the WIA advises that the amateur must immediately do whatever it takes to stop the interference, and must resolve the problem without resort to the ACMA.

Links to the pages on the ACMA website that I have mentioned can be found in the release dealing with this matter on the WIA website.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Getting youth interested by exhibiting in high schools

Students in most schools have never heard of amateur radio.

IARU-Region One Youth Co-ordinator Lisa PA2LS suggests how to raiseawareness of the hobby.

An opportunity to change thinking is to exhibit at a local high school.

Veron did this recently; their goal was to show youth that there is more than only internet and Apps. First they started with making promotion material, like flyers, banners and pens. The committee made the decision what they wanted to show. They choose to show in an active way what the radio amateur hobby is about.

The next step was to ask members of the VERON section to help during the exhibition. It seemed during club meetings that many members wanted to participate and help. Also some younger members, which is nice when you are promoting on a school.

Before the start of the exhibition, which was two days in total, local radio amateurs helped with the preparations. A pump mast was placed at the schoolyard.

Inside there was a stand next to the electrical engineering faculty of the school. There was also a self-build SDR-radio, self-build radio's,
80 meter QRP transmitter and much more.

WRC-12: IARU VICE PRESIDENT OLE GARPESTAD, LA2RR, CHATS WITH ITU

IARU Vice President Ole Garpestad, LA2RR, sat down for a video interviewwith the ITU Press Office at 4U1ITU, the Amateur Radio station at ITUHeadquarters in Geneva.

During the interview, IARU Region 1 President Hans Blondeel Timmerman, PB2T, operated CW in the background.

Discussed was Agenda Item 1.23 and what it means to the Amateur RadioService, what the IARU does at the WRC, the future of Amateur Radio, and what the Amateur Radio Service and the IARU are doing for the next WRC.

Watch the video here

L.A.B.R.E. meets the Minister of Communications and broadcast associations to empower EMC rules in Brazil

The Brazilian national amateur radio society LABRE made two important meetings in Brasilia to discuss administrative affairs and EMC.

LABRE will join a working group to solve some of the problems and write a new national amateur radio rule. LABRE will ask to be a member of GPRI, a permanent radio interference group held by ANATEL to study and expose the interference cases.

IARU (International Amateur Radio Union) and their national organizations like LABRE for long time battle for a healthy spectrum, susteain an useful environment able to fully development the amateur radio service, including low power long distance communications.

One of the most important cases of amateur radio EMC concerns with juridical and technical consequences is related to PLC/PLT/BPL noise.

LABRE was represented on the meetings by the likes of PY5EG, former president of LABRE and PT2ADM, current president.

Fli¿½vio Archangelo, PY2ZX is a journalist recently promoted to press adviser for the Brazilian amateur radio association. Through the following link you can obtain an article and photos covering these important meetings between LABRE and Brazilian government.

http://www.archangelo.net/temp/labre/release-2012-01-ee.htm

(Fli¿½vio py2zx.ham@gmail.com)

New pressure on jammers of international broadcasts

The International Telecommunication Union has called upon the world'snations to take 'necessary actions' to stop intentional interference with satellite transmissions.

The change in ITU regulations, which was approved at the just-concluded World Radiocommunication Conference (WRC-12) in Geneva, Switzerland, came after numerous complaints that international satellite TV programmes in Persian and Arabic were suffering from deliberate interference, known as

"jamming".

Two satellite operators that have been targeted, Eutelsat and Arabsat, said the interfering signals originated from Iran and Syria.

The International Campaign for Human Rights in Iran termed satellite jamming part of a broader effort. "The Iranian government is also engaged in comprehensive attempts to take complete control of online access to the internet as well as restricting mobile voice and data communications," the group said in a statement urging the WRC to address the jamming issue.

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

In my day-to-day environment I meet lots of different people. Many of them are not Amateurs. In fact, most of them are not Amateurs. That's not to say that I cannot see that some of those people could be, and some have Amateur written all over their forehead without ever realising it.

Now it's not for me to tell you to go out and convert people to Amateurs, that's your job - Hi Hi.

What I'd like to look at is, "What is it that brought you into Amateur Radio?" I've said in the past that for me it came as a surprise. I knew two people, one of whom was a "known Amateur" the other not. I'd never talked about Amateur Radio with either of them.

The person who is the "known Amateur" has had their license for many years, as long as I've known them, 20-odd years, likely longer, I've never gotten around to asking. The other "secret Amateur" was the one who is responsible for me becoming aware of this hobby.

It all started pretty innocently, here's a WiFi Quad-Copter, with an Amateur Radio license we might be able to extend its range to something useful. It went in a whirlwind from there.

Since I became an Amateur, I've been fascinated with how people became involved in Amateur Radio. For some of those, the incentive was lost in the history of time. For others it's fresh as the ink on their license.

One Amateur I spoke with talked about how Amateur Radio was their opportunity to first step in a very challenging and rewarding hobby. Bounce signals off the moon, talk to people of all ethnicities, social positions, religions, colours, creeds etc. Join a group of earth people that have few boundaries.

They wistfully added, "Maybe this is just one of the seeds of the 'world race'. "

Your reason for joining Amateur Radio likely looks nothing like any of the ideas or reasons I've just mentioned, perhaps you have a distinct first memory. Perhaps you might consider how you got the Amateur Radio Bug and how that might relate to the people around you. Perhaps you'll find new Amateurs in unexpected places, or find old friends where you never looked before.

I'm Onno, VK6FLAB

Radio Amateur Chris Hadfield VA3OOG to command ISS

The BBC reports that astronaut Chris Hadfield, VA3OOG will be the first Canadian to command the International Space Station.

His big moment will begin when he launches to the station on a Soyuz rocket at the end of this year.

For three months, the 52-year-old will serve as a flight engineer in the Expedition 34 crew.

Then, in March 2013, he will assume command of Expedition 35 for threemonths, before returning to Earth in his Soyuz capsule.

Chris also holds the callsign KC5RNJ.

New WIA Member Only Features On The WIA Website

The March edition of AR magazine is about to hit your letterbox, when it arrives make sure you save the Mailing Address sheet included inside the plastic wrapper. The details on the address sheet enable you to register for members access on the WIA website. Registering for member access on the website is very easy, all you need to apply for your unique member password are the details from AR mailing address sheet.

The formal registration procedure using the mailing address sheet is necessary so we can correctly verify the identity of each member before assigning an access password. With your members password you will have ongoing secure access to view your membership details and access membersonly features on the website. Without a reliable verification process, then of course anybody could simply call up the WIA office, pretend or claim to be you, and obtain a password to view membership and other personalinformation.

Belgium Amateurs embrace social media

The Board of Directors of the national amateur radio society of Belgium, the UBA, has taken the plunge to embrace social media.

The UBA says that social media is becoming an indispensable tool in the toolbox of any organization that wants to communicate with its targetgroups, namely the members and those interested in our hobby.

You can now find the UBA at

WWII radar station RAF Dunkirk sold at auction

Several bidders were interested in the disused WWII radar station. A former Kent radar station which was used to help defend Britain during World War II has been sold at auction.

RAF Dunkirk, near Faversham, was built after 1937 to provide long rangeearly warning for the Thames Estuary and the south eastern approaches to London.

The station is spread over 26 acres and is a listed Scheduled Monument.

The site, which includes a transmitter block, pillboxes, a radar tower base and an underground transmitter room, sold for ï¿½158,000.

In July this year it will be Australia's turn.

VK4ZD, Bill will be taking on that role for the coming 3 years.

Each year Rotary International has an International Rotary Convention held in a different part of the world. In 2015 it will be held in Sydney. Plans are already under way to have a special event Ham Radio station active at the convention.

REWIND

The Voice of America, which sent its original broadcast overseas 70 yearsago this month, will see backers of its first-built transmitting station at Bethany begin fundraising this year to make it a national museum.

The impact of the local transmitting station was felt in 1944 when the building and its six 200-kilowatt transmitters were completed about a year after groundbreaking.

The station was instantly able to broadcast news to Europe, Africa and South America.

"What happened here is something that I suppose only a few of us in the community understand or realize the significance of," National VOA Museum of Broadcasting board president Ken Riser said. "None of this had been done before. They couldn't just pull things off a shelf. They had to actually design, build and construct it all from scratch.

"These were things that were probably equivalent of going to the moon in the '60s."

The old VOA Bethany Relay Station is undergoing approximately $500,000 worth of exterior restoration work that includes installation of a new roof and block maintenance on the rear of the building.

Town Seeks Amateur Radio Users for Emergencies:

Posted: 24 Feb 2012 04:28 PM PST
http://www.eham.net/articles/27787

Arlington officials are seeking amateur radio operators willing to help the town with emergency response. In a statement, officials said they're looking for licensed ham radio operators to become volunteers and help out in case the town's communications systems stop working during an emergency. Fire Chief Robert Jefferson told the Boston Globe it would take an "extreme scenario" for the town to resort to using amateur radio. "You never know," Jefferson told the Globe.

//
Solar Superstorm Could Be On the Way:

Posted: 24 Feb 2012 04:27 PM PST
http://www.eham.net/articles/27786

I USUALLY try to vary my topic from month to month but my February reflection on the aurora brought in a couple of intriguing queries from readers. One was about "the Carrington Event" and what effect, if any, the recurrence of such a phenomenon would have on the modern world. The other was sparked by a US newspaper headline from last year proclaiming, in very large letters, "NASA warning of solar superstorm in 2012". The two are closely related in that the Carrington Event, named after the British astronomer who made scientific observations of it, was arguably the greatest solar outburst of recent history. The flare, a great mass of hot plasma unleashed by a giant sunspot on August 28, 1959, caused an extraordinary display of auroral activity which was visible not just in the high latitudes but as far south as the Gulf of Mexico in the Americas and over Mediterranean areas in the old world. As well as providing our forebears with an incredible light show for several days - brighter than moonlight across much of the surface of the Earth, and much more colourful - the flare and its associated coronal mass emission imparted so much energy to the Earth's magnetic field that very strange things started happening to what was then a state-of-the -art communication system - the telegraph. The system failed across great swathes of Europe and America with telegraph poles all over the place, and the paper used to record the Morse imprints at the most sophisticated transmission stations, being set on fire. And the machines kept on churning out nonsensical signals despite being disconnected from their power sources. COULD something like this

happen again? The answer has to be yes, given that we owe our lives to being right next door to a turbulent star, the workings of which we do not fully understand and which we have only just begun to observe systematically.

//
Propagation Forecast Bulletin #08 de K7RA:

Posted: 24 Feb 2012 09:41 AM PST
http://www.eham.net/articles/27785

We don't know if this is a significant trend, but solar activity has really leveled off recently. Not everyone is unhappy about this. During the recent long minimum, 160 and 80 meter operators sang the praises of great conditions.

//
DARC Short Term Award 35R24:

Posted: 24 Feb 2012 09:42 AM PST
http://www.eham.net/articles/27783

The DARC chapter R24 offers a free electronic short term award for contacts with its members during 2012.

RFinder for Apple iPhone/iPad/iPod impending release!!!

Posted: 24 Feb 2012 01:59 PM PST
http://forums.qrz.com/showthread.php?335167-RFinder-for-Apple-iPhone-iPad-iPod-impending-release!!!&goto=newpost

For immediate release

From the shack of W2CYK

2/22/2012

By popular demand, we are pleased to announce the impending release of RFinder - The Worldwide Repeater Directory (WWRD) for iOS! We hope to have the iPod/iPhone/iPad version in the App Store by March 7th!

RFinder already runs on the Android platform, open source via CHIRP on Windows/Linux/Mac and of course, the world wide web. We are working diligently with RTSystems to incorporate the Worldwide Repeater Directory (WWRD) into their suite of radio programming software. We have opened up the directory so anyone with a Windows application can request our API toolkit to incorporate the WWRD into their applications.

Your annual subscription to the WWRD works on all platforms. Just use the same user/password combination on any WWRD enabled application and you are ready to go!

Some recent enhancements:

Callsign lookup, improved data for Italy, France and Israel

Look in future releases of iOS and Android:

DStar! We have improved the back end to support this and are working to automatically syncronize DStar data.

Satellite data with footprint visualizations!

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 26th February 2012

EI80IRTS Special Callsign

As we celebrate our 80th Anniversary, a special callsign EI80IRTS is now on the air. IRTS members and affiliated clubs are invited to take part in the celebrations. If you or your club would like to activate EI80IRTS, you can contact Co-ordinators Ger McNamara EI4GXB at ei4gxb/at/ gmail.com or 087 2532512 or Thos Caffrey EI2JD at thoscaffrey /at /hotmail.com for details.

A very attractive certificate for working EI80IRTS is sponsored by Dundalk Amateur Radio Society, and details can be seen athttp://www.ei7dar.com/ei80irts.html

---

IRTS 80th Anniversary AGM & Rally

Tickets for the AGM dinner on Saturday April 21st are selling fast. The event this year is hosted by Dundalk Amateur Radio Society, www.ei7dar.com. Dinner tickets are just 32, this is a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors. This is a must attend event in the 80th Anniversary year of your national society, www.irts.ie.

Dinner tickets can be bought now by contacting Thos, EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie.

IRTS Request for Return of Trophies

It is time once again to recall all trophies presented at the 2011 IRTS, AGM in Limerick.

Trophies and Cups can be returned to any IRTS Committee Member before end of February 2012.

This will allow for engraving to be done and allow for repairs if necessary.

Early return will be appreciated. Peter EI4HX at ei4hxperimental /at/ eircom /dot/net

Nominations For Awards for IRTS Trophies.

The time is here again for nominations for the several awards for IRTS Trophies that are required from within the membership, this includes the awards for, 1. Service to the Society or to Amateur Radio. Awards in this category can be to members or non-members.

2 Awards for other achievements.

Awards in this category [2] include the 4 and 6 Meter Shields, the SWL Award, and the awards for Quality Construction Projects. These are confined to members only.

When considering your nominations, please refer to previous successful winners as included in www.irts.ie/cgi/awards.cgi

Nominations may be from Clubs or Individuals, must be by post or e-mail, and can be forwarded to the Awards Committee Members, Pat EI2HX and Jim EI4HH, or to Peter Grant EI4HX, Chair of Awards Committee, QTHR, or by e-mail to ei4hxperimental /at/ eircom /dot/ net

Closing date for nominations is 29th February 2012.

South Eastern Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group will take place on Monday 27 February at 8:00 p.m. in the Roanmore GAA Club, Cleaboy Road, Waterford. Members are asked to attend and as always, visitors are welcome.

Please note that membership renewals for 2012 are now due. Membership costs 30 Euro and is available at a reduced rate of 20 Euro for pensioners, students and the unemployed. Please pass your payment on to any committee member or you can renew at the AGM on 27 February. Those who paid in November or December are fully paid up for 2012.

For information about the group, visit www.searg.com and you can also follow SEARG on Facebook and Twitter.

Limerick Radio Club

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

North Cork Radio Club

North Cork Radio Group will be activating Blackrock Castle as part of CASHOTA on the 4th March next 2 - 5pm as EI1NC/P. The Castle's reference is EI009/C. We plan to have a digi station in operation as well as possible satellite contact on the day. If you happen to be in the area, are interested in the hobby, or would like to come and visit us, we would be happy to see you. For those of you that are CASHOTA chasers, we look forward to hearing you on the air!

North Cork Radio Group are pleased to announce that they will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

Craggy Island DXpedition Group

We are delighted to announce that the Craggy Island Dxpedition Group has received its new callsign EI0TED which of course will be EJ0TED when operating from offshore Islands. Special thanks to Mr DerekO'Reilly in ComReg for putting our application through and keeping in touch about the progress.

It just remains for us to put together or plan of action for the forthcoming year and hopefully the weather will be with us. Much of the equipment has now been procured for the Island operations but the group is still waiting on a lighteight beam and a small Honda generator to complete the list. If there are more than two operations the Galway VHF Group Callsign,EI4ALE, will also be in use. These operations will contribute towards the WAI award scheme and also the WAI Islands award. The IOTA contest is certainly on the cards this year.

Our plans will be announced through the IRTS News Services and also on the Galway VHF Group news blog at www.galwayvhfgroup.com and we look forward to working as many as possible during our activations.

Talk on Amateur Television

As Part of Engineers Week members of South Dublin Radio Club will be giving a talk on Amateur Television on Thursday 1st of March. Rather than taking place where the club normally meets this will take place as part of a range of talks on Technology and will be held in Dublin city centre. More details are on the venues website: http://www.tog.ie

Every Tuesday the club will continue to demonstrate the new television repeater as part of the normal weekly meetings.

DX News

Bob N7MSU will be QRV again from Belize from 26 February until 15 March. He will use the callsign V31SU. Look for him on all bands 40 - 10m. QSLs go via his home call.

Alan G4XAQ will activate C56XA from the Gambia from 27 February until 15 March. Another station from the Gambia this week will be Luc F5RAV using the callsign C5LT. He will be there until 2 March.

Brian K1LI will sign J7Y from the Caribbean island of Dominica from now until 13 March. QSL info is via his home call.

The well known DXer Nigel G3TXF, who has recently returned from the Pitcairn Islands where he was one of the operators at VP6T, is on his travels again. This time his destination is St Helena in the southern Atlantic where he will sign ZD7XF. Dates are 29 February until 13 March with QSLs going via the home call.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th-February, through Sunday, 26th-February there were 232 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 DXU (Update/Press Release #3). Roger/G3SXW and Wayne/N7NG provided the following [edited]: "Dated February 22nd, 2012 - DX University® will take place at the Holiday Inn, Visalia, California, on Friday, 20th April,

2012. This major event is a first and has attracted a high-calibre of
speakers for the all-day program.
Places are limited but there are still a few seats available. Reser-
vations can be made at: http://www.dxuniversity.com/ As a bonus we will
give away several hundred dollars of door prizes on the day!
Rooms are still available at the Holiday Inn for Thursday night,
19th April. See: http://www.holidayinn.com
Contact Wayne <n7ng@bresnan.net> or Roger <g3sxw@btinternet.com>
with any queries. Principal Sponsor - ELECRAFT"

3C0, ANNOBON ISLAND (Delayed!). Operators Elmo/EA5BYP and Javier/EA5KM
continue to be active as 3C6A from Bioko Island (AF-010) which was expected
to last until February 26th. However, details on their Web page state on
Saturday, February 25th: "The two operators are now in Equatorial Guinea
(3C6A) and they are having problems in their journey to the island of
Annobon, so this will be delayed until Friday (March 2nd). They will
continue doing everything possible to give the entity to the largest
number of hams, but remember that they are only two persons." Their
planned activity as 3C0E from Annobon Island (AF-039; Pagalu) was to
last until March 11th, but there are no other details whether or not
to extend this operation. Activity will be on 160-6 meters using CW, SSB
and RTTY. See OPDX.1047 for suggested frequencies. QSL 3C0E (as well
as 3C6A) via EA5BYP: Elmo Bernab&#65533; Coll, P.O.Box 3097, 03080 Alicante,
Spain. For more details and updates, watch the Web page at:
http://www.gdgdxc.net/3c0e/index.php

3W, VIETNAM. Wayne, K6ZSJ, and his wife will change their QTH every 6
months from California to Nha Trang City. Currently, they are in Vietnam
and Wayne has been active as 3W7W since December. He states, "I'll be QRV
almost every day while here, so if we don't QSO today I'll be back soon
for another try, hi. Most frequently, 3W7W will be around 14200 kHz or
the low end of 40 meters CW." Wayne built a house right next to the South
China Sea with a radio room on the top floor and plans to mount a tower
or mast for his A3S tribander and 40m vertical to his 3rd floor deck.
QSL only via W3HNK direct or by LoTW.

6H, MEXICO (Special Event). Members of the Grupo DXXE will activate the
special event callsign 6H6IARU between April 13-18th. Operations will be
on all bands between 160-6 meters, as well as the amateur radio satellites
from different Grid Locators throughout Mexico. Activity is to celebrate
the 87th anniversary of the founding of the International Amateur Radio
Union (IARU), and to celebrate "World Amateur Radio Day" on April 18th.
This year's theme for the "World Amateur Radio Day" is Amateur Radio
Satellites: "Celebrating 50 Years in Space" in remembrance the launching
of OSCAR 1 on December 12, 1961, and the launch of OSCAR 2 on June 2, 1962.
QSOs with this station are valid for the IARU Region 2 award, the various
FMRE awards and the DXXE award <www.dxxe.org>. QSL via N7RO or LoTW.

60 METERS NEWS (Recommended Practices). With new privileges on the
60 meter band beginning March 5th, the ARRL announced this past week
"Recommended Practices" which were based on survey results and

subsequent research. The committee declined to propose a specific band plan for 60 meters at this time, but instead created a "Recommended Practices" document now available at:
http://www.arrl.org/files/file/Regulatory/Recommended_Practices_for_60_Meters%20-%20Version%206_4.pdf
Also, look for the April issue of QST magazine tp include an article by ARRL Regulatory Information Manager Dan Henderson, N1ND, that will offer a detailed discussions of the new 60 meter privileges and recommended operating practices.

6V, SENEGAL. Operators Mike/RA9FW and Igor/UA9CDC will be active as 6V7Z from "Le Calao Resort" between March 16-28th. Their activities will include the Russian DX Contest (March 17-18th) and the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single entry. QSL via RA9FW, direct or by the Bureau.

7P8, LESOTHO (Update). Donovan, ZS2DL, has finalized his team of operators, but has changed the dates for his DXpedition to Lesotho. Due to the "Roof of Africa Rally" (see <http://www.roofofafrica.org.ls>) taking place and all accomodations being taken for their original dates (November 9-19th), the dates have been changed to arriving in Lesotho on November 21st, and leaving December 4th. Operations will possibly take place between November 22nd and December 3rd. Naturally this means they will be an entry in the CQWW DX CW Contest (November 24-25th). The callsign will 7P8D. Operators mentioned are Donovan/ZS2DL (CW), Andrew/V51YJ (CW), Mitko/LZ1UQ (CW), Jo/DJ3CQ (CW), Chris/DL2MDU (CW/RTTY), Rhy/ZS1TT (SSB/RTTY), Frosty/K5LBU, Mitch/ZS2DK (SSB/RTTY) and Roger/ZS6RJ (CW/RTTY). Activity will be on 160-10 meters using CW, SSB and RTTY, with a minimum of three stations (possibly 5 stations) on the air 24/7. Suggested CW frequencies (listening up) are: 3504, 7024, 10103, 14020, 18078, 21020, 24900 and 28020 kHz. QSL direct via: LESOTHO DXPEDITION 2012, P.O. Box 29169, Sunridge Park, 6008, SOUTH AFRICA (w/2 USDs - Please no IRC as it is difficult to convert at the post office). A OQRS system (PayPal) will also be implemented just before the expedition. Logs will be uploaded to LoTW within 12 months after the DXpedition has ended. For more details, visit:
http://www.zs2dl.co.za/7P8D.html

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the ARRL DX SSB Contest (March 3-4th) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9G, GHANA. Look for 9G1AA to be active again from the Dormaa Hospital in Dormaa-Ahenkro between February 28th and about March 16th. A few different sources are reporting that Rob/PA3DEW and Vincent/PA3FQX are the operators. Activity is usually and mainly on 20 and 15 meters SSB. QSL via PA3ERA, direct or by the Bureau. Hopefully, more details will be forthcoming. To see past activities from 9G1AA, go to the "Dutch Amateurs Going On Expedition" (DAGOE) Web page at:
http://www.dagoe.com/9g1aa2.htm

9M2, WEST MALAYSIA. Takeshi "TAKE", JI3DST, will be active as 9M2/JI3DST (He states, "Now not fixed callsign.") from West Malaysia between 0000z,

March 10th and 0900z, March 11th. Activity will be on 80/75/40/30/20/17/
15/12/10/6 meters using CW, SSB and FM (no RTTY/PSK). Take states that
in case of heavy rain or other conditions, the operation's condition
may vary. QSL 9M2/JI3DST via JI3DST.

9M8, EAST MALAYSIA. Steve, 9M6DXX, informs OPDX that he will be active
as 9M8Z from Sarawak (OC-088) once again between March 23-28th. Activity
will include the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/
All-Band/High-Power entry. QSL Manager is M0URX. QSL direct (w/SAE plus
IRC or 2 USDs), by the Bureau, or LoTW. Direct or Bureau QSLs may also
be requested using the M0URX Online QSL Request Service (OQRS) at:
http://m0urx.com/oqrs

C5, THE GAMBIA. Willy, ON4AVT, will be active as C5AVT from near Banjul
between February 28th and March 20th. Activity will be QRP and mostly
on 15 meters PSK31 using a FT-817 and a Buddipole. QSL via his home
callsign, direct or by the Bureau.

C6, BAHAMAS. Steve, W2ML, will be active as C6A/W2ML from Nassau (NA-001)
between February 27th and March 5th. He is there on vacation and to be
in the ARRL DX SSB Contest (March 3-4th). Activity will be on all bands
using CW, SSB and PSK-31. QSL via the W2 Bureau or direct to his home
callsign.

CENTRAL AMERICAN TOUR. Andrei, NC2N (ex-NP3D), will be active as TG7/NC2N
from Guatemala between March 3-8th, and as HR5/NC2N from Honduras between
March 9-12th. Activity will be holiday style on 80-10 meters using CW,
RTTY and SSB. He also plans to be active while in Guatemala during the
ARRL SSB DX Contest (March 4-5th) as a Single-Op/Low-Power entry. Logs
will be uploaded to LoTW as soon as possible. Direct QSLs can be obtained
via W3HNK or RW6HS. Andrei will try to complete his 3rd Triple Play Award
from TG-land.

CY9, ST. PAUL ISLAND (Update to OPDX.1049). The callsign, dates and Web
pages have now been announced for the upcoming operation. Look for the
CY9M DXpedition to St. Paul Island (NA-094) to take place between July
26th and August 1st. The following media pages have been also announced:
Website: http://www.cy9m.com/
Twitter: https://twitter.com/#!/CY9M
Facebook: http://www.facebook.com/CY9M.2012
The 10 member team is looking for club/organization sponsors and individual
donors for this DXpedition. For details, please see the Web page.

DXCC NEWS (M-V Island Deleted!). Bill Moore, NC1L, ARRL Awards Branch
Manager, reported on February 23rd: "According to the Finnish Ministry
of Transportation and Communication, the Saimaa Canal Treaty between
Finland and Russia has been finalized by relevant Finnish and Russian
authorities through ratification.
The Treaty has entered into effect with a date of February 17, 2012.
Malyj Vysotskij Island (MVI), R1M, is no longer included in the Treaty.
Thus, MVI will be deleted from the DXCC list as of February 17, 2012,
and added to the Deleted Entities List.

Administratively at HQ, we will not make the necessary changes to the DXCC system until after the final data processing for 2011 is complete -- this includes the tables shown in Logbook of The World. (The 2011 DXCC Annual and Honor Roll listings will contain M-V Island as it stood in 2011, a current entity). This change will affect the Honor Roll numbers as follows:
#1 Honor roll will drop to 340 (down from 341)
The entry level Honor Roll number will drop to 331 (down from 332)

DXCC members will see their current entity totals drop by one on their Mixed awards, and on the bands and modes where MVI credit is given. They will also see their DXCC Challenge totals drop commensurately."

E5, SOUTH COOK ISLANDS (Update). Look for the E51M DXpedition that is going to North Cook Islands to also be active as E51EWP (not E51MCW as announced last week) from Rarotonga, South Cook Islands, between March 23-26th, and again between April 11-14th, before and after their operation on Manihiki (see OPDX.1044). Activity will be on all bands, including 60m, using CW, SSB, but with an emphasis on RTTY because there is a high demand for RTTY. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. For more details, see the E51M Web page at: http://www.manihiki2012.de

IOTA NEWS.............
AS-118. Members of the Kuwait Amateur Radio Society (9K2RA) will once again activate 9K2F from Failaka Island between March 7-12th. QSL via 9K2HN. For updates, visit the KARS's Web page at: http://9k2ra.net

AS-175. NEW IOTA! Look for an Indian team to be active using the special callsign ATBDW (callsign is correct) from Bet Dwarka Island (Bet Shankhodar) between March 15-31st. This island is in the Gujerat State West IOTA Group and has never been activated before. Activity will be on 80-10 meters using CW, SSB and the Digital modes. Operators mentioned are Sarla/VU2SWS (Group Leader), Milind/VU2IZO, Nand/VU2NKS, Deepak/VU2CDP, Basappa/VU2NXM, Laxman/VU2LX and Lion/VU2JHM. More details and a Web page are forthcoming.

J7, DOMINICA. Simon, G7SOZ, will be active as J79SZ from Dominica (NA-101) between March 7-15th. Activity will be mainly CW with some SSB, and he does plan to be an entry in the RSGB Commonwealth Contest (March 10-11th). QSL via G7SOZ, direct or by the Bureau. He does use the LoTW. For more details, visit: http://www.g7soz.net

KH6, HAWAII. Operators Tommy/VK2IR and Peter/VK2NN will be active as KH6/homecall from Hawaii between September 22nd and October 6th. This will be a holiday style DXpedition with the family, and they plan to operate 40-10 meters. They also hope to meet some of the local hams in the area. QSL via VK2IR.

** (Bureau, Direct or eQSL)

NEW QSL MANAGER. Mike, W2GR, informs the Ham community that he is now the QSL Manager of the following callsigns: EA8AY, EF8USA, EF8X and EE8X. QSL to W2GR via CBA direct only.

Barry, W2UP, informs OPDX that he recently returned from operating as PJ2/W2UP, Feb 14-21st. He has already uploaded his log to LoTW. Paper QSLs are available, direct only (no bureau cards) to his home address with SASE or SAE+IRC/greenstamp.

PR2I LOGS AND PICTURES. Fred, IK7JWX, reports that the logs and pictures are now online for the 2012 PR2I Italian/Brazilian DXpeditions to IOTA SA-024 and SA-071 at: http://www.i8lwl.it
QSLs are via direct with SASE (see PR2I at QRZ.com for info). QSLs by the Bureau are accepted via E-mail request at: ik7jwx2003@yahoo.it

PIRATE ALERT. YI1IRQ is not an active callsign. Any use of this callsign is a PIRATE. Any QSL sent to YI1IRQ will be returned unanswered.

PIRATE ALERT. Johan, ZS1A, reports: "ZD9GI went QRT on 15/9/11. There is a pirate operating now with that call. Please note info on QRZ.com <http://qrz.com/> and please do not send QSL card if after that date." Also, John, ZS1LF/ZD9GI, reports [edited]: "I don't operate CW, but I see there has been a Pirate using the ZD9GI callsign, and he was busy on 40m. The ZD9GI Gough Island (WAP ZAF-05) is no longer operational as I am QRT as of the 15th, September 2011. Any new contacts will be a pirate operating and QSL cards will not be honored. I have updated my QRZ page as well putting the alert on it. It was ON5NT, that warned me about the pirate. Actually, there are no Hams on Gough Island at this time; it will take a few years for one to go down again."

QSL RECEIVED VIA LoTW: 3G200DI, 4U1WRC, 9J2RI, A41OO, BA7IO, D2QV, E51BKV, EI2JD, F5IDJ, F5PSG, FK/F4BKV, HR5/NQ5W, HU2DX, JA6TMU, KH6/AA4V, LA5VSA, LZ1BJ, NH2T, OE3TAC, OL7M, P33W, PH9HB, PJ2/WI9WI, S51B, S51DX, S53M, SP7XK, ST2AR, T32AU, T6JP, UA0IT, V31YN, V44KAI, VK3BM, VK4MIA, WH6S, YS3CW, Z37M and ZM4M

TO11, GUADELOUPE. Gildas, F6HMQ, (along with Michel, F6GWV) will once again be active from Guadeloupe (NA-102) using the special callsign, TO11A, between March 2-16th. They plan to be active in the upcoming ARRL DX SSB Contest (March 3-4th) as a Multi-Op entry. Outside the contest, look for activity on 6 meters. QSL via F6HMQ.

TP8, FRANCE. The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP8CE between March 9-11th. Activity is to celebrate the 40th anniversary of the European Youth Center. Operations are usually on all HF bands and modes, and possibly the satellites. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

V5, NAMIBIA (Update). Operators David/GI4FUM and XYL Gillian/GI8MIV, along with Richard/GI4DOH, Kalle/DM3BJ and Andre/V51B will be active from Oranjemund for the CQWW WPX SSB Contest (March 24-25th) as a Multi-Op entry. Callsign has not been announced yet. The week before the contest operators will be active on the HF bands using CW, RTTY and PSK31. Skeds may be requested via <GI4FUM@arrl.net>. QSLs for this operation should go via David, GI4FUM (QTHR).

XT, BURKINA FASO. A group of Japanese operators will be active from Ouagadougou between March 21-28th. Operators mentioned are Yukinori/ JA3VWT (XT2VWT), Kitai/JA3IVU (XT2IVU), Junichi/JH3AEF (XT2AEF), Shusuke/ JO3VVO (XT2VVO) and possibly other JA operators. Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL via their home callsigns, direct or by the Bureau. Their was some indication that the XT2CEFIG club station may also be activated.

Z8, SOUTH SUDAN. It was announced this past week that the Republic of South Sudan was issued/allocated the prefix block Z8A-Z8Z by the International Telecommunication Union (ITU). A complete list of all the prefixes are available at: http://www.itu.int/online/mms/glad/cga_callsign.sh?langen

ZD7, ST. HELENA. Nigel, G3TXF, who was active as ZD8XF from Ascension Island (AF-003) this past week, will be active as ZD7XF from St. Helena (AF-022) between February 29th and March 13th. Activity will be mainly focused on 160 and 80 meters CW, with an entry in the RSGB's Commonwealth Contest [BERU] (March 10-11th). QSLs via G3TXF. For more info and updates, go to: http://www.g3txf.com/dxtrip/ZD8-ZD7-Feb-12/ZD8-ZD7.html

Kids can Discover Amateur Radio at the Surrey Museum:

Posted: 25 Feb 2012 04:12 PM PST
http://www.eham.net/articles/27789

Hurricanes, fires, floods, and earthquakes happen, but you can count on amateur (or ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20 from 2-4 p.m., join the Surrey Museum and the Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop for kids. The workshop will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational. The workshop will provide kids with a hands-on experience of how amateur radio systems work and the technology used. (For ages nine and over. Admission is free. Space is limited so please pre-register by calling 604-592-6956. Held at the Surrey Museum, 17710 56A Ave.). Communications infrastructure (cellphone, regular phone, or the Internet) is usually one of the first services to fail in a major emergency due to damage, lack of electricity and/or overload. Ham radio uses direct radio to radio communication independent of commercial systems, allowing emergency messages to get through.SEPAR operates under the direction of the Surrey Fire Department and would be called out at the request of the Surrey Emergency Program.

//
Gary R. Goodwin, KC8TGP (SK):

Posted: 25 Feb 2012 04:11 PM PST
http://www.eham.net/articles/27788

Gary R. Goodwin, 76 of Dade City, Fla., (formerly of Marietta) passed away on Friday (Feb. 3, 2012). He was born May 3, 1935, in Marietta. He graduated in 1953 from Marietta High School and served in the United States Army. He retired in 1992 from Monongahela Power Company after 34 years where he worked as an electrician. He was an avid Ham Radio Operator, call letters KC8TGP.

GB2RS NEWS

Sunday 26th February 2012

The news headlines:

* National Radio Centre opens its doors

* Improved access at 5MHz

* New RSGB VHF Manager

The National Radio Centre at Bletchley Park opened its doors for the first time on Saturday 25 February. It is initially operating for three days a week, Thursday, Saturday and Sunday, while the displays and exhibits are put through their paces. The formal opening is expected to take place in late spring. The date will be announced later.

Following proposals from the RSGB to Ofcom, aimed at harmonising NoV access to 5MHz with that access enjoyed by radio amateurs in other countries, the Society has received an offer from the MoD. It was reported earlier that the MoD were unable to meet our request for access over a continuous range, ie a band, so at our request have offered a number of small frequency blocks, which include all of the present 3kHz wide channels. Since the response is quite complex, the Society is to seek views using its new Litmus Test process on how it should respond. This Litmus Test will be open to all UK radio amateurs and will commence on 1 March. More information can be found on the RSGB website, following the link on the home page to Consultations.

The Society is pleased to announce that Terry Stevens, G8DKS has been appointed VHF Manager, with immediate effect. The role covers the development of the hobby and spectrum management issues, both nationally and internationally, on frequencies between 30MHz and 1GHz.

In the March edition of RadCom it was announced that the Society is about to start a month's consultation on the draft Spectrum Strategy that has been prepared by the RSGB Spectrum Forum. The consultation will go live on Thursday 1 March. The draft strategy and links to the online response form can be found by following the We Need Your Views link on the right hand side of the RSGB home page. We hope that as many amateurs as possible will provide us some feedback on this important subject, and that where possible people will help others who are not familiar with the web or have a disability that otherwise would make it difficult to participate.

Ofcom has today published an addendum to the second consultation on assessment of future mobile competition and proposals for the award of 800MHz and 2.6GHz spectrum. The addendum clarifies proposals for the spectrum portfolios that would be available to opted-in bidders if Everything Everywhere was to divest its 1800MHz spectrum before the planned auction at the end of 2012.

Ofcom has announced a GPS jamming exercise between 5 and 9 March near RAF Spadeadam in Cumbria. From 8am to 6pm there will be multiple jammers based within 5km of N55° 04.000' W002° 34.000', operating within the 24MHz band centred around 1575.42MHz. It is stressed that, as in previous exercises, Safety of Life operations will, at all times, take precedence over exercise activities. And now for the details of rallies and events for the coming week

Today, 26 February, the Rainham Radio Rally takes place at the Rainham School for Girls, Derwent Way, Rainham, Gillingham ME8 0BX. The opening time is 10am. Details from Trevor, G6YLW on 07717 678 795.

The Cambridge & District Amateur Radio Club Rally will take place on 4 March at the Wood Green Animal Shelter, King's Bush Farm, on the A1198 London Road at Godmanchester PE29 2NH. Doors open at 10am and entry is £3. There will be trade stands and a Bring & Buy with talk in on S22. Contact John, G0GKP, on 01954 200 072.

Also on 4 March, the Exeter Radio & Electronics Rally takes place in America Hall, De La Rue Way, Pinhoe Exeter EX4 8PW. Doors open at 10.30am and admission is £2. There will be trade stands and a Bring & Buy. More information from Pete, G3ZVI on 07714 198 374.

Now for the news of special events

On Saturday 3 March, the Northampton Radio Club will be activating special event station GB5XX at Daventry Town Council Museum, from 10am to 4pm. The station is commemorating 80 years since the first short wave broadcasts to the Empire from Daventry radio station, 5XX. Operation will be on 20m, 17m, 2m and 70cm. More information from John Cockrill, G4CZB on 01604 832 584, in the evenings only please.

And now the HF DX news compiled from 425 DX News and other sources

Jean-Pierre, F6ITD will operate SSB and digital modes on the HF bands from Guadeloupe, which is IOTA reference NA-102, until 13 March. QSL via his home callsign, either direct or via the bureau.

DJ0IF and SP7VC will be on the air from Madeira Island, which is IOTA reference AF-104, from 29 February to 7 March as CT9/home callsign. They will be in ARRL DX SSB Contest on 3 and 4 March as CR3L. QSL for CR3L is via DJ6QT and for CT9/DJ0IF and CT9/SP7VC via their home callsigns.

Phil, G3SWH and John, G3OLU/EA5ARC will be operating as 3DA0PW from the well-equipped Hawane Resort in Swaziland. The station includes Elecraft K3 transceivers, Icom IC-2KL amplifiers, an A4S at 24m and an A3WS at

20m, a wire 4-square for 40m and a vertical for 80m complete with thirty 20m long radials. The two will active until 29 February, CW only, on 80 through to 10 metres. Plans are to have two stations active as much as possible each day. Subject to a good internet connection, there will be an online log on Phil's website and daily uploads to LoTW. QSL via G3SWH either direct, via OQRS or via the bureau.

Now the contest news

Sunday 26 February sees the first 70MHz Cumulative, which runs from 1000-1200, 70MHz only, on all modes. The exchange is RST plus serial number and locator.

The 50MHz UK Activity Contest takes place from 2000 to 2230UTC on 28 February. Using all modes on the band the exchange is signal report, serial number and locator.

At the same time the SHF UK Activity Contest takes place on the 2.3 to 10GHz bands. Using all modes the exchange is signal report, serial number and locator. The 144/432MHz Contest takes place for 24 hours on 3 and 4 March. There are Open and Single-op categories and 6-hour and 24-hour sections, with 6-hour entrants being able to split their operating into two sessions if they wish. Using all modes the exchange is signal report, serial number and locator.

The ARRL International DX contest runs for the full 48 hours of the weekend of 3 and 4 March on the 1.8 to 28MHz bands. Work US stations in the contiguous 48 States, plus Canadians. Send a signal report and your transmit output power. There are sections for QRP as well as low and high power. US stations send a signal report and 2-letter State abbreviation, while Canadian stations send a signal report and 3-letter Province code.

And now the solar factual data for the period from Friday the 10th to Thursday the 16th of February, compiled by Neil Clarke, G0CAS on the 17th of February.

Only a small number of sunspot groups were visible this week. Most of these were small and quiet with only a couple of groups producing small C class solar flares on the 19th, 20th and the 21st. The remaining days activity was at very low levels. Solar flux levels varied little day to day and averaged 105 units, however, on the 20th flux levels increased to 111 units. The 90 day solar flux average on the 23rd was 130 units, that's two units down on last week. X-ray flux levels averaged B2 units and varied little. Geomagnetic activity started at very quiet levels with an Ap index of only 2 units on the 17th but by the 19th and the 20th activity increased due to a small coronal hole disturbance. The most disturbed day was the 20th with an Ap index of 17 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 280 kilometres per second on the 18th to 650 by the 20th. Particle densities were low every day except for the 18th and the 19th which increased to 32 and 19 particles per cubic

centimetre respectively. Bz varied between minus and plus 3 nanoTeslas on the quietest day and between minus 12 and plus 10 nanoTeslas during the disturbance. Aurora was noted late on 19th and during the afternoon on the 20th, though mainly on 50MHz. The higher HF bands were patchy, though on a couple of days MUFs were comfortably above predicted values.

And finally the solar forecast. Later this week the quiet side of the Sun is expected to be rotating into view. Therefore, solar activity is expected to be very low to low. Solar flux levels should be not much higher than 100 units. Geomagnetic activity is expected to very quiet for the first half of the week but towards next weekend activity could increase slightly due to a small coronal hole. MUFs during daylight hours at equal latitudes should be around 27MHz for the south and 24MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

NEWS FOR THE MIDLANDS On Monday 27 February Friskney & East Lincolnshire Communications Club is holding a club net on 144.165MHz USB from 7pm. Contact Chris, M0MFP, on 01507 442 240.

On Monday 27 February Gloucester Amateur Radio & Electronics Society is having an informal, workshop and operating evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 27 February South Birmingham Radio Society is putting the shack on the air and having a ragchew. Contact Don, on 01214 581 603.

On Monday 27 February Stratford Upon Avon District Radio Society is holding a skittles evening. Contact G0CHO, on 01608 664 488.

On Tuesday 28 February Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 28 February Lincoln Short-Wave Club is taking part in the 50MHz UKAC from the Shack. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 28 February Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 28 February Worcester Radio Amateurs Association is holding a project night. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 28 February Wythall Radio Club is having a talk on garden antennas by Callum, M0MCX. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 29 February Friskney & East Lincolnshire Communications Club is holding a M3 + M6 members club net on GB3FR from 7.30pm. Contact Chris, M0MFP, on 01507 442 240.

On Wednesday 29 February Lincoln Short-Wave Club is having a talk by Jim, G0EJQ, on the future of the RSGB. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 29 February Midland Amateur Radio Society is holding laptop computer training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 29 February Telford & District Amateur Radio Society is planning its contest, portable and 2m DF hunts for 2012. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 1 March Lincoln Short-Wave Club is running its club net on GB3LM from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356. On Thursday 1 March Salop Amateur Radio Society continues its Foundation course, having a natter night and holding a committee meeting. Details on the club website at www.salop-ars.org.uk.

On Thursday 1 March South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 2 March Coventry Amateur Radio Society is having a talk on radio operation in VK by G8SEQ. Contact John, G8SEQ, on 07958 777 363.

On Friday 2 March Friskney & East Lincolnshire Communications Club is holding a club net on GB3FR from 8pm. Contact Chris, M0MFP, on 01507 442 240.

On Friday 2 March South Birmingham Radio Society is holding a construction evening. Contact Don, on 01214 581 603.

On Saturday 3 March Lincoln Short-Wave Club is in the shack from nine till noon. For more information contact Pam Rose, G4STO, on 01427 788 356.

NEWS FOR THE NORTH OF ENGLAND On Monday 27 February Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 27 February Sheffield Amateur Radio Club is watching the BBC video about early radio, Shock and Awe. More information from Peter

Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 27 February South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 01619 693 999.

On Monday 27 February Thornton Cleveleys Amateur Radio Society is holding a discussion group. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 28 February Chester & District Radio Society is having an operating evening. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 28 February Halifax & District Amateur Radio Society commences its new Foundation course. Anyone wishing to join should e-mail at G2UG@hadars.org.uk or phone Martin, M0GQB, on 01422 341 317.

On Tuesday 28 February Morecambe Bay Amateur Radio Society is having a radio doctor's night with Bob, G3VVT. Contact Sheila, on 07867 516 836.

On Wednesday 29 February Denby Dale Radio Club is visiting to Mirfield ATC, including a Heart Start first aid training session aimed at electrical and radio type situations. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 29 February Hornsea Amateur Radio Club is holding a committee meeting. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 29 February Maltby & District Amateur Radio Society starts its Buildathon. More information from Keith, G1PQW, on 07801 156 678.

On Wednesday 29 February Mid-Cheshire Amateur Radio Society is watching the VHF NFD video. Contact Peter Paul Fox, G8HAV, on 01606 553 401. On Thursday 1 March South Manchester Radio and Computer Club is having a talk on 10 events from history by Nigel, M6NDG. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 1 March Wakefield & District Radio Society is holding a social evening and is on the air from the club shack. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 2 March East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 2 March Tynemouth Amateur Radio Club is running Morse tuition and putting G0NWM on the air. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 3 March Wakefield & District Radio Society is holding an Advanced exam at 1400. There is no Foundation course today. Contact Dr David Lockwood, G4CLI, on 07748 221 855.

NEWS FOR NORTHERN IRELAND On Thursday 1 March Bangor & District Amateur Radio Club is having a presentation on D-Star by Charlie, GI4FUE. Contact Mike, GI4XSF, on 02842 772 383.

NEWS FOR SCOTLAND On Tuesday 28 February Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 29 February Glenrothes & DRC is holding an operating evening from 7.30pm. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 1 March Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 1 March Paisley Amateur Radio Club is having a talk by 2M0OXQ & MM0NAE on operating a Yaesu radio. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Friday 2 March Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 26 February Horsham Amateur Radio Club is holding a fox hunt. Details are on the web at www.harc.org.uk.

On Monday 27 February Maidstone YMCA Amateur Radio Society is having a visit from Keith Bird, RSGB region 12 DRM. More information from Howard Vicary, G0RJN, by email to hvicary@hotmail.com.

On Monday 27 February Norfolk Amateur Radio Club is running its club net from 19.30 on GB3NB. Details from Chris Danby, G0DWV, on 01603 898 678. On Tuesday 28 February Bedford and District Amateur Radio Club is looking at construction techniques. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 28 February Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 28 February Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 28 February Dorking & District Radio Society is having a talk on early TV receivers by Stephen Niechcial. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 28 February Harwell Amateur Radio Society is having a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 28 February Home Counties ATV Group is having a talk by Noel, G8GTZ, on the move of GB3HV Mark 2 to Woodcote. Contact Pete, G8FRC, on 01189 695 697.

On Wednesday 29 February Crawley Amateur Radio Club is having a presentation on the T32C experience by team member Mike Chamberlain, G3WPH. More information from John, G3VLH, on 01342 714 402.

On Wednesday 29 February Norfolk Amateur Radio Club is opening the shack and workshop, having an informal meeting and Bright Sparks. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 1 March Bredhurst Receiving and Transmitting Society is having a club meeting. Contact Andrew, M6AAE, on 07403 325 075.

RAC Bulletin 2012-015E - Earle Smith, VE6NM - SK
2012-02-25

It is with regret that Radio Amateurs of Canada has learned that Earle Smith, VE6NM, a RAC past President, passed away peacefully after an illness on Friday, February 24th.

Earle had served as President of RAC from late 2004 to the end of 2007 and was well respected by amateur radio operators both within Canada and Internationally. He was a gentleman and friend to all hams and a strong advocate for amateur radio and for the Radio Amateurs of Canada.

All who knew Earle respected him as a leader, a friend and a force for good in the amateur radio community. We will miss him. The amateur community can post condolences which will be forwarded to the family at http://earlesmith.rac.ca.

Geoff Bawden, VE4BAW
President and Chairman of Radio Amateurs of Canada

http://forums.qrz.com/showthread.php?335536-Surfin-Hunting-Broadcast-Radio-Transmitters&goto=newpost

Surfin: Hunting Broadcast Radio Transmitters [FONT=Century Gothic]

TAGS: AM radio, antenna towers, Bob Mudra, displays, google map, Internet, radio stations, Stan Horzepa, technical information, transmitter, TV station, valley, WA1LOU blog, watr

02/24/2012

By Stan Horzepa, WA1LOU

Contributing Editor

This week, Surfin wonders where the transmitter went -- and finds it on the Internet.

It was easy when there were only three AM radio stations in town. The antenna towers of WATR were only two blocks away and dominated my neighborhood. WWCO's tower was clearly visible up the valley about three miles away, and WBRY's towers were a little further north -- not visible from my home -- but an easy spot when traveling around the north end of town.

But things got complicated.

WATR added a TV station to the mix, call signs changed, WATR TV moved from the AM radio site, FM stations came on the air, FM stations changed hands and changed call signs, new towers went up here, there and everywhere. You couldnt tell a radio site without a scorecard.

Need a scorecard?

Radio-Locator fills the bill. It claims to be the most comprehensive radio station search engine on the internet with links to over 10,000 radio station web pages and over 2500 audio streams from radio stations in the US and around the world.

You can search by location or call sign. When Radio-Locator finds a station, it displays its technical information including the coordinates of the stations transmitter. Click on the coordinates and a new browser window

opens a Google Map, displaying the transmitters location. How cool is that?

Thank you, Bob Mudra, AK9RM, for reminding about Radio-Locator.

Until next time, keep on surfin

Titans in Space Near Space Upcoming Balloon Launch - LEO-1

Posted: 26 Feb 2012 06:01 PM PST
http://forums.qrz.com/showthread.php?335496-Titans-in-Space-Near-Space-Upcoming-Balloon-Launch-LEO-1&goto=newpost

The Olde Towne Middle School Radio and Technology Club & Science Club would like to announce their upcoming near-space balloon launch. The launch will take place March 3rd at 9:30 plus or minus a little for wx delays. The balloon and payload will be named Leo-1 after Leo McGehee K5LEM (SK) who was a vital member of our chase on our first balloon launch last Spring. This year we are focusing on using the balloon as a payload delivery system for science projects that are dependent on getting into the stratosphere.

One major change is that we are attempting a HF and VHF telemetry reception record as shown on arhab.org. Please let your friends in South America and Europe know about the flight and what to listen for. If you copy telemetry from either unit, email or snail mail me(N5VEI or KC5NXD) your copy to receive a QSL card. We need all the reports we can get, ESPECIALLY THOSE FROM OVERSEAS OR SOUTH OF THE BORDER!

Below are the flight details:

Olde Towne Middle School Near-Space Exploration Program 2011-2012

Mission name: LEO-1 (dedicated to Leo McGehee, K5LEM (SK))

Date: Primary March 3, 2012 - 9:30am Central time, backup - March 4th 1pm Central time

Launch location: Gluckstadt, MS near the Nissan Plant (142 Calhoun Parkway, Madison, MS)

Payload: Balloon - Kaymont 1200g, Gas - He, Parachute - modified 5 ft. rocket chute

Radio payload:

Big Red Bee APRS - KC5NXD-12 (webpage: aprs.fi and search for the callsign), SPOT Locator, GOPRO HD camera, voice beacon on 146.565 Mhz, HF telemetry - Frequency: approx 14.104 (plus 1500 on the waterfall) 1 minute on and 1 minute off - DominoEx-16, RTTY 110, CW (DominoEx16 ☐ full telem., RTTY 110 ☐ full telem., Hell and CW are Altitude only). Common software for all modes is FLDigi. #Google: FLDigi high altitude balloon. #Set it up to relay telemetry to the internet if you can - setup guide: http://ukhas.org.uk/guides:tracking_guide.

Science payload:

Mini Wx Station, high speed particle test, DNA mutation bacteria, adhesion test, extreme battery test, low pressure expansion test, elasticity test, water loss test, sound distortion test

Tracking: 1) go to the following webpage: http://aprs.fi and search for the callsign KC5NXD-12

2) go to http://spacenear.us/ and look for either KC5NXD or N5VEI

Prediction page: http://nearspaceventures.com/w3Baltrak/readyget.pl

Radio and Tech Club Goals:

1) Reach 85,000 feet

2) Recover the payload

3) Get students interested in science experimentation

4) Get the students and the public interested in amateur radio and near space exploration

5) Encourage science techniques, experimentation, and developing engineering skills

Science Club objectives:

1) Engage students in STEM related hands-on learning

2) Promote critical thinking skills

3) Increase science awareness with real-world applications

4) Develop sound experimental designs utilizing the scientific method

5) Conduct quantitative analysis to aid in scientific skill development

Possible mission scrub causes: Excessive winds, rain, severe weather

Sponsors: ###

1) Frank Howell, K4FMH - k4fmh.com - Big Red Bee GPS unit

2) Mississippi State University - Helium gas

3) Bill Richardson, N5VEI - OTMS Radio and Tech Club sponsor

4) Bobby Robinson - OTMS Science Club sponsor

###

Equipment: GOPRO Camera, Big Red Bee Balloon APRS unit, Doppler DF Instruments voice beacon, SPOT Locator, WB8ELK HF telemetry unit, and one unregistered geocoin to count as possibly one of the first if not the first to go to the stratosphere.

Needs:

Sponsors

Tracking teams

Local monitors for APRS and other tracking systems

Response from Ofcom on 5 MHz NoV:

Posted: 26 Feb 2012 04:26 PM PST
http://www.eham.net/articles/27791

Following proposals from the RSGB to Ofcom, aimed at harmonising our NoV access to 5 MHz with that access enjoyed by radio amateurs in other countries, the Society has received an offer from the primary user, which in the UK is the MoD. As has been reported earlier the MoD was unable to meet our request for access over a continuous range, i.e. a band, but has offered a number of small frequency blocks, which includes all of the present 3 kHz wide channels.

Greetings,

Do you shop online?

This method of shopping for goods and services has become as
common as going to the local convenience store for bread and milk.

I am an Internet Marketer offering to donate net profits from
commissions earned and the link below explains the offer in more
detail. I believe no human should go without the basic necessity
of life -- Food. A healthy person can be more productive in society
and less dependent on government programs.

I urge you to join me in this effort -- you will pay no more than
you would otherwise pay through any other link. Go ahead and click
the link below to get the details on this program.

Special Event Station - VO1AA - April, 25, 2012
2012-02-26

The Society of Newfoundland Radio Amateurs (SONRA) will make history
on April 25, 2012

April 25th each year marks the birthday of Guglielmo Marconi, who
received the first wireless signal at Signal Hill, Newfoundland on
this date. This April 25th, SONRA will celebrate the event with making
an Amateur Radio contact with Princess Elettra (Marconi) who will be
in Bologna Italy to celebrate her father's birthday. It is planned to
have the Canadian Heritage Minister, the NL Premier , the City of St.
John's Mayor along with the NL Lieutenant Governor, exchange greetings
with the Princess via Amateur Radio from VO1AA at Cabot Tower.

This is the first time that this event has been attempted, and it is
anticipated that it will be a high level media exposure for Amateur
Radio in Canada.

SONRA appreciates the wonderful relationship that it enjoys with Parks
Canada, Signal Hill National Historic Site, and looks forward to many
years of commemorating this important event.

Highlights of Solar and Geomagnetic Activity
20 - 26 February 2012

Solar activity was at very low to low levels. Regions 1421 (N18,
L=133, class/area = Cro/30 on 20 February) and 1422 (N15, L=177,
class/area = Dsi/330 on 21 February) each produced isolated C-class
activity, the largest a C4 at 20/0509 UTC from Region 1421. The most
significant event of the period was a filament eruption from the
northeast quadrant early on 24 February associated with an
Earth-directed coronal mass ejection (CME).

No proton events were observed at geosynchronous orbit. An
enhancement of the greater than 10 MeV proton flux at geosynchronous
orbit began around 25/0300Z and continued through the remainder of
the period (peak flux of 4.6 pfu at 26/0055 UTC). The enhancement
was associated with the filament eruption observed on 24 February.

The greater than 2 MeV electron flux at geosynchronous orbit
increased from normal to high levels during 20 - 22 February due to
effects from a coronal hole high speed stream (CH HSS). Fluxes
decreased to mostly moderate levels during 23 - 26 February.

Geomagnetic field activity was at unsettled to active levels with
minor to major storm periods at high latitudes due to CH HSS
effects. Activity decreased to quiet to unsettled levels on 21
February as CH HSS effects subsided. Quiet to unsettled levels were
observed on 22 February with active periods at high latitudes due to
the onset of another CH HSS. Activity dropped to mostly quiet levels
on 23 February as CH HSS effects subsided. Mostly quiet to unsettled
levels occurred during the remainder of the period (24 - 26
February) with the exception of isolated active to major storm
levels at high latitudes on 25 February. A Sudden Impulse (19 nT)
was observed on 26 February marking the arrival of the 24 February
CME.

Forecast of Solar and Geomagnetic Activity
29 February - 26 March 2012
```

Solar activity is expected to be very low to low during the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 29 February - 17 March. Flux is expected to increase to moderate to high levels on 18 - 19 March due to effects from a recurrent CH HSS. Predominately normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to begin with quiet to unsettled levels on 29 February as effects from the 24 February CME subside. Predominately quiet levels are expected during the forecast period. However, unsettled conditions are likely on 02, 05 - 07 and 11 March due to weak CH HSS effects and unsettled to active conditions are expected on 17 - 20 March due to a more prominent recurrent negative polarity CH HSS.

Patrick Germond: Help with the Hams:

Posted: 27 Feb 2012 04:23 PM PST
http://www.eham.net/articles/27794

"No worries, mate, no worries. Give your Sheila a kiss for me. Sydney, Australia clear." "Copy that, Sydney. Take care and I'll talk to you later. This is Kilo Delta Zero Juliet Alfa India out, and the frequency is clear." What you just read was part of a short wave (ham radio) conversation I had with a fellow from down under last October. I would like to take a moment to share with you some of the details of ham radios, and why it's a growing hobby among future electrical engineers, hobbyists, and preppers.

//
Ham Radio Operators Check in to the Battleship:

Posted: 27 Feb 2012 04:17 PM PST
http://www.eham.net/articles/27793

WILMINGTON, NC (WECT) - The Battleship North Carolina is used to getting visitors from all over the world. But today, some of those visitors visited the ship through the airwaves. Sunday was North Carolina's QSO Party. QSO is code that amateur radio operators use when they've made contact with someone else. The battleship is one of four locations across the state where people who successfully QSO them can get extra points. Each week a different state has a QSO party and this weekend, ham radio operators from every North Carolina county participated. "The possibility of potential is worldwide," said Azalea Coast Amateur Radio Club member Allan Pellnat.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

February 29, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- ARRL DX Phone - Everybody Crosses the Pond
- Type Fast - NA RTTY Sprint
- Free Contesting Webinar - Schedule Update
- New Contest from China
- Round 'n Round We Go Echoes
- More Log Submission Records Fall - CQ WPX RTTY
- Incoming! Space Alerts and Warnings
- Rubber Crystals - No Joke!
- Recordum Quod est Locutus

==> NEW HF OPERATORS - THINGS TO DO

This weekend brings the phone weekend of the venerable ARRL DX Phone
contest, now more than 80 years old and the oldest of all radiosport
contests. With all the DX beaming your way, fill your log with
long-distance contacts and practice your pileup and copying technique.

BULLETINS

There are no bulletins in this issue

BUSTED QSOS

Clarifying the WRC-12 report from the last issue - the new allocation
will not take effect until it is entered into the Radio Regulations. No
date has been set for this, but it is unlikely to be earlier than
January 1, 2013. In any case, no amateur can use the band until his or
her national regulations are revised to implement the allocation.
(Thanks, Khrystyne K1SFA)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

March 3-4
```

- SNS and NS Weekly Sprints--CW (Mar 2)
- ARRL International Phone DX Contest
- Worldwide EME Contest
- Open Ukraine RTTY Championship
- OK1WC Memorial Contest (Mar 5)
- ARS Spartan Sprint--CW (Mar 6)
- YL CW Party (Mar 6)
- John Rollins Memorial DX Contest--CW (Mar 7)

Mar 10-11

- RSGB Commonwealth Contest--CW
- AGCW QRP Contest--CW
- QRP ARCI HF Grid Square Sprint--CW
- EA PSK63 Contest
- Idaho QSO Party
- North American RTTY Sprint
- Wisconsin QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The following schedule of free webinars comes from Potomac Valley Radio Club President K4ZW, Ken Claerbout:

Title: N1MM Logger in Depth: Part 1 - Overview
Date: Tuesday, February 28 at 9 PM EST
Title: N1MM Logger in Depth: Part 2 - Digital Modes and Multi-Op
Date: Tuesday, March 6 at 9 PM EST
Title: Getting Started In Digital Contesting
Date: Sunday, April 1 at 3 PM EDT

The web link to registration is posted on the PVRC website <http://www.pvrc.org/> under the Upcoming Webinars link.

The WRC-12 Plenary meeting agreed that WRC-15 will consider a possible new secondary amateur allocation within the band 5250 - 5450 kHz in accordance with Resolution COM6/12 (WRC-12). A worldwide amateur allocation on 60 meters draws ever closer - patience! (Thanks, Frank W3LPL)

Also drawing closer is the summer thunderstorm season here in the US. This would be a great time to spend a few hours in a National Weather Service (NWS) SKYWARN training session <http://skywarn.org/skywarn-training/>. Even with the advances in Doppler radar and other monitoring marvels, the NWS relies on the eyes and instruments of observers. Contesters make great weather spotters, too, being accustomed to exchanging information accurately and efficiently. Here's a great way to put your talents to work for your community - especially younger hams looking for a way to make meaningful contributions.

Here's an interesting remote rig control interface <https://picasaweb.google.com/lh/photo/vRvw9TECtZN0wp68n-G4ukCW0xPRFk9-O49_QJlUHTI?feat=directlink>

based on the iPad. It also logs your contacts! (Thanks, Brian K1BRF)

Jim AD1C has released version 3.1 of PASS
<http://software.ad1c.us/pass/> - a program to analyze passing stations
from band-to-band during contests. This version includes pass_win.exe
which will work from a command prompt under Window 7/Vista as well as
Windows XP.

There has been a lot of discussion of the Sun's activity and potential
effects on terrestrial electronic and power distribution systems. You'd
never know it from the current state of the higher HF bands but there
were a lot of sunspots just a couple of months ago - and they could
return at any time. Not known for alarmist narrative, this IEEE
Spectrum article "A Perfect Storm of Planetary Proportions
<http://spectrum.ieee.org/energy/the-smarter-grid/a-perfect-storm-of-planetary-proportions
>"
reviews susceptibility to solar surges.

Rick NQ4I notes that the NQ4I multi-multi team has preferred using the
cqcontest <http://cqcontest.ru/> Russian real-time contest score
posting website. There are plenty of features, including display of
scores and multipliers.

With interest building in the eventual MW (medium wave) amateur
allocation, readers may be interested in the printed monthly magazine
called "Lowdown" published by the Longwave Club of America
<http://www.lwca.org/>, covering everything on LF from "Natural Radio"
(atmospherics) to 500 kHz, experimental stations, technical content,
and a stations-heard listing. (Thanks, Bob K2EUH)

After a weekend of listening to Reverse Beacon Network spot-clickers
all winding up approximately exactly zero-beat with each other on a DX
station, here's a good one from Guy N7ZG - "If QNZ means 'please zero
beat my frequency' then how about adding QTK, meaning "Will you
knuckleheads please spread out?""

Web Site of the Week - Notice just reached the Contest Corral of a
brand-new contest from China - the Worked All Provinces of China
<http://www.mulandxc.org/?page_id=2> (WAPC), sponsored by the Mulan DX
Club. A "test" run will be held on 21 April from 0000-2359Z and the
main event is currently planned for October 6th. It is great to see a
Chinese-sponsored HF DX contest! (Thanks, Randy K5ZD and Fred K3ZO)

WORD TO THE WISE

Pass - In a multi-operator station, it's a good idea to keep your eye
on the logging software to notice if the station you are working is
needed on another band for a multiplier. If so, ask them if they will
move for you - it's called "passing the multiplier" and a well-executed
sequence of ringing up a few new ones, particularly late in the
contest, is really exciting to see!

==> SIGHTS AND SOUNDS

During the 2011 CQWW CW there were good conditions on the 15 meter band and Julian VK4CMV recorded signals with extreme echoes from SK3W - near his antipode. In this YouTube video <http://youtu.be/_T0BoAjCbzg> you can hear strong echoes that are delayed almost a half second. While not quite as much time elapsed as for Long Delayed Echoes, this is clearly unusual propagation. (Thanks, Ingo SM5AJV)

The solar wind stream that hit Earth's magnetic field on Feb. 18th initiated surprisingly widespread aurora displays. Sightings of the aurora borealis crossed the Canadian border and were reported as far south as Nebraska in the United States. Photographs of the display and speculation about what made the solar wind impact so potent are available on the Spaceweather website <http://spaceweather.com/>. While you're there, read up on the planetary conjunctions going on now and in the days to come.

Zoli HA1AG posted a nice photo album <http://www.hg6n.hu/ha1ag/zenphoto/> from the ED9M operation last year. While you're there, check out his photos from other radio adventures!

Did you ever wonder how long a nanosecond is? Watch this video <http://www.youtube.com/watch?v=JEpsKnWZrJ8&feature=youtu.be> as Admiral Grace Hopper (SK) explains.

==> RESULTS AND RECORDSS

RTTY contesting is certainly growing like a weed. Ed W0YK <w0yk@cqwpxrtty.com>, CQ RTTY Contest Director informs us that, "Over 3300 logs have been received, topping last year's record number of 2374. However, there are many more call in the aggregate QSOs from the received logs, so there are many more logs available to aid the log checking. We would appreciate receiving your log even if you'd like it to be used as a checklog. No log is too small to be useful!" The log submission deadline is 2359Z on Thursday, Mar 1 and logs can be submitted by email <rtty@cqwpx.com> or via the web <http://www.cqwpx.com/logcheck>.

Preliminary CW Sprint Results <http://www.ncjweb.com/sprintcwprelim.php> can be found on the National Contest Journal website. Congratulations to Scott KA9FOX with a very impressive QRP score over 10K points. There was a photo finish in the team scores with NCCC #1 just edging out the Ad Hoc team. (Thanks, CW Sprint Manager, Tree N6TR)

Check out the soapbox comments <http://www.eskimo.com/%7Emwdink/3830/> collected from 3830 postings for recent contests by Dink N7WA. Great reading and an excellent way to get prepared for the next contest!

Who was loudest? Who was spotted the most on all the bands? Pete N4ZR reports that Bob N6TV has prepared a package of statistics from the recent ARRL DX CW contest. They are now posted on the Reverse Beacon Network blog <http://reversebeacon.blogspot.com/2012/02/arrl-dx-cw-stats-thanks-n6tv.html>.

Everyone who submitted a log for the WPX SSB/CW Contests was sent an email with a link to their log checking report. If you lost that email or did not receive it you should contact WPX Contest Director, Randy K5ZD <k5zd@cqwpx.com>.

A list of Logs Received for the 2011 edition of the Canada Winter Contest has been published <tp://www.rac.ca/en/rac/programmes/contests>. Inquiries on the listing can be sent to Canada Winter Contest Chairman, Sam VE5SF <%20Canadawinter@rac.ca>. Plaques for the 2010 edition of the Canada Winter Contest are in the mail - don't forget to drop a note of thanks to the plaque sponsor!

Results for the Stew Perry <http://web.jzap.com/k7rat/stew.html> contest are "basically final." Contest manager, Tree N6TR of the Boring (OR) Amateur Radio Club says, "At some point, I will figure out who won which awards and do a writeup. That is - unless someone is inspired to do a guest writeup like Paul, K8PO did last year. It was nice seeing the writeup done from a less "Boring" perspective for a change."

Contest Director, Goetz DJ3IW and Contest Manager, Bernd DC4HB write to let us know that the results of the 2011 DRCG Long Distance Contest <http://drcg.de/index.php?option=com_content&task=view&id=138&Itemid=93> are available.

OPERATING TIP

When conditions are "funny" due to a solar hiccup or a geomagnetic disturbance, start looking for unusual propagation along skewed paths or for openings at unusual times. Paths at the customary times and bearings may be closed but when the ionosphere is busy, strange things have been known to happen!

==> TECHNICAL TOPICS AND INFORMATION

Brian K1LI writes, "In the category of "useful resources," I find that the Space Weather Alerts and Warnings Timeline <http://www.swpc.noaa.gov/alerts/alerts_timeline.html> gives me, at a glance, lots of information that helps me understand what's going on propagation-wise, such as the timeline for Jan 16 -31 <http://www.swpc.noaa.gov/alerts/archive/archive_16Jan2012.html>. It gives a very interesting depiction of the events we all witnessed.."

When using the paralleled-coax technique of making balanced transmission line from coax, does that change the velocity factor? "Nope...it's exactly the same." What about the matched loss of the line? "The matched loss per unit length of the resulting twin-lead will also be exactly the same." (Thanks, Jim W6RMK and Steve G3TXQ)

You can run tetrode amplifier tubes as grounded-grid as described in this classic article <http://ahars.com.au/documents/eimac01.pdf> by Bill Orr W6SAI in which he describes such operation of the 4-125A, 4-250A, 4-400A, and 4-1000A. (Thanks, Bill WA4LAV)

John KE7KDQ recently compiled this list
<http://lifehacker.com/5884556/electrodroid-is-a-reference-for-all-of-your-diy-electronics-and-circuit-building-projects?tag=android-downloads>
of Do-It-Yourself (DIY) electronic and circuit-building apps for the Android operating system. And while we're in DIY mode, here's an Instructables lesson on the how-to of motors <http://www.instructables.com/id/How-To-Motors/>. What do motors have to do with radio? Ask any SteppIR <http://www.steppir.com/> antenna owner!

Technical Web Site of the Week - The Bliley crystal pictured in the previous issue prompted this recollection by Ellen W1YL of the famous VF1 "variable frequency" (or "rubber") crystals. "Yes it was intentionally designed to allow you to change frequency-- as I seem to recall (over 60 years ago now!) it had a variable pressure plate with a exterior portion that you 'screwed' in or out to vary the frequency...just a bit but it was literally our first VFO and a big deal, even though the frequency variation was small." You can see the Bliley VF1 on the website <http://www.bliley.net/XTAL/> maintained by Bliley descendent, Charles K3NAU.

==> CONVERSATION

Recordum Quod est Locutus

The Latin phrase for "record what is spoken" should be kept in mind during this weekend's coming ARRL DX Phone contest - and throughout the year. Your job - as a radio operator - is to record the information that is actually transmitted by the other station, beginning with the call sign.

Believe not the spot - verily, I say unto you, verify! Listen so that you are sure of what you put in your log. If a station is not giving a call sign frequently enough, call and ask for it.

Exhibit a healthy amount of skepticism towards the information popping up on your band map or web browser. Using any of the contest modes, the slightest miscue will result in a busted call or exchange and cost you the contact, possibly the multiplier, and probably some penalty points.

Really? A rare station that just happens to have a call sign just one letter different from a station that has been spotted ad infinitum all weekend just happens to show up on Sunday afternoon? Really?

Really? Down on the low bands, you just worked a distant multiplier with an incredibly booming signal who was spotted only a couple hundred hertz from a much closer station? Really?

Before you jump all over that instant pileup and hit the send button - stop and think about what might actually be happening. You're probably going to cost yourself major points by not listening and thinking. Really!

On the other side of the equation, when you spot a station manually be sure you are giving out the right information. On CW, it's so easy to miss a dit, changing a 4 to a V or a 6 to a B. On phone, the accents and QRM make for a double accuracy whammy. Was that a B or a P? An M or an N? Phonetically, please!

Maybe a catchier latin-inspired phrase would be effingo quod propagtur - copy what propagates? Could we start a radiosport movement? Sure, it's fun to click spots and watch your multiplier totals rocket their way up the ladder, but take a little extra time to be sure you've effingo-ed correctly and completely. With so much information flying around cyberspace, it's easy to forget the purpose of contesting in the first place which is to develop operating skill. Don't substitute logging information off the 'net rather than what you copy off the air.

73, Ward N0AX

==> CONTESTS

29 February through 13 March

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Int'l Phone DX Contest--Phone, from Mar 3, 0000Z to Mar 4, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and state, province, or power. Logs due: Apr 3. Rules <http://www.arrl.org/contests>

OK1WC Memorial Contest--Phone,CW, from Mar 5, 1600Z to Mar 5, 1659Z. Bands (MHz): 3.5, 50. First through fourth Monday of each month; see website. Exchange: RS(T) and serial. Logs due: 14 days. Rules <http://www.hamradio.cz/ok1wc>

SNS and NS Weekly Sprints--CW, from Mar 2, 0200Z to Mar 2, 0300Z. Bands (MHz): 1.8-14. Frequencies: Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Open Ukraine RTTY Championship--Digital, from Mar 3, 2000Z to Mar 3, 2359Z and Mar 4, 0800Z to Mar 4, 1159Z. Multiple operating periods. Bands (MHz): 1.8-28. Exchange: Regional abbreviation and serial. Logs due: Apr 4. Rules <http://uarl.com.ua/openrtty>

ARS Spartan Sprint--CW, from Mar 6, 0200Z to Mar 6, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

YL CW Party--CW, from Mar 6, 1900Z to Mar 6, 2100Z. Bands (MHz): 3.5. Exchange: RST, serial, if YL "YL," name. Logs due: Mar 31. Rules <http://www.agcw.de/>

John Rollins Memorial DX Contest--CW, from Mar 7, 2300Z to Mar 8, 2300Z and Mar 10, 2300Z to Mar 11, 2300Z. Multiple operating periods. Bands (MHz): 7,14. Exchange: RS, name, and S/P/C. Logs due: 4 weeks. Rules <http://www.antiquewireless.org/>

RSGB Commonwealth Contest--CW, from Mar 10, 1000Z to Mar 11, 1000Z. Bands (MHz): 3.5-28. Exchange: RST and serial (Commonwealth only). Logs due: 30 days. Rules <http://www.rsgbcc.org/>

AGCW QRP Contest--CW, from Mar 10, 1400Z to Mar 10, 2000Z. Bands (MHz): 3.5-28. Exchange: RST, serial, class, AGCW number or NM. Logs due: Mar 31. Rules <http://www.agcw.de/>

QRP ARCI HF Grid Square Sprint--CW, from Mar 10, 1500Z to Mar 10, 1800Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: RST, 4-digit grid square, QRP ARCI number. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

EA PSK63 Contest--Digital, from Mar 10, 1600Z to Mar 11, 1600Z. Bands (MHz): 3.5-28. Exchange: RST + serial or EA province. Logs due: 30 days. Rules <http://www.ure.es/>

Idaho QSO Party--Phone,CW,Digital, from Mar 10, 1900Z to Mar 11, 1900Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and ID county or S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

North American RTTY Sprint--Digital, from Mar 11, 0000Z to Mar 11, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name, and S/P/C. Logs due: 7 days. Rules <http://www.ncjweb.com/>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 11, 1800Z to Mar 12, 0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050; Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or S/P/C. Logs due: Apr 12. Rules <http://www.warac.org/>

VHF+ CONTESTS

OK1WC Memorial Contest--Phone,CW, from Mar 5, 1600Z to Mar 5, 1659Z. Bands (MHz): 3.5, 50. First through fourth Monday of each month; see website. Exchange: RS(T) and serial. Logs due: 14 days. Rules <http://www.hamradio.cz/ok1wc>

Worldwide EME Contest--Phone,CW, from Mar 3, 0000Z to Mar 4, 2400Z. Bands (MHz): 432, 3.4 GHz. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

Idaho QSO Party--Phone,CW,Digital, from Mar 10, 1900Z to Mar 11, 1900Z. Bands (MHz): 1.8-28, 50-440, Frequencies: CW 35 kHz above band edge; Phone 7.260, 14.260, 21.335, 28.470 MHz, plus 50, 144, 440 . Exchange: RS(T) and ID county or S/P/C. Logs due: 30 days. Rules <http://www.nx7tt.com/>

Wisconsin QSO Party--Phone,CW,Digital, from Mar 11, 1800Z to Mar 12,
0100Z. Bands (MHz): 3.5-28, 50+, Frequencies: CW 3.550, 7.050, 14.050;
Phone 3.890, 7.230, 14.290, 21.350, 28.400. Exchange: WI county or
S/P/C. Logs due: Apr 12. Rules <http://www.warac.org/>

==> LOG DUE DATES

29 February through 13 March

February 29 - SPAR Winter Field Day
<http://www.spar-hams.org/contests/winterfd/index.php?pg=2>

March 1 - BARTG RTTY Sprint
<http://www.bartg.org.uk/documents/contests/sprint/rules/bartg-sprint-contest-rules-2012.p
df>

March 1 - AWA Linc Cundall Memorial CW Contest

HRD Software, LLC releases version 5.11a

Posted: 29 Feb 2012 05:21 AM PST
http://forums.qrz.com/showthread.php?335871-HRD-Software-LLC-releases-version-5-11a&goto=newpost

Tampa, FL February 29, 2012: HRD Software, LLC announced today they have released version 5.11a of Ham Radio Deluxe.

This latest version follows the release of version 5.1 on Feb 10, 2012 and is another step in the continuing project of the company to eliminate outstanding issues found in previous versions of HRD. Rick Ruhl, W4PC, co-owner and lead programmer said, "We□ll continue to update the 5.1x releases with "bug fixes" as the development of enhancements for the 6.0 release continues.

To facilitate both bug fixes and enhancements to Ham Radio Deluxe, the development team is to moving the program source code from the obsolete Visual C++ 6.0 development environment to current Visual Studio 2010 development environment. This major step enables a more straightforward, bug-free development process and better program integration using the more powerful VS 2010 and its support tools for enhancements to HRD."

The 5.x releases of HRD are free. HRD Software LLC does have direct paid support with phone and email for the 5.1x products for an introductory price of $59.95. This pricing plan includes version 6.0 at no additional charge. The introductory price expires upon release of Ham Radio Deluxe 6.0.

The scheduled release of Ham Radio Deluxe 6.0 is May 18, 2012 at the Dayton Hamvention and on line. The MSRP for Ham Radio Deluxe 6.0 with support will be $79.95 when it is released.

CircuitLab: Sketch, simulate, and share schematics

Posted: 28 Feb 2012 07:23 PM PST
http://forums.qrz.com/showthread.php?335829-CircuitLab-Sketch-simulate-and-share-schematics&goto=newpost

Anyone who has ever tried to use SPICE and its extensions to simulate electronic circuits is likely to have met a great deal of frustration. Now, CircuitLab has deployed a web-based application that enables users to whip up their own simulated electronic circuits and test them. This ought to be a boon for technically inclined amateur radio operators!

HSMM-MESH

Posted: 28 Feb 2012 04:24 PM PST
http://forums.qrz.com/showthread.php?335805-HSMM-MESH&goto=newpost

HSMM-MESH (High Speed MultiMedia) is a great new technology that we as amateur radio Operators can take full advantage of. It's Wi-Fi on steroids!

We don't have to be hobbled by part 15 limitations, we can also use OUR frequency allocations, and avoid a majority of interference by part 15 devices.

Common, inexpensive off the shelf equipment is used and or simply modified for this application.

HSMM-MESH can enable Hams to have a robust mesh network for uses such as VOIP, callbook lookups, communication, SAR, mapping, EM-Comm, etc. The applications are endless!

AMSAT Theme at Dayton 2012: Running with Fox

The 2012 Dayton Hamvention will be held this year on 18 - 20 May 2012. As has been the case for the many years Hamvention will be at the Hara Arena Complex on the north side of Dayton. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area.

The AMSAT theme for 2012 is "Running with Fox". We will have multiple exhibits of the new AMSAT satellite on display.

Visit AMSAT's Dayton Hamvention page for all details on activities:

http://www.amsat.org/amsat-new/hamve...012/Dayton.php

Some of the activities will include:

+ Life size Fox models will be on display as well as diagrams of the modules inside the 10cm square satellite.

+ Operational prototype of ARISSat-1 on display.

+ AMSAT Thursday Night Get-together at the Tickets Pub & Eatery.

+ The sixth annual AMSAT/TAPR Banquet will be Friday night May 18 at the Kohler Banquet Center. The price for the Banquet is $30. Seating is limited and reservations are required. Follow the links on AMSAT's Dayton page.

+ The AMSAT Forum will be on Saturday May 19.

AMSAT has a limited block of rooms reserved at the Country Inn & Suites in Fairborn, OH. Please contact Martha at the AMSAT office for room price and availability during Hamvention. Priority for rooms will be given to those volunteering to work in the AMSAT booth for multiple 2 hour shifts during Hamvention. The hotel web page is:

http://www.amsat.org/amsat-new/hamve...2012/Hotel.php

The phone number for the AMSAT office is 301-589-6062. Other hotels in the immediate area of the Country inn & Suites include the Fairfield Inn, Ramada Inn, Hampton Inn, Fairborn Holiday Inn, Red Roof Inn and the Homewood Suites if additional accommodations are needed.

Further information on Hamvention 2012, including advance ticket sales and motel accommodations, can be found at http://www.hamvention.org.

ARISS School Events Now Number Over 700

ARISS Operation Team Mentor Charlie Sufana, AJ9N reports that the total number of ARISS ISS-to-Earth school events is now at 701. ARISS offers an opportunity for students to experience the excitement of Amateur Radio by talking directly with crewmembers on-board the International Space Station.

Teachers, parents and communities see, first hand, how Amateur Radio and crew members on ISS can energize youngsters' interest in science, technology, and learning.

ARISS is an international educational outreach program partnering the participating space agencies, NASA, Russian Space Agency, ESA, CNES, JAXA, and CSA, with the AMSAT and IARU organizations from participating countries. Further information on the ARISS program is available on the website http://www.ariss.org/ (graciously hosted by the Radio Amateurs of Canada).

The 700th school event was with The Academy@Shawnee City in Louisville, Kentucky via a telebridge contact with ON4ISS on February 14. ARISS says the special John Glenn event to commemorate the 50th anniversary of Perth, City of Lights was successful on February 20. This marked event number 701.

Planned school contacts for this coming week include:

+ ESA-ESTEC, Noordwijk, Netherlands, telebridge via IK1SLD. The schools that are involved are: American school of The Hague, International School of Amsterdam, and The British School in the Netherlands on Monday, February 27 at 12:45:29 UTC.

+ Parkside Elementary, Atlanta, GA, telebridge via K6DUE on Friday, March 3 at 16:42:29 UTC.

+ 5th Geniko Lykeio Katerinis, Katerini, Greece, direct via SX2ISS on Friday, March 3 at 17:03:52 UTC.

Each contact may have multiple schools sharing the same time slot. A list of all of the ARISS School Events can be found at:

http://tinyurl.com/ARISS-Events

[ANS thanks ARISS Operation Team Mentor Charlie Sufana, AJ9N for the above information]

ESA Reports Vega Cubesat Success

The ESA provided a summary of the success of the cubesats launched on the Vega mission on February 13. The web report said, "Shortly after the seven ESA student CubeSats started their adventure in space on board the Vega launcher yesterday, the university teams and radio amateurs all around the world pointed their 'ears' towards space and started to receive the first signs of life from the tiny spacecraft."

+ The Spanish XaTcobeo CubeSat was heard a couple of hours after launch (13 February 2012, 11:00 CET) during its first pass over the University of Vigo's ground station, and its signal was also tracked by many radio amateurs. The first data received show that the satellite's batteries are properly charged and that telemetry and telecommand systems work well, representing a very promising start for the mission.

+ The Hungarian team received the first signals from Masat-1 from a radio amateur in Florida less than two hours after launch, and by many others shortly after. A couple of hours later the team's ground station in Budapest gathered the first 'official' satellite data which confirmed that the spacecraft is in perfect shape.

+ PW-Sat, the Polish student CubeSat, was also heard loud and clear only a few hours after the launch. The signals have been heard both by the team's ground station and by several radio amateurs from the UK, India, Germany and the Netherlands.

+ The Italian UniCubeSat-GG team heard the first signals from the satellite, although they have not been decoded yet, shortly after launch, first from a Kentucky (US) ground station and then from the dedicated Rome ground station.

+ Initially weak signals were reported from the Italian e-st@r. On February 15 the e-st@r team reported signals from their CubeSat heard by their control ground station and other ham radio stations.

+ Weak signals have been received so far from the Romanian Goliat and the French Robusta CubeSats. These teams currently believe that their spacecraft may not have yet achieved a stable orientation after separation and sufficient battery charge level in orderfor their communication systems and antennas to transmit properly to the ground station. The situation will evolve in the course of the next several days, and further attempts to establish good communications links with those satellites will continue.

A joint effort from all CubeSat teams and radio amateurs from the AMSAT network has now started, in order to be able to clearly detect the satellites.

The full ESA report can be found on-line at:

http://www.esa.int/SPECIALS/Educatio...2ZYXHYG_0.html

[ANS thanks the ESA for the above information]

MASAT-1 (MO-72) Team Releases Software and Web Page Updates

The MASAT-1 team said this week that updated client software for telemetry reception and decoding is available on their web at: http://cubesat.bme.hu/en/radioamator...iens-szoftver/

Some of the upgrades include:

+ The "Offline" label removed, the status of the automatic packet reporting is displayed.

+ Battery voltage constant (on the EPS panel) updated.

+ User selection between 626/1250 bps decoding.

+ The waterfall display shows tracks for the 0, CW and 1. The decoder has been reported to be most successful if tuning is set upward by 50-100 Hz from the tuning indicators. User experiences are invited to be sent to mezei@cubesat.bme.hu.

The automated received packet upload from the client software has been updated to accept ham@cubesat.bme.hu or a@a.a as mail address for those not wishing to send their actual address. Users can change the e-mail address by editing the registration.txt file in the program folder of the software package.

A statistics web page reporting on the numbers of packets forwarded by amateur radio operators has been added:

http://cubesat.bme.hu/en/radioamator...i-statisztika/ The site has successfully received over 50000 packets from around the world. The latest updates to the web and client software should address initial concerns that 'no packets' have been received.

The MASAT-1 team thanks amateur radio operators for your outstanding support. The MASAT-1 Important News for Radio Amateurs page is at: http://cubesat.bme.hu/en/2012/02/19/...ioamatoroknek/

The MASAT-1 mission home page is: http://cubesat.bme.hu

[ANS thanks the MASAT-1 Team for the above information]

Dedicated CubeSat Radio Spectrum Discussed at WRC-12

AMSAT-UK reports on their web that the recently concluded WRC-12 conference agreed to a resolution by the SmallSat, CubeSat, and NanoSatellite community for dedicated spectrum allocation outside of the 435 to 437 MHz

amateur satellite band.

Wouter Jan Ubbels, PE4WJ with the Dutch space development company ISIS says he was able to introduce a resolution at WRC-12 submitted by a number of countries, led by the Netherlands to propose an agenda item for WRC-2015 to conduct studies to identify the spectrum needs of nano-and picosatellites, and furthermore to study the associated regulatory constraints.

After the discussions at WRC-12, the resolution received partial acceptance to begin study of the regulatory aspects for WRC-2018.

Wouter concluded, "This is very good news, and could mean that the ITU notification process for nano-and picosatellites can become greatly simplified in the future. We first of all would like to thank all the supporting administrations for their support and would like to invite the community to, through their administrations, participate in the studies, so that the outcome will be as much as possible line with the needs of the community. We will continue to work on this subject and keep you updated through these lists and at the various small / nano / picosatellite conferences and workshops."

The full news item can be viewed on the AMSAT-UK web at:

http://www.uk.amsat.org/4950

[ANS thanks Wouter Jan Ubbels, PE4WJ and AMSAT-UK for the above information]

Arizona Centennial Event K7UGA Station Reports 122 Satellite QSOs

Arizona AMSAT Area Coordinator, Patrick Stoddard, WD9EWK/VA7EWK and Tom Kramer, NQ7R provided the satellite contacts for the K7UGA special-event station. K7UGA was sponsored by the Central Arizona DX Association in its commemoration of the Arizona statehood centennial.

Patrick reported, "Between Tom NQ7R and myself, we made 122 satellite contacts. Tom worked his passes from his home in Casa Grande AZ (grid DM42). For passes I worked at the start of the week through Thursday afternoon, I operated from DM43 in the Phoenix area. For the passes I worked Friday and Saturday, I was at the Yuma Hamfest. On Sunday morning, I parked next to the Yuma Territorial Prison State Historic Park overlooking the Colorado River. Both Yuma sites are in grid DM22."

Patrick posted videos of his K7UGA operation:

+ SO-50 pass on Friday (17 February) morning at 1751 UTC:

http://www.youtube.com/watch?v=BKaIKgjuSMM

+ AO-27 pass on Friday afternoon at 2032 UTC:

http://www.youtube.com/watch?v=AIA_VANTdpQ

+ AO-27 pass on Saturday (18 February) afternoon at 2004 UTC:

http://www.youtube.com/watch?v=YiXTjgD5nD8

+ VO-52 pass on Sunday (19 February) morning at 1538 UTC:

http://www.youtube.com/watch?v=l0AAB3A7Xy4

The K7UGA page on QRZ.com states that all QSL card requests be sent with SASE to: K7BHM, 1623 N. Los Altos Ct., Chandler, AZ 85224-8357.

[ANS thanks Arizona AMSAT Area Coordinator, Patrick Stoddard, WD9EWK/VA7EWK for the above information]

AA5UK Announces Plans for Hawaii Satellite Operation

Adrian Engele, AA5UK says he will be traveling to Hawaii between March 21 and April 4. This is primarily a vacation trip for sightseeing and scuba diving but satellite operation is also planned.

He will try to get on the satellites as often as his schedule permits within vacation activities. His primary focus will be on FO-29, VO-52 and AO-7 Mode B passes. SO-50 and AO-27 may be attempted if conditions permit.

+ March 21 - Fly from Chicago to Honolulu and Hilo.

+ March 22-25 - Operation from south of Hilo.

+ March 26 - April 1 - Kailua-Kona, Big Island in Hawaii.

+ April 2 - April 4: Oahu, Waikiki beach.

Adrian invites you to stay tuned via AMSAT-BB and his Twitter feed @AA5UK for latest schedule information. He will also update his page on QRZ.com in the coming weeks with additional information.

[ANS thanks Adrian Engele, AA5UK for the above information]

Satellite DX: XF1AA on Isabel Island

The OPDX Bulletin 1050 is reporting that a team of 10 operators, from the Aguas-Calientes Amateur Radio Club will activate Isabel Island, grid DL71, using the callsign XF1AA. The planned dates are March 16th through the 21st.

Ismael, XE1AY, is one of the operators and is active on the satellites. If you should hear Ismael on the birds, please give him the airtime to work as many as he can. Good luck with the operation!

[ANS thanks John Papay, K8YSE for the above information]

Volunteers Needed for AMSAT at Timonium, MD on March 31

Pat Kilroy, N8PK says that volunteers are needed to staff the AMSAT display and for satellite operating demonstrations at the Greater Baltimore Hamboree and Computerfest on Saturday, March 31 in Timonium, Maryland. This event is one of the largest Amateur Radio and technology shows on the East Coast.

In addition to the AMSAT display and satellite demonstrations Pat is planning to show the FUNcube Dongle and present show'n'tell talks for visitors to the AMSAT booth.

Please contact Pat soon by e-mail (pat@patkilroy.com) if you can help!

For more info about the hamfest visit: http://www.gbhc.org/

[ANS thanks Pat Kilroy, N8PK for the above information

ARISS Status Report - 20 February 2012

1. Kochi Youth Radio ISS Astronaut

Kochi Gakuen Kochi Junior High School in Kochi, Japan experienced a successful Amateur Radio on the International Space Station (ARISS) contact on Monday, February 13. Students asked Dan Burbank, KC5ZSX, 11 questions about living in space. The contact was integrated into the science curriculum. Media coverage included three television stations and three newspapers.

2. Astronaut Dan Burbank Speaks with Louisville Students

On Tuesday, February 14, youth attending The Academy @ Shawnee participated in an Amateur Radio on the International Space Station (ARISS) contact with on-orbit astronaut Dan Burbank, KC5ZSX via telebridge station ON4ISS in Belgium. The contact took place at the Challenger Learning Center in Louisville, Kentucky with the assistance of the Louisville Astronomical Society. Approximately 40 people were in attendance and listened as Burbank chatted with students about experiments on board the ISS and the effect space has on

the human body, among other topics. The Academy, an inner city high school of 500 students, has been designated as the Aerospace Magnet School for Jefferson County Public Schools. The contact was part of a comprehensive education plan to pique students' interest in Science, Technology, Engineering and Math.

3. Astronaut Training Status

Astronaut Alexander Gerst passed his amateur radio license exam on February 13 and is waiting for his callsign to be assigned. He is scheduled to fly with Expedition 40 in May 2014.

An introductory session is planned for Gregory Wiseman, KF5LKT (Expedition 40, May 2014) on Monday, February 27 and a preflight session is scheduled for Expedition 32 astronauts Sunita Williams, KD5PLB and Akihiko Hoshide, KE5DNI on Monday, March 5. Williams and Hoshide will fly later this year.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

http://forums.qrz.com/showthread.php?335857-Special-Event-Station-VO1AA-April-25-2012&goto=newpost

Special Event Station - VO1AA - April, 25, 2012

The Society of Newfoundland Radio Amateurs (SONRA) will make history on April 25, 2012.

April 25th each year marks the birthday of Guglielmo Marconi, who received the first wireless signal at Signal Hill, Newfoundland.

This April 25th, SONRA will celebrate the event by making an Amateur Radio contact with Princess Elettra (Marconi) who will be in Bologna Italy to celebrate her father's birthday. It is planned to have the Canadian Heritage Minister, the NL Premier, the City of St. John's Mayor along with the NL Lieutenant Governor, exchange greetings with the Princess via Amateur Radio from VO1AA at Cabot Tower.

SONRA appreciates the wonderful relationship that it enjoys with Parks Canada, Signal Hill National Historic Site, and looks forward to many years of commemorating this important event.

Parachute Mobile at Radiofest 2012, March 3, Monterey CA

Posted: 29 Feb 2012 01:05 AM PST
http://forums.qrz.com/showthread.php?335856-Parachute-Mobile-at-Radiofest-2012-March-3-Monterey-CA&goto=newpost

Parachute Mobile at Radiofest 2012, March 3, Monterey CA

Parachute Mobile http://www.parachutemobile.org will be operating in conjunction with Radiofest 2012 next Saturday March 3, 2012. Radiofest 2012

is the ARRL Santa Clara Valley Section Convention.

See http://www.radiofest.org/index.php?page=pages&id=9 for times and freqs.
Current plans are for simplex voice comms on 146.430 MHz. Live ATV video
will be broadcast from a jumper-cam and relayed to a display at RADIOFEST.

Jumper 1, Mark Meltzer AF6IM and Jumper 2, Michael Gregg KF6WRW, will be
exiting at 15,000 ft over the old Ft Ord Army airfield (Marina Airport)
which will give the jumpers a line of sight to the RADIOFEST QTH. Our team
coordinator Rob Fenn KC6TYD has completed his freefall training and will be
jumping too. This will be our team's tenth Parachute Mobile mission.

Join the fun. All you need is an HT set for our comm frequency. Jumper 1
and Jumper 2 will be fitted with APRS that will transmit their location and
altitude as well as biotelemetry data including SpO2 (blood oxygen
saturation) and heart rate. Look for AF6IM for Jumper 1 and KF6WRW for
Jumper 2 on your favorite APRS web site such as www.aprs.fi . No SSID
required.

Colorful special event QSL cards will be issued for confirmed QSOs with
hams and also for scanner enthusiasts who log our jumpers.

RADIOFEST is a fun ham event with a swap meet, exhibitors, speakers and
other activities. RADIOFEST only costs a dollar for admission:
http://www.radiofest.org/

We wish to thank RADIOFEST and Skydive Monterey Bay for their help in
making this exciting event happen.

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: GM; Foula Island, square IP80, start 2012-03-01

Martin, GM6VXB, will be on Foula island, IP80XD, for work setting up
some microwavelinks. Activity will be mostly in evening hours as
meteorrates are quite low in the morning hours this time of year.
He will call CQ at random times and might be on the ON4KST-chat.
Activity times uncertain and not frequent. Martin will leave Foula
on March 5th.

SOURCE: Martin, GM6VXB, direct to MMMonVHF and ON4KST-chat.

** DXCC: 4U1ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the
year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing
something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never

been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: J5; square IK21DT; start 2012-03-23

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm

and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !
73 de I3LDP VeronaDXteam.

SOURCE: I3DLI to Moon-Net GG

** DXCC: EY; square MM48; start 2012-04-27

From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. Callsign not known yet. Locator will
be MM48JN near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.

We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

73 Rene PE1L and Eltje PA3CEE

SOUrCE: Rene, PE1L, and Eltje, PA3CEE direct to MMMonVHF

USE or SUBSCRIBE: http://mmmonvhf.de/latest.php?id=4108

** DXCC IS; squares JN40, JN41, JM48, JM49; start 2012-06-12

Patrick, ON7ARQ will be QRV from Sardinia from June 12th untill June 26th.
During the contest on June 16th/17th he will be signing IM0/ON7ARQ (from
the Island Isola di San Pietro?)

SOURCE: Patrick, ON7ARQ, direct to MMMonVHF

** DXCC: LA; square KQ50; start 2012-08-11

Only 3 Squares remaining on a visit of the OH8K Team in the northern area -
KQ50 will be one and will be tried to activate in August 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to be qrv from KQ50
during 11-16. August 2012 as LA/OH6ZZ on 2m FSK/EME. QRG and more details
will be spread later...

SOURCE: tnx to Jussi, OH6ZZ direct to MMMonVHF

3C0, ANNOBON ISLAND (update)
The start of the 3C0E DXpedition to Annobon Island (AF-039, Pagalu) is delayed until Mar 2 due to transportation problems. Instead of that Elmo,EA5BYP, and Javier,EA5KM, are handing out QSOs as 3C6A from Bioko Island (AF-010, Fernando Poo) to as many DXers until then. The DXpedition was planned until Mar 11 originally, nothing is known about a possible extension. Activities take place in CW, SSB and RTTY on 160m-6m. See also: http://www.gdgdxc.net/3c0e

5H, TANZANIA
Maurizio,IK2GZU, works in the new hospital and orphanage at the Ilembula mission in Tanzania from Mar 4 until Apr 4. He will be active as 5H3MB with a FT 100 and the TS 850 of the mission using a 3-element tribander (beaming towards Europe), vertical and dipole during his spare time. The mission is situated 1500m above sea level about 800 km southwest of Dar es Salaam. QSL via homecall, LoTW after his return. See also: http://www.buffoli-pm.it

6Y, JAMAICA, NA-097
Allen,N2KW, plans to show up as 6Y0A from Mar 5-23. However, fishing is equally important to him as amateur radio is. Allen has announced to take part in the Commonwealth Contest (Mar 10/11) seriously but prefers to work in CW outside of the contest. He tries to work especially those areas that are difficult to work from the Caribbean. Allen will upload the log also to the LoTW. Unfortunately paper QSLs are available only direct via his QSL manager Kappy,WA4WTG. Kappy is collecting stamps...

8P, BARBADOS, NA-021
Thomas,W2SC, will join the ARRL DX SSB Contest (Mar 3/4) as 8P5A. QSL via NN1N, LoTW.

9G, GHANA
Rob,PA3DEW, and Vincent,PA3FQX, will be in Ghana again from Mar 1-20

and plan to be QRV as 9G1AA from the Dormaa hospital. QSL via PA3ERA.
See also: http://www.dagoe.com

9N, NEPAL
Toshi,JA8BMK, is active as 9N7FOX working holiday style in CW, SSB and
RTTY on 10m-80m between Feb 29 and Mar 9. QSL via JA8UWT.

9Q, DEMOCRATIC REPUBLIC OF CONGO
On January 27 the first license examination took place at the clubhouse
of the "Amateur Radio Association of the Congo" (ARAC) in Kinshasa.
With the assistance of Mr. Henri and support from the distance by
Henk,ON4AHF; Pascal,9Q1PM, has prepared the candidates so excellent
that all 21 examinees passed the exam with flying colors (5x 100%)!
The exam was taken by Mr. Mpatamana from the "Ministere des Nouvelles
Technologies de Postes Communication" under supervision of Pascal,
ON4CFC. The club has big plans and wants to show up on the air as 9Q0AR
regularly now. Congratulations on passing the license exam, welcome to
the global community of radio amateurs and enjoy our common hobby!
http://www.iaru-r1.org/index.php?option=com_content&view=article&i
d=1
:amateur-radio-exams-in-dr-congo&catidE:stars&Itemid=

C5, GAMBIA
Willy,ON4AVT, is signing C5AVT from the vicinity of Banjul in PSK
mainly on 15m until Mar 20. His equipment includes a FT-817 and a
Buddipole. QSL via homecall. See also: http://www.on4avt.be

C6, BAHAMAS
The Yankee Clipper Contest Club members Tom,N1GN, Bill,NE1B, Mike,N1IW,
and Karney,W2AFC, will join the ARRL DX SSB Contest as multi/single
signing C6ANM from Nassau (Gambier Village) on New Providence Island
(NA-001, WLOTA 1115, WW Loc FL15GB). QSL via LoTW or direct via WA2IYO.

George,K4IIO/GM0IIO, will be QRV as C6AZZ working in CW (only little
SSB) on 160m-6m from Mar 1-8. He plans to join the ARRL DX SSB Contest.
QSL via K4IIO, unfortunately only direct.

Steve,C6A/W2ML, is working holiday style in CW, SSB and PSK-31 on all
bands until Mar 5 including the ARRL DX SSB Contest. QSL via homecall.

CT3, MADEIRA, AF-014
Adam,DJ0IF, and Mek,SP7VC, plan to be active as CR3L from Santana on
Madeira (AF-014) during the ARRL DX SSB Contest. QSL via DJ6QT.
Listen for CT9/homecalls before and after the contest from Feb 29 until
Mar 7. QSLs via homecall. See also: http://www.cq3l.de

FG, GUADELOUPE, NA-102
Michel,F6GWV, and Gildas,F6HMQ, chose Guadeloupe (NA-102, DIFO FG-001,
WLOTA 0644, Loc FK96) as their destination. Listen for TO11A from
Mar 2-16. 50 MHz operation and participation in the ARRL DX SSB Contest
are planned as well. QSL via F6HMQ.

FM, MARTINIQUE, NA-107
Albert,F5VHJ, plans to join the ARRL DX SSB Contest as TO5A.
QSL via homecall, LoTW.

HI, DOMINICAN REPUBLIC, NA-096
The Loma Del Toro Contest Group members Tino,HI3CC, Ezequiel,HI3EPR,
Edwin,HI3K, Franky,HI3TT, and John,KL7JR, will take part in the
ARRL DX SSB Contest signing HI3K from Puerto Plata (NA-096/WLOTA 2974).
QSLs only direct via KB2MS. See also: http://www.lomadeltoro.com

HR, HONDURAS
After working from Guatemala (see below) Andrei,NC2N (ex NP3D), plans
to become QRV in holiday style signing HR5/NC2N with low power in
CW/RTTY/SSB on 10m-80m from Mar 9-12.
QSLs unfortunately only direct via W3HNK or via RW6HS, LoTW.

J3, GRENADA, NA-024
Harry,AC8G, announced to show up again as J37K from Mar 1-5. First task
after his arrival will be to repair the yagi. On Mar 1/2 he wants to
work especially stations outside of W/VE and will then join the
upcoming ARRL DX SSB Contest in the SOHP category.
QSLs via homecall (W with SASE), LoTW.

JA, JAPAN, AS-007
The special event station 8N1MOMO will be QRV between Mar 1 and Apr 5
to celebrate the 36th Koga-City (JCC 1404) Momo (or peach blossom)
festival and the 19th fire balloon contest. Koga is situated in the
prefecture Ibaraki on Honshu (AS-007, WLOTA 2376). QSL via bureau.

JX, JAN MAYEN, EU-022
Recently it was reported that only licensed staff of the Olonkin base
will get license for JX. Starting in March Svein,LA9JKA, is going
to work on Jan Mayen for one year and plans to become active as JX9JKA.
QSL via homecall, unfortunately only direct, no eQSL.

KH0, NORTHERN MARIANA ISLANDS, OC-086
Masayoshi,AE6YW/JI1DSO, plans to hit the airwaves as AH0/AE6YW from
Saipan (OC-086, USi NI002S, WLOTA 1333, Loc QK25uf) working on 80m-6m
and via satellite between Feb 29 and Mar 6. QSL via JA6GMC.

KH2, GUAM, OC-026
Hisashi,JF2SKV, plans to take part in the upcoming ARRL DX SSB Contest
signing NH0S/KH2 in the SOAB HP category. QSL via homecall.
See also: http://www.myhamshack.com/NH0S

KP2, US VIRGIN ISLANDS, NA-106
Yuri,N2TTA, joins the ARRL DX SSB Contest as KP2MM from Christiansted
on St. Croix Island (NA-106, USi VI002S, WLOTA 2477).
QSL via LoTW or direct via homecall. See: http://www.n2tta.info

PA, THE NETHERLANDS
Fred,PA0FAW, will activate the special event station PA100NOM from
Mar 1-28 to celebrate the 100th anniversary of the National Open Air
Museum in Arnhem. QSL via PA0FAW.

PJ7, SINT MAARTEN, NA-105
Wojciech,SP9PT, Bogdan,SP2EBG, YL Gala,SP2GKS, Jurek,SP3GEM,
Czeslaw,SP3HLM, and Jozef,SP9-31029, are planning a DXpedition to
Sint Maarten (NA-105) as PJ7PT. They will be QRV in CW/SSB/RTTY on
160m-6m from Mar 5-18. QSL via SP9PT, LoTW. See: http://www.pj7pt.com
---
Thomas,PJ7/AA9A, will be active from the same island in SSB/CW on
40m-10m from Mar 3-17. QSL via homecall, LoTW.

TI, COSTA RICA
Juan Carlos,TI2JCY, Carlos,TI2KAC, Mauricio,TI4ZM, Bob,W4BW, Lex,W4XO,
Eddie,K4UN, and Keith,W4KTR, will show up as TI8M from Pajaros in the
ARRL DX SSB Contest. QSL via TI2KAC, LoTW.
They will use their own calls before and after the contest.

Kyle,WA4PGM, Roy,WK4Y, Richard,AJ3G, and Julius,N2WN, will sign TI5N
in the ARRL DX SSB Contest. QSL via W3HNK, unfortunately only direct.

TG, GUATEMALA
Andrei,NC2N (ex NP3D), plans to show up as TG7/NC2N from Mar 3-8 incl.
the ARRL SSB DX Contest. QSLs only direct via W3HNK or via RW6HS, LoTW.

V2, ANTIGUA, NA-100
Babs,DL7AFS, and Lot,DJ7ZG, will be active as V21FS and V21ZG from the
Villa Sundowners near Pottery Village on Antigua (NA-100, WLOTA 1118,
Loc FK97CC) from Mar 5-31. Listen for them in RTTY, PSK and SSB on
6m-15m, V21ZG will focus on JA and QRP stations. QSLs via DL7AFS.
See also: http://www.qsl.net/dl7afs

V7, MARSHALL ISLANDS, OC-028
Jim,K4FW, is working as Launch Panel Operator (LPO) at the Orbital
Sciences Corporation on Kwajalein Island (OC-028) in March. He plans
to hit the airwaves from the Kwajalein clubstation (V73AX) signing
either V73FW or V7/K4FW in SSB. QSL via K4FW.

VP9, BERMUDA ISLANDS, NA-005
Kurt,W6PH, and Tim,N6WIN, will be QRV as VP9/W6PH from Hamilton Parish
on Bermuda (NA-005) in the ARRL DX SSB Contest (MS/LP).
QSL via W6PH, unfortunately only direct.

W, USA
Peter,VE3IKV, plans to become active in holiday style signing W4/VA3RA
from St. Simons Island (NA-058/USi GA003S/WLOTA 4115/Glynn County) on
Mar 3/4 and after that from Key West (NA-062/USi FL040S/Monroe County)
from Mar 5-17. You can find him working in CW only on the usual IOTA
frequencies on 80m-10m. QSL via homecall.

YN, NICARAGUA
Jeff,N6GQ, wants to join the ARRL SSB Contest as YN2AA from Grenada in
Nicaragua (Loc EK71au) in the SOAB HP category. Jeff will be QRV also
on 160m-6m before and after the contest. QSL via LoTW.

ZD7, ST HELENA ISLAND, AF-022
Nigel,G3TXF, was active as ZD8XF from Ascension Island on Feb 24/25.

He is now working as ZD7XF from St. Helena (AF-022) in CW on 160m/80m
between Feb 29 and Mar 13. He also plans to join the Commonwealth
Contest (BERU) on Mar 10/11. QSLs via homecall, LoTW, e-mail request.
http://www.g3txf.com/QSL-Office/QSL-Off.html
http://www.g3txf.com/dxtrip/ZD8-ZD7-Feb-12/ZD8-ZD7.html

ZF, CAYMAN ISLANDS, NA-016
John,AD8J, wants to hit the airwaves in CW and SSB on 20m-10m signing
ZF2AG/ZF8 from Little Cayman (NA-016) from Mar 1-10.
QSL via homecall, LoTW.

PIRATES: John,ZS1LF/ZD9GI, is not working in CW. If you have logged ZD9GI
in CW on 40m you have worked a pirate. Momentarily there is no station
active on Gough Island.

The callsign YI1IRQ is completely made up and QSL cards are returned.

SILENT KEY: A big DXer is forever gone. After a serious illness our friend
Emil,DJ4PI, put away the microphone on Feb 25 at the age of 78. He was
a well known DXer and very active especially on the lowbands until the
very end. Emil was a member of numerous clubs such as the ARRL, SDXG,
GDXF, BCC and the DIG. In addition to many top diplomas as 5BDXCC,
5BWAZ and WAE-1 his call is listed on the DXCC Honor Roll at #1. Many
HAMs will miss his "Papa Italy" in the pile-ups. Emil was licensed in
1958, very active in his local club, always helpful and technically up
to date. Amateur radio was part of his life and Ham-Spirit his passion.
We will keep our friend Emil always in our memory. (Michael, DF3IS)

UPCOMING CONTESTS

Mar 3/4 ARRL International DX Contest
Mar 3 Open Ukraine RTTY Championship (part 1 and 2)
Mar 4 Open Ukraine RTTY Championship (part 3)
Mar 4 DARC 10m Digital Contest
Mar 6 YL CW Party

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-118, 9K, Kuwait group: Failaka Island will be activated by 9K2F from
Mar 7-12. QSL via 9K2HN (bureau/direct/LoTW).

EU-024, IS0, Sardinia Island: The 6th meeting of the "Italian Navy Coastal
Radio stations" takes place from Mar 3-18. For this reason the special
event station II0IDP will be activated on HF by two teams (led by
Gianni,IS0IGV, and Patrizio,IS0FQK) from Cagliari (WLOTA 1608).
QSL via IS0IGV (bureau/direct). See: http://www.assoradiomarinai.it

EU-041, IS0, Maddalena archipelago: Another activity during the 6th meeting
of the Italian navy stations is the special event station II0ICH from
Maddalena Island (WLOTA 1632). The team manager is IS0JMA.
QSL via IM0QMA (bureau/direct). See: http://www.assoradiomarinai.it

SA-030, CX, San Jose/Montevideo/Canelones department group: The team of CV5A
conducts their next DXpedition to Flores Island (WLOTA 0528/Loc GF25AB)
in March. More details can be found at: http://www.radiogruposur.com
QSLs only direct via CX2ABC.

Magic Band in Senegal

The "Regulatory Agency for Telecommunications and Posts" (ARTP) in Senegal
allocated the frequency range 50-51 MHz primarily to amateur radio.
However, prior to commencing operation the new "ITU Radio Regulations"
have to come into effect.

Prefix allocation for South Sudan

The "International Telecommunication Union" (ITU) has allocated the prefix
block Z8A-Z8Z to the new Republic South Sudan.

New licenses in Nepal (9N)

Nine amateur radio licenses were issued to local HAMs:
9N1GJ (Ganesh K. Gimi), 9N1KK (Pravin Joshi), 9N1KS (Khagda Sen Oli),
9N1MM (Ms. Kalpana Pokharel; the old call of Father Moran (SK)),
9N1NS (Ms. Nisha Shrestha), 9N1NU (Ms. Niva Upretee),
9N1SP (Sanjeev Pandey), 9N1SS (Surya N. Shrestha), 9N1TN (Tara B. Neupane).
The callsign 9N1II was not issued yet.

Arlington Seeks Ham Radio Operators:

Posted: 28 Feb 2012 04:51 PM PST
http://www.eham.net/articles/27799

Arlington -- In the town's continuing efforts to be prepared for all emergencies, the Arlington Emergency Management Agency is currently seeking amateur radio operators (ham radio) who would be willing to assist the town during an emergency.

//
AITI Holds Amateur Radio Direction Finding Competition:

Posted: 28 Feb 2012 04:50 PM PST
http://www.eham.net/articles/27798

The Authority for Info-communications Technology Industry of Brunei Darussalam (AITI) recently organised an ¡®Amateur Radio Direction Finding (ARDF) Competition 2012¡ä at Sungai Basong Recreational Park in Tutong District. Two local amateur radio clubs ¨C the Brunei Darussalam Amateur Radio Association (BDARA) and Persatuan Gemilang Daerah Tutong ¨C jointly supported this event. The ARDF competition allowed participants to compete and show their skills in amateur radio direction finding. It required the skills of orienteering and navigating of radio direction finding in locating hidden transmitters called ¡®beacons¡¯ or ¡®foxes¡¯ within an area using the bearings of the transmitted signal in pedestrian mode. A total of 10 teams participated in the ARDF and every team consisted of three members with at least one person in the team holding a valid amateur radio station licence. The ARDF competition started at 7.45am and lasted for two hours. During the competition, each team also displayed their capabilities in the design of their homemade directional antennas.

//
NASA: Spike in Sun's Activity Produces Five Eruptions in 2 Days:

Posted: 28 Feb 2012 04:48 PM PST
http://www.eham.net/articles/27797

The Sun has been very active in the last week. NASA scientists say our star flared up producing five major eruptions in two days that generated spectacular northern lights displays over the weekend. NASA scientists say the solar flares which burst from nearly all areas of the Sun occurred between February 23 and 24, and came from "top, bottom, left and right

sides of the solar disk." According to NASA, four of the five flares occurred within a time-span of 24 hours.

//
Former RAC President Earle Smith, VE6NM (SK):

Posted: 28 Feb 2012 11:08 AM PST
http://www.eham.net/articles/27796

Earle Smith, VE6NM, of Grand Prairie, Alberta -- who served as President of the Radio Amateurs of Canada (RAC) from 2004-2007 -- passed away Friday, February 24. He was 81. An active radio amateur since 1948, first licensed as VE1SA, Smith enjoyed meeting amateurs from all over Canada and the world.

//
ARRL Publishes New Guidelines for 60 Meters:

Posted: 28 Feb 2012 11:09 AM PST
http://www.eham.net/articles/27795

Thanks to the FCC Report and Order issued November 18, 2011, amateurs will enjoy a number of new privileges on the 60 meter band beginning March 5, including a boost in effective radiated power from 50 to 100 W, as well as the ability to use CW and certain digital modes.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

http://forums.qrz.com/showthread.php?336022-ON100TT&goto=newpost

UBA section ON4EKO will be on the air with the Special Event Callsign
ON100TT , this during the weekend of April 14 th.

We will do that to commemorate the TITANIC disaster ,exactly ONE HUNDRED
YEARS AGO .

At that very moment Mr. Jack Philips and Mr.MacBride did their very best
to save the life of the passengers by transmitting the emergency call
CQD ,followed by the call SOS , which has been transmitted as emergency for
the first time in history .

Our Clubstation can be worked up from Saturday April 14th at 09:00 UTC
until Sunday April 15th at 18:00 UTC.

During the year 2012,the station will be active several times.

We will use the following frequencies:

-on 2 meters: our Club frequency 145.375MHz.

-on HF bands: CW and SSB.

We hope to work you !

http://forums.qrz.com/showthread.php?335966-International-Woman-s-Day-10M-SSB-Contest-2012&goto=newpost

International Woman's Day 10M SSB Contest 2012

The Federación de Radio Aficionados de Puerto Rico (FRAPR), will have their first International Woman's Day 10 Meter SSB Contest on Saturday at 9am (1300UTC) until 8:59pm (0059 UTC on Sunday). It will be between the frequencies of 28.300 to 28.500 Mhz with maximum output of 100 watts.

The contest is to promote Amateur Radio female operators to participate on the lower bands. For rules and log sheet go to: http://www.frapr.org/2011/concurso_1...jeres_2012.pdf Even thou this is a local contest, there will be a special certificate for those female operators from other countries who contact the Puerto Rican YL's.

To obtain one, please send SASE to: FRAPR RR1 Box 6418, Guayama, PR 00784-9606

Concurso Dia Internacional de la Mujer 2012 de 10 Metros SSB

La Federación de Radio Aficionados de Puerto Rico (FRAPR), llevará a cabo el primer concurso con motivo del Día IInternacional de la Mujer de 10 metros el sábado 10 de marzo a las 9am (1300UTC) hasta las 8:59pm (0059 UTC el domingo). Será entre la frecuencias de 28.300 a 28.500 Mhz, con un

máximo de 100 watts.

El mismo es para promover la participación de las mujeres radioaficionados en las bandas bajas Para reglas y página de log ir a: http://www.frapr.org/2011/concurso_1...jeres_2012.pdf Aunque es un concurso local, Habra un certificado especial para las radioaficionadas del extranjero quienes hagan contactos con las YL's locales.

Para obtener el mismo favor de enviar un SASE a: FRAPR RR1 ZBox 6418, Guayama, PR 00784-9606

//
March 8, 2012 - YL Day - AGB YL BELARUS 2012 Special Award

Posted: 28 Feb 2012 08:47 AM PST
http://forums.qrz.com/showthread.php?335732-March-8-2012-YL-Day-AGB-YL-BELARUS-2012-Special-Award&goto=newpost

Every year during March 8th, AGB-club create Special Award - AGB YL BELARUS 2012 in this year - for YL-operators contacts in the YL-Day.

http://www.ev5agb.com/award/award_yl_belarus-2012_e.htm

Specially for YL (personal callsigns, operators of collective stations having SWL) and also for the Men-operators, the given Memorable Award will stand out free of charge and in format PDF.

For YL-AGB-members and YL operators of collective stations of club AGB - should be spent not less than 10 QSO.

For YL not being member of AGB club - it is necessary to spend not less than 10 QSO on air in Day 8 Martha and to have not less than 1 QSO with YL-BBELARUS

For Men it is necessary to spend not less than 3 QSO with YL-BBELARUS.

To offset goes QSO and in Contests, spent on March, 8th, and usual daily communications, but only on March, 8th, 2012 - 0000-2400 UTC.

I will repeat that It only for Memorable Diploma AGB-YL-BELARUS-2012 which will have a little excellent design from Base Diploma AGB-YL-BELARUS

Reports and demands (GCR-list) to send or by e-mail eu1eu@mail.ru (in case of problems use eu1euster@gmail.com) or on the mailing address Igor Getman EU1EU, p.o. 143, Minsk-5, 220005 Belarus

The Award will be dispatched after gathering of all demands, reports, logs and pictures-photos of YL-Belarus (3 month is given). The request to specify yours email for transfer of the Diploma to you.

==> + ON THE AIR: ARRL PUBLISHES NEW GUIDELINES FOR 60 METERS

Thanks to the FCC's Report and Order
<http://www.arrl.org/news/fcc-releases-new-rules-for-60-meters> issued
November 18, 2011, radio amateurs will enjoy a number of new privileges
on the 60 meter band, beginning at midnight (EST) March 5. These new
privileges include a boost in effective radiated power from 50 to 100
W, as well as the ability to use CW and certain digital modes.

Late last year, the ARRL HF Band Planning Committee surveyed 60
meter operators to gather opinions about how to best use the new
privileges. On the subject of creating a specific band plan, the survey
results indicated little consensus beyond the fact that 5403.5 kHz
should retain its status as a de facto "DX channel." On the other hand,
survey respondents made a number of suggestions for general operating
practices.
```

Based on the survey results and subsequent research, the committee declined to propose a specific band plan for 60 meters at this time. Instead, the committee created a "Recommended Practices" document (click here <http://www.arrl.org/files/file/Regulatory/Recommended_Practices_for_60_Meters%20-%20Version%206_4.pdf> for the document). The 60 meter pages <http://www.arrl.org/60-meter-faq> on the ARRL website have been updated to reflect the changes brought about by the Report and Order.

The April issue of QST will also include an article by ARRL Regulatory Information Manager Dan Henderson, N1ND, offering a detailed discussion of the new 60 meter privileges and recommended operating practices.

==> + W1AW: W1AW VIDEO TOUR AVAILABLE ON ARRL WEBSITE

In case you missed the live web tour of W1AW <http://www.arrl.org/news/save-the-date-take-a-virtual-tour-of-w1aw-on-february-12>, the Hiram Percy Maxim Station at ARRL Headquarters, you can now watch the 18 minute video on the ARRL website. On February 12, W1AW Station Manager Joe Carcia, NJ1Q, led Emmy Award-winning meteorologist Geoff Fox, K1GF, on a tour of the famed station. Al Petrunti, KA1TCH, of the New Day Group <http://www.newdayhd.com/> followed Carcia as he led Fox and viewers through the station, recording it for viewers to watch.

"We wanted viewers of this live Internet tour to feel as if they are actually at W1AW," Carcia explained. "If you came to W1AW in person, you would see the same things that we showed on the virtual tour: The three operating stations, the transmitter racks that we use to send out our bulletins and use for the code practice transmission, the control console and 'Old Betsy <http://www.arrl.org/images/view/web_008.jpg>,' Hiram Percy Maxim's personal spark gap transmitter."

You can view the video of the tour <http://www.arrl.org/w1aw> on the ARRL website (scroll to the bottom of the page).

==> + DXCC NEWS: MALYJ VYSOTSKIJ ISLAND ADDED TO DXCC DELETED ENTITIES LIST

According to the Finnish Ministry of Transportation and Communication, the Saimaa Canal Treaty between Finland and Russia has been finalized by relevant Finnish and Russian authorities through ratification. Malyj Vysotskij Island (MVI), R1M, is no longer included in the Treaty. Thus, MVI was deleted from the DXCC List as of February 17, 2012, and added to the DXCC Deleted Entities List. Read more here <http://www.arrl.org/news/malyj-vysotskij-island-added-to-dxcc-deleted-entities-list>.

==> +ARRL ANNUAL AWARDS: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL

awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. ARRL members can nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open-1>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of February -- takes a look the 2012 World Radiocommunication Conference, a new law that has a provision for an Amateur Radio study, new rules for 60 meters, happenings at W1AW, a new movie that features Amateur Radio, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-43>.

==> + W1AW: MARCH QUALIFYING RUNS

The W1AW and West Coast Qualifying Runs were inadvertently left out of the March 2012 issue of QST. Here is the missing information:

W1AW Qualifying Runs are 10 PM EST Friday, March 9 (0300 UTC March 10) (10-40 WPM) and 7 PM EDT (2300 UTC) Tuesday, March 20. The West Coast Qualifying Run will be transmitted by station K6KPH on 3581.5, 7047.5, 14047.5, 18097.5 and 21067.5 kHz at 2 PM PDT (2200 UTC) Saturday, March 17. Unless indicated otherwise, speeds are from 10-35 WPM. You can find the upcoming schedule here <http://www.arrl.org/qualifying-run-schedule>.

==> SOLAR UPDATE

Tad "The dawn of the great black Sun that shines on me <http://www.youtube.com/watch?v=OooxwBrIzsA>" Cook, K7RA, reports: In tomorrow's K7RA Solar Update, we'll have a review of recent sunspot number averages. The average daily sunspot number for the month of February 2012 was 50.1, the lowest since January 2011, when it was 32.2. The average daily sunspot number for the three months ending on February 29, 2012 was 83.3, the lowest since the three months ending in September 2011, when it was 79.6. This is a three month moving average, so there is a figure for every month that includes data from the two previous months. Look for more information on the ARRL website on Friday, March 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Alarm's Black Sun <http://en.wikipedia.org/wiki/The_Alarm>.

==> THIS WEEK IN RADIOSPORT

This week:

- March 3 -- Wake-Up! QRP Sprint
- March 3-4 -- ARRL International DX Contest (SSB)
<http://www.arrl.org/arrl-dx>
- March 4 -- DARC 10 Meter Digital Contest
- March 6 -- ARS Spartan Sprint; AGCW YL-CW Party

Next week:

- March 10 -- AGCW QRP Contest
- March 10-11 -- Idaho QSO Party; EA PSK63 Contest
- March 11 -- North American Sprint (RTTY); SKCC Weekend Sprint
- March 11-12 -- Wisconsin QSO Party
- March 14-15 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + SILENT KEY: FORMER RAC PRESIDENT EARLE SMITH, VE6NM (SK)

Earle Smith, VE6NM, of Grand Prairie, Alberta -- who served as President of the Radio Amateurs of Canada (RAC) from 2004-2007 -- passed away Friday, February 24. He was 81. An active radio amateur since 1948, first licensed as VE1SA, Smith enjoyed meeting amateurs from all over Canada and the world. "Earle was well respected by Amateur Radio operators both within Canada and internationally," said current RAC President Geoff Bawden, VE4BAW. "He was a gentleman and friend to all hams and a strong advocate for Amateur Radio and for the Radio Amateurs of Canada. All who knew Earle respected him as a leader, a friend and a force for good in the Amateur Radio community. We will miss him." Read more here <http://www.arrl.org/news/former-rac-president-earle-smith-ve6nm-sk>.

==> + ARRL RECOGNIZES: PHIL SALAS, AD5X , WINS FEBRUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for February is Phil Salas, AD5X , for his article "A Relay-Based Full Break-In TR Switch for Your Vintage System. " Congratulations Phil! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the March issue today.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 3 -- ARRL Santa Clara Valley Section Convention

Glades Amateur Radio Operators Asked to Participate:

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27809

CQ, CQ, CQ! To All Licensed Amateur Radio Operators! MOORE HAVEN, FL. -- All licensed Amateur Radio Operators, please be aware that Terri and Austin Moorhouse will hosting as the Net Control Operators for the Amateur Radio Emergency Service (ARES) and the Radio Amateur Civil Emergency Service (RACES) for Glades County under the support and control of the Glades County Emergency Management EOC. The ARES-RACES Network was established to provide emergency communications during civil emergencies such as floods, hurricanes, tornadoes or any other civil emergency. All licensed Amateur Radio Operators in or near the Glades County area are invited and encouraged to participate in the ARES-RACES Net test drills held every Thursday evening at 8:00 p.m. on the two-meter frequency of 147.300 Hz on the Glades County Repeater W4TEJ 147.300 + 600 PL 100.00 HZ.

//
Kevin Baynes, KI4AAD (SK):

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27808

Family, motorcycles and CB radios went hand in hand for Kevin Baynes. As a child he took notes from a favorite uncle, who taught him how to ride and how to work the radio, things he continued to enjoy as an adult. ."You knew which house on the street was ours," joked Tunya Baynes, his wife of more than 20 years, who lives in Ellenwood. "The one with the big antenna. He loved that CB radio and had a ham (radio) license and everything." Mr. Baynes' love for amateur radio was widely known in his family. Most relatives knew his handle in the amateur radio world was Mr. One-zero-six, but not a soul knew why he picked that sequence of numbers. But there was no mystery to the name he identified with when riding his beloved Kawasaki Ninja ZX-14, and in the motorcycle world. There he was simply known as Philly, a nod to his hometown of Philadelphia. He rode with DD214 Military Riders out of Atlanta, and loved to race at the racetrack, Mrs. Baynes said.

Richard L. Daniels, NASA Official, W4PUJ (SK):

Posted: 29 Feb 2012 05:12 PM PST
http://www.eham.net/articles/27806

Richard L. Daniels, 79, a senior NASA manager who retired in 1994, died Feb. 14 at his home in Arlington. He died of lung cancer, said his wife, Jacquelyn Daniels. Mr. Daniels joined NASA in 1961 as the first management intern assigned to the Office of Space Flight Programs. He retired as deputy director of information resources management in the division of management systems. His honors included NASA's Exceptional Service Medal. Richard Lester Daniels was born in Cincinnati and graduated in 1956 from the University of Cincinnati. In 1957, he received a master's degree from the University of Pennsylvania's Wharton School of Business. Mr. Daniels was a 40-year volunteer with the Radio Amateur Satellite Corporation, where he planned and helped build and launch satellites serving thousands of amateur radio operators around the world. For this work, he received NASA's Spaceship Earth Award for community service.

City to Reassess Rules for Radio Antennas:

Posted: 29 Feb 2012 05:10 PM PST
http://www.eham.net/articles/27805

OTTAWA -- The city will take another look at its proposed rules for antennas after amateur radio enthusiasts complained Tuesday that they're too restrictive. The city doesn't officially have control over them -- they're regulated by Industry Canada, but the federal department gives municipalities a say if they want one and Ottawa is working up a formal policy. The rules draw a distinction between commercial antennas, which are proliferating as cellphone companies struggle to keep their networks up to speed, and antennas for personal use, though the policy would restrict both. Among other things, the city policy would oppose antennas in front and side yards, and potentially require public consultations for any antenna more than 15 metres tall. Several amateur radio operators addressed city council's planning committee Tuesday, pointing out that they sometimes put antennas in their front or side yards for better reception but they're often highly unobtrusive. Furthermore, the proposed policy doesn't distinguish between urban front yards and rural front yards, which could be set very far back from any road and be hundreds of feet from the nearest neighbour.

[IARU-R2-News 168] Reinaldo Leandro YV5AM
2012-02-28

To: IARU Region 2 Member Societies

I would like to share with you this letter that IARU President Tim
Ellam VE6SH sent to IARU Region 2 President Reinaldo Leandro YV5AM
about his contribution to our recent success in Geneva during WRC-12

President Reinaldo Leandro was key player in obtaining a 472 kHz band
and on the inclusion of the Cuban proposal for a possible amateur
radio band in 5 MHz on the agenda for WRC-15.

We congratulate President Leandro and make his success ours in Region 2.

Congratulations Reinaldo!

NZART Headquarters Infoline Issue 246

2 March 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· IARU News Silent Key

· Solo Aviator arrives in Auckland

· VHF/UHF/SHF Contest Results

· New Examination Policy

· WARO turns 50

>From HQ…

Not much news this week, I have been rather busy with post Council meeting minutes and preparing the necessary information to go into Break In, so no time to get up to mischief nor have my usual gripe about something.

Reminder notices for subscriptions have been sent. If you do not wish to renew, I would appreciate if you could let me know, so that I can ensure you will not continue to get reminder invoices.

Having said that NZART and amateur radio in NZ needs all your support, both financially and physically. If there is something that you feel you can specifically help with, such as promoting the hobby either by advertising, or have some other suggestion please let either myself or your local Councillor.

Talk soon…Debby ZL2DL

News from IARU R 2 - Silent Key Earle Smith VE6NM

It is with deep sadness that we have to report the passing today, February 24 2012, of Earle W. Smith, VE6NM. Earle is a former President of Radio Amateurs of Canada and has held numerous positions in RAC and its preceeding organisation. He had many friends all over the world from his involvements in IARU and his frequent travels. He will be sorely missed.

To Barbara and his children, our deepest sympathy. At this time, the
funeral arrangements have not been finalized and will be advised later.

Daniel A. Lamoureux, VE2KA

Director AREA 'A'

IARU Region 2

Solo Aviator arrives in Auckland

Please note, that around 4 pm NZ time a Slovenian aviator mr. Matevz
Lenarcic will be landing in Auckland on his ultralight airplane
Pipistrel Virus 914WS S5-PEZ on his around-the-world flight after
overlying the Pacific in 3 legs . NZART members with interest in flying
can follow him live on http://www.worldgreenflight.com/index.php?id=Please post this notice to attention of NZART members.

THE NEXT CONTEST

The next contest is the Low Band Contest, 50 MHz to 440 MHz, on Saturday
the 14th and Sunday the 15th of April 2012. This is the weekend after
Easter. The operating times are: Saturday 1700 to 2300 NZST and Sunday
0700 to 1300 NZST.

The contest after that is the Hibernation Contest, all bands 50 MHz and
up, on Saturday the 9th and Sunday the 10th of April 2012. This is the
weekend after Queen's Birthday weekend. The operating times are:
Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz

with Contest Log in the subject line, or by post to:

Contest Manager
Wellington VHF Group
P.O. Box 12-259
Thorndon
Wellington

Please include your email address if you wish to receive the results as soon as they are available.

The complete confirmed results will be published on the VHF website: www.vhf.org.nz

NZART Examination Processes & Policy

Council have decided that it is necessary to update the NZART Examination Policy to clarify our internal procedures and also incorporate the recent elaboration by Radio Spectrum Management (RSM) of their policy and expectations. RSM will be re-issuing their publication PIB 46 covering the Radio Operator Certificate and Callsign Rules once NZART have placed the 2012 version of the approved examination database on the NZART web site.

The changes to the examination database for the 2012 version correct the wording of some questions, allow for the recent power increase and replace two questions, one with a clearer less subjective question, and one on packet with a question concerning APRS.

The RSM have re-iterated that they wish to only work with the enduring organisation that represents the Amateur hobby in New Zealand, the NZART.

The RSM have also confirmed that they wish to continue with the current arrangements for the management and delivery of the Amateur examination. These arrangements make NZART responsible for the provision and updating of the currently used 2006 amateur examination question database which is hosted on the NZART website. RSM is currently working with the Training Officer to complete a review of the 2006 amateur examination question database. Once this review is completed the updated 2012 amateur examination question database will be hosted on the NZART website and this will be the only Amateur examination question database to be used for the Amateur examinations in New Zealand and is to continue to be freely available from the NZART website.

The following policy was approved at the Council Face to Face meeting in February.

NZART AMATEUR RADIO LICENSE EXAMINATION SYSTEM

As expected by the Radio Spectrum Management (RSM) Licensing Manager of the Ministry of Economic Development (MED), NZART maintains a publicly accessible and downloadable examination system on the NZART web site.

RSM have registered a number of ARX externally and require them to use the NZART Examination system (reference the RSM document PIB 46 covering Radio Operator Certificate and Callsign Rules).

NZART will have a principal Amateur Radio Examiner (ARX) who is the Examinations Co-ordinator and a deputy who are responsible for the operation of the examination system with the assistance of the members of the Examination Division appointed by Council.

The Examinations Co-ordinator and the Examinations Division are to report at least annually to NZART Council

The current database is the 2006 version and a 2012-updated version is being finalised. Once this is completed MED require this to be hosted on the NZART web site and for it to be the only examination question database to be used for the Amateur examinations in New Zealand.

NZART INTERNAL EXAMINATIONS PROCEDURES

Examinations are to be:

1. Conducted using the NZART systems and procedures with the NZART question bank and examination question paper generator provided and maintained by the NZART Examinations Division.

2. Under the control of the Examinations Coordinator who will administer examination Supervisors and have access to SMART for successful candidates to receive a Certificate of Competency and callsign.

3. Conducted within reason, on an as required, by appointment, basis

4. Available to all candidates (NZART members and non-members).

5. Held in locations that require minimum travelling for both candidates and Supervisors.

6. Two Supervisors accredited by the Examinations Coordinator in consultation with NZART Council are to be present throughout each examination session. These supervisors are initially nominated by their branch to the Examinations Coordinator.

WARO turns 50

On the 10th March this year, WARO will celebrate their 50th anniversary. There is a special a luncheon at the Millenium Hotel Rotorua to celebrate this milestone . This hotel is where the inaugural meeting of WARO was held 50 years ago. Guests as far afield as Australia (ALARA) the WIA equivalent of WARO will be attending. For more information, contact the WARO President, Margaret ZL1MB, President of WARO.

The Nelson WARO girls are attending a luncheon at the Mapua Wharf restaurant.

Amateur Radio Newsline(tm) Report 1803 - March 2 2012

CLOSED CIRCUIT ADVISORY:

The following closed circuit advisory is not necessarily for air. With some words about our new website presence and the latest from the Newsline Support Fund here's our producer Bill Pasternak, WA6ITF:

--

By now you have probably noticed that amateur Radio Newsline has a new look on the World Wide Web. Candidly, this was not planned but came about because our old web host notified us that they were leaving the shared server web hosting business by the end of February. We had to act fast and thanks to three people: Robert Sudock, WB6FDF, Dale Cary, WD0AKO and Kevin Trotman, N5PRE, the move was accomplished in less than two weeks. For this I thank them very much. But the move was not without financial cost to Amateur Radio Newsline. We had thought we would be OK through the end of May but that's no longer the case. So we are coming to you a bit earlier to ask your assistance in keeping these newscasts on the air. You ca make a donation on-line by clicking on the Pay Pal button on our website home page or by sending a donation to the address you will here at the end of this weeks newscast. Either way, we at the Amateur Radio Newsline thank you for your ongoing support. I'm Bill Pasternak, WA6ITF. Now this weeks newscast.

--

Thank you Bill. Now, amateur Radio Newsline report number 1803 with a release date of Friday, March 2nd, 2012 to follow in 5-4-3-2-1.

The following is a QST. Bad batteries may have lead to the loss of communications of a ham radio balloon from Texas to China. Also, Australia begins an evaluation program to see if its hams should be granted a power increase to a full kilowatt; Hams in Senegal to get access to 6 meters; M V Island is deleted from the DXCC and the role of social media in times of emergency reporting. All this and more on Amateur Radio Newsline(tm) report number 1803 coming your way right now.

(Billboard Cart Here)

**

RADIO NEAR SPACE: BAD BATTERIES MAY HAVE CAUSED BLT-28 FAILURE

Failure of the batteries that powered the ham radio payload of a high altitude balloon that was designed to float from Texas to China seems the likely cause of a total communications failure with the near space project. Amateur Radio Newsline's Heather Butera-Howell, K-B-3-T-Zed-D, is here with the rest of the story:

--

The South Texas Balloon Launch Team lofted the high altitude scientific balloon experiment known as BLT-28 on February 11th from near Katy, Texas. The balloon was supposed to rise to over 100,000 feet and float for several days and hopefully reach its target of Nanjing, China. But as reported here on Newsline, contact was lost with the balloons APRS tracker just south of the Louisiana coast at an altitude of 45,763 feet.

Andrew MacAllister, W5ACM, is part of the group that launched BLT-28. In a note to Lloyd Colston, KC5FM that was forwarded to Newsline, McAllister says that right now the highest probable failure mode was the batteries that powered the electronics payload on BLT-28.

W5ACM notes that the power supply was made up of commercial 1.5 volt lithium cells. According to post flight experiments, MacAllister says that several of the same type of batteries were put directly on some dry ice where they went from 1.5 volts down to two tenths of a volt. And when warmed up, they did not return to normal output.

MacAllister speculates that it could have been that cold just after reception of the last packet message from BLT28. He notes that the temp sensor system was not guaranteed below minus 40 degrees Celsius.

MacAllister confirms that there will be a second attempt to float a balloon from Texas to China, but first up will be a test flight of the thermal insulating system for the batteries and payload. W5ACM speculates that should happen sometime in May.

For the amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD,near Pittsburg, PA.

--

W5ACM indicates that if all goes well in May, that another attempt to fly a balloon from the United States to China could happen before years end. (South Texas Balloon Launch Team, KC5FM)

RADIO RULES: AUSTRALIA'S ACMA AND WIA IN STUDY TO SEE IF VK HAMS SHOULD HER 1KW POWER LIMIT

Advanced class ham radio operators in Australia are being invited to take part in a study to see if it is possible to raise the power limit down-under to a full kilowatt. This as the Australian Communications and Media Authority, better known as the ACMA publishes details of the trial of higher power transmitter output on its website. Michael Owen,

VK3KI, is the President of the Wireless Institute of Australia:

--

The ACMA has published on its website details of the trial of higher power transmitter output for Advanced amateur radio licensees.

The trial will commence on 1 March 2012 and will continue until 31 August 2013.

The ACMA has advised the WIA that the 18 month authorization is intended to provide the ACMA with time to evaluate the success of the trial after a 12 month period and to consider permanent regulatory arrangements, if warranted, while avoiding dead air between the evaluation time and the implementation of permanent arrangements, if appropriate The paper is in the part of the ACMA site dealing with amateur matters and is an information paper.

A brief article also appears on the Engage part of the ACMA website, where anyone can record their comments.

--

The Wireless Institute of Australia Board of Directors has cautioned those hams considering obtaining a higher power permit that this is only a trial. As such, if problems do emerge, it could affect whether amateurs down-under will permanently continue to be able to use the higher power. In particular, if interference is caused to others, the WIA advises that the VK radio amateur involved must immediately do whatever it takes to stop the interference, and must resolve the problem. (WIA News)

RESTRUCTURING: HAMS IN SENEGAL TO GET 6 METERS

Six meters is coming to Senegal. This with word from its national ham radio society that following its application to the Regulatory Agency for Telecommunications and Posts, the band 50 to 51 MHz has been officially allocated to that nations amateur service on a primary basis. This allocation becomes effective when the new ITU Radio Regulations come into force. Therefore any contacts made on 6 meters before that date have to be considered as unauthorized. (6W7RT)

**

DXCC NEWS: MV ISLAND DELETED FROM THE DXCC ENTITY LIST

As of February 17th, Malyj Vysotskij Island, better known as MV Island in ham radio circles has been deleted from the D-XC-C. This after an announcement by the Finnish Ministry of Transportation and Communication that the Saimaa Canal Treaty between Finland and Russia has been finalized and that MV Island is no longer included in it.

For amateur radio this means that M V Island was deleted from the DXCC and added to the Deleted Entities List. Also that the entry level for DXCC Honor Roll number has dropped to 331.

We will have more DX news later on in this weeks newscast. (N1CL)

**

RADIO RULES: ARRL PUBLISHES NEW RECOMMENDATIONS FOR 60 METERS

With new privileges on the 60 meter band beginning March 5th, the ARRL announced some new "Recommended Practices" for operating on that band.

These new suggestions are based on survey results and subsequent research. The committee evaluating the new 60 meter rules declined to propose a specific band plan at this time, but instead created a "Recommended Practices" document now available in .PDF format at tinyurl.com/arrl-sixtymeters

Also, look for the April issue of QST magazine to include an article by ARRL Regulatory Information Manager Dan Henderson, N1ND. It will offer a detailed discussion of the new 60 meter privileges and recommended operating practices for that band. (ARRL)

**

HAM RADIO IN SPACE: ARISS CELEBRATES 700th ISS TO SCHOOLROOM CONTACTS

A milestone for manned ham radio operations from Earth orbit. ARISS Operation Team Mentor Charlie Sufana, AJ9N reports that the total number of Amateur Radio on the International Space Station or ARISS sponsored ISS-to-Earth school events has passed the 700 mark.

The 700th school contact was with the Academy at Shawnee City in Louisville, Kentucky. It took place via telebridge with ON4ISS on February 14. The special John Glenn event to commemorate the 50th anniversary of Perth Australia's, City of Lights on February 20th marked event number 701.

For those hams not aware. ARISS offers an opportunity for students in schoolrooms to experience the excitement of amateur radio by talking directly with crewmembers on-board the International Space Station. Further information on the ARISS program is available at www.ariss.org. (ARISS)

RESCUE RADIO: THE ROLE OF SOCIAL MEDIA IN REPORTING EMERGENCIES TO THE PUBLIC

"Emergency Management Without Social Media.Fail" is the title of a very interesting op-ed article by author Tim Burrows posted across several social media websites. In it, Burrows looks at both the positive and negative effects on the public that social media can have in accurately disseminating and updating information of a disaster, accident or other event that the public needs to know. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

The scenario Tim Burrows writes about involves a railroad accident that took place on February 26th. That's when a VIA Rail Canada train en route from Niagara Falls to Toronto was involved in a derailment that occurred in the Burlington, Ontario area. Official news reports say that the three engineers riding in the cab of the locomotive were killed. There were no fatalities among the 75 passengers but 45 were injured.

Burrows article details the role of the mass media along with the self involvement of individuals in putting out news bulletins regarding the accident, many of which were not properly vetted before being released into cyberspace. He notes that while there was an incredible amount of information flying around there was no "voice of authority" speaking. He also takes note that official media sources were also quoting unsubstantiated sources such as one outlet that quoted an emergency agency from another jurisdiction.

On the other hand, Burrows praised several VIA Rail employees who used Twitter to keep accurate information flow of the accident even though they were being chided at on Twitter because the system suffered delays. Burrows said that even though they had just lost three members of their working family they answered everyone professionally and systematically.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Whether you agree or disagree with Burrows assessment of the role of social media in regard to the accuracy of the information being made public, his article is a very interesting evaluation for anyone involved in the world of emergency communications. This being especially true during events where no official JIC or Joint Information Center is available. You can read the entire story on-line at tinyurl.com/emergency-social-media. (Wordpress.com, Facebook)

**

RESCUE RADIO: MA TOWN SEEKS STANDBY RESCUE RADIO ASSISTANCE FROM LOCAL HAMS

Yet another city has discovered the value of having trained ham radio operators as a part of its emergency communications plan. This as community leaders in Arlington, Massachusetts, announce that they are seeking radio amateurs willing to help the town with its emergency response network.

In a statement issued to the press, officials say that they're looking for ham radio operators to become volunteers and help out in case the town's communications systems was to stop working during an emergency. Arlington used a grant from the U.S. Department of Homeland Security to buy a ham radio gear for emergencies. Any Massachusetts ham living in the area who is interested in volunteering should contact Fire Chief Robert Jefferson by e-mail to rjefferson(at)town(dot)arlington(dot)ma(dot)us. (Arlington Partch, eHam.net)

RESCUE FROM RADIO TOWER: NAKED CLIMBER REMOVED FROM ATOP LOS ANGELES RADIO TOWER

>From the believe it or not file comes the story of a naked man atop a downtown Los Angeles radio tower who was wrapped in a blanket and lowered to safety by a makeshift pulley system on Wednesday night February 8th.

The unidentified tower climber was believed to be in his 30s or 40s and possibly an Arizona resident. It was unclear why he climbed the 220 foot high structure, which is part of a city personnel building just west of downtown L.A..

Witnesses say that he removed items of clothing after he began scaling the tower about 4 p.m. Pacific time just prior to sundown. His rescue went without incident after he asked to be given some MacDonalds hamburgers.

The mission which involved a heavy presence of Los Angeles Fire Department personnel was completed at about 9:45 Pacific Standard Time. Police said that the man will not be charged with a crime and his name will not be released. (LA Times, LA Weekly, others)

**

ENFORCEMENT: FCC ISSUES A PAIR OF UNLICENSED OPERATION FINES IN FLORIDA

The FCC has issued a $20,000 Notice of Apparent Liability for Monetary Forfeiture to Florida resident Robens Cheriza. This, for operating an unlicensed radio transmitter on the frequency 107.3 MHz from his residence in West Palm Beach.

In this case the FCC says that it received an interference complaint from the Federal Aviation Administration about illegal transmissions reported by its control tower at the Palm Beach International Airport. The FCC traced the transmissions on 107.3 MHz to Cheriza's residence

and said they saw an FM transmitter connected by coax to the transmitting antenna.

Cheriza admitted operating the station for about a month and said he knew that was illegal. On the night when the airport experienced interference, Cheriza told agents he had broadcast a party from his home.

Also, Mercius Dorvilus received the base fine of $10,000 for operating a station illegally on 92.7 MHz in Pompano Beach, Florida. He told a detective from the Broward County Sheriff's Office that he bought and installed the gear in his rented room and that he was responsible for operating the transmitter. The FCC, citing Florida business records, said Dorvilus is doing business as "Radio Vision FM 927, Inc." and has registered the domain name, www.visionfm.org.

Both Cheriza and Dorvilus were given the customary 30 days from the date of the issuance of the fines to either pay or to file an appeal. (FCC)

**

COMMUNICATIONS LAW: FCC ADOPTS RULES TO STRENGTHEN CONSUMER PROTECTIONS AGAINST UNWANTED TELEMARKETING ROBOCALLS

The FCC has again slapped the hand of telemarketers to further protect consumers from unwanted autodialed or prerecorded calls, often referred to as robocalls.

On February 15th the Federal Communications Commission on approved changes to its telemarketing rules to combat unwanted telemarketing calls and texts which were consistently in the top three consumer complaint categories at the FCC in 2011.

The FCC says that robocalls invade consumers' privacy, and can, in the case of calls to wireless numbers, use up their minutes. The new rules reduce regulatory uncertainty with minimal burden on industry and maximize consistency with those of the Federal Trade Commission.

Specifically, the rules protect consumers by requiring telemarketers to obtain prior express written consent from them, including by electronic means such as a website form, before placing a robocall to a consumer. The new rules also require that telemarketers provide an automated, interactive "opt-out" mechanism during each robocall so that consumers can immediately tell the telemarketer to stop calling. They also strictly limit the number of abandoned or "dead air" calls that telemarketers can make within each calling campaign.

On the other side, the revised rules also ensure that informational calls, such as those related to school closings and flight changes, continue to be available to consumers who wish to receive them. (FCC)

NAMES IN THE NEWS: HAMRADIONOW - THE ORLANDO INTERVIEWS

Some names in the news this week. Gary Pearce KN4AQ is releasing a series a videos shot at the Orlando HamCation in mid-February. This, as a part of his Ham Radio Now series that features interviews with the true movers and shakers of the hobby in the 21st century.

His latest release includes a very in depth interview with CQ Magazine editor Rich Moseson W2VU. In it Pearce talks to him for almost an hour about how CW is faring now that it's no longer required; about the CQ family of magazine's new digital option, and a little about ham radio video production.

This video is titled Ham Radio Now Episode 2: The Orlando Interviews. More about this new series is on-line at arvideonews.com. (Southgate)

**

NAMES IN THE NEWS: THE ERIC JAMIESON INDIAN OCEAN AWARD CREATED IN VK

And the Wireless Institute of Australia Board has accepted the offer of Eric Jamieson, VK5LP, to sponsor awards for first amateur radio contacts on the two meter band spanning the Indian Ocean between Australia and Africa. There will be three honor give. One each for voice, for CW and for the digital modes. As one might expect this program will be known as the Eric Jamieson Indian Ocean Awards. More on this is on line at www.wia.org.au. (WIA News)

**

NAMES IN THE NEWS: LIGHTSQUARED ANNOUNCES LAYOFFS FOLLOWING FCC DECISION AGAINST ITS NETWORK

LightSquared Inc. the wireless company whose controversial plan to operate in spectrum adjacent to that used by the space-based G-P-S navigation system says that it plans to lay off nearly half of its

employees to save money. In a press release, the company said it will cut 45 percent of its 330 employee workforce and called the move a necessary cost savings measure to ensure the long-term success of the company.

As previously reported, the Federal Communications Commission dealt the company a severe blow when it said it would revoke permission for LightSquared to move ahead with its wireless network. This, after tests found that it would interfere with Global Positioning Systems used by the military, the airlines and the general public. (Published news reports)

EMERGING TECHNOLOGY: PASNASONIC TO RELEASE TEXT TO SPEECH TV

Panasonic plans to release a new line of televisions in March with text-to-speech capabilities. This according to a podcast from the UK-based show Early Edition.

On the netcast, Panasonic's Nigel Prankard is quoted as saying that users will be able to obtain channel information, browse the user guide, and use the built-in electronic program guide among other features.

He went on to explain that the company felt it was the right time to include accessibility features and that Panasonic planned to include it in all models. This based on the company stating that a user shouldn't be limited in the choice of a television by which ones included accessibility features.

Apple is credited in part for proving the technology could be added without much additional cost. This initial release of these new televisions sets appears to be targeted toward the UK market. No word when these sets will be released world wide. More information is on-line at tinyurl.com/first-accessible-tv. (KC9RP via Insight Radio)

**

HAM RADIO IN SPACE: AMATEUR RADIO CELEBRATES JOHN GLENN OVER PERTH AUSTRALIA

50 Years of anticipation all worked out on the day that Australia and the world celebrated John Glenn's orbit in Friendship 7 over the city

of Perth on Monday, February 20th. And ham radio was an important part of the event. Onno Benschop, VK6FLAB, reports:

--

We had John Glenn, the Premier of WA, the Lord Mayor of Perth, Lyn Beazley the WA Chief Scientist and many other dignitaries on hand to celebrate. We even managed to squeeze in some David Bowie and a video on how to become an astronaut.

The crowds filled the Northbridge Piazza and much anticipation culminated at 10:24 UTC. Orbital calculations all worked out and the International Space Station made it across the horizon. There were some chilling seconds when Mike was calling from Honolulu, but in the end, the contact was a great success.

Of course, an event like this could not have been possible without a little help from some friends, Captain Dan Burbank on the International Space Station, the WA State Records Office, the WA Museum, the City of Perth, ARISS, NASA and the Hills Amateur Radio Group.

A full credit list is being prepared on the Hills Amateur Radio Group website, but two people require a special mention, Tony VK5ZAI the Australian ARISS mentor and Meg VK6LUX who energetically kept the multitude of interested parties moving along making it all possible.

We managed to get Amateur Radio into the news on ABC Online, ABC radio and local television, who knows we might pick up some more amateurs along the way.

Alex VK6FLOL and Donald VK6PDS scored a place in history as prize winners for the contact.

I'm Onno Benschop, VK6FLAB

--

By way of background, on February 20, 1962, John Glenn became the first American to orbit the Earth in the Friendship 7 spacecraft. On this mission, Glenn flew over Perth and the people of Perth turned on their lights to acknowledge his mission. Glenn observed that the city was visible from space and Perth become known worldwide as the City of Light. (WIA News)

WORLDBEAT: RSGB ATTEMPTS TO HARMONIZE 5 MHZ ALLOCATION

The RSGB report that it has received an offer from the primary United Kingdom user of 5 MHz, which is the Ministry of Defense aimed at working with the British ham radio community on band access issues.

As has been reported earlier the Ministry of Defense was unable to meet an RSGB request for access over a continuous range but has offered a number of small frequency blocks. These include all of the present 3

kHz wide channels.

The new offer is quite complex and the RSGB's view is that it need to seek input from members and non-members of the UK amateur community as to how it responds. As such the RSGB announced that it would be launching what it calls a second "Litmus Test" discussion entitled "New 5 MHz NoV proposals".

The details of the offer and a draft response from the RSGB should have been uploaded to www.rsgb.org/consultations by March 1st. (GB2RS)

**

ON THE AIR: TARC REMEMBERS THE APRIL 2011 TUSCALOOSA TORNADO VICTIMS

On the air, the Tuscaloosa Amateur Radio Club will be operating special event station W4XI on April 28th from 11:00AM to 5:00PM local time. This in remembrance of the 44 people that died when an F-4 tornado struck that city on April 27, 2011.

Operation will be from the top of the western parking deck at Druid City Hospital Regional Medical Center in Tuscaloosa. The operating frequencies will be 7.270 and 14.270MHz, +/- any QRM. The club will also have a RTTY station in the data portion of both the 40 and 20 meter bands. QSL information is on the club website at www.w4kcq.org. (N4EDT)

**

ON THE AIR: THE IRTS CELEBRATES ITS 80th ANNIVERSARY

The Irish Radio Transmitters Society is now celebrating its 80th anniversary and is on the air with the special callsign EI80IRTS. An attractive certificate sponsored by Dundalk Amateur Radio Society will be available to all who make contact with the station. More details are on-line at www.ei7dar.com/ei80irts.html. (IRTS)

**

DX

In DX, JI3DST, will be on the air signing portable 9M2 from West Malaysia between 0000 UTC on March 10th and 0900 UTC on March 11th. His activity will be on 80 through 6 meters including most of the WARC bands. Modes to be used will include CW, SSB and FM. QSL via JI3DST.

DJ0IF and SP7VC will be on the air from Madeira Island through the 7th of March signing portable CT9. QSL via their home callsigns.

F6ITD will operate SSB and digital modes on the HF bands from Guadeloupe until 13th of March. QSL via his home callsign, either direct or via the bureau.

Lastly, K5LBU, VE7MID, VE7DS and N5JR will be

active from the Lotsane Safari Lodge in Botswana

between March 18th and the 27th. The group

plans to be active in the CQ World Wide WPX SSB

Contest from March 24th to the 25th as A25HQ.

They will have three radios and both a log

periodic and wire antenna covering 160 meters

and up. More details in future Amateur Radio

Newsline reports.

(Above from various DX news sources)

**

THAT FINAL ITEM: NASA SHUTS DOWN LAST MAINFRAME

There was a time when IBM's mainframe computers were the cutting-edge machines for scientific and engineering calculations. Now, for NASA that's all come to an end. Cheryl Lasek, K9BIK, has the details:

--

The day of the giant mainframe computer began in the 1960s, when IBM's System 360 rewrote the rules of computing and before humans walked on the moon. When NASA acquired two of the then super-speed System 360 Model 95 mainframes in 1968, IBM touted the machines' mathematical abilities.

But February marked the end of the era in NASA computing. This as the space agency powered down its last IBM Z9 mainframe that was located at Marshall Space Flight Center.

Linda Cureton is a Chief Information Officer who once programmed a System 360 mainframe in assembly language at the Goddard Space Flight Center in Greenbelt, Maryland. She is quoted as saying that mainframes are really not so bad and they have their place. She notes that things like virtual machines, hypervisors, thin clients, and swapping are all old hat to the mainframe generation though they are new to the current generation of what she termed as cyber youth.

But for many in the industry, mainframes had become so burdened with a reputation for a bygone era of computing that they became synonymous with dinosaurs. To counter this IBM fought back, boosting performance, adding new technology. The company succeeded in that these newer mainframe systems remain a fixture in some corners of the computing industry.

In the old days, mainframes were the size of several large rooms. Today these units are only the size of a refrigerator. And even though NASA has shut down its last one, there is still a requirement for mainframe capability in many other organizations.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

By comparison with days gone bye, today's fastest mainframe supercomputers can perform 10.5 quadrillion calculations per second. (NASA, Science OnLine)

WIANEWS WEEK COMMENCING MARCH 4 2012.

VK7 24GHz Records Set

What use is an f-call?

ANTENNA SPRAY

SPECIAL EVENTS AND ON AIR CONTEST COLUMN

THESE ITEMS AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MARCH 04 2012.

VK7 24GHz Records Set

Rex VK7MO that intrepid Microwave DXer lets us know that over the last little
while David VK3QM and Ken VK3AKK along with Rex have been gradually increasing
the 24GHz Tasmanian State Record from a few meters across his Lounge room to
6 km across the river, 17 km from Mt Wellington to Coningham to around 161 km
from Mt Barrow to Mt Wellington.

The equipment used at the VK7MO end was 4 watts into a 47 cm dish based on
Khune Tranceiver PA and Preamp all GPS locked. At the VK3QM/VK3AKK end they
used a 10 inch dish and 500 mw output.

Rex also says 24GHz digital tests that were undertaken between Mt Barrow and
VK3HZ proved to be very promising. The path was 421km path between John's Hill

lookout in VK3 and Mt Barrow. While a QSO was not completed three full decodes were exchanged suggesting that such a path is possible on 24 GHz.

Watch this space!!!!

Congratulations to all involved.

(vk7wi)

In preparation for the April announcement on Australia's Square Kilometer Array bid, a new supercomputer that is 10,000 times faster than an average office desktop computer has been installed at the University of Western Australia (UWA).

Besides the need for a supercomputer, scientists at the International Center for Radio Astronomy Research (ICRAR) say the AU$2 billion SKA will also generate one exabyte of data − a billion terabytes - every day while it searches the sky with the power to detect airport radars in other solar systems 50 light years away.

Basically, the amount of computer data generated by the entire world in a whole year will need to be stored in a single day for the telescope.

The SKA is a continent-wide Australasian project with radio telescope sites that that extend to New Zealand. Results on the SKA bid is expected to be made by the international SKA Board in London in April.

The other bid comes from South Africa.

(icrar - asian scientist)

The Federal Government is in confidential negotiations with railway operators after setting prices for radio spectrum critical to a new national rail safety system.

Communications Minister Stephen Conroy's office said state transport authorities would be required to pay full commercial rates for the spectrum as it revealed it was in confidential negotiations with them over renewal of their spectrum licenses.

Under terms of the determination announced last week, operators will be required to pay $0.23 per person living in each license area for every MHz of 1800MHz spectrum they operate.

That would mean rail authorities would collectively have to pay at least $420m to retain their current license holdings in each state.

(sourced to the Australian)

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Have you registered to attend to the WIA Annual Conference being held in Mildura over the weekend 25th - 27th May?

Saturday afternoons Technical Symposium - Technology To The Future. Hear what the experts have to say, learn about the cutting edge technology and what our Australian Amateurs have been working on, and the bright future for our hobby.

One of the presents will be Andrew Martin, VK3OE. Andrew is a qualified Telecommunications Engineer --- Andrew has developed a remote internet controlled site and chirp radar for amateur use. Andrew will discuss his remote site together with recent developments and results obtained with the chirp radar.

It's going to be a very special weekend of activities, and there is much more in store that we will continue sharing with you in upcoming broadcasts and don't forget the registration page on the WIA Website.

Up up and away, see you in Mildura this has been Robert VK3DN

HAMS ACROSS AUSTRALIA.

vk2zwk advises Fishers Ghost Amateur Radio Club will be holding an exhibition for 2 weeks at Campbelltown Library. On display will be various radios, photos and details of activities undertaken by FGARC. This is part of the 30th Birthday celebrations March 19 - 31

Tomorrow evening the 5th the upgrade course commences with Amateur Radio NSW at 7pm. This course will continue each Monday evening, other than public holidays. The location is at the VK2WI site = number 63 Quarry Road, Dural. While the course is intended for Foundation licenses to upgrade to either Standard or Advanced don't let not yet holding a license stop you attending.

Later in the month there will be the one day Foundation Course of Sunday 18th. Assessments for all license grades will be held on Sunday 25 during the bi-monthly Trash & Treasure days - all the the VK2WI site.

The Gippsland Gate Radio & Electronics Club members announce that on 21st July 2012 they will be conducting their annual Hamfest at the Cranbourne Community Hall on the corner of Clarendon and High Streets, Cranbourne. High Street is part of the South Gippsland Highway. Melway 133 K4.

Forty tables of goods will be presented at this large venue, but stall holders should book early as demand is always high. Reservations for stall holders may be made by contacting Steve Harding VK3EGD on 0408 878934 or by emailing. More information can be found on the GGREC

website.
Tables will be available for $20 each. A limit of four (4) tables per Stall Holder applies. Doors open at 8:30 AM. for stall holders and at 10:00 AM for the general public. The admittance fee of $6 as a buyer will go towards the continued upgrading of facilities at our Club Shack & meeting room in Cranbourne.

Take away food, tea and coffee will be available. The entry fee includes a ticket in the Door Prize which will be drawn around 1:30 PM for all who register upon entry. Great prizes to be won as usual. Additional tickets can be purchased on the day.

Sewing Circle Net Meet the Voice BBQ

If you have not heard about it by now, then let us update you on the up and coming Sewing Circle Net Meet the Voice BBQ. The Ross event gets under way at 10.30am Sunday 18 March.

Registration is just $5.00 per amateur or family. Your registration will give you 2 free tickets in the mighty raffle. This year, 2 prizes. A $100 voucher, kindly donated by Dave and Claureen Wilson from TTS Systems. The other prize a new FDC 70cm/2m dual band hand held radio. Extra raffle tickets will be on sale on the day!

Plans for the auction of quality pre owned equipment are well underway. So far, 10 items for auction including 2 computer systems, a 70cm multimode radio, an 80M antenna, a quarter kilo bag of resistors, a screwdriver antenna with controller, a super jpole dual band antenna and much more.

The Sewing Circle Net extends many thanks to auction donors Geoff VK7GW; the two Bryan's VK7KBE and 7KWB and Ron VK7VDL. Do you have something that you would be willing to donate to the auction?

Remember, all funds raised (and we mean every dollar) from registrations, the raffle and the auction will go to repeater maintenance around Tasmania.

The car boot sale will feature again this year. Fill your vehicle with any pre-loved gear that you would like to sell. Going on previous years, trade will be brisk. If you have a boot load, maybe you have something that you could donate to the auction? If you do have something to donate, all they ask is that you do not leave it to the last minute.

A website is dedicated to the Ross event, kindly provided by Tony VK7VKT. The web address is sewingcircle.org

(Vince VK7VH, Don VK7AY and all the crew on the Sewing Circle Net)

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

(EPISODE 20111009)

Amateur Radio is a moving feast of people, coming and going, gaining interest, loosing interest, having time, running out of time. Every week there are people joining and people leaving the hobby. Fortunately the Foundation License seems to be increasing the size of the hobby quicker than the number of people leaving through choice or not.

One of the things that strikes me is that there is a small group of amateurs with foundation licenses who can be heard on-air, but there is a large contingent of licensees that are hardly ever heard from. Of course it's possible that some of those F-calls never even purchased a radio, or that their circumstances changed by the time their license came through, but overall I'd expect to hear more people on air than I do.

So what is stopping those new amateurs from participating?

Why are they shy to push on their magical microphone key and have a go? Rather
than answering the question, perhaps you might ask yourself if there is anything that you could be doing that might encourage new licensees to join in the fun and become active participants in the hobby.

It's not for me to dictate how you might go about achieving that, but I always have suggestions - I'm never short of a word and you might have guessed. For one,
leaving a break between each over is an excellent way to let newcomers feel like you care enough about them to let them join in. One amateur I spoke with suggested that you put your microphone down after your over which forces you to pick it up with the associated delay, leaving a space for another station to chime in with their contribution.

Not that I'm suggesting that amateurs talk over the tail of each other, or anything like that - hi hi.

Perhaps there are other tips you have to contribute.

I'm Onno - vk6flab

INTERNATIONAL NEWS With thanks to IARU, RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

UK National Radio Centre opens

The National Radio Centre at Bletchley Park opened its doors for the first time on Saturday 25th February.

It is initially operating for three days a week - Thursday, Saturday and Sunday - while the displays and exhibits are put through their paces. The formal opening is expected to take place in late spring.

Improved 60m access

Following proposals from the RSGB to Ofcom, aimed at harmonising NoV access to 5MHz with that access enjoyed by radio amateurs in other countries, the Society has received an offer from the MoD.

It was reported earlier that the MoD were unable to meet our request for access over a continuous range, ie a band, so at our request have offered a number of small frequency blocks, which include all of the present 3kHz wide channels.

More information can be found on the RSGB website, following the link on their home page to Consultations

HAM RADIO IN HOLLYWOOD

In a movie Journey 2: The Mysterious Island, Sean Anderson (played by Josh Hutcherson) receives a coded distress signal that comes from a mysterious island where no island should exist.

The movie opens in Dayton, Ohio with Sean on his motorcycle, being chased by police officers. Sean had been caught breaking in to a "satellite facility." When questioned Sean confesses that he had received a coded message from his grandfather but his equipment was too weak to copy it; he decided to go somewhere where there were bigger antennas.

The message -- a string of one and two syllable words makes no sense to Sean. But a former US Navy cryptographer, offers to help decode the message; Seems the message is really in Morse code:

each one syllable word is a "dit,"
while each two syllable word is a "dah."

This gives clues to the location of the grandfather's whereabouts.

NEWS FROM ARNEWSLINE USA

A SPRAY-ON ANTENNA

Chamtech Enterprises, of Sandy, Utah, has developed a spray-on antenna material that it says is more lightweight and energy efficient than current technology.

Revealed at Google's inaugural "Solve for X" symposium, the company says that an antenna can be painted onto almost any surface including trees, walls and even on fabrics.

Chamtech says that it is already talking with government-based customers, and as such can't give too much detail on how it works. However it has released information that its material uses organic elements that have the ability to interact with magnetic and radio-frequency fields.

The company's Chief Technology Officer is Rhett Spencer. Spencer is quoted as saying the antenna could increase mobile energy efficiency by 10 percent. Also that it was found to work particularly well under water. Observers at the event say that being organic could make it ideal for sub-aquatic telecommunications infrastructure.

Prelimnary tests on current a generation cell phone showed that the product was able to boost signals by an impressive 20 dbm when painted over the standard internal antenna.

>From our point of view, for ham radio operators living in antenna restricted areas such as apartments or condominiums, the possibilities of a product such as this could be endless. All a ham might need is a bit of imagination and some of the spray-on antenna paint to get on the air with a signal much stronger than from the rubber duckie on his or her HT.

For the Amateur Radio Newsline, I'm Michael Grebert, N4OZ, not far from Music City, Nashville, Tennessee.

For more information about the Chamtech spray-on antenna material you can take your web browser to www.chamtechops.com A video with a talk about the technology involved is on-line
tinyurl.com/spray-on-antenna

COORDINATING THE SUPER BOWL

And finally this week in the ARNewsLine segment of WIA Natioan News, a tale of frequency coordination to the stars. Not the stars in the sky but those on the football field at this year's Super bowl. It's also the story of the part played in the process by a number of Hoosier state radio amateurs.

Here's Jack Parker, W8ISH:

INDY SUPER BOWL HAMS

Actuality Audio: "Check one two three four-This
is about a team an organization-I've just gone
from hotel to stadium. It was a great experience overall."

>From mic checks to manning to Madonna to the
man on the street the airwaves around downtown
Indianapolis were full of frequencies from over
3500 hundred transmitters. For two weeks prior
to Super Bowl 46, and through the game itself,
hundreds of radio and television stations were
vying for radio spectrum in their efforts to
cover the greatest show in professional football.

Keeping interference to a minimum is the job of
the Super Bowl Frequency Coordination
Committee. It is a team of 46 six, including 17
Amateur Radio operators from central
Indiana. Their mission was to log, tag and tune
all wireless transmitters from broadcast media from around the world.

As Super Bowl Sunday approached the job of
preventing interference became a super task. The
Indianapolis Super Bowl village, Lucas Oil
Stadium and major hotels are located in a one
mile square area. According to one volunteer,
that is a lot of RF in a small area.

According to organizers the area of frequency
control was expanded on game day stretching
out about 30 miles into the suburbs of central Indiana.

Reporting from Indianapolis, I'm Jack Parker, W8ISH.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

VK JOHN MOYLE MEMORIAL FIELD DAY March 17-18
WW FISTS TITANIC SPRINT April 15

WW International Lighthouse Lightship Wknd August 18-19

FISTS have sponsored a Titanic 24 Hour Sprint on Sunday the 15th April 2012.
(0001 to 2359 U.T.C).

All licensed Amateur Bands except the WARC Bands.

Recognising the 100th anniversary of the loss of the RMS Titanic on the 15th April 1912. This event is to be a standard exchange, between stations.

Scoring: -
10 Points for any Titanic special events station
5 Points for a FISTS HQ Station (GX0IPX, GX3ZQS, MX5IPX, VK2FDU, ZL6FF, JL3YMV, KN0WCW)
3 Points for a FISTS Affiliated Club Station
2 Points for a FISTS Member
1 Point for a Non Member

Logs: - To include Date/Time/Call/Name/QTH/QRG/FISTS No/or Non Member Points.
by e-mail to m0bpt@yahoo.co.uk
in Excel/csv/tabbed word document format if possible.

To be received no later than 30th April 2012.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Prefix hunters don't forget that Croatia is marking the 20th
Anniversary of the allocation of the 9A prefix.

Operators there are permitted to insert the figures '20'
into their callsigns.

For example 9A2AA will become 9A202AA, 9A1MM becomes 9A201MM etc.

These prefixes are available throughout 2012.

(irts)

5 P 12 EU

Denmark has the Presidency of European Union from 1st January to
30th June 2012 and the callsign 5P12EU will be activated during
this period. QSL cards will be available and there is an award
scheme for working or hearing this callsign. For all details on
QSLing, the award scheme and logs, check out www.5p12eu.dk

EI 80 IRTS Special Callsign

As the Irish celebrate their 80th Anniversary, a special callsign EI80IRTS
is now on the air and a very attractive certificate for working EI80IRTS
is sponsored by Dundalk Amateur Radio Society, and details can be seen at
http://www.ei7dar.com/ei80irts.html

G3PHO will be on the air as 9H3C from Malta's Gozo Island between March 8th and
the 15th. Activity will be on 80-10 meters and possibly 160m.
Look for him to be an entry in the RGSB Commonwealth Contest.
QSL via G3PHO his home callsign or Logbok of the World.

J88DR

St Vincent in the Caribbean. J88DR will be there until 14 March on the HF bands
with emphasis on 30, 17 and 12 metres. QSL to Dave G3TBK.

T6JM

A station from Afghanistan is Jose CT1FKN who is signing T6JM.
He is there until mid-June and is mainly QRV on 20m SSB and BPSK31.
QSL T6JM to CT1FKN his home call.

TA1TC

Albania will be on the air during the CQ WPX SSB Contest. This with word that TA1HZ will operate from that nation as ZA1TC for the period of March 23 to 26 details and QSL info is on www.qrz.com.

REPUBLIC OF THE SOUTH SUDAN AWARDED Z8A TO Z8Z CALL SIGN BLOCK

The ITU has announced the official callsign allocation prefix block for the newly crated nation of the Republic of South Sudan will be Z8A through Z8Z. The Republic of South Sudan joined the United Nations on July 14, 2011 at which time it became the 193rd member of that august world body.

(arnewsline)

ZS4U will be operational portable 9Q6 from the Republic of the Congo between March 10th and April 5th. Activity will be limited, probably mainly on the weekends and some days during the week.

Listen out for him between 1200 and 1600 UTC on 40 through 6 meters using CW, SSB and PSK31. QSL via his home callsign zs4u.

AWARDS

ERIC JAMIESON INDIAN OCEAN AWARDS

Last weeks news carried the story by our President on a new award.

The Board meeting in Melbourne over the weekend of 18-19 February 2012 accepted the offer of Eric Jamieson, VK5LP, to sponsor awards for first amateur radio contacts on the two metre (144 MHz) band spanning the Indian Ocean between Australia and Africa.

There will be three awards, for voice, CW and digital modes and will be known as the Eric Jamieson Indian Ocean Awards.

In presenting a sum of money to the WIA Foundation to fund the Awards, Eric said: "I acknowledge that spanning the Indian Ocean will not be easy but one cannot say that it will never be accomplished. The degree of difficulty may be judged from the so far inability to span the much shorter Atlantic Ocean despite concerted attempts in order to win the Brendan Atlantic Ocean trophies."

The Indian Ocean Award is designed to encourage experimentation in propagation and long distance communication techniques in the two metre amateur band.

VK9ZR Mellish Reef 1982

A video of the 1982 Coral Sea DXpediton to Mellish Reef, VK9ZR, has been released on YouTube.

The YouTube description reads

1982 Coral Sea DXpediton to Mellish Reef, VK9ZR, aboard sailing yacht Banyandah with Jack and Jude. Amateur Radio. Stops at lonely weather station on Willis Island, population 4. Cyclone forces departure.

Super 8 film, rough in patches, but great adventure showing energy and courage in undertaking the 3 week, 2500 km journey across the Coral Seas using only primitive sextant for navigation.

Watch Mellish Reef ~ MidOcean Adventure ~ (makes you wonder why these days with GPS so many DX Peditions collect their sponsors yet never make the air!..ed)

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

RAOTC MARCH REMINDER.

Hallo everyone, this is Clive VK6CSW with a reminder that the next Radio Amateurs Old Timers Club of Australia's news and information bulletin will take place tomorrow, Monday March 5th, at the usual times and on the usual frequencies.

At 10 am Victorian time the relay can be heard on 145.7 MHz FM in the 2 metre band, and also on 7060 and 3650 kHz

At 0100 UTC the bulletin is beamed north from Melbourne on 14.150 MHz USB

An hour later at 0200 UTC the bulletin is beamed westward again on 14.150 MHz USB.

For West Australian listeners, the bulletin is transmitted at 8 am local time on 7060 kHz LSB and again at 10 am via all linked NewsWest repeaters.

Everyone, RAOTC members and non-members alike, is cordially invited to listen and to call back afterwards.

In case you missed that, to check times and frequencies for your area, visit the RAOTC website at raotc.org.au

(Clive VK6CSW)

N6SL SAYS QCWA 40 METER CW NET SPPED LOWERED TO 15 WPM

Ben Russell, N6SL says via the Quarter Century Wireless Association's remailer that to encourage more participation the 40 meter QCWA 40 Meter CW Net that the code speed has been reduced to approximately 15 words per minute.

N6SL, who is the Net Control Station, says that this net meets every Wednesday at 8 PM Eastern Time on 7.035 MHz +/- QRM. Anyone interested in QCWA and its activities is invited to take part.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 25th-February, through Friday, 3rd-March, there were 221 countries active. Countries available: 1A, 3A, 3B8, 3C, 3C0, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S0, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

2012 INTERNATIONAL YL DAY 10 METER SSB CONTEST. The Federaci&#65533;n de Radio Aficionados de Puerto Rico (FRAPR), will have their first "International Woman's Day 10 Meter SSB Contest" on Saturday, March 3rd, at 9am (1300UTC) until 8:59pm (0059 UTC) on Sunday, March 4th. It will be between the frequencies of 28.300 to 28.500 MHz with maximum output of 100 watts. The contest is to promote Amateur Radio female operators to participate on the lower bands. For rules and log sheet, please go to: http://www.frapr.org/2011/concurso_10m_2011/Reglas_logbook_mujeres_2012.pdf Even though this is a local contest, there will be a special certificate for those female operators from other countries who contact the Puerto Rican YL's. To obtain a special certificate, please send SASE to: FRAPR RR1 Box 6418, Guayama, PR 00784-9606.

3C0, ANNOBON ISLAND (Update). By the time you read this, operators Elmo/EA5BYP and Javier/EA5KM are now active as 3C0E from Annobon Island (AF-039; Pagalu). Nothing was heard about a possible extension, so activity will last until March 11th. Activity will be on 160-6 meters using CW, SSB and RTTY. See OPDX.1047 for suggested frequencies. QSL 3C0E (as well as 3C6A) via EA5BYP: Elmo Bernab&#65533; Coll, P.O.Box 3097, 03080 Alicante, Spain. For more details and updates, watch the Web page at: http://www.gdgdxc.net/3c0e/index.php

4J0, AZERBAIJAN (Lighthouse Op). Members of the "Safari DX-Activators Club" will activate Nardaran Lighthouse (AZE-008) and possibly (depending on permission) Shuvalan Lighthouse (AZE-007) between March 3-4th. Activity will be between 0800-0000z approx. The callsigns to be used by the team of operators are 4J0LH for Nardaran, and 4J0SFR for Shuvalan. The main bands of operation will be on 40 and 20 meters. They will use two IC-718 w/PA-200W into multi-band Delta-42m and Inverted-V antennas. QSL via 4J5T. Operators mentioned are Yasuhiko/JR0HYT (QRP), Boris/4K4K (CW), Sergey/4J5A (CW), Oktay/4J7A (CW/SSB), Farid/4K6AF and Natig/4J5T (SSB, team leader).

4K, AZERBAIJAN. Axel, DL6KVA, will once again be active as 4K0CW from Baku between March 15-20th. Activity will be CW only on all HF bands (depending on the band conditions) using 100 watts into a 84m long wire (from Vlad's, 4K9W, QTH). Axel also plans to participate in the Russian DX Contest (March 17-18th) as a Single-Op/Low-Power/CW entry. QSL via DL6KVA (Bureau OK). Logs will also be uploaded to LotW.

5N, NIGERIA. Bodo, DF8DX (ex-DL3OCH and 5N0OCH), will once again be active as 5N7Q from Abuja between March 7-14th. He is there for maintenance work on a broadcast station. Activity will be on 40-10 meters using one of the largest fully rotatable huge broadcasting antennas on modes CW and SSB. Bodo informs OPDX, "In the past, I had alot of QSOs on 80m, even though the antennas are not really designed for that band. I will try to be active on 80m as often as possible. These antennas that I use have a 20dBi gain on all frequencies from 6-26 MHz. They are optimized as transmitting antennas. They are very broadband tuned and therefore also catch alot of noise. So, whenever there is some QRM or QRN, it's a lot

stronger on my antennas, and I cannot always use them on frequencies below 10 MHz. The QRM is just too high, and I don't copy anything. But there are days where I switch to 80m and the entire band is very calm and noise is only S1. I then had fantastic DX QSOs on 80m. I will try that for sure again, but it's not only depending on me." QSL via DF8DX, direct or by the Bureau. All QSOs will be uploaded to LoTW.

6V, SENEGAL (Now 6m!). Members of the Saly Amateur Radio Club Station (ADRASEC) in Mbour will activate the special callsign 6V7SIX to celebrate the newly allocated band 50-51 MHz in Senegal, recently obtained at WRC-12. This is a temporary authorization valid until the new ITU Radio Regulations (WRC-12) come into force, normally by the end of 2012. The 6V7SIX Radio Club operators will be listening to 50.110 MHz (Intercontinental calling frequency) and 50.210 MHz (French calling frequency). The 6V7SIX callsign is the first, and for now, the only station authorized to operate on the 6-meter band in Senegal. 6V7SIX is proud to be sponsored by the UK Six Meter Group (UKSMG) and InnovAntennas. QSL via eQSL and LoTW only.

7P, LESOTHO. Gert, ZS6AYU, will once again be active as 7P8GF between March 8-13th. Activity will be holiday style on 40-10 meters, CW only and using just 100 watts into a vertical. QSL via ZS6AYU (see QRZ.com).

8Y, GUYANA. Operators Anderson/PY2TNT and Alex/PY2WAS will be active as 8R1PY from Lethem, Guyana, between April 5-8th. Activity will be on 80-10 meters, including 30/17/12 meters, using CW and SSB. QSL via PY2WAS, direct or by the Bureau.

9Q, DEM. REPUBLIC OF CONGO (Update). Barney, ZS6TQ/ZS4U, will once again be active from here, but this time as 9Q6/ZS4U between March 14th and April 8th (not March 10th and April 5th, as first announced). Activity will be limited as work permits, mainly on the weekends and some days during the week between 1300-1500z. Operations will be on 40/20/15/10/6 meters using dipole antennas and operating CW, SSB and PSK31. QSL via K3IRV.

A3, TONGA (Reminder). Sigi, DL7DF, will head up a team of 9 experienced operators to be active as A35YZ between March 7-24th, 2012. Operators menitoned are Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Reiner/DL7KL, Sigi/DL7DF, Juergen/DL7UFN, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI. Activity will be active on 160-6 meters using several stations operating on CW, SSB with one station exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or by the Bureau.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the ARRL DX SSB Contest (March 3-4th) as a Single-Op/Single-Band (15m)/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

CE0Y, EASTER ISLAND. Tim, NL8F, will be active as CE0Y/NL8F from Easter Island (SA-001) before and after the CQWW WPX SSB Contest (March 24-25th). Tim informs OPDX that he is trying to get a CE0Y callsign. Activity outside of the contest will mainly be on 17 and 12 meters, but he does

have capabilities for 80-6 meters. Depending if he can tune on 75 meters, he will try the DX window on the gray-line times. Operations will be mostly SSB and maybe some Digital depending on quiet times. Also, during the contest, he may operate as a Single-Op/Single-Band (10m)/Low-Power entry, but if conditions are not right, he will operate as an All-Band entry. He will have an amp with him, but will only use it outside of the contest. Reports indicate that he will be there until March 26th, and may also activate one or two other South American IOTAs before he departs to Chile on April 3rd. QSL as of press time is via his home callsign, but this may change. More details are forthcoming.

CR2, AZORES (Going After The EU Record). Operators Martti/OH2BH, Ville/ OH2MM and Juha/OH8NC have decided (in spite of relative poor prediction) to put the 1991 EU record to rest. Listen for CR2X to be active on all six bands during the ARRL DX SSB Contest (March 3-4th) as a Multi-Single entry. QSL via OH2BH.

DAYLIGHT SAVING TIME (DST). Just a reminder that countries who observe this, Daylight Saving Time will take place on Sunday, March 11th at 2:00 AM, and the clocks are moved forward 1 hour to 3:00:00 AM local time. Daylight Saving Time will end on Sunday, November 4th at 2:00 AM. For the history and details about DST, as well as an interesting map of the world, see: http://en.wikipedia.org/wiki/Daylight_saving_time

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
VK0TH • Macquarie Island; Current Operation

If you had this operation rejected in a recent application, send a note to bmoore@arrl.org to have your record updated. Note, due to extremely heavy E-mail, DXCC may not respond to your message. Once updated, this will be reflected in your LoTW account and/or in the live, daily DXCC standings on the website. <www.arrl.org/dxcc>

E5, SOUTH COOK ISLANDS. Operators Graeme/VK4FI and Alan/VK4WR will be active as E51GMH and E51BKM, respectively, from the South Cook Islands between April 8-27th. Graeme informs OPDX that they will activate Rarotonga Island (OC-013) and Aitutaki Island (OC-083). Their main band of interest is 6 meters, and for the HF bands, 40/20/17/15/12/10 meters. They will use and IC-706 and a FT-450 into a 5 element Yagi for 6m and a OCF Dipole. Modes will be CW and SSB only, no amplifiers - 100 watts only. QSLs go to VK4FI (see QRZ.com info - 2 USDs for postage).

EF8, CANARY ISLANDS. Operators Carlo/IK1HJS, Manuel/EA8ZS, Pekka/OH1RY/ EA8AH and Juan/EA8CAC will be active as EF8R from Gran Canaria Island (AF-004) during the ARRL DX SSB Contest (March 3-4th) as a Multi-Single entry. QSL via LoTW.

EF8, CANARY ISLANDS. Jaime, WP3A, will be active as EF8C during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via NP3O. Look for more info on: http://kp2b.net

GI100, NORTHERN IRELAND (Special Event). During the month of April, look for special event station, GI100MGY, to be active from the RMS Titanic's home city of Belfast. The suffix, MGY, was the callsign of the ill-fated ship, which was launched from Belfast in May 1911. The special prefix, GI100, was allocated to the "Project WhiteStar" special event team by Ofcom, the UK regulator. Activity will be on 80-10 meters using all modes. On April 15th, there will be a 2 minute station silence at 01:47 am, the exact time when the vessel sank, in memory of all those who lost their lives that night. On the evening of 14th and 15th, most of the operations will be on CW. QSL via GI4FUE direct or by the RSGB Bureau (details are on QRZ.com).

IOTA NEWS.............
AS-175. (Update/Change) NEW IOTA! Look for an Indian team to be active using the callsign AT2DW (not ATBDW as announced) from Bet Dwarka Island (Bet Shankhodar) between March 15-31st. This island is in the Gujerat State West IOTA Group and has never been activated before. Activity will be on 80-10 meters using CW, SSB and the Digital modes. Operators mentioned are Sarla/ VU2SWS (Group Leader), Milind/VU2IZO, Nand/VU2NKS, Deepak/ VU2CDP, Basappa/VU2NXM, Laxman/VU2LX and Lion/VU2JHM. More details and a Web page are forthcoming.

OC-221. Joppy, YB8XM, and a team of 17 operators (from five different Provinces - Jakarta, West Java, Banten, Papua, and Maluku [Ambon]) will be active as YB8Y from Ohoiew Island located in the Kai Island IOTA group between March 20-27th. Activity will be on all bands, 160-6 meters, using CW, SSB and RTTY. The team plans to be active in the CQWW WPX SSB Contest (March 24-25th) as a Multi-2 entry. Operators and Technicians mentioned are Kazuo/YB0AKM, Wisnu/YB0AZ, Sur/YB0JS, Pri/YB0ECT, Triadi/ YB0KVN, Sugiyanto/YB0BUI, Dadang/YBB0TD (Team Leader), Jo/ YC0LOW, YL Laily/YC0TSU, Tonny/YB0YJ, Joz/YD1JZ, Eddy/YD1XUH, Yon/YB1CCF, Jel/YB1GJS, Faisal/YB1PR, Januar/YB9YZ (Team Leader), Ronny/YB9WR, YB9VBS, YB9VA, Tatang/YB1MH, Danu/ YD1GCL, Kasmuri/YD1MRI, Rizal/YD1ORZ, Joppy/YB8XM, (Team Leader), Marthin/YB8VM, Eka/YC0VKI, YC0LLY, YC0KVM, YL Susana/ YD1LUX and guest Op Sadao/WK1S/JA1PBV. QSL via YB1GJS, direct or by the Bureau. For more details, see: http://yb8y.com

ISWL CALLSIGNS (For March). The following ISWL club callsigns will be used throughout the month of March:
GX4BJC/A - Operated from Blacon, Chesterfield, in Cheshire, by Mike/ M1DAP.(/A WAB Square ◆J36 - England & IOTA ◆U-005).
MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom/G3RPV. (/A WAB Square ◆L27 - England & IOTA ◆U-005).

For more information, see <http://www.iswl.org.uk> or QRZ.com and eQSL.cc

KP2, U.S. VIRGIN ISLANDS. Harry, W6DXO, will once again be active as KP2/W6DXO from Cruz Bay, St. John Island (NA-106), between April 18-23rd. He informs OPDX that this is his fourth time there. Activity will be holiday style operation, and he states, "Because this is not a real DXpedition, but rather Ham radio tacked on to a snorkeling trip I'll be traveling light: IC706IIG and a vertical antenna. I've used this set up all over the world with great success and it fits into a simple roller suitcase. I'll concentrate on 17m and 20m SSB and CW." QSL via KF6JOQ.

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the ARRL DX SSB Contest (March 3-4th) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

MJ, JERSEY. Operators Craig/K3PLV and Pete/K8PT will once again be active as MJ/K3PLV and MJ/K8PT, respectively, from Jersey starting March 27th through April 3rd. They will have amplifiers and directional antennas on most HF bands and will have the capability to operate 160-2 meters using modes CW, SSB, RTTY and perhaps some PSK. Please QSL to their home calls. For more information or to explore skeds, contact Pete, K8PT, at: k8pt@arrl.net

NH8/S, SWAINS ISLAND (Excerpts from a Press Release). Operators Joe/W8GEX and Craig/K9CT will lead a multi-international team of operators to the rare DX entity Swains Island (OC-200) in September (their Web page states September 4-18th). Joe and Craig are the same co-leaders of the very successful PJ7E DXpedition on 10-10-10, and were also part of the team that re-activated Midway Island (K4M) in 2009. Swains Island is ranked number 31 on the "DX Magazine's Most Wanted Survey" and number 30 on the "ClubLog's Most Wanted list". Because of the anticipated demand, a highly experienced team of 20 operators has been formed. The team will operate six stations over a 14 day period, from 160-6 meters on all modes, using the callsign NH8S. A great emphasis will be put on Europe where it is most needed. The current list of team members include Joe/AA4NN, Norbert/DJ7JC, Dietmar/DL3DXX, Massimo/I8NHJ, Alan/K5AB, John/K6MM, Kevin/K6TD, Craig/K9CT, Fred/KH7Y, Lou/N2TU, Arnold/N6HC, Mark/NA6M, Tom/ND2T, Garry/NI6T, Hawk/SM5AQD, George/W4BUW, Charles/W6KK, Joe/W8GEX, David/WB4JTT and Jerry/WB9Z. Swains is a privately owned island, and the only way to get there is from American Samoa via a ship. The time frame of this operation may not be the best for the low bands, but dates are dictated by transportation and weather. The team of international operators will first gather in Honolulu and then travel to American Samoa together. Landing

permission has been granted for the tent and generator operation by the owner for this timeframe. A Web page is currently under construction by team member John, K6MM, which will provide updates as they become available at: http://www.nh8s.org
There are no communication systems on Swains, but logs will be uploaded daily via satellite phone. Later, the group will also have an OQSL link on the Web site for easy QSLing. All equipment must be sent from the U.S. via cargo ship in June. Location, transportation, island costs, and other logistics make this a costly trip. Therefore, donations are very much appreciated. Details of how to donate to help defray their expenses are on the Web site. The team wants to thank ICOM who will be supplying IC7600s for their use. Also, they would like to thank Joe, AA4NN, who will be their QSL Manager, and to Carl, N4AA, Editor of "The DX Magazine" who will sponsor the log search.

NP2, U.S. VIRGIN ISLANDS. Operators Randy/N0TG, Jeff/N1SNB and Ron/AA4VK will be active as NP2/homecall from St. Croix (NA-106) between March 7-14th. Activity will be on all bands and modes. This will also include CW and SSB on 60 meters. QSL for all callsigns are via N0TG, direct or by the OQRS (Details via <www.N0TG.com>).

P4, ARUBA. Operators Scott/K0DQ, Ed/N4OC and John/W6LD/P40L will be active as P40L from Aruba (SA-036) during the ARRL DX SSB Contest (March 3-4th) as a Multi-Single entry. QSL via WA3FRP.

P4, ARUBA. John, W2GD, will be active as P40W from Aruba (SA-036) during the CQWW WPX SSB Contest (March 24-25th). He will be on Aruba between March 20-27th. Operations outside of the contest are usually on 160m and 30/17/12 meters as time permits. QSL via LoTW or direct to N2MM. Logs will be loaded on LoTW upon his return to the USA.

P4, ARUBA. Operators XYL Hiroko/JH3PBL, Masumi/JA3AVO and two other operators will be active from the on Aruba (SA-036) between May 9-14th. Operations will be from "Cook's Radio Retreat" <http://www.p49v.com>. XYL Hiroko/JH3PBL, Masumi/JA3AVO will be active as P40U (SSB) and P40X (CW, Digital), respectively. The other two operators have their callsigns pending and will operate SSB only. QSL via their home callsigns. For more details and updates, watch Masumi's Blog page at: http://ja3avo.blog81.fc2.com

PZ, SURINAME. Serge, RX3APM, will once again be active as PZ5P between March 21-26th. Activity will include the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via UA4LU or LOTW.

NAVASSA LOG. Hutch, NK0S, reports, "I am currently converting the (1982) paper logs for KP2A/KP1 to be uploaded to LoTW."

NOT THE MANAGER. Kappy, WA4WTG, reports that he is receiving cards for 9K2MU. Kappy says he is NOT the QSL Manager for this station and has never been. It appears that 9K2MU does direct QSLing for all contacts. Do NOT send 9K2MU QSL requests to WA4WTG.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 9800 old QSL cards in several different albums/galleries. This site contains:
- NEW!!!! As of February 17th, 2012, Malyj Vysotskij is listed on the deleted entities. You can find a large collection of 4J1 and R1M QSLs at: http://lesnouvellesdx.fr/galerie/galerie.php?page=stdel If you have some other cards for this entity, your help will be very appreciated! Many thanks in advance. The paper card is not needed, only a scan in a .jpg format both sides (300ppi is OK).
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1300+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3500+ QSLs)
- Album for stations from North Africa 1945-1962 (300+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1400 cards for the old timer with more than 120 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.

The URL address for the Web site is: http://LesNouvellesDX.free.fr Some cards are still needed for the collection, and your particip-ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@free.fr

T48, CUBA. Members of the Federaci&#65533;n de Radioaficionados de Cuba's
in Las Tunas, eastern Cuba, will once again activate T48K. This time
it will be during the ARRL DX SSB Contest (March 3-4th) as a Multi-
Single/Low-Power entry. QSL via DK1WI.

T6, AFGHANISTAN (Update). J&#65533;rgen "Joe", 5Q2J/OZ2JBC, as now active as
T6JP. Joe is an electronic mechanic in the Danish Army. He told OPDX
that he will be there until late July. Activity will be on 80-10 meters
depending on the conditions. However, due to background noise, Joe will
work primarily on 20-10 meters using RTTY, PSK and SSB, with a Yaesu
FT-857D (100W). See important QSL info for direct and Bureau QSLs at:
http://oz2jbc.dk/page3.html
Log will be uploaded monthly to eQSL and LoTW.

TT8, CHAD. YL Elvira, IV3FSG, will be active as TT8ES from D'Jamena
until March 18th. Activity will be on the HF Bands using SSB and the
Digital modes. Most of her activity this past week has been on 20/15
meters. QSL via IK3GES.

TG, GUATEMALA. Javier, HR2J, will be active as TG7/HR2J during the ARRL
DX SSB Contest (March 3-4th) as a Single-Op/Single-Band (40m)/Low-Power
entry. QSL via HR2J or LoTW.

TZ, MALI. Members of the "Italian Dxpedition Team" will be active as
TZ5T from Mali between April 12-27th. Operators mentioned are Silvano/
I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT.
The Software Management (real-time log online) by Giacomo/IH9GPI and the
Pilot station is Art/IK7JWY. Activity will be on 160-6 meters using CW,
SSB and RTTY. Suggested frequencies are:
CW - 1823, 3505, 7005, 10106, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945 and 28495 kHz
RTTY - 7041, 10142, 14080, 18103, 21080, 24915 and 28080 kHz
6m - 50105 kHz CW, SSB and Beacon

QSL via I2YSB direct to: Silvano Borsa, Viale Capettini 1, 27036 Mortara,
Italy. QSL by Bureau to IK2CIO. A OQRS is available online at their Web
page. Official website: http://www.i2ysb.com
Official forum: http://www.hamradioweb.org/forums/forumdisplay.php?fe
Further notices will follow.

V2, ANTIGUA. Operators Babs/DL7AFS and Lot/DJ7ZG will be active as V21FS and V21ZG, respectively, from the Villa Sundowners near Pottery Village between March 5-31st. Activity will be on 15-6 meters using SSB, RTTY and PSK. V21ZG will look especially for JA and QRP stations. QSL via DL7AFS, direct or by the Bureau (DARC). Visit the Web site at: http://www.qsl.net/dl7afs

VK0/M, MACQUARIE ISLAND (Last Chance!). Trevor, VK0TH, announced on QRZ.com on February 25th: "Only 4 weeks of operations left on Macquarie Island.... ... Will post a schedule and frequencies for those wanting to get VK0/M in the log before operations cease. The incoming team (2012) have no Amateur Operators so it will be at least May 2013 possibly longer before Macquarie activates again."

VP5, TURKS AND CAICOS ISLANDS. Mark, WA0MHJ, will be active as VP5/WA0MHJ after the ARRL DX SSB Contest between March 5-7th. Activity will be on 160-10 meters, as well as 6 meters, using CW and RTTY. QSL via LoTW or via WA0MHJ, direct or by the Bureau. ADDED NOTE: Mark will team up with Glenn/W0GJ and Scott/K0MD to be active as VP5H during thee ARRL DX SSB Contest (March 3-4th) as a Multi-Single entry. QSL VP5H via W0GJ. The two operators will also be active outside of the contest signing VP5/homecall.

VP9, BERMUDA. By the time you read this, operators Kurt/W6PH and Tim/N6WIN will be active as VP9/homecall from Ed/VP9GE's QTH on Bermuda (NA-005) until March 5th. The operators plan to be active during the ARRRL DX SSB Contest (March 3-4th) as a Multi-Single/Low-Power entry using the callsign VP9I. QSL VP9I and VP9/N6WIN via N6WIN. QSL VP9/W6PH via W6PH direct.

XV, VIETNAM. Retu, OH4MDY (OX3RZ/XU7MDY/XV2MDY), will once again be active as XV2RZ from Southeast Vietnam between March 14th and April 16th. Activity is usually on 80-6 meters using the "normal modes" (CW and SSB). However, Retu states that this time he will focus on the Digital modes. QSL only direct via OH4MDY with a SASE and 2 USDs. His log will be available online at: http://www.clublog.org

YN, NICARAGUA. Scott, K7ZO, who has been in Nicaragua since February 25th, visiting his son, is now active as YN5ZO until March 5th. He plans to be in the ARRL DX SSB Contest (March 3-4th) as a Single-Op/All-Band.Low-Power entry. QSL via LoTW or direct to K7ZO.

The following stations are expected to be active in the
ARRL DX SSB Contest (March 3-4th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2012 ARRL DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

Balloon launch in Mexico 3 March 2012 18:00 UTC

Posted: 29 Feb 2012 08:49 PM PST
http://forums.qrz.com/showthread.php?336002-Balloon-launch-in-Mexico-3-March-2012-18-00-UTC&goto=newpost

Tri-Band balloon to be launched in North of Mexico next Saturday March 3rd 2012

Monterrey NL, Mexico,

The ☐Asociacion de Radio Experimentadores del Estado de Nuevo Leon (ARNL)☐ (An A.R.C. Group) informs about their plans to launch an experimental balloon with a 3 band beacon (2m-6m-10m) as per commemorative events of the 80th anniversary of the national ☐Federación Mexicana de Radio Experimentadores, FMRE☐ Amateur Radio unity group which they are part of.

The purpose of this exercise will be purely experimental and all Ham community is encouraged to participate and send reports during the whole flight event.

The transmitter will rotate TX on the following freqs:

2m 144.200 MHZ mode: CW

6m 50.090 MHZ mode: CW

10m 28.055 MHZ mode: CW

TX power will be 100mW on each band, its recommended that listeners consider a few Hertz deviation due to atmosphere temperature changes during flight

The balloon will carry a GPS enabled microprocessor that will transmit XE2NL/B and both the ALTITUDE and the GRID LOCATOR code in CW at all times

Hams are asked to report RST and copied MSG from the device and email them immediately on published email on the XE2NL QRZ webpage ☐ The stations sending reports will receive a commemorative QSL Card from this event ☐

At this moment, the launch is scheduled to be done on Saturday March 3rd 2012 at noon (12:00pm CST) (18:00 GMT) near the city of Monterrey, NL Mexico.

the estimated duration of flight is 2 hours minimum.

Please visit XE2NL in QRZ webpage days before launch, as launch day approaches, we will communicate of any itinerary (TIME) or frequency (FREQ) changes

Sincerely, The ARNL team

//
6V7SIX: 6m band in Senegal, it's a go!

Posted: 29 Feb 2012 09:37 AM PST
http://forums.qrz.com/showthread.php?335916-6V7SIX-6m-band-in-Senegal-it-s-a-go!&goto=newpost

As of March 1st, 2012, the Saly Amateur Radio Club station (ADRASEC Senegal) will be allowed to operate with the callsign 6V7SIX on the band 50-51 MHz. This is a temporary authorization valid until the new ITU Radio Regulations (WRC-12) come into force, normally by the end of 2012. A dual watch of 50.110 MHz (Intercontinental calling frequency) and 50.210 MHz (French calling frequency) will be performed by the Radio Club operators. Watch for the next opening on the Magic Band and call us!

Francois Normant, 6W7RT

President of ADRASEC Senegal

IARU R1 National EmComm Coordinator for Senegal

Amateur Radio Club to Host 'Pelican Island Special Event':

Posted: 01 Mar 2012 04:22 PM PST
http://www.eham.net/articles/27822

WABASSO -- Vero Beach Amateur Radio Club is hosting its fifth annual "Pelican Island Special Event" on March 10 from 9 a.m. to 4 p.m. to commemorate the 109th Anniversary of the Pelican Island National Wildlife Refuge, our country's first National Wildlife Refuge. The event will be located on the Wabasso Causeway Park (County Road 510) between the Wabasso bridge and U.S. 1. Formed in 1961 with 11 members, the Vero Beach Amateur Radio Club has grown to more than 50 members and includes all of Indian River County. Since its onset, the club has been helping our community with communications assistance both to non-profit organizations during fundraisers and our government in times of emergency. Amateur Radio is both a hobby and an emergency service. As the American Radio Relay League comments, "Ham radio provides the broadest and most powerful wireless communications capability available to any private citizen anywhere in the world."

//
Rural Affairs Committee Agrees That Proposed Antenna Rules Need Tweaking:

Posted: 01 Mar 2012 04:22 PM PST
http://www.eham.net/articles/27821

OTTAWA -- Proposed rules for where private radio operators can put their antennas need another look, council's rural-affairs committee said Thursday morning, two days after the planning committee said the same thing. The city can't actually control the placement of antennas, private or commercial, because they're regulated by Industry Canada. But the federal department does give municipalities a chance to comment when it's making decisions and the rules describe what the city thinks is OK. They're aimed at restricting big and intrusive installations while staying out of the way

of small ones, but amateur radio operators warned city councillors that they don't quite hit the mark. Antennas on residential properties would be exempt from public consultations as long as they're under 15 metres tall and at the back of a house. The radio operators said that actually leaves little room for a working antenna above many trees and roofs, it unduly restricts unobtrusive antennas that would be less visible in front yards than telephone wires, and it doesn't distinguish between an urban house and a rural one, where neighbours might be much too far away to care which yard has an antenna in it.

//
Former RAC President Earle Smith, VE6NM (SK):

Posted: 01 Mar 2012 02:57 PM PST
http://www.eham.net/articles/27812

Earle Smith, VE6NM, of Grand Prairie, Alberta -- who served as President of the Radio Amateurs of Canada (RAC) from 2004-2007 -- passed away Friday, February 24. He was 81. An active radio amateur since 1948, first licensed as VE1SA, Smith enjoyed meeting amateurs from all over Canada and the world. "Earle was well respected by Amateur Radio operators both within Canada and internationally," said current RAC President Geoff Bawden, VE4BAW.

//
ARNewsline Report 1803 -- March 2 2012:

Posted: 01 Mar 2012 02:57 PM PST
http://www.eham.net/articles/27811

The following is a QST. Bad batteries may have lead to the loss of communications of a ham radio balloon from Texas to China. Also, Australia begins an evaluation program to see if its hams should be granted a power increase to a full kilowatt; Hams in Senegal to get access to 6 meters; M V Island is deleted from the DXCC and the role of social media in times of emergency reporting. All this and more on Amateur Radio Newsline report number 1803 coming your way right now.

SARL NEWS - SUNDAY 04 MARCH 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with sadness and shock that the sudden termination of the life of Rodger Gadsden, ZS5FX, last weekend, must be announced.

Roger was fatally shot in his Crestholme home, by a family friend who then shot himself and died later of his injuries.

Roger was an active member of the Durban amateur radio fraternity, a true gentleman and helpful in his community.

Our sincerest condolences to his relatives and friends.

SARL AND ICASA AGREE ON HOW TO EXAMINE REGULATIONS

The South African Radio League and ICASA have agreed on how to examine for the regulations part of the Radio Amateur Examination in the May 2012 exam. The SARL has prepared an examination paper with questions that cover regulations that are common to the old and the new

regulations. Because of inaccuracies in the new regulations the SARL proposed this as a compromise until the revisions to the 1 April 2011 regulations have been gazette. At the quarterly liaison meeting held on Thursday last week, ICASA accepted the SARL proposal.

ICASA also informed the meeting that the revisions to the regulations are ready to be gazetted and should be published after a court case with one of the cellular companies about the fee structure has been concluded. The case is being heard in court on 6 March 2012.

PAY YOUR LICENSE FOR 5 YEARS AND SAVE

ICASA confirmed that when the amateur radio license is due for payment on 1 April radio amateurs will have the option of paying for 5 years saving the hassle of paying annually and saving on the fee. The annual fee is R120 but for R501 you can get the license for 5 years. Irrespective of what the ICASA invoice states, by paying R501 will automatically renew your license for five years. There is however no refund should the person give up his license for what ever reason.

A general misconception is that license fees accrue to ICASA, they do not. The fees go to Treasury. ICASA is funded from the annual budget allocated by Treasury to the DOC.

JOIN INTECNET NEXT SUNDAY 11 MARCH

The next interactive technical net or SARL Intecnet will be held on Sunday evening 11 March at 19:30 with Vincent Harrison, ZS6BTY, as guest speaker. The subject will be antennas. Vincent will look at HF antennas to work DX including dipoles, verticals and small beams. He will focus on the effect of the height above ground, radiation patterns and take off angles. He will also briefly touch on antennas for 80 and 160 metres. A PowerPoint presentation will be made available on www.sar.org.za a few days before the intecnet.

Clubs wishing to link their repeaters to the conference bridge should send details to artoday@sarl.org.za before next Wednesday.

AUSTRALIA'S REGULATOR AND WIA TO STUDY TO SEE IF VK AMATEURS SHOULD HAVE 1 kW POWER LIMIT

Advanced class radio amateurs in Australia are being invited to take part in a study to see whether it is possible to raise the power limit down-under to a full kilowatt. This, as the Australian Communications and Media Authority, better known as the ACMA, publishes details of the trial of higher power transmitter output on its website. Michael Owen, VK3KI, the President of the Wireless Institute of Australia says "The ACMA has published on its website details of the trial of higher power transmitter output for Advanced amateur radio licensees. The trial commenced on 1 March 2012 and will continue until 31 August 2013."

The ACMA has advised the WIA that the 18 month authorization is intended to provide the ACMA with time to evaluate the success of the

trial after a 12 month period and to consider permanent regulatory arrangements, if warranted, while avoiding dead air between the evaluation time and the implementation of permanent arrangements. If appropriate, The Wireless Institute of Australia Board of Directors has cautioned those amateurs considering obtaining a higher power permit that this is only a trial. As such, if problems do emerge, it could affect whether amateurs down-under will permanently continue to be able to use the higher power. In particular, if interference is caused to others, the WIA advises that the VK radio amateur involved must immediately do whatever it takes to stop the interference, and must resolve the problem.

SARL TO DISCUSS A REGULATORY ROADMAP AT THE AGM

At the recent Council meeting it was agreed to develop a regulatory roadmap on various license and regulatory issues that need to be discussed and agreed upon for discussion with ICASA. The discussion will be under general at the AGM. Radio Amateurs who would like to make input to the roadmap are invited to send their input to artoday@sarl.org.za by no later than 31 March so that the document can be made available on the web. Please mark the subject line in your email "ROADMAP". If you use an attachment, please make sure that it is in Word.

5 MHz FREQUENCIES COULD BE SOONER IN SA THAN WRC15

At the ICASA/SARL Liaison meeting the SARL proposal to make an interim arrangement to allocate spectrum around 5 MHz to Amateur Radio was discussed.

The WRC12 Resolution COM6/12 was accepted which places the possible allocation to the amateur service on a secondary basis at around 5 300 kHz.

ITU-R (Radiocommunication Sector) was invited to study spectrum requirements for a secondary allocation to the amateur service in the band 5 250 - 5 450 kHz and to carry out studies on the impact to other services currently allocated in the band.

After further discussion it was agreed that the SARL would submit a revised proposal to allocate spectrum in that band to radio amateurs for the purpose of propagation studies in terms of the invitation to ITU-R. The SARL will submit the revised proposal to ICASA within the next week.

NOMINATIONS INVITED FOR THE TINUS LANGE 7066 AWARDS

Submissions are solicited for both the Tinus Lange 7066 Technical Excellence and the Tinus Lange 7066 Junior Technical Excellence Award.

The awards are bestowed annually on the persons who submit a technical project in any of the following categories: Design and/or construction of projects such as a pre-amp, SWR bridge, patching unit, automatic

ID-er, practical antenna ideas, mast, portable gear, power supplies etc.

Any software for use in Amateur Radio.

The submission must include the following: The actual items (if size and mass allows it) or photographs (particularly in the case of antennas, mast etc) A complete write-up in article form with illustrations/pictures ready for publication in Radio ZS.

The Awards: Technical Achievement Award: A framed certificate and a cash award of R350. Junior Technical Achievement Award (under 25 years old): A framed certificate and a cash award of R350,

ENTITY MVI DELETED FROM DXCC HONOR ROLL

According to the Finnish Ministry of Transportation and Communication, the Saimaa Canal Treaty between Finland and Russia has been finalized by relevant Finnish and Russian authorities through ratification.

The Treaty has entered into effect with a date of February 17, 2012.

The result of this treaty is that Malyj Vysotskij Island (MVI), R1M, is no longer included in the Treaty. Thus, MVI will be deleted from the DXCC list as of February 17, 2012, and added to the Deleted Entities List.

This change will affect the Honor Roll numbers as follows:

Honor roll will drop to 340 (down from 341). The entry level Honor Roll number will drop to 331 (down from 332)

CONTEST RESULTS

PEARS National VHF/UHF contest. Here are the preliminary results covering the national winners:

Digital stations. 6 m: ZS5Y - 140 354 4 m: ZS2ACP & ZU6MIC - 1 183 2 m: ZS5Y - 31 716 23 cm: ZS6BNE - 244 points.

Longest distances achieved on digital. 6 m: ZS1LS & ZS6NK - 1 538 km 4 m: ZS2ACP & ZU6MIC - 1 183 km 2 m: ZS1LS & ZS6BUN - 1 268 km, 23 cm: ZS6BNE & ZS6BUN - 244 km.

Analogue base stations. 6 m: ZS1NAZ - 63 666, 4 m: ZS2OC - 383, 2 m: ZS2I - 26 456 70 cm: ZS2BK - 1 544 23 cm: ZS6BNE - 244 points.

Analogue field stations. 6 m: ZS2ABB - 19 392 4 m: ZS2BO - 593 2 m: ZS2VDL - 63 014, 70 cm: ZS2BO & ZS2VDL - 4 416 23 cm: ZS2ABB - 182 points.

Longest distances recorded on analogue. 6 m: ZS1NAZ & ZS6A - 1 278 km 4 m: ZS2BO/ZS2VDL & ZS2Q - 88 km 2 m: ZS5Y & ZS6BUN - 476 km 70 cm: ZS5Y & ZS6BNE - 244 km 23cm: ZS5Y & ZS6BNE - 244 km.

Limited Category. 6 m: ZS2E - 1 982 2 m: ZS2U - 16 060 70 cm: ZR2T - 2 096 points.

Special congratulations must go to a newbie Michelle Badenhorst, ZU6MIC, of Polokwane for her achievements as national co-winner on 4 metres digital, as well as divisional winner on 2 metres analogue and digital.

A complete list of divisional winners and runners up plus all other scores will be posted in due course on the SARL VHF Forum.

FORTHCOMING COMPETITIONS

Annual SARL Hamnet 40 m Simulated Emergency Contest. This contest will be on the air this afternoon from 12:00 - 14:00 UTC or 14:00 to 16:00 CAT. It is a SSB only contest on 40 metres. There are four classes of participation - Class A: Single Operator Stationary Mobile; Class B: Single Operator Portable; Class C: Multi-Operator Portable and Class D: Single Operator Base Station.

The exchange for Class A is a RS report and a serial no starting with 201; for Class B a RS report and a serial no starting with 401, for Class C a RS report and a serial no starting with 601 and for Class D a RS report and a serial no starting with 801. Non-participants will give a RS report and a serial no starting with 001. The score calculation is available in the rules.

Logs must be submitted by 11 March 2012 and can be sent by e-mail to contest@pears.ham-radio-op.net, paper logs can be sent to Hamnet Eastern Cape, Al Akers, ZS2U, 53 Clarence Street, Westering, Port Elizabeth 6025.

The SARL March Madness YL Sprint. This sprint celebrates International Women's Day on 8 March, but because this is not a public holiday, the Sprint will be run from 09:00 to 10:00 UTC (11:00 to 12:00 CAT) on Saturday 10 March.

It is a phone sprint on the 40-metre band and the exchange is a RS report and YL or OM. Contacts between YL stations are worth 5 points. Contacts between YL and OM stations are worth 3 points and contacts between OM stations are worth 1 point.

Log sheets must be submitted by 17 March by e-mail to zs4bfn@netactive.co.za or by mail to the Bloemfontein RAC, Box 12104, Brandhof, 9324.

The first leg of the SARL VHF/UHF Analogue/Digital contest will be run over the weekend of 17 and 18 March. More detail in next week's bulletin.

The rules for all the contests can be found in the 2012 Contest Manual.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is expected to be at low levels. New Sunspot 1 427 poses no threat for strong solar flares. The far side of the Sun is however a different story and we hope that the higher activity will rotate towards the Earth.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 44.

All the bands from 20 to 10 m, and especially 15 m, will provide lots of DX fun with 10 m only opening sporadically due to the low solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

04 March - This afternoon - SARL Hamnet Simulated Emergency Contest from 12:00 - 14:00 UTC or 14:00 to 16:00 CAT. 10 March - SARL March Madness YL Sprint from 09:00 to 10:00 UTC (11:00 to 12:00 CAT). 11 March - Intecnet at 19:30 CAT. 17/18 March - SARL VHF/UHF Analogue/Digital contest. 30 March - Last day to submit items on regulatory issues for discussion with ICASA to artoday@sarl.org.za. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

YB8Y - ORARI IOTA DXPedition to Ohoiew Island, Kei kecil Islands OC-221

Posted: 03 Mar 2012 07:33 AM PST
http://forums.qrz.com/showthread.php?336351-YB8Y-ORARI-IOTA-DXPedition-to-Ohoiew-Island-Kei-kecil-Islands-OC-221&goto=newpost

Hello DXers,

We want to inform you that we are ready to use YB8Y for IOTA DXPedition to Ohoiew Island, Kei Kecil Islands Maluku Tenggara Indonesia (OC-221). We will fly to that Island in 19 mach 2012, and we will be on the air on all HF bands from 160m to 6m all modes SSB CW and RTTY on 20 march until 26 March 2012

The oprs such as :

Wis-YB0AZ, Sur-YB0JS, Pri-YB0ECT, Triadi-YB0KVN, Yanto-YB0BUI, Jo-YC0LOW, YL/Laiy-YC0TSU, Joz-YD1JZ, Edy-YD1XUH, Yon-YB1CCF, Jel-YB1GJS, Fal-YB1PR, John-YB9YZ, Ron-YB9WR, Tatang-YB1MH, Dan-YD1GCL, Rizal-YD1ORZ, Jopy-YB8XM and crews : Martin-YB8VM, Eko-YC0VKI, Ujang-YC0LLY, Ria-YC0KVM, Nana-YD1LUX and our Guest Opr : Ito-WK1S / JA1PBV.

Our plan we also participate in CQ WW WPX SSB 2012 as Multi Two. The call sign we will use YB8Y.

All QSLs for YB8Y is Via YB1GJS (Please see on www.qrz.com). Also We have website for this event : www.yb8y.com

Thats all,

See you in Pile up guys...!

73 DX,

de Pri, YB0ECT/KB3LWW

MSU Satellite Surpasses Goal; NASA Taps MSU to Queue Up for Another Launch:

Posted: 02 Mar 2012 04:01 PM PST
http://www.eham.net/articles/27830

The Montana State University satellite that rode into space on a NASA rocket has now gathered information longer than the historic U.S. satellite it was built to honor, says the director of MSU's Space Science and Engineering Laboratory (SSEL). Almost four months after the Oct. 28 launch and shortly after learning that NASA selected another MSU satellite for possible launch on a NASA rocket next year, SSEL Director David Klumpar cheered as he suddenly realized that Montana's only satellite had collected data for 111 days as of Feb. 15. Since then, the satellite has well surpassed the entire 111-day mission of its history-making predecessor, Explorer-1, the first successful U.S. satellite. Ham radio operators play an important part in the mission because they contact MSU whenever they hear HRBE's "heartbeat," a beep that occurs every 15 seconds, Klumpar said. A map in the Space Operations Center keeps track of those operators. They live in Germany, Australia, Sudan, Japan, all over the United States and the rest of the world.

James Barry Crosby, AB0WG (SK):

Posted: 02 Mar 2012 04:01 PM PST
http://www.eham.net/articles/27829

Osage Beach, Mo. -- James Barry Crosby, son of Wendell Glen and Pansy Carmen Allen Crosby, was born, March 9, 1937 in Parma, Missouri. He departed this life, Wednesday, February 29, 2012, in Lake Regional Hospital, Osage Beach, Missouri at the age of seventy-four years, eleven months and twenty days. James made a profession of faith and was a member of New Testament Christian Church. He was a licensed amateur ham radio operator. He held the highest license issued for amateur radio and morse code. He assisted Camden County in Civil Defense and served as the Assistant Emergency Coordinator. He was a member of the Lake of the Ozarks Amateur Radio Club and the Lebanon Amateur Radio Club. He was also part of the McDonald's breakfast club.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 4th March 2012

IRTS 80th Anniversary AGM & Rally

Tickets for the AGM dinner on Saturday April 21st are selling fast. The event this year is hosted by Dundalk Amateur Radio Society, www.ei7dar.com. Dinner tickets are just 32, this is a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors. This is a must attend event in the 80th Anniversary year of your national society, www.irts.ie.

Dinner tickets can be bought now by contacting Thos, EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie.

Limerick Radio Club

Rally: Limerick Radio Club rally will be held on Sunday March 11th 2012 at the Radisson Blue Hotel on the Ennis Road, Limerick. Doors open at 11am and all the usual traders will attend. Bring and Buy tables can be ordered from Dermot Gleeson EI2GT.

CQIR, St. Patrick's Day

The CQIR contest is fast approaching and we are pleased to report that radio news services and contest reflectors worldwide have been giving the event great publicity. Both QST and RadCom have carried feature pieces and we expect a really excellent turnout right around the globe. The Society is appealing to all EI and GI stations to make a special effort to come on the bands, at least for a few hours over the 24 hours of the contest and hand out much needed points and multipliers. Many of the overseas Irish who will be participating will not be contesters but will be taking part to celebrate St Patrick's Day, so even if you are

not a contester yourself, you will find many operators looking to have a bit of a ragchew as well. Paul EI5DI advises that his contest logger SD is now free and unrestricted in CQIR. Entrants should be aware that the Russian DX contest overlaps with CQIR, and Russian stations will send a 2-character district code instead of a serial. SD may be downloaded from ei5di.com, and users should experiment with test logs before the contest. Full rules for the contest are available on the IRTS website. This contest is the international showpiece event for the Society's 80thcelebrations and while we know most of our serious contesters will be making a big effort on the bands we would again ask all stations to join in the festivities over the St. Patrick's weekend.

Cork Radio Club

Cork Radio Club will meet at Carrigtwohill Community Centre on Tuesday next March 6th at 2030. Following on from last months look at shack logging software, Claus EI7JZ will introduce some more logging programmes.

Cork Radio Club would like to extend a sincere thank you to John Riordan EI6IJ of Buncrana in Co. Donegal for his kind donation of a FT2000D transceiver plus accessories. John, originally from Cork, did his theory course with the club.

Also on Tuesday night, there will be updates on the Titanic special event station EI100T and on the Marconi Day expedition to Brow Head. Plans for the summer field day stations will also be discussed. Cork Club stations won both the CW open section and the SSB restricted section in the IRTS Field Days last year.

New members will be very welcome and further information can be got from club chairman Jeremy EI5GM on 083-3317710

North Cork Radio Group

1.North Cork Radio Group will be activating Blackrock Castle as part of CASHOTA on the 4th March next 2 - 5pm as EI1NC/P. The Castle's reference is EI009/C. We plan to have a digi station in operation as well as possible satellite contact on the day. If you happen to be in the area, are interested in the hobby, or would like to come and visit us, we would be happy to see you. For those of you that are CASHOTA chasers, we look forward to hearing you on the air!"

2.The North Cork Radio Group are pleased to announce that they will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the

opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

3.The North Cork Radio Group are also pleased to announce confirmation of their annual rally, to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork. Doors open at 11am and admission is 5 per person (children are free, as per usual). Raffle tickets will also be available at the door. The usual traders will be present, and anyone wishing to reserve a table, or would be interested in setting up a stall, should contact Edwin Van Mierlo (EI2HEB) on 086 3885741 or via email at ei2heb/at/ ei1nc/ dot/com. More details will be available in the coming months.

Based on the success of our previous rallies, we wish to confirm that all our future rallies will be held each year in September for the foreseeable years. This date will usually be on the Sunday between the GAA All Ireland Hurling and Football finals. All details concerning venue, times etc will be confirmed closer to these dates.

Galway Radio Experimenters

Galway Radio Experimenters Club will be hosting two very interesting presentations at their next club meeting on Monday 12th march at 8.00 Pm in The Anno Santo Hotel, Threadneedle Road, Galway. Details may be seen on our web site www.galwayradio.com.

Larry, EI9CN, will demonstrate the software defined radio, the Flex 5000A and if conditions permit will incorporate CW Skimmer and Logger 32 into his demonstration.

Tom EI3ER will give a short talk on the radio communications surrounding the sinking of the Titanic, the ship's radio station, the ships that worked the Titanic and the radio officers involved.

We heartily invite any amateurs, SWLs or other interested people to come along on the night. This would be particularly interesting for any amateur thinking of going down the Software Defined Radioroute.

Cashota

CASHOTA (Castles and Stately Homes on the Air) will be holding the first Monument Month over April 2012. This annual award event involves activating Monuments which As defined by Wikipedia, a monument is a type of structure either explicitly created to commemorate a person or important event or which has become important to a social group as a part of their remembrance of historic times or cultural heritage, or simply as an example of historic architecture.

Everyone is welcome to participate, with all details of the event, including how to register, being available at

http://www.cashotamonuments.webs.com/, if you require more information contact Steve EI5DD at http://cashota-ireland.org/home.

South East Amateur Radio Group

The Annual General Meeting of South Eastern Amateur Radio Group took place on Monday 27 February last.

The new committee elected is as follows;

Chairperson: David Gainda (EI6GVB) Vice-chairperson: Francis Lenane (EI5GOB) Secretary: John Ronan (EI7IG) Treasurer: Mark Wall (EI7IS) PRO: Michael Hoban (EI5DCB)

Officers: John McCarthy (EI8JA), Michael Drennan (EI7GH) and Dennis Drennan (EI1629).

The club would like to thank everyone who attended and would like to thank the outgoing committee for their work throughout the past year. Further information is available on the membership page of the clubs web site at www.searg.com

---

Summits On The Air

We reported recently on SOTA activations on the Antrim hills by the "two Victors". Last weekend, Victor GI4ONL and Victor MI0JST travelled to the Sperrins, and were heard on Slieve Gallion, Carnanelly and Benbradagh. There was no shortage of callers and, by all accounts, no shortage of wind and rain also.

Phil ON4TA, who is in Connemara at present, is also battling with the elements from time to time. We have heard him on Tonatieva (which is in County Mayo, overlooking Killary Harbour), Derroura and Tully Mountain. Phil has found that from the West of Ireland he has good propagation on 20 metres to mainland Europe.

DX News

A group of Polish amateurs will be active from the Caribbean island of Sint Maarten from 5 - 18 March. The callsign will be PJ7PT and QSL manager is SP9PT.

The husband and wife team of Lot DJ7ZG and Babs DL7AFS return to Antigua starting 5 March. Look for them as V21ZG and V21FS on all bands 160 - 6m.

Gert ZS6AYU pays a short visit to Lesotho from 8 - 13 March where he will operate as 7P8GF. He is followed by Peter EI7CC who will reactivate 7P8PB from 15 March until 3 April. Peter will be operating

as before from the shack of Gerry 7P8CC better known to us as EI8CC.

A large group from Germany and Poland plan to be active from the Pacific island of Tonga from 7 - 24 March.. Callsign is A35YZ and QSL manager is DL7DF.

The Republic of South Sudan has been assigned the callsign prefix block Z8A-Z8Z. The only operation from this new DXCC entity was last July/August when the call was ST0R. Future activations will use the Z8 prefix.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

High School Sends Balloon to Edge of Space:

Posted: 03 Mar 2012 04:14 PM PST
http://www.eham.net/articles/27833

A high-altitude weather balloon jammed with cameras rose far, far higher than jets fly over the weekend, traveling to the edge of space during a journey that thrilled its "pilots" back at San Diego's Mt. Carmel High School. The $90 balloon was sent aloft Saturday by the school's Amateur Radio Club, which tracked it to a point more than 100,000 feet high. The journey lasted 2 hours and 41 minutes, ending when the balloon landed east of the Ocotillo Wells airport. It was recovered by dirt bikers, who declined a $100 reward. "This was a huge success for our students! We are already planning our next project," said John Earnest, the physics teacher who serves as the advisor to the Amateur Radio Club. "We were able to transmit live pictures during flight as well as telemetry data on temperature, pressure, acceleration, position, and altitude. We also had HD video that was retrieved after flight."

//
Radio Amateurs Occupy Hughes Center:

Posted: 03 Mar 2012 04:12 PM PST
http://www.eham.net/articles/27832

Radio amateurs will occupy the Hughes Center today as part of the Arkansas River Valley Amateur Radio Foundation's (ARVARF) annual Hamfest event. Hamfest is open to the public and will be conducted from 8 a.m. until noon. Admission is $5. Vendors will offer amateur radio equipment and door prizes. Some of the prizes will include radio equipment, which require a valid amateur radio license to win. "It's a lot of fun," local ham Kenneth Zelnick said. "We get to meet people who we may not know other than a voice on the radio." Radio amateurs, also known as hams, will have the opportunity to purchase new equipment from commercial vendors or older or original equipment from flea market vendors, according to Hamfest chairman and former head of Arkansas Tech University's (ATU) music department Andy Anders. "There's just so much stuff, it's incredible," Anders said. "There's a lot of various radio gear and related things that are going to be on tables to see ... and of course, all you have to do is ask somebody about it, and hams love to talk about their gear."

//
Something Good in Memphis:

Posted: 03 Mar 2012 04:12 PM PST
http://www.eham.net/articles/27831

lexander H. Hilliard has been nominated for recognition in MIFA's Something Good in Memphis campaign by Sandra Mathias. Mathias writes: "For 39 years, Alexander H. Hilliard has offered his time, talent and expertise to his community by sharing his knowledge of radios and emergency communications. An active amateur 'ham' radio operator with an extra class license, Hilliard also has a commercial license, is a radio instructor and a volunteer test examiner.

GB2RS NEWS

Sunday 4th March 2012

The news headlines:

* Senegal to gain access to the 6m band

* New Planning Advisory Committee Chairman

* Notice of Variations available

Following an application to the Regulatory Agency, Senegal has gained access to the 6m band. 50 to 51MHz has been officially allocated to that nation's amateur service on a Primary basis. This allocation becomes effective when the new ITU Radio Regulations come into force. Any contacts made on 6m before that date have to be considered as unauthorised.

As already announced in RadCom, Len Paget, GM0ONX has asked to stand down from Chairmanship of the Planning Advisory Committee to allow him to concentrate on his Regional role. The Society is grateful to Len for his contribution in the planning role over a number of years. Len will be succeeded by Stephen Purser, G4SHF, who takes up his role with immediate effect. We welcome Stephen back to the PAC and wish him success in the role. He can be contacted by email to PAC.Chairman@RSGB.org.uk.

You can now obtain your Notice of Variation to allow you to use the special prefixes for Queen's Diamond Jubilee and London 2012 Olympic and Paralympic Games. After completing the simple web forms, your NoV will be immediately e-mailed back to you in PDF format. The Queen's Diamond Jubilee NoV applies from 0000BST on 5 May 2012 to 2359BST on 10 June 2012 inclusive. The London 2012 Olympic and Paralympic Games NoV applies from 0000BST on 21 July 2012 to 2359BST on 9 September 2012 inclusive. Fill in the forms on the RSGB website, www.rsgb.org.

Notices of Variation to amateur radio licences for special research permits to operate in the band 501 to 504kHz have been extended to 31 December 2012. They had been due to expire on 29 February 2012. Ofcom has started discussions with the Radio Society of Great Britain about the timescales for implementing the new secondary allocation to the amateur service, between 472 and 479kHz, that WRC-12 agreed would be effective from 1 January 2013.

The International Museums Weekend special event will this year take place on the weekends of 16 & 17 June and 23 & 24 June. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums. Organiser Harry, M1BYT asks that all those intending to take part in the event should register at www.ukradioamateur.co.uk/imw.

And now for the details of rallies and events for the coming week

We start with advance notice of a change to a rally date. The East Suffolk Wireless Revival will now take place on 1 July. Contact Steve, M1ACB on 07711 329624. The Cambridge & District Amateur Radio Club Rally takes place today, 4 March, at the Wood Green Animal Shelter, King's Bush Farm, on the A1198 London Road at Godmanchester PE29 2NH. Doors open at 10am and entry is £3. There will be trade stands and a Bring & Buy with talk in on S22. Contact John, G0GKP, on 01954 200 072.

Also today, 4 March, the Exeter Radio & Electronics Rally takes place in America Hall, De La Rue Way, Pinhoe, Exeter EX4 8PW. Doors open at 10.30am and admission is £2. There will be trade stands and a Bring & Buy. More information from Pete, G3ZVI on 07714 198 374. The Wythall Radio Club Radio and Computer Rally takes place on 11 March at the Woodrush Sports Centre, Shawhurst Lane, Hollywood, near Birmingham B47 5JW. The venue is on the A435, 2 miles from J3 of the M42. There will be trade stands and a Bring & Buy with admission costing £2.50.Contact Chris, G0EYO on 07710 412 819.

Now for the news of special events

The Irish national society, IRTS, is celebrating its 80th anniversary with a special event callsign, EI80IRTS. IRTS members and affiliated clubs are taking part in the celebrations. A certificate for working EI80IRTS is sponsored by Dundalk Amateur Radio Society. Details are online at www.ei7dar.com/ei80irts.html.

And now the HF DX news compiled from 425 DX News and other sources

IK2GZU, will sign 5H3MB from Tanzania from 4 March to 4 April while he is there doing work at the new hospital and orphanage. He will do some HF operating with his own FT-100 rig and the TS-850 that belongs to the Mission. There is a tribander fixed on Europe, a vertical and a dipole. He will put the log on LoTW when he's back home. QSL via IK2GZU.

Nine operators from Germany and Poland will sign A35YZ from Tonga from 7 to 24 March. They will be on all bands and modes with several stations, including one dedicated to digital. QSL direct or bureau to DL7DF. Tonga is usually a tough one from the UK, being almost directly over the pole.

David, VO1AU will be active as ZL7/VO1AU from the Chatham Islands, which is IOTA reference OC-038, between 8 and 13 March. Activity will be on CW and SSB. He will also participate in the Commonwealth Contest. QSL via VO1MX.

DL7AFS will sign V21FS and DJ7ZG will sign V21ZG from Antigua from 5 March for a few weeks. They will focus on 15, 12 and 10m. QSL to DL7AFS or via the DARC QSL bureau.

A Polish team will activate Sint Maarten as PJ7PT from 5 to 18 March. They will be on all bands, CW, SSB and RTTY. QSL via SP9PT.

JI3DST will be on the air signing portable 9M2 from West Malaysia between 0000UTC on 10 March and 0900UTC on 11 March. His activity will be on 6 through to 80m, including most of the WARC bands. Modes to be used will include CW, SSB and FM. QSL via JI3DST.

Now the contest news

The 144/432MHz Contest takes place for 24 hours this weekend, ending at 1400UTC today, 4 March. There are Open and Single-op categories and 6-hour and 24-hour sections, with 6-hour entrants being able to split their operating into two sessions if they wish. Using all modes the exchange is signal report, serial number and locator.

The ARRL International DX contest runs for the full 48 hours of this weekend ending at 2359 today, 4 March, on the 1.8 to 28MHz bands. Work US stations in the contiguous 48 States, plus Canadians. Send a signal report and your transmit output power. There are sections for QRP as well as low and high power. US stations send a signal report and 2-letter State abbreviation, while Canadian stations send a signal report and 3-letter Province code.

Monday 5 March sees the data leg of the 80m Club Championships taking place from 2000 to 2130UTC. The exchange is signal report and serial number. Tuesday 6 March is the 144MHz UK Activity Contest from 2000 to 2230UTC. Using all modes the exchange is signal report, serial number and locator.

Next weekend, on 11 March, the 2nd 70MHz Cumulative contest take place from 1000 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

On 10 and 11 March, the 75th Commonwealth Contest will take place from 1000 to 1000UTC. To celebrate it there is going to be a prize draw into which every entrant making more than 75 valid QSOs will be entered. The prize will be an RFSpace SDR-IQ Software Defined Radio, generously donated by Martin Lynch of ML&S. All entrants who have, after adjudication, 75 or more valid QSOs will automatically be entered for the draw, so entrants need do nothing more than submit their log but please make sure you make more than 75 QSOs, to leave some margin in case any of your QSOs are disallowed. Using CW on the 3.5 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 24th of February to the 1st of March, compiled by Neil Clarke, G0CAS on Friday the 2nd of March.

Only a small number of sunspot groups were visible every day. All were small and quiet. Solar activity was very low every day, except for the 26th when activity increased to low when two small C class solar flares took place, and again on the 1st. Solar flux levels declined from 109 units on the 24th to 102 by the 29th. The average was 105 units. The 90 day solar flux average on the on the 1st was 127, that's three units down on last week. X-ray flux levels declined slightly over the period and averaged B2 units. Geomagnetic activity started at quiet levels but on the 27th and the 28th activity increased due to the arrival of a coronal mass ejection. The most disturbed day was the 27th, with an Ap index of 19 units. Activity then increased again on the 1st with an Ap of 15 units. The average was Ap 9 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 370 kilometres per second to 520 by the 26th. Particle densities were low, except for a brief increase to 21 particles per cubic centimetre early on the 27th. Bz varied between minus 5 and plus 6 nanoTeslas on the quiet days and between minus and plus 11 nanoTeslas during the disturbance. On most days MUFs reached or even slightly exceeded forecast levels, with the exception of the 27th, when MUFs were depressed by several MHz. Auroral propagation was reported on 50, 70 and 144MHz. While high latitude stations were, as usual, the main beneficiaries, at the height of the disturbance, around 1700 hours, contacts were made as far south as the Midlands. A weaker event also occurred during the evening of the 1st.

And finally the solar forecast. There as been a dramatic decline in solar activity since the start of the year and in solar flux levels. This is well illustrated in the 90 day solar flux averages that have declined almost 20 units since the start of the year. There are no real signs that activity will increase during the coming week. As always though, when solar activity increases it will happen with very little warning. Therefore, solar flux levels are expected to be around the 100 mark or slightly higher. Geomagnetic activity should be at `unsettled' levels for the next couple of days due to a small recurring coronal hole and then decline to quiet levels for the remainder of the period. MUFs during daylight hours at equal latitudes should be around 28MHz for the south and 25MHz for the north. Darkness hour lows should be about 8MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of about 35MHz. The optimum working frequency with a 90 per cent success rate will be around 28MHz. The best time to try this path will be between 1000 and 1500 hours. With this path crossing the equator it should not be affected by the coronal hole disturbance.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS We start with advance information that Friskney and East Lincolnshire Communications Club will be running Foundation and Intermediate training courses in March and April. More information from Ant Freeman, M0HAZ, on 07956 654 481.

On Monday 5 March Friskney and East Lincolnshire Communications Club is running a club net on 144.165MHz USB from 1900. Details from Ant Freeman, M0HAZ, on 07956 654 481.

On Monday 5 March Gloucester Amateur Radio & Electronics Society is having a talk by Gloucestershire Repeater Group. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 5 March Lincoln Short-Wave Club is taking part in the 3.5MHz CC Data from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 5 March Welland Valley Amateur Radio Society is starting a club net on 145.275MHz FM and then QSYing to 6m. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 6 March Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 6 March Friskney and East Lincolnshire Communications Club is having a talk on antennas by Ron, G7ZRT. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 6 March Lincoln Short-Wave Club is taking part in the 144MHz UK AC from 2000. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 6 March Loughborough & District Amateur Radio Club invites members to call in from home on 2m. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 6 March Wythall Radio Club Final is having its final rally preparation meeting. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 7 March Lincoln Short-Wave Club is putting G5FZ on the air and having a natter night.. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 7 March Midland Amateur Radio Society is holding an open meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 7 March South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 01214 581 603.

On Wednesday 7 March South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550. On Wednesday 7 March Telford & District Amateur Radio Society is on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 8 March Lincoln Short-Wave Club is holding a club net on 145.375MHz from 2000. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 8 March Salop Amateur Radio Society is having a calibration night with Ken, G8DIR and continuing its Foundation course. Details on the club website at www.salop-ars.org.uk.

On Thursday 8 March South Birmingham Radio Society having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 9 March Coventry Amateur Radio Society is having a construction night. Contact John, G8SEQ, on 07958 777 363.

On Friday 9 March Friskney and East Lincolnshire Communications Club is running a club net on GB3FR from 2000. Contact Ant Freeman, M0HAZ, on 07956 654 481.

On Friday 9 March South Birmingham Radio Society is loading the trailer for the Wythall Rally. Contact Don, on 01214 581 603.

On Saturday 10 March Lincoln Short-Wave Club is holding its Saturday surgery from 0930. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Sunday 11 March Midland Amateur Radio Society Club is visiting the Wythall Rally. Details from Norman, G8BHE, on 07808 078 003.

On Sunday 11 March South Birmingham Radio Society is running a club stand at the Wythall Rally. Contact Don, on 01214 581 603.

On Sunday 11 March Worcester Radio Amateurs Association is running a club stand at the Wythall Rally. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Sunday 11 March Wythall Radio Club is running the Wythall Rally. Details from Chris, G0EYO, on 07710 412 819.

NEWS FOR THE NORTH OF ENGLAND On Sunday 4 March Hambleton Amateur Radio Society is having an operating night. More information from Tony Wilson, G3MAE, on 01609 881 530.

On Monday 5 March Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 5 March Bolton Wireless Club is having a talk on coastal ship-to-shore radio stations by Dave, G4MVU. For details, send an email to boltonwireless@gmail.com.

On Monday 5 March Hornsea Amateur Radio Club is taking part in the 80m CC Data. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 5 March Sheffield Amateur Radio Club is having a social evening and participating in the RSGB 80m CC Data from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk. On Monday 5 March Thornton Cleveleys Amateur Radio Society is having a natter night. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 6 March Chester & District Radio Society is holding a surplus sale. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 6 March Halifax & District Amateur Radio Society members will be discussing their participation in the Queen's Diamond Jubilee QSO Party. Contact Martin, M0GQB, on 01422 341 317.

On Tuesday 6 March Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836.

On Tuesday 6 March Stockport Radio Society Club is having an introduction to the PSK interface unit project by Bernard, G3SHF and Pete, M1PTR. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 7 March Denby Dale Radio Club is having a talk on cave radio underground communication. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 7 March Durham and District Amateur Radio Society is having an operating evening. Details from David, M0BPM, on 01913 888 113.

On Wednesday 7 March Hornsea Amateur Radio Club is having an update by Pat Carty on the world of virtual radar. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 7 March Maltby & District Amateur Radio Society is having part 2 of its Buildathon. More information from Keith, G1PQW, on 07801 156 678.

On Wednesday 7 March Mid-Cheshire Amateur Radio Society is on the air. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday 7 March Wirral & District Amateur Radio Club is having a D&W evening at The Hoylake Lights, Hoylake. Details from Simon, G6XHF, on 0151 601 3269.

On Thursday 8 March Wakefield & District Radio Society is having a social evening and is on the air. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 9 March Bolton Wireless Club is visiting St James Primary School, Daisy Hill, Westhoughton to kick off their Science Week, operating G0BWC on HF and G1ONE on 2m. For details, send an email to boltonwireless@gmail.com.

On Friday 9 March East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 9 March Tynemouth Amateur Radio Club Radio is looking at blogs and Wordpress. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 10 March Hornsea Amateur Radio Club is taking part in the Commonwealth Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday 10 March Sheffield Amateur Radio Club will be at Norfolk Community Primary School from 9am operating GX3RCM for National Science Week. Contact Steve Webster, by email to stevem1ers@blueyonder.co.uk.

On Saturday 10 March Wakefield & District Radio Society continues its Foundation course from 1330. Contact Dr David Lockwood, G4CLI, on 07748 221 855.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 6 March Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 7 March Glenrothes & DRC is holding a planning meeting for forthcoming club events and activities. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 8 March Aberdeen Amateur Radio Society is having a talk by Stewart Cooper, GM4AFF about CQWW on Hawaii. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 9 March Borders Amateur Radio Society is having a talk on RAYNET by Geoff Darby, G7GJU. Details from MM0YLG on 07944 912 751.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with advance information that South Essex Amateur Radio Society is moving to a new venue and date. From 13 March, meetings will be on the second Tuesday of the month at the Members Bar, Island Yacht Club, Point Road, Canvey Island, SS8 7TX. More information from Dave Speechley, G4UVJ, on 01268 697 978 or online at www.southessex-ars.co.uk.

On Sunday 4 March Bromley & District Amateur Radio Society commences its Foundation course. Details from Andy, G4WGZ, on 01689 878 089.

On Sunday 4 March East Kent Radio Society is having a talk by Martin, G4RVV on the development of the armoured tank. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 5 March Braintree & District Amateur Radio Society is having a talk on propagation by Melvin, G0EMK. For more information contact John, M5AJB, on 01787 460 947.

On Monday 5 March Burnham Beeches Radio Club is holding its AGM. Contact Dave, G4XDU, on 01628 625 720.

On Monday 5 March Maidstone YMCA Amateur Radio Society is having a radio testing evening. More information from Howard Vicary, G0RJN, by

email to hvicary@hotmail.com.

On Monday 5 March Norfolk Amateur Radio Club is running a club net from 1930 on GB3NB and taking part in the RSGB 80m Club Championship Data. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 5 March Southdown Amateur Radio Society is having a talk at Chaseley. Details from John, G3DQY, on 01424 424 319.

On Monday 5 March Surrey Radio Contact Club is having a surplus sale. Contact John, G3MCX, on 02086 883 322.

On Tuesday 6 March Bedford and District Amateur Radio Club is on the air. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com. On Tuesday 6 March Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 6 March Bredhurst Receiving and Transmitting Society is holding its weekly net. Details from Andrew, M6AAE on 07403 325 075.

On Tuesday 6 March Chelmsford Amateur Radio Society is having a talk on antenna testing by Andy Tyler, G1GKN. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 6 March Leiston Amateur Radio Club is having a talk on Summits on the Air by Tony, 2E0NHG. Details from Andy, G3ZYP, on 01394 460 441.

On Tuesday 6 March North Kent Radio Society is looking at radio programming software. For more information contact Dave Collings, by email to nkrs@crystaldave.com.

On Wednesday 7 March Chesham & District Amateur Radio Society General Meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 7 March Havering & District Amateur Radio Club is having a talk on QSL cards and QSLing by Dave, M0TAZ. More information from John, M0UKD, on 07890 222 111.

On Wednesday 7 March Norfolk Amateur Radio Club is having a talk on antenna modelling using MMANA- GAL by Steve, G0KYA. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 7 March Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Wednesday 7 March Worthing & District Amateur Radio Club is having a talk on Maritime Shoreham by by Trevor Povey. Contact John, G8FMJ, on 01273 593 232.

On Thursday 8 March Bredhurst Receiving and Transmitting Society is holding a club meeting. Details from Andrew, M6AAE, on 07403 325 075.

On Thursday 8 March Echelford Amateur Radio Society is having a natter night, Bring & Buy and CW practice. Contact John, G4GSC, on 01784 451

898.

On Thursday 8 March Edgware & District Radio Society is having talks by members. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 8 March Hilderstone Radio and Electronics Club is running a construction project with the pupils of the Marlowe Academy from 10am to 3pm. At 7pm there is a club construction evening. Details form Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 8 March Lowestoft & District PYE Amateur Radio Club is having a talk on D-Star by Mark, G0LGJ. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 8 March Reading & District Amateur Radio Club is having a talk on fungi as food by Anthony Armitage, M0GZB. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 8 March Shefford & District Amateur Radio Society is holding its AGM. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 9 March Cambridge & District Amateur Radio Club is looking at the MK II solar flare detector by Peter, M0DCV. Contact Ron, G3KBR, on 01223 501 712. On Friday 9 March Itchen Valley Amateur Radio Club is holding a members' forum. Details from Liz, M0ACL, on 02380 254 599.

On Friday 9 March Radio Society of Harrow is holding its AGM. More information from Linda, G7RJL, on 02083 868 586.

On Friday 9 March Wimbledon & District Amateur Radio Society is having a vintage radio evening with a demonstration by Dick Shanahan of radio receivers from the 1920s to the 1950s. Contact Andrew Maish, G4ADM, on 02083 353 434.

NEWS FOR THE SOUTH WEST On Monday 5 March Weston Super Mare Radio Society is having a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 7 March Cornish Radio Amateur Club is holding a committee meeting at Perranarworthal Church Hall. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday 7 March Thornbury & South Gloucestershire Amateur Radio Club is having a talk on narrow band digital modes by Paul, 2E0PSM. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 7 March Trowbridge & District Amateur Radio Club is having short talks by G0GRI and M0PUB. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 8 March South Bristol Amateur Radio Club is holding a darts tournament. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 8 March Swindon & District Amateur Radio Club is holding its construction contest. Contact Den, M0ACM, on 07810 317 750.

On Friday 9 March Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 5 March Dragon Amateur Radio Club is having a look at using the club antenna analyser. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Thursday 8 March Aberystwyth & District Amateur Radio Society is having a talk on propagation by Simon, GW0NVN. Details from Ray, GW7AGG, on 01970 611 853.

On Thursday 8 March Marches Amateur Radio Society is holding a surplus equipment sale with Malcolm GW0WZZ acting as auctioneer. Details online at www.marchesradiosociety.org.

Apparently, every TV and radio entity has a copy of it. You'd think, by now, it would have been leaked. Clearly, a national survey was conducted that showed sports fans to be so brain-deficient that piles of pure, untreated nonsense should regularly be presented as fact, and it will be accepted as fact.

Mississippi State-Auburn, an SEC Network telecast on MSG Saturday, included a sideline interview with Auburn man Charles Barkley. When it was over, play-by-player Dave Neal said: "What an ambassador for this university he has been!"

Geez. Barkley's an excessive boozer, gambler and night crawler who has done time for DUI after hooking up with a hooker. As a Nike peddler, he was selected to tell the nation: "I am not a role model." More recently he admitted to accepting illegal cash while playing basketball at Auburn.

If Auburn had more "ambassadors" like Barkley, it would be a medium security prison.

Yesterday, after Eli Manning threw the ball out of bounds after he was hit -- duly noted by Fox's Joe Buck -- one pass after Giants receiver Victor Cruz dropped a pass -- also duly noted by Buck -- Buck noted Manning is "now oh-for-three" passing. And that didn't prevent Fox from later posting Manning's wildly misleading passer rating.

ESPN's voices, all weekend, announced the debut of the "New, expanded, three-hour Sunday NFL Countdown Show!" -- as if it's good news, as opposed to what it is: another ESPN exercise in absurd excess.

All week, on TV and radio, we heard from players, coaches, team owners who were asked to describe where they were and what they felt on Sept. 11. Turns out their recollections and feelings weren't much different from many of us, but, as usual, the media suppose that tragedy hurts sports figures more.

On local radio shows, might it have been better to have heard the 9/11 recollections of local listeners?

Yesterday, two minutes into Eagles-Rams, Fox twice told us Michael Vick was last season's Comeback Player of the Year -- as if that's a wonderful thing. Comeback from what, a bad season? In other words, NFL standards now allow players who are released

RAC Bulletin 2012-016E - Ontario Section Emergency Coordinator appointed.
2012-03-04

VIA: Doug Mercer, VO1DTM/VO1DM

ATTN: All Ontario ARES Members and Amateur Radio Operators

I am pleased to announce the new appointment for the position of
Ontario Section Emergency Coordinator (SEC) for ARES in Ontario. Scott
Carter VE3CGN of Dutton, Ontario is our new SEC for Ontario.

Scott brings with him much experience in the field of emergency
communications. Scott was the former District Emergency Coordinator
for the Tecumsah District. Sccot has many certifications in emergency
management including his CEC, BEM, IMS-100, IMS-200 to mention a few.
Scott is also very active with the SATERN Organization the Salvation
Army Team Emergency Radio Network.

Scott's appointment took effect on 01 Mar 12 till 01 Sep 12 when
respective appointments will be made in each of the four new Sections
in Ontario. I ask you all to join me and welcome Scott to his new
position as he will be a great asset to the Ontario Field Services and
ARES.

Thank You and welcome aboard Scott

73
Al

Allan Boyd - VE3AJB
Section Manager - Ontario Radio Amateurs of Canada

Weather Spotters Aim to Keep B.C. Safe:

Posted: 04 Mar 2012 04:55 PM PST
http://www.eham.net/articles/27837

From Jim Maczko's point of view, Saturday's meeting of the Battle Creek region's weather spotters couldn't have come at a better time. Overnight, a string of severe storms had struck the nation's eastern half, causing deaths in four states. Just hours earlier, an official warning of high winds in the area had ended. And still fresh in everyone's memory was the destructive windstorm that swept through Battle Creek and Emmett Township on May 29, 2011, felling trees and damaging homes and businesses. "We have to stay prepared and stay ready," said Maczko, warning coordination meteorologist with the National Weather Service office in Grand Rapids. About a hundred volunteers with their eyes on the sky and their hearts in the right place came to learn more during the annual refresher course for SkyWarn, a program of the federal weather agency. Ken Nierman of Battle Creek said he has volunteered as a weather spotter for about 12 years. "It's something I can do as a civilian to add to the safety of the community," said Nierman, who is the emergency coordinator for Radio Amateur Civil Emergency Services, or RACES, a group of ham-radio experts who help officials communicate during local, regional or national emergencies.

//
Learn Morse Code to Help Disaster Victims, Radio Hams Told:

Posted: 04 Mar 2012 04:53 PM PST
http://www.eham.net/articles/27836

JOHOR BARU: Amateur radio enthusiasts should learn Morse code so that they can respond to emergencies better. South Johor Amateur Bandwidth Radio Association patron Tunku Abdul Jalil Tunku Osman said such a skill was useful, especially during natural disasters. "During the 2004 tsunami, the emergency response teams that were deployed to Aceh used Morse code to find victims as phone lines were damaged. "In the major flood that hit Kota Tinggi and several other districts in the state, our members used two-way radios to help," he said after attending the association's annual general meeting here yesterday.

//
Historically Speaking: Morse Started In Art, Not Technology:

Posted: 04 Mar 2012 04:51 PM PST
http://www.eham.net/articles/27835

Danielson, Conn. -- It took a tragedy for Samuel F. B. Morse to change his life from painting to inventing. Morse was born April 27, 1791, in Charlestown, Mass., the first child of Woodstock native Jedidiah Morse Jr. and his wife, Elizabeth Breese. Jedidiah Morse was a Puritan and his children were brought up in a praying household and with the virtue of self-sacrifice. Samuel Morse showed artistic talent very early. He attended Phillips Academy in Andover, Mass., and graduated with distinction from Yale College, his father's alma mater, in 1810. He was 19. While in Europe in 1830, Morse met Louis Daguerre, who, at that time, was recognized as a celebrated designer for the theater. He was, earlier, also known as the inventor of the diorama. By 1839, Daguerre announced his daguerreotype as a "gift, free to the world." It would revolutionize the art world, and Morse was impressed with the implications of this new photographic process. Morse, meanwhile, continued his portrait work. While in Washington painting Lafayette's likeness, he received word by a horse messenger that his wife, Lucretia Walker Morse, was sick. He hurried back to their home in New Haven, but arrived after she had been buried. In his grief and guilt, having been away from his family, he turned his efforts to the pursuit of swift, long-distance communication. Morse made contact with Charles Thomas Jackson, an authority on electromagnetism. Morse began to experiment with and develop a single-wire telegraph. His Morse code would change the way the world communicated.

http://forums.qrz.com/showthread.php?336572-Thomasville-GA-Tailgate-Hamfest-March-31-2012&goto=newpost

The Thomasville Amateur Radio Club will be hosting its annual Tailgate Hamfest on March 31, 2012. The Tailgate Hamfest will be held at Morningside Methodist Church, 2007 Smith Avenue, Thomasville, GA, 31792, beginning at 8:00 AM ET until 2:00 PM ET.

This is a free event, and area Hams are invited to both buy and sell.

A test session will be held at 10:00 AM, and walk-ins are welcome!

Talk-in is the W4UCJ repeater (147.195+, 141.3 TXPL). The alternate repeater will be KE4URL (145.170-, 141.3 TXPL).

The TARC membership, and our local hams hope to see you there!

Highlights of Solar and Geomagnetic Activity
27 February - 04 March 2012

Solar activity ranged from very low to moderate levels. Activity was
at very low to low levels during 27 February - 01 March with
occasional B-class and isolated C-class flares. Activity increased
to moderate levels on 02 March due to an M3/Sf flare at 02/1746 UTC
from Region 1429 (N18, L=300, class/area Dkc/700 on 04 March).
Activity decreased to low levels on 03 March with occasional
low-level C-class flares from Region 1429. Activity returned to
moderate levels on 04 March due to a long duration M2/1n flare at
04/1052 UTC from Region 1429. Region 1429 rotated into view on 03
March and quickly became recognized as a large, magnetically complex
spot group with a reverse-polarity, beta-gamma-delta magnetic
configuration.

No proton events were observed at geosynchronous orbit, however, the
greater than 10 MeV proton flux was enhanced due to the long
duration M2 flare observed on 04 March.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 27 February - 01 March. Flux levels
increased to normal to high levels during 02 - 04 March.

Geomagnetic field activity was at quiet to minor storm levels during
27 - 28 February due to a CME passage associated with the filament
eruption/asymmetric halo-CME observed on 24 February. Activity
decreased to quiet levels on 29 February. Quiet to unsettled levels
occurred during 01 - 04 March with active to minor storm periods
observed at high latitudes due to weakly-enhanced solar wind speeds
combined with sustained periods of weak southward IMF (Negative Bz).

Forecast of Solar and Geomagnetic Activity
07 March - 02 April 2012
```

Solar activity is expected to be at moderate to high levels from 07 - 16 March. Activity is expected to decrease to low levels during 17 - 28 March after Region 1429 rotates around the west limb. Probabilities for moderate to high activity will increase once again on 29 March with the return of Region 1429.

There is a chance for isolated proton events at geosynchronous orbit while Region 1429 remains on the disk through 16 March.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 07 - 17 March. Flux is expected to increase to moderate to high levels on 18 - 19 March due to effects from a recurrent coronal hole high speed stream (CH HSS). Normal to moderate levels are expected to return from 20 - 28 March followed by moderate to high levels on 30 March - 01 April due to a second recurrent CH HSS. Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be active with a chance for minor storm levels on 07 March due to the combined arrival of CMEs observed on 04 and 05 March. Activity is expected to be at quiet to unsettled levels on 08 March as the effects from those CMEs subside. Mostly quiet conditions are expected during 09 - 10 March. Quiet to unsettled levels are expected on 11 - 13 March due to weak CH HSS effects. Activity is expected to decrease to quiet levels during 14 - 16 March. Activity is expected to increase to unsettled to active levels during 17 - 20 March due to a recurrent negative polarity CH HSS. Mostly quiet conditions are expected from 21 - 27 March followed by an increase to quiet to unsettled levels on 28 - 31 March due to another recurrent CH HSS. Predominantly quiet conditions are expected for the remainder of the period.

Attention Beginning Monday March 12, 2012, the Weekly Bulletin will now be issued and available on the SWPC web page every Monday morning by 1500 UTC.

281. QRZ Forums - Contests, DXpeditions and Special Events for Tuesday 6 March 2012

Newsgroup: rec.radio.amateur.misc

QRZ Forums - Contests, DXpeditions and Special Events

//
W2E - Doomsday 2012 Special Event

Posted: 05 Mar 2012 06:50 PM PST
http://forums.qrz.com/showthread.php?336743-W2E-Doomsday-2012-Special-Event&goto=newpost

Gentlemen:

Please note that our special event station W2E - Doomsday 2012 will be QRV
from 2200z on 12/20/2012 thru 2359z on 12/22/2012.

The event celebrates the end of the Mayan Calendar and what has been
characterized in popular culture as Doomsday 2012.

The special 1x1 Call - W2E is short for "World 2 End"

Special event operators will be making QSOs on the following frequencies,
plus or minus: 3.866 MHz, 7.266 MHz, 14.266 MHz, 21.366 MHz, and 28.366 MHz.

Special emergency power has been arranged in the event commercial power
connections are inexplicably terminated. Also, 7.266 MHz will be manned
using a vintage Hallicrafters transmitter and receiver should solid state
transceivers become non-functioning.

Dennis M. Barrett, J.D., Ph.D. / N4ECW

W2E Special Event Coordinator

DXNL 1770 - Mar 7, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3W, VIETNAM, AS-128
Jacek,SP5APW, is visiting Phu Quoc Island (AS-128) from Mar 7-12. He
applied for the call 3W4JK beantragt and wants to work holiday style
in SSB, PSK31 and RTTY on 40m-10m (maybe also 6m) with an Elecraft K3,
a microKEYER II and Buddipole antenna. QSL via homecall.
See also: http://as-128.blogspot.com

5N, NIGERIA
Bodo,DF8DX (ex DL3OCH), is active as 5N7Q from Mar 7-14.
QSL via homecall, LoTW.

6W, SENEGAL
The Radio Club de Saly is using the callsign 6V7SIX since Mar 1.
They are listening on 50.110 MHz (international calling frequency) and
on 50.210 MHz (French calling frequency). QSL via LoTW, eQSL.
See also: http://www.senrasec.org

7P, LESOTHO
Gert,ZS6AYU, will be QRV only in CW on 40m-10m signing 7P8GF with 100 W
and vertical from Mar 8-13. QSL via homecall.

9K, KUWAIT, AS-118
Failaka Island (AS-118) will be activated from Mar 7-12 by some members
of the "Kuwait Amateur Radio Society" (9K2RA) using the callsign 9K2F.
QSL via 9K2HN, LoTW. See also: http://9k2ra.net

9M2, WEST MALAYSIA
Take,JI3DST, plans to show up as 9M2/JI3DST (callsign may change) in
CW/SSB/FM on 80m-6m on Mar 10/11. QSL via homecall.

9N, NEPAL
Toshi,JA8BMK, is working as 9N7BM until Mar 9. QSL via JA8UWT.

A3, TONGA, OC-049
Sigi,DL7DF, Manfred,DK1BT, Georg,DK7LX, Wolf,DL4WK, Reiner,DL7KL,
Juergen,DL7UFN, Frank,DL7UFR, Jan,SP3CYY, and Leszek,SP3DOI, will be
QRV from Tonga (OC-049) from Mar 7-24. They will use the callsign A35YZ
with several stations in CW, SSB and a separate station only for RTTY,
PSK31 and SSTV on 160m-6m. QSL via DL7DF, OQRS. See: http://dl7df.com

C6, BAHAMAS, NA-080
Al,N3EA, and Steve,WA2EAJ, are signing C6AEA (CW) and C6AAJ (SSB and
digital modes) from Grand Bahama (NA-080) until Mar 9.
QSLs unfortunately only direct via W3HNK or via LoTW.

DL, GERMANY
DQ0STRATEX is a special event call on the occasion of the stratospheric
balloon project (StratexB) planned for March 2012 by the local DARC
clubs Duelmen (N28) and Luedinghausen (N29). They plan to send an
amateur radio load, consisting of an APRS and a speach beacon, to the
stratosphere with this balloon project. Another payload will be added
by the HAMs of the German Aerospace Center (DLR) in Bremen (I04) with
an experimental ADS-B receiver. The special event station DQ0STRATEX is
active in all modes on all bands between Jan 13,2012, and Jan 31, 2013,
handing out the special DOK STRATEXB. They have two balloon missions
planned, on Mar 10 around 0930 UTC and on Mar 24 around 1600 UTC,
both starting on the airport at Borkenberge near Luedinghausen.
The APRS beacon is transmitting on 144.800 MHz and the speach beacon
in FM on 430.375 MHz. SWL reports are highly appreciated (also online).
QSL cards via DK4REX. See also: http://www.darc.de/distrikte/n/29

E7, BOSNIA AND HERZEGOVINA
The special event station E720RS celebrates the 20th anniversary of the
republic Srpska (Serbian republic in Bosnia Herzegovina, capital:
Banja Luka) between Mar 1 and Dec 31. QSL via bureau.
See also: http://www.hamradiors.org

EI, IRELAND, EU-115
The special event station EI100T is activated until the end of 2012
from Cork Harbour which was the last port from which the Titanic left
on her tragic maiden voyage 100 years ago.
QSL via EI4HQ, LoTW. http://ei4hq.cloudaccess.net/ei100t-titanic.html

F, FRANCE
The special callsign TM210VH is celebrating the 210th birthday of
Victor Hugo until the end of the year. QSL via F4GFE.

The clubstation TP8CE of the Council of Europe in Strasbourg will be
activated on Mar 9-11 to mark the 40th anniversary of the European
Youth Center. The usual TP2CE team will be supported by the guest OPs
Volker,DL1WH, and Dieter,DK5PZ, in CW, SSB and maybe also digital modes
between Mar 9, 1200 UTC, and Mar 11, 1200 UTC. QSL via F5LGF.
An online log is available at: http://ewwa.free.fr

J7, DOMINICA, NA-101
Simon,G7SOZ, is working in CW and SSB as J79SZ from Dominica (NA-101)

from Mar 7-15 including the RSGB Commonwealth Contest (Mar 10/11).
QSL via G7SOZ, LoTW. See also: http://www.g7soz.net

JA, JAPAN, AS-076
The special event station 8N5KOCHI is active until Mar 22 to mark an
ARISS school contact from Kochi on Shikoku (AS-076) scheduled for
Feb 13, 10:13 UTC. QSL via bureau.

KP2, US VIRGIN ISLANDS, NA-106
Randy,NP2/N0TG, Ron,NP2/AA4VK, and Jeff,NP2/N1SNB, are QRV in all modes
on all bands (incl. 60m) from St. Croix (NA-106, WLOTA 2477,USi VI002S)
from Mar 7-14. QSL unfortunately only direct via N0TG or with online
QSL request and a donation of 3 US$: http://www.n0tg.com

KP4, PUERTO RICO, NA-099
Paula,KP3/K9IR, is working holiday style from Cabo Rojo on 40m/20m/10m/
6m until Mar 10. QSL via homecall.

LZ, BULGARIA
Once again several special calls remember Bulgarian orthodox saints
for one month each:
LZ1818MOG January
LZ1401SET February
LZ1784SIB March
LZ1437MGS April
LZ907SKB May
LZ1515PSB June
LZ1822MIT July
LZ916ss August
LZ1737ssS September
LZ1814MIS October
LZ1620PPZ November
LZ1500PNB December
QSLs via bureau. See also: http://www.balkanclub.org/awards.htm
---
The special event station LZ12FDAY is active until Jul 22 to draw the
attention on the "LZ HF QRP Field Day" of the Bulgarian Federation of
Radio Amateurs (BFRA) from Jul 20-22. QSL via LZ1BFR.
See also: http://www.lzhfqrp.org

PJ2, CURACAO, SA-099
PJ2/DK5ON is going to hit the airwaves from Curacao (SA-099) in SSB,
RTTY and PSK on 10/12/15/17/20/40/6m from Mar 12-30. QSL via homecall.

S5, SLOVENIA
The radio club Skofja Loka celebrates its 40th jubilee with the special
callsign S540DKR until the end of April. QSL via S59DKR, LoTW.
SWL reports can be sent via e-mail to s540dkr@gmail.com
See also: http://lea.hamradio.si/~s59dkr/40years.html

S7, SEYCHELLES, AF-024
Tom,DL5NEN, and his XYL Claudia,DO5NEN, are on a "Honeymoon DXpedition"

and will sign S79NEN from Mahe (AF-024) and La Digue (AF-024) from
Mar 12-28. They will be active in SSB/RTTY/CW on 10m-40m and plan to
take part also in the WPX SSB Contest and the BARTG HF RTTY Contest.
QSL via DO5NEN.

TA, TURKEY
The "World Kidney Day" shows the importance of the kidneys for the
entire health. The "TC Special Wireless Activity Team" (TCSWAT) and the
"Giresun Radio Amateurs and Nature Sports Club" (GITRAD) will activate
the special callsign TC2012WKD in CW/PSK31/SSTV/SSB on Mar 8. You can
apply for a special award via e-mail when you have made QSOs on at
least three different bands. QSL via bureau oder via TCSWAT. See also:
http://www.worldkidneyday.org
http://www.tcswat.org
http://www.gitrad.org.tr/default3x.aspx

The special event station TC50TRAC is activated from several cities
throughout the year to celebrate the 50th anniversary of the Turkish
radio club "Telsiz ve Radyo Amatoerleri Cemiyeti" (TRAC). See QRZ.com.
A special award is issued as well. Private stations append /50 to their
callsign.

TT, CHAD
YL Elvira,IV3FSG, signs TT8ES from N'Djamena in SSB and digital modes
until Mar 18. QSL via IK3GES.

VE, CANADA
The special callsign CK975LC marks the 75th anniversary of the
"Loyalist City Amateur Radio Club of Saint John" until Mar 31.
QSL via VE9MY, LoTW or via e-mail request to: morgakl@gmail.com
See also: http://www.lcarc.ca

VP9, BERMUDA ISLANDS, NA-005
Bob,VP9/G3PJT, will be QRV from Mar 8-15. He wants to take part in
th RSGB Commonwealth Contest as well. QSL via homecall.
See also: http://www.beru.org.uk

YA, AFGHANISTAN (update)
Jorgen "Joe",5Q2J/OZ2JBC, expects to be active as T6JP until the end
of July. See also: http://oz2jbc.dk/page3.html

ZL7, CHATHAM ISLANDS, OC-038
Dave,ZL7/VO1AU, will show up from Chatham (OC-038, WLOTA 1627) working
in CW and SSB from Mar 8-13. He announced to join the RSGB Commonwealth
Contest in the SOAB category. QSL via VO1MX.

VK0TH (Macquarie Island) approved for DXCC credit: If your VK0TH QSL card
has been rejected for DXCC credit before please send an e-mail with
the QSO data to bmoore@arrl.org
Trevor will go QRT at the end of March and wants to hand out a new DXCC
to as many people as possible. See QRZ.com.

SILENT KEY: Earle Smith,VE6NM, president of the "Radio Amateurs of Canada"
from 2004-2007 passed away on February 24 at the age of 81.
See also: http://earlesmith.rac.ca

UPCOMING CONTESTS

Mar 10 DIG QSO Party
Mar 10 AGCW-DL QRP Contest
Mar 11 North American Sprint
Mar 11 DIG QSO Party
Mar 11 UBA Spring Contest
Mar 10/11 RSGB Commonwealth Contest
Mar 17/18 Russian DX Contes

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-014, CT3, Madeira Archipelago: Rosel,DL3KWR, and Hardy,DL3KWF, are going
to visit Madeira (WLOTA 0053) again. Listen for CT9/DL3KWR and
CT9/DL3KWF in CW and digital modes mainly on 12m, 17m and 30m between
Mar 8 and Apr 4. QSLs via homecalls (direct/bureau). Bureau QSLs can be
requested also via e-mail to dl3kwr@darc.de or dl3kwf@darc.de

EU-023, 9H, Malta group: Peter,G3PHO, will be on Gozo Island (MIA MM-004,
WLOTA 0046) signing 9H3C with 100w and dipoles on 80m-10m (maybe also
160m) from Mar 8. He plans to join the RGSB Commonwealth Contest.
QSL via G3PHO.

EU-125, OZ, Jylland West group: Stefan,DL7AOS, will be QRV again as 5P5K
from Romo Island (DIA NS-001, OZFF-040) from Mar 10. He will use
his FT-857, a power amplifier and a vertical near the beach on 80m-6m.
He will take part in the Russian DX Contest on Mar 17/18 as well.
QSL via DL7AOS (bureau/direct).
A video from last year can be downloaded from Youtube at:
http://www.youtube.com/watch?v

OC-199, VK6, Western Australia State (NW Coast) Centre Group: Wally,VK6YS/p,
will activate West Lewis Island during the IOTA Marathon mainly in SSB
and little CW on 40-10m between Mar 8 (1000 UTC) and Mar 10 (0800 UTC).

Lighthouse activities

Ham Radio Allows Students to Contact Foreign Countries:

Posted: 05 Mar 2012 04:28 PM PST
http://www.eham.net/articles/27841

KJHK radio is not the only campus radio station.Tucked in acorner of Learned Hall, the KU Amateur Radio Club has a long-standing history with KU. Since it was formed in 1952, KU students have used the radios in the room, known as HAM radios, to communicate with and compete against people from across the globe. For most competitions, the goal is to contact as many people from a given area state or world wide as possible.
Long-distance contact is known as DXing, which is possible thanks to two large antennae on the roof of Learned. "Using this equipment, I've talked to people in France, Italy, Chile and Great Britain," said Michael Shook, a senior from Peoria, Ill., in the Amateur Radio Club. "I really like DXing and talking to someone from tens of thousands of miles away." Right now, there are a few upcoming amateur radio competitions, including one focused on contacting people from Kansas. Another competition, known as Field Day, takes place during the summer, where over 35,000 HAM radio operators from the United States and Canada participate in a variety of contests.

//
New System To Forecast Space Weather:

Posted: 05 Mar 2012 04:25 PM PST
http://www.eham.net/articles/27840

A new system has been developed by British scientists that will forecast space weather in an effort to better protect satellites orbiting our planet from damaging solar storms. Led by researchers at the British Antarctic Survey (BAS), the SPACECAST project is expected to provide reliable web-based forecasts so that satellite operators will be able to take action to keep their navigational, communication, and scientific satellites from the radiation that solar storms produce. Researchers from six European countries partnered with two European companies and with colleagues from the US to use satellite data, ground-based measurements of the Earth's magnetic field, and computer models to make accurate forecasts of space weather. "For the first time, we can now forecast radiation levels for a whole range of different orbits, from geo-stationary to medium earth orbit where there is a tremendous growth in the number of satellites," Richard Horne, BAS's lead researcher of the project, said in a recent press release. GPS satellites, which orbit closer to Earth, passing through the

so-called Van Allen radiation belt -- a ring of charged particles trapped within a magnetic field encircling the planet above the equator -- are typically at a higher risk than other types of satellites.

//
Sun Erupts With Major Solar Flare:

Posted: 05 Mar 2012 04:24 PM PST
http://www.eham.net/articles/27839

A major solar flare erupted from the sun late last night (March 4) sending an explosion of plasma and charged particles hurtling toward Earth.

286. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-07 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1331103900@panix.com>
Source record: 3453
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

The Queens Diamond jubilee special callsigns

Posted: 07 Mar 2012 07:36 AM PST
http://forums.qrz.com/showthread.php?336959-The-Queens-Diamond-jubilee-special-callsigns&goto=newpost

This year marks Queen Elizabeths Diamond jubilee, to celebrate this amatuers all over the united kingdom will be using special callsigns, these callsigns can be heard on air from 00:00 BST 0n the 5th of May 2012 to 23:59 BST on the 10th of June 2012 inclusive.

My intermiediate callsign 2E0SCC, will change for the duration of this event to 2Q0SCC, so if you wish to get this special callsign in your log book then listen out between the dates previously mentioned and i will try to make myself heard with my 50 watts of power output. ;)

** MMMonVHF Newsletter / No.10 - WEEK 10/2012 **

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-03-07
We try to distribute our Newsletter, once a week on thursday;
if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

DL2LAH/HS0ZIL, Karsten: On 4th march 2012 OM Joe (Pornchai
Joe Semjang), HS2JFW, was voted as President of the RAST (Radio Amateur
Society of Thailand).
Joe was the first HAM Radio Operator from Thailand who became QRV on
moonbouncing from HS in the year 2002! He is very active in all matters
of HAM Radio in Thailand and especially in VHF/UHF. We wish him a good
and always diplomatic hand in his work on efforts for HAM Radio in
Thailand!
Will we hear HS on 6m or 70cm EME soon??? Congrats to OM Joe, HS2JFW
from MMMonVHF.de and the whole VHF/UHF/SHF community!!

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: 4U1ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the
year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing
something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never

been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: J5; square IK21DT; start 2012-03-23

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm

and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

** DXCC: EY; square MM48; start 2012-04-27

From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. Callsign not known yet. Locator will
be MM48JN near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.

We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

**DXCC: DL; GERMANY; start 2012-03-10

DQ0STRATEX is a special event call on the occasion of the stratospheric
balloon project (StratexB) planned for March 2012 by the local DARC
clubs Duelmen (N28) and Luedinghausen (N29). They plan to send an
amateur radio load, consisting of an APRS and a speach beacon, to the
stratosphere with this balloon project. Another payload will be added
by the HAMs of the German Aerospace Center (DLR) in Bremen (I04) with
an experimental ADS-B receiver. The special event station DQ0STRATEX is
active in all modes on all bands between Jan 13,2012, and Jan 31, 2013,
handing out the special DOK STRATEXB. They have two balloon missions
planned, on Mar 10 around 0930 UTC and on Mar 24 around 1600 UTC,
both starting on the airport at Borkenberge near Luedinghausen.
The APRS beacon is transmitting on 144.800 MHz and the speach beacon
in FM on 430.375 MHz. SWL reports are highly appreciated (also online).
QSL cards via DK4REX. See also: http://www.darc.de/distrikte/n/29

**DXCC: PJ2; CURACAO; start 2012-03-12

PJ2/DK5ON is going to hit the airwaves from Curacao (SA-099) in SSB,
RTTY and PSK on 10/12/15/17/20/40/6m from Mar 12-30. QSL via homecall.

Kids Will Ham It Up, Radio Style:

Posted: 06 Mar 2012 04:34 PM PST
http://www.eham.net/articles/27854

In the event of hurricanes, fires, floods, earthquakes and other disasters, you can count on amateur (or Ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20, local kids can join Surrey Museum and Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop at the museum, at 17710 56A Ave. The session (from 2 to 4 p.m.) will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational. The hands-on workshop is designed for kids age nine and older. Admission is free, but space is limited; preregister by calling 604-592-6956. Workshop participants will talk to people in other countries, experience digital communications without the internet, learn how radio waves travel, simulate a ground control/International Space Station contact, try Morse code and watch videos. Also, kids will learn that new technology is not always superior to old technology and is anything but obsolete.

//
Father, Son Team Up in 'Outer Space':

Posted: 06 Mar 2012 04:32 PM PST
http://www.eham.net/articles/27853

Two Anderson Township amateur radio operators recently sent and received a photo from a satellite that was manually deployed from the International Space Station. Farrell Winder and his son, Jeff Winder, had helped in the development of SuitSat-1 - a worn-out Russian spacesuit that was recycled, outfitted with an amateur radio transmitter and batteries, and tossed from the International Space Station in 2006. Amateur radio operators were able to receive its signals on earth, but the batteries ran down in two weeks and the space suit eventually burned up as it spiraled into earth's atmosphere. The limited success of SuitSat-1, however, inspired the development of a much newer advanced concept called ARISSat-1, which was launched in August 2011 from the International Space Station.

//
W2E - Doomsday 2012 - Special Event:

Posted: 06 Mar 2012 04:33 PM PST
http://www.eham.net/articles/27852

The event celebrates the end of the Mayan Calendar and what has been characterized in popular culture as Doomsday 2012. The special 1x1 Call - W2E is short for "World 2 End" Special event operators will be making QSOs on the following frequencies, plus or minus: 3.866 MHz, 7.266 MHz, 14.266 MHz, 21.366 MHz, and 28.366 MHz.

//
Henryville, IN Tornado:

Posted: 06 Mar 2012 04:35 PM PST
http://www.eham.net/articles/27842

On Friday March 2nd an inbound cold front brought extreme weather to the Ohio Valley area. The Clark County RACES team conducted a Skywarn net relaying weather reports to the Louisville, KY National Weather Service office. This front spawned several tornadoes which took a track through the Northern part of Clark and other nearby counties. After the storms passed we started receiving reports of massive destruction in the Henryville and Marysville Indiana areas.

QRZ Forums - Hamfest and Convention Calendar

//////////////////////////////////////
ARRL Southern Florida Section Convention at the 37th Annual Stuart Hamfest,
17 March

Posted: 06 Mar 2012 09:12 AM PST
http://forums.qrz.com/showthread.php?336819-ARRL-Southern-Florida-Section-Convention-at-th
e-37th-Annual-Stuart-Hamfest-17-March&goto=newpost

This is (again) a FREE hamfest and Convention- come join the fun!

The focus of this year□s event is on Storm Spotting and Emergency
Communications with an educational forum led by Mike Corey, ARRL Emergency
Preparedness and Response Manager and author of the ARRL Storm Spotter□s
Handbook. Other forums include talking to hams all over the world (DX),
plus you can learn how to get started in this exciting hobby. We have a
prize drawing at the end of the day with over $2000 in Amateur radio prizes
on raffle.

Prizes this year are:

Grand Prize Yaesu FT-450D

2nd Prize ICOM IC-208H 2M/440 mobile

3rd Prize Yaesu FT-60R Dual Band hand held

plus more...

(our thanks to R and L for selling the major prizes to us at cost to
support our event)

You need not be present to win the major prizes and anyone may enter the
raffle via a donation at http://www.stuarthamfest.com/ (yes, Virginia- that
is how we pay for this free event). Want a chance to win? Get the details
on the site.

On the third weekend in March each year hundreds of Amateur Radio operators
(□hams□) and people interested in technology from all over the state come
to the Martin County Fairgrounds, 2616 SE Dixie Hwy, Stuart, Florida for
the Martin County Amateur Radio Association (MCARA) Stuart Hamfest. The
37th annual event will be open from 8:00 AM to 5:00 PM on Saturday, March
17, 2012. Admission and Parking is Free to all. 2012 marks the second time
the American Radio Relay League (ARRL) has designated the event as the ARRL
Southern Florida Section Convention.

Charlie 4 147.450 QSO

Charlie 5 147.465 QSO

Charlie 6 147.480 QSO

Charlie 7 147.495 QSO/Grove Ops 2

Delta 1 147.510 Digital (2)

Delta 2 147.525 Digital

Echo 1 147.540 Echo Common (3)

Echo 2 147.555 QSO

Echo 3 147.570 QSO

Echo 4 147.585 QSO

Common X 147.550 Cambria County ARES simplex common

Romeo 1 145.210 - Cambria Central Repeater

All Amateur Mobile Units will use the 145.210 KC3DES Repeater (Romeo1) for check in.

Use of the Common Assigned ARES frequency X 147.550 should be limited as last resort.

Operators will be assigned to a group for QSO supervision. The common group frequency is the initial contact place for group members. For a QSO, move to the named frequency under the group. Announce that you are QSYing to, lets say Echo 2. When you return from Echo 2 QSY announce your return on the group common, in this case Echo 1. It would be nice to have someone in each group assign and monitor allocations. Delta 1 - 2 are for digital use simplex.

==> + DAYTON HAMVENTION®: DAYTON HAMVENTION HONORS QST TECHNICAL EDITOR JOEL HALLAS, W1ZR, WITH TECHNICAL ACHIEVEMENT AWARD

On March 6, the Dayton Hamvention® Awards Committee announced the recipients of Hamvention's four annual awards. QST Technical Editor Joel Hallas, W1ZR, was named the winner of the Technical Achievement Award. The recipient of the Amateur of the Year is S. Suri, VU2MY. Steven Betza, WZ2V, was selected as the recipient of the Special Achievement Award. The Deutscher Amateur Radio Club -- Germany's IARU Member-Society -- was selected as the Club of the Year. Read more here <http://www.arrl.org/news/dayton-hamvention-honors-em-qst-em-technical-editor-joel-hallas-w1zr-with-technical-achievement-awar>.

==> + ON THE AIR: NEW 60 METER PRIVILEGES NOW IN EFFECT

As of March 5, US amateurs have new privileges on the 60 meter band. In addition to an increase in effective radiated power from 50 to 100 W, hams can now transmit CW and PSK31 on the following channel-center frequencies:

- Channel 1: 5332.0 kHz
- Channel 2: 5348.0 kHz
- Channel 3: 5358.5 kHz
- Channel 4: 5373.0 kHz
- Channel 5: 5405.0 kHz

Amateurs can also transmit USB voice and PACTOR III on the following suppressed carrier frequencies (the frequencies typically shown on transceiver displays):

- Channel 1: 5330.5 kHz
- Channel 2: 5346.5 kHz
- Channel 3: 5357.0 kHz
- Channel 4: 5371.5 kHz
- Channel 5: 5403.5 kHz

For more information, please see 60 Meter Operations -- New Privileges and Recommended Practices <http://www.arrl.org/files/file/Regulatory/Recommended_Practices_for_60_Meters%20-%20Version%206_4.pdf>, published <http://www.arrl.org/news/arrl-publishes-new-guidelines-for-60-meters> by the ARRL HF Band Planning Committee. A revised ARRL band chart <http://www.arrl.org/files/file/Hambands_color.pdf> is also available. Watch for the article "New Privileges on 60 Meters" by ARRL Regulatory Information Manager Dan Henderson, N1ND, in the April 2012 issue of QST.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 9 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz and 3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. Thanks to all of you who took the time to share information with us. After reading the feedback, the committee began working on the band plans; the first draft plan ready for review is for the 9 cm band (3300-3500 MHz). Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-9-cm-band-plan>.

==> + PROPAGATION NEWS: ACTIVE SUNSPOT REGION 1429 PRODUCES SOLAR FLARES, CORONAL MASS EJECTIONS

This week has been an active week for our Sun. An X-1.1 class solar flare erupted from the Sun on March 4 at 11:13 PM EST (0413 UTC March 5), sending an explosion of plasma and charged particles -- a coronal mass ejection (CME) -- hurtling through space. Forecasters at NOAA's

Space Weather Prediction Center are saying that this CME should miss Earth, but it will hit Mercury and Venus. Then on March 6 at 7:28 PM EST (0028 UTC March 7), the Sun released a solar flare, the strongest one this year. The X-5 class flare hurled another CME into space, but it is too soon to tell if this is an Earth-directed flare. This activity is coming from sunspot 1429, which is currently making its way around the northern hemisphere of the Sun.

Sunspot 1429 -- which emerged on the Sun on March 2 and is estimated to be at least four to five times larger than Earth -- is slowly turning to face Earth, so if any such eruptions do occur, they are increasingly likely to be geoeffective.

When a CME hits the Earth's atmosphere -- approximately 72 hours after exploding on the Sun -- the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF) -- the highest frequency at which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible.

When aurorae occur, the electrons hit the ionosphere at the North and South geomagnetic poles, creating ionization. Waves that would normally travel off into space are bouncing off the aurora and being redirected back toward Earth. This can create opportunities for long-distance propagation via VHF and UHF. Read more here <http://www.arrl.org/news/active-sunspot-region-1429-produces-solar-flares-coronal-mass-ejections>.

==> + DON'T BE FOOLED: CHECK OUT THE APRIL ISSUE OF QST

This April issue of QST remembers the wireless heroes of the RMS Titanic and the SS Carpathia 100 years ago, and also takes readers on a voyage to the South Orkney Islands for the VP8ORK DXpedition -- and more. So set aside a couple of hours, grab a beverage and get ready to have some radio fun with the April issue of QST.

In 2011, the Third Annual ARRL Homebrew Challenge presented the toughest challenge to date. In 2006, we asked readers to build a 5 W PEP 40 meter sideband and CW transceiver. In 2009, we upped the ante, looking for a 50 W linear amplifier to go along with the transceiver. For 2011, we challenged hams to come up with a single or multiband transceiver for 6 and/or 10 meters. Find out who walked away with the honors in "Homebrew Challenge III - And the Winner Is..." by QST Technical Editor Joel R. Hallas, W1ZR.

Eric Keerbs, AD7HM, discovers a way to let your radios talk to your computer using an interface converter in his article "Level Converter to Allow Full Control of Peripherals by Computer or Radio." In "A Transceiver-to-Amplifier Interface," Ed Toal, N9MW, presents an interface that you can use to safely switch your older linear amplifier

from your new transceiver. Paul Danzer, N1II, takes a look at window line and standing wave ratio in his article "Balanced Line SWR Measurement."

It's been 100 years since the RMS Titanic -- heralded as "unsinkable" -- struck an iceberg and sank to the bottom of the Atlantic, taking 1511 passengers and crew with it. Retired US Coast Guard Reserve Commander Richard Paton takes a look at the tragedy -- with a focus on Jack Phillips and Harold Bride, the two Marconi wireless operators on the Titanic -- in his article "Radio's Role in the Titanic Disaster." The "Vintage Radio" column profiles the wireless operator aboard the rescue ship, the SS Carpathia.

The VP8ORK DXpedition to the tip of the Antarctic Peninsula saw seals, dolphins and big pileups. Join Michael Mraz, N6MZ, as he recounts the Microlite Penguin DXpedition to the South Orkney Islands in "South of Sixty South." Make plans to join the ARRL and the ARRL EXPO at the 2012 Dayton Hamvention and the 2012 ARRL National Convention in California. Find out all you need to know about these two headlining events in "ARRL EXPO 2012 -- Save the Dates" by ARRL Marketing Manager Bob Inderbitzen, NQ1R.

NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the ICOM IC-9100 MF/HF/VHF/UHF transceiver in this month's Product Review. He says the rig is "compact and versatile. The IC-9100 handles almost any type of operating on the 160 meter through 2 meter bands, plus 70 and 23 cm."

Of course, there are the usual columns you know and expect in the April QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, How's DX and more. Look for your April issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + FCC NEWS: FCC REDUCES FORFEITURE FOR FLORIDA MAN ACCUSED OF USING UNAUTHORIZED EQUIPMENT

In November 2011, the FCC issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Michael Perry of Cross City, Florida. In a Forfeiture Order released on March 6, the FCC reduced the forfeiture that Perry must pay to $450. Perry was accused of operating a radio transmitter without the requisite FCC authorization and his failure to operate a Citizens Band station, "willfully violat[ing]" Section 301 of the Communications Act of 1934, as amended and Sections 95.409 (by operating an unlicensed and non-certificated CB transmitter) and 95.411 (by operating an unlicensed radio transmitter with two amplifiers) of the FCC's rules. Read more here <http://www.arrl.org/news/fcc-reduces-forfeiture-for-florida-man-accused-of-using-unauthorized-equipment>.

==> ARRL ANNUAL AWARDS: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for the ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. ARRL members can nominate hams for the Herb S. Brier Instructor of the Year Award, the Hiram Percy Maxim Award, the ARRL Microwave Development Award, the ARRL Technical Service Award, the ARRL Technical Innovation Award and the Knight Distinguished Service Award. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open-1>.

==> SOLAR UPDATE

Tad "If we can make it through the night we will see the Sun <http://www.youtube.com/watch?v=kiCuxOL7Ag4>" Cook, K7RA, reports: This has been quite a week for dramatic solar activity: The average daily sunspot number was up nearly 26 points to 69.4, while the average daily solar flux rose nearly 17 points to 121.9. The latest forecast has solar flux at 140 on March 8-9, 135 on March 10-11, 130 on March 12-13, 125 on March 14-15, then 130, 125, 120, 115, 115, 110 and 110 on March 16-22, then back down to 105 on March 23-25. The predicted planetary A index for March 8-10 is 75, 28 and 15, then 10 on March 11-13, 5 on March 14-16, then 12, 15, 10, and 8 on March 17-20, and 5 on March 21-27. Look for more information on the ARRL website on Friday, March 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Good Charlotte's March On <http://en.wikipedia.org/wiki/Good_charlotte>.

==> + DXCC NEWS: FOUR OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that four operations -- the current VK0TH and AX/VK0TH (Macquarie Island) operation, the current T6BP (Afghanistan) operation, the 2011 6O0M (Somalia) operation and the December 2011-January 2012 9U3TMM (Burundi) operation -- have been approved for DXCC credit. "If you have had these operations rejected in a recent application, please send an e-mail <bmoore@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Once updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online in the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK IN RADIOSPORT

This week:

- March 10 -- AGCW QRP Contest
- March 10-11 -- Idaho QSO Party; EA PSK63 Contest
- March 11 -- North American Sprint (RTTY); SKCC Weekend Sprint

- March 11-12 -- Wisconsin QSO Party
- March 14-15 -- CWops Mini-CWT Test

Next week:

- March 17 -- 10-10 International Mobile Contest; Feld Hell Sprint; AGCW VHF/UHF Contest
- March 17-18 -- North Dakota QSO Party; Oklahoma QSO Party; Virginia QSO Party; Russian DX Contest
- March 17-19 -- BARTG HF RTTY Contest
- March 19 -- Run for the Bacon QRP Contest
- March 22 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ENTER THE SEVENTH ANNUAL ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2013 ARRL Calendar. Read more here <http://www.arrl.org/news/enter-the-seventh-annual-arrl-photo-contest>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- When operating CW, do you send the symbol "@" (di-dah-dah-di-dah-dit), or do you spell out "at" (di-dah/dah)?
- Is your primary station computer a desktop, laptop or tablet?
- Does your local Amateur Radio club still publish a newsletter?
- How many times has your primary call sign changed over the years?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the June 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 9-10 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-52nd-annual-acadiana
-hamfest>,
Rayne, Louisiana; ARRL Oklahoma State Convention

//
Second Biggest Flare Of the Solar Cycle:

Posted: 07 Mar 2012 01:31 PM PST
http://www.eham.net/articles/27862

NASA models using data from the Solar Terrestrial Relations Observatory (STEREO) and the Solar Heliospheric Observatory (SOHO) have now provided more information about the two CMEs associated with the two March 6 flares. The first is traveling faster than 1300 miles per second; the second more than 1100 miles per second. NASA's models predict that the CMEs will impact both Earth and Mars, as well as pass by several NASA spacecraft - Messenger, Spitzer, and STEREO-B. The models also predict that the leading edge of the first CME will reach Earth at about 1:25 AM EST on the morning of March 8 (plus or minus 7 hours). =Such a CME could result in a severe geomagnetic storm, causing aurora at low latitudes, with possible disruption to high frequency radio communication, global positioning systems (GPS), and power grids. The sun erupted with one of the largest solar flares of this solar cycle on March 6, 2012 at 7PM EST. This flare was categorized as an X5.4, making it the second largest flare - after an X6.9 on August 9, 2011 - since the sun's activity segued into a period of relatively low activity called solar minimum in early 2007.

//
Magnetic Storm Watch March 8 UTC:

Posted: 07 Mar 2012 01:03 PM PST
http://www.eham.net/articles/27855

The CME that erupted late on March 4 passed ACE around 0400 UTC March 7 (11:00 p.m. EST March 6). As a result, storming reaching the G2 (Moderate) level continues at this time. Another CME, part of the recent R3 (Strong) Radio Blackout event at 0024 UTC March 7 (7:24 p.m. EST March 6) is forecast to pass ACE early morning UTC on March 8 (start of day EST March 8).

Amateur Radio Newsline(tm) Report 1804 - March 9 2012

Amateur Radio Newsline report number 1804 with a release date of March 9th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Dayton Hamvention announces its 2012 award winners, the Sun erupts with a massive C-M-E hurled toward Earth, Brazil bans DXpedition operations from Saint Peter and Saint Paul, new rules now in effect for U-S hams on 60 meters, and a new movie about going into space from Richard Garriott, W5KWQ. All this and more on Amateur Radio Newsline(tm) report number 1804 coming your way right now.

RADIO HONORS: HAMVENTION ANNOUNCES 2012 AWARD WINNERS

Its honors time in amateur radio. This as the Dayton Amateur Radio Association announces the names of these years Hamvention Award winners. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

This year the Dayton Hamvention Awards Committee has gone world wide in choosing who would receive the Hamvention's 2012 honors. Named as Radio Amateur of the Year award recipient is Mr. S. Suri, VU2MY, of Hyderbad, India. Mr. Suri can be described as the Hirum Percy Maxim of that nation. Among his numerous achievements, VU2MY was instrumental in establishing the art and science of amateur radio in India as well as leading the effort to establish the world acclaimed National Institute of Amateur Radio. Staying with his avocation, Mr. Suri has lead search, rescue and recovery efforts in many natural emergency events throughout India and elsewhere.

Technical Achievement Award recipient Joel Hallas, W1ZR, of Westport, Connecticut, is likely best known for his monthly QST column titled "The Doctor Is In." This ongoing series is designed to answer many of the basic and not-so-basic technical questions of ham radio that readers may have on their minds. More important, W1ZR responds to these questions in an easy to read format that might best be cited as having a unique appeal especially to newcomers to the hobby.

In addition to his writing for QST, W1ZR is the author of several well read books. These include such titles as Basic Radio, Basic Antennas,

The ARRL Guide to Antenna Tuners, Care and Feeding of Transmission Lines and Understanding and Using Your Antenna Analyzer. He has also garnered many technical awards and remains one of the top technical authors in the field of amateur radio.

This years Special Achievement Award recipient is Steven Betza, WZ2V, of Endicott, New York. According to the Awards Committee, Betza enjoys teaching students by using live experiments and missions. Through a project called "Blue Horizon," WZ2V has already licensed 38 new hams, set the world record for the highest amateur balloon at 125,000 feet, and demonstrated many technical feats relating to that record breaking flight. He also has contributed in a major way to college and high school education programs in Electronic Engineering.

Last but by no means least, the annual Club of the Year Award goes to Deutsche Amateur Radio Club. Better known by its initials DARC, the group has organized Germany into one unified national radio society that can easily be compared to the ARRL here in the United States. The DARC provides educational and technical support for radio amateurs and shortwave listeners. Prior to formal regulations in Germany, the DARC provided guidance in terms of frequency and power management. Today, in addition to all of its other responsibilities, the DARC plays a major role in training and licensing across Germany and is well respected throughout the European Union.

With our sincere congratulations to all of this years Hamvention Award winners, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

The winners will receive their honors at the 2012 Dayton Hamvention. Its scheduled for May 18th to the 20th at the Hara Arena in the Dayton suburb of Trotwood, Ohio. Amateur Radio Newsline plans to be there to bring you all the sound of this years Dayton Hamvention event. (Hamvention 2012)

**

PROPAGATION: SUN EJECTS LARGE CME

The largest solar flare in five years began racing toward Earth on Wednesday March 7th, threatening to unleash a torrent of charged particles that could disrupt communications world-wide.

As this report is being prepared, the government's Space Weather Prediction Center had issued a warning that the effects of the Coronal Mass Ejection or CME were expected to begin around 7 a.m. Eastern time on Thursday, March 8th. Forecasters say the flare was growing as it sped outward from the sun.

Joseph Kunches is a scientist for the National Oceanic and Atmospheric Administration. He said that this particular solar storm was likely to last through Friday morning, March 9th but warned that the region of

the Sun that erupted can still send more CME's our way. Kunches noted that another set of active sunspots is ready visible on the solar disk and that these could also erupt and send more CME's our way.

This latest solar storm comes on the heels of an earlier and weaker solar eruption happened Sunday, March 4th. For updates on this and other solar flare-ups please keep an eye on www.spaceweather.com. (Spaceweather, NOAA, others)

BREAKING DX NEWS: BRAZIL BANS PY0S DX OPERATIONS

The Southgate News reports that radio amateur are now prohibited from operating DXpeditions from the Brazilian Archipelago of Saint Peter and Saint Paul also known as PY0S. This is a remote group of islands near the equator whose maximum elevation is only 18 about meters above sea level. It's also the nearest point of Brazil to Africa, lying about 1820 kilometers from Guinea Bissau. St. Peter & St. Paul was rated number 16 in 2011 DXCC list of most wanted entities.

In a report credited to PS8RF and the Brazilian Amateur Radio League and some DX groups in Brazil have shown their displeasure with this government ban in postings on various social websites. PS8RF told Southgate that there is already a major mobilization by the Brazilian ham community aimed at urging the nations Senators and Federal Representatives to reverse the decision on the to ban. PS8RF notes that the biggest concern among Brazilian hams is that this decision could open unheard restrictions to other entities in Brazil as in other parts of the world where there is no amateur radio activity. More on this breaking news item is on-line at www (dot) teresinadxgroup (dot) com. (Southgate, PS8RF)

**

RADIO LAW: NEW US 60 METER RULES NOW IN EFFECT

Effective Monday, March 5th United States radio amateurs were granted new operating privileges on the 60 meter band. In addition to an increase in effective radiated power from 50 to 100 watts, hams can now transmit CW and PSK31. More information on what modes can be used on what frequencies is on-line at the ARRL website. The quick link to it is tinyurl.com/60-meters-now. (ARRL)

**

RADIO LAW: OTTAWA CANADA LOOKS AT BIG HAM ANTENNA RESTRICTIONS

Ottawa Canada's proposed rules for where private radio operators can put their antennas need another look. This according to the City Council's Rural-Affairs Committee which met two days after the city's Planning Committee reached a similar decision. Amateur Radio Newsline's Don Carlson, KQ6FM, reports:

--

According to the on-line Ottawa Citizen, the regulations are aimed at restricting big and intrusive antenna installations while staying out of the way of small ones. But Ottawa area hams have warned City Councilors that they do not agree with the way that they are written,.

Under the rules, antennas on residential properties would be exempt from public consultations as long as they are under 15 meters in height and at the back of a house.

Radio amateurs counter that this type of a regulation would leave little room for a working antenna above many trees and roof lines. Also that it unduly restricts unobtrusive antennas that would be less visible in front yards than telephone wires, and it doesnt distinguish between an urban house and a rural one, where neighbors might be much too far away to care which yard has an antenna in it.

Like the Planning Committee the Rural-Affairs Committee approved the rules their staff had made up, but nevertheless asked for tweaks and improvements to be made before the issue heads to City Council for a final vote on March 28.

The Canadian Province of Ottawa is home to about 1,400 amateur radio operators. City Council members have already been told that ham radio operators comes are a vital resource during rare disasters like extended power failures. Amateur radio enthusiasts were instrumental in setting up communications during the 1998 ice storm, particularly on the hard-hit South Shore of Montreal.

For the amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

--

According to the March 1st story, the city of Ottawa cannot actually control the placement of private or commercial antennas. That's the purview of Canadian federal telecommunications regulator Industry Canada. However Industry Canada does give municipalities a chance to comment when it's making decisions so that citizens can express what a city thinks is right for them. Now the Ottawa City Council must convince Industry Canada to adopt them. (ottawacitizen.com)

RESCUE RADIO: TRAINED EMCOMM OPERATORS NEEDED IN WAKE OF INDIANA TORNADO

Ham radio operators were activated after a rash of tornadoes hit in several states. We have more in this report:

--

Trained ham radio communicators are needed in Clark County, Indiana following tornadoes that devastated the area on March 2nd.

In a posting to the Indiana Ham remailer picked up on QRZ.com, Jeff Brady, N9WSV, who is the Assistant Emergency Coordinator for Clark County, Indiana, says that more operators are needed to assist in recovery efforts Brady says that they could use additional operators to man various posts even if its only for a few hours a day.

But do not just show up on site. Rather, if you can assist first contact N9WSV by phone at 502-777-7304 or e-mail to n9wsv (at) arrl (dot) net. If you are in the area he is monitoring the146.94 repeater which requires a 67hz sub-audible access tone.

N9WSV adds that the local team of ham radio operators have put in many hours and any relief is greatly appreciated.

--

More on this story in future Amateur Radio Newsline reports. (W8ISH, IN_HAM, QRZ.com)

**

PUBLIC SERVICE: BOSTON AREA HAMS NEEDED FOR 44TH PROJECT BREAD WALK FOR HUNGER EVENT

The 44th running of the Boston, Massachusetts area Project Bread Walk for Hunger takes place on on Sunday, May 6th. Communications planners say that they licensed radio amateurs to provide communications support for the Project Bread Staff and volunteers along the 20 mile walk. If you are interested in helping out this year, please take your web browser to www.mmra.org/wfh to log in and fill out the signup form. Questions go to wfh12 (at) mmra (dot) org. (KA1NCF)

**

RADIO POLITICS: A TINY MOVE TOWARD CONFIRMING NEW COMMISSIONERS

There could be some movement on the stalled FCC nominee front, but not very much. Amateur Radio Newsline's Cheryl Lasik, K9BIK, reports:

--

According to a spokesperson for Senator Charles Grassley his staffers met with those of Commerce Committee Chairman Senator Jay Rockefeller on Monday February 27th to discuss the senator's hold on two pending FCC Commissioner nominations. These are Jessica Rosenworcel and Ajit Pai.

The Grassley spokesperson called the meeting a "development" rather than "progress." She added that she would not further characterize the meeting beyond saying it was about the nominations, Senator Grassley's hold threat and a possible resolution.

The Grassley warning stems from his request for documents related to the FCC's LightSquared waiver. These are documents that the FCC has refused to provide based on the agency's claim that Senator Grassley is not the chair of a relevant committee. That decision by the FCC to effuse the request has sparked a confrontation between the senator and the regulatory agency.

For the Amateur Radio Newsline, I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

--

The FCC has been without a full complement of commissioners since last spring, when it was reduced to four by the exit of Meredith Attwell Baker. It has been at three since the retirement of Michael Copps at the end of last year. (B&C)

**

ENFORCEMENT: FLORIDA CB OPERATOR ORDERED TO PAY A REDUCED $450 FINE

The FCC has affirmed a reduced fine of $450 issued to a Florida C B radio operator based only on his proven inability to pay a much higher $10,000 Notice of Apparent Liability to Monetary Forfeiture. In ordering Michael W. Perry of Cross City to pay the reduced amount, the commission turned away his claim that he was not using a non-certified transmitter or an external power amplifier on the 11 meter band.

In its order, the FCC indicated that there was ample physical evidence in this case and that the $10,000 fine was being reduced solely based on Perry proving that the fine would be a financial hardship on him. However it also cautioned Perry that a party's inability to pay is only one factor in its forfeiture calculation analysis. The FCC stated that it has it has previously rejected inability to pay claims in cases of repeated or otherwise egregious violations. Therefore, future violations of this kind may result in significantly higher forfeitures that may not be reduced due to Perry's financial circumstances.

Perry was given the customary 30 days from the date that the Forfeiture Order was affirmed to pay the $450. If he fails to do so the matter could be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: NO STAFF AND YOU GET A FINE

The FCC issued a notice of apparent liability to Taylor Broadcasting, which owns WJTB AM in Elyria, Ohio. This for allegedly failing to maintain management and staff presence at its main studio.

In issuing the proposed $10,000 fine the FCC said that its agents visited WJTB to inspect it in March 2010 but found the main studio locked and apparently empty. According to the FCC, a person who identified herself as Ms. Taylor drove up and them and said that they would have to talk to a Mr. Taylor. She gave the agents a phone number but even armed with that contact information the agents were unable to reach him or gain access to the studio.

Later, after the FCC wrote a letter of inquiry, the company replied that its personnel do not work specific days and times, but rather are scheduled as needed. It also said that that the agents should have pushed the entry buzzer. But when FCC agents returned in August, they again found the door locked, with no one answering knocks, and no entry buzzer button to press.

In issuing the proposed fine, the FCC says that Taylor Broadcasting's claim that station personnel are scheduled as needed has not resulted in a meaningful management and staff presence at its main studio. The base fine for such cases is $7,000 but the commission set the penalty at $10,000, saying Taylor's continued failure to comply with the commission's main studio requirements even after being advised of this demonstrates a deliberate disregard for the rules.

Taylor Broadcasting was given the customary 30 days from the date the Notice of Apparent Liability was issued to pay it or to file an appeal. (FCC)

**

RADIO WEATHER: HIGH WINDS SHUT DOWN ILLINOIS TV STATION

Dual station WTVO and WQRF in Rockford, Illinois was forced off the air on Friday, March 2nd and staff evacuated from the building. This as heavy snow and low altitude winds caused guy wires on the stations 700 foot high tower to whip around wildly.

The stations Chief Engineer Mike Real. In a media interview he said that in all the years that he has been at WTVO and WQRF that he has never seen the tower guy system reacting in that way. He noted that the swaying guy wires had the ability to actually start shaking the tower down, or cause damage to the it which is what we wanted to check on. Because of this the station stayed off the air as crews examined the tower over the weekend.

In addition to the evacuation at WTVO and WQRF, 12 homes near the tower were evacuated Friday night. After the inspection was completed, WTVO-WQRF resumed broadcasting on Sunday night, March 4th. (WTVO-WQRF)

**

HAM RADIO ON THE WEB: A VIDEO TOUR OF W1AW

In case you missed the live web tour of the February 12th of ARRL headquarters' flagship station W1AW you can now watch the 18 minute video on the ARRL website. In the show W1AW Station Manager Joe

Carcia, NJ1Q, led Geoff Fox, K1GF, on a tour of the famed station. Al Petrunti, KA1TCH, of the New Day Group recording it for future netcasting. You can view that video tour at www.arrl.org/w1aw. It's at the bottom of the page. (ARRL)

**

HAM HAPPENINGS: MARTLESHAM MICROWAVE ROUND TABLE APRIL 28-29

The 2012 Martlesham Microwave Round Table takes place April 28th and the 29th. This year's venue is the BT Adastral Park, Martlesham Heath, in the United Kingdom near the city of Suffolk.

Speakers scheduled so far include J.R. Miller, G3RUH; Andy Talbot, G4JNT; B.R. Coleman, G4NNS, and a number of other well known U-K microwave experimenters. The United States will be represented by well known author Kent Britain, WA5VJB of Grand Prairie, Texas.

This promises to be one of the best Martlesham Microwave Round Table in history. More information is on-line at mmrt.homedns. org. (UK Microwave Group)

**

NAMES IN THE NEWS: VE3CGN APPOINTED RAC ONTARIO SEC

Some names in the news. Fist up is Scott Carter VE3CGN who has been appointed as the new Section Emergency Coordinator for A-R-E-S in Ontario, Canada. According to Radio Amateurs of Canada, Carter was the former District Emergency Coordinator for the Tecumsah District and holds many certifications in emergency management. He is also very active with the Salvation Army Team Emergency Radio Network. His appointment was effective on March 1st. (RAC, VE3AJB)

**

NAMES IN THE NEWS: W5LFL AND W5KWQ - MAN ON A MISSION - THE MOVIE

And next we travel back in time to 1983. That's when then NASA astronaut and ham operator Owen Garriott, W5LFL, made the first manned amateur radio transmission from space. His pioneering effort from flight STS-9 paved the way for todays International Space Station ARISS program.

Several decades later, Owen's son Richard, W5KWQ, would fly to the ISS and use the same method to talk to his dad and many others here on planet Earth. Now, these historic moments have been captured in the exciting new documentary titled Man on a Mission. A film that reveals Richard Garriotts quest to become the first second generation American in space.

In a note to Amateur Radio Newsline via First Run Features, both W5LFL and W5KWQ ask that hams spread the word about this documentary to your club members and associates in the amateur radio community. Currently,

Man on a Mission is available nationwide via Video on Demand. A DVD release is planned for May 2012. More about this documentary is on-line at firstrunfeatures.com/manonamission. The films trailer ca ne seen at tinyurl.com/garriott-film. (Firstrun Features)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WORLDBEAT: UK SPECIAL 600 METER PERMITS EXTENDED

United Kingdom Notices of Variation to amateur radio licenses for special research permits to operate in the band 501 to 504 kHz have been extended to December 31st 2012. This as telecommunications regulator Ofcom has begun discussions with the Radio Society of Great Britain about the timetable for implementing the new secondary allocation to the amateur service, 472 to 479 kHz that was recently approved at WRC-12. The agreed upon availability date for this band to begin to become available for administrations world-wide to begin proceedings to open to their ham radio communities is effective as of January 1st, 2013. A United Kingdom Notices of Variation is the equivlant to an FCC issued Special Temporary Authority or STA grant here in the USA. (RSGB)

**

HAM RADIO IN SPACE: HAMSAT VO-52 GOES SILENT

The HAMSAT VO-52 amateur radio satellite that suddenly ceased operating last month could return to the air. According to V-U-2-W-M-Y, the satellite is in what he calls "excellent health" following recovery efforts and is currently under observation by ground controllers in India.

By way of background, on February 28th all transmissions from HAMSAT VO-52 ceased. Since then neither its beacon nor it's 435 to 145 MHz linear transponder had been heard by stations on the ground. However it now looks as if the bird is back to life, but there is one caveat.

VU2VMY notes that HAMSAT VO-52 is actually the property of the government of India. Therefore unlike other amateur radio satellites that are owned, operated and maintained by non-governmental agencies, detailed information on HAMSAT VO-52 cannot be shared with anyone in accordance with the prevailing governmental regulations. However VU2WMY adds that a decision about switching its transponder back on is

pending clearance.

VU2WMY adds that this is the first ever interruption in the services of the bird since HAMSAT VO-52 was commissioned on May 5th of 2005. (VU2VMY)

**

HAM RADIO IN SPACE: VA3OOG TO BE FIRST CANADIAN TO COMMAND THE ISS

The BBC reports that astronaut Chris Hadfield, VA3OOG, who also holds the U-S call KC5RNJ will be the first Canadian to command the International Space Station.

According to the news report, Hadfield will begin his journey when he launches to the ISS on board a Russian Soyuz lift vehicle near the end of this year. For his first three months on-orbit the 52-year-old ham radio operator will serve as a flight engineer in the Expedition 34 crew. Then, in March 2013, he will assume command of Expedition 35 for three months before returning to Earth.

This will not be Hadfield's first trip into space. On past missions to orbit he became the first Canadian to undertake a spacewalk and was the first and only Canadian to board the Russian Mir space station.

VA3OOG was also the first Canadian to operate his country's major contribution to the space shuttle program. That being its famed robotic arm that was used in numerous space experiments, on-orbit repairs and to help build the ISS.

You can read more about Chris Hadfield, VA3OOG, and his coming trip to the ISS on line at tinyurl.com/va3oog-on-orbit. (BBC, Space Today)

**

WORLDBEAT: TOKYO JAPAN HOME TO WORLDS TALLEST BROADCAST TOWER

A ceremony to mark the completion of the world's tallest freestanding broadcasting tower was held in Tokyo on Friday, March 2nd. Construction on the Tokyo Sky Tree tower began in 2008. It was completed a few days prior to its dedication ceremony.

The Sky Tree stands 2,080 feet tall and is claimed to be the tallest structure of its type ever built. It will eventually be the home of most broadcasting and two-way radio operations in that city.

Video of the new tower and the dedication ceremony is on-line at tinyurl.com/tall-tokyo-tower. And before you ask if will also be the home of any sort of ham radio relay operation we can only say that your guess is as good as ours. (RW)

**

WORLDBEAT: DRM COMING TO INDIA

All India Radio has outlined its digitization plan. This during the 18th Annual Broadcast Engineering Society of India event.

According to All India Radio Director General, a pair of one megawatt transmitters at Rajkot and Kolkata are likely to be operational by the end of March and an additional 72 Digital Radio Mondiale transmitters would be commissioned between June of this year and March 2013.

The ongoing rollout by All India Radio has gained the interest of receiver manufacturers, who were present at the event with their latest products. Digital Radio Mondiale member companies Nautel, Digidia, Fraunhofer, Harris and Thomson Broadcast attended the conference this year. (Radio Magazine)

**

ON THE AIR: FLEMISH RADIO AMATEURS COMMEMORATE THE SINKING OF THE TITANIC 100 YEARS AGO

Three special call signs will be activated from April 1st to the 30th from Belgium by the Flemish Radio Amateurs organization. This to honor those who perished 100 years ago in the sinking of the steam ship Titanic.

OO100MGY by operated from the city of Antwerp. OR100MGY will take to the air from Knokke-Heist while OT100MGY will be on from Londerzeel.

During the weekend of April 14 through April 15, all three stations will be active during a marathon session from 12:00 Saturday until 16:00 Sunday UTC. Each of these stations has a special and unique QSL card available so that three different styles can be acquired. (FRA)

**

DX

In DX, word that the AX stroke VK0TH operation from Macquarie Island, the December 2011 and January 2012 9U3TMM DXpedition to Burundi and the 2011 6-Oh-Zero M operation from Somalia have all now been approved for DXCC credit. Also approved is the current T6BP operation from Afghanistan, If you had any of these operations rejected in a recent application send a note to bmoore (at) arrl ()dot) org to have your record updated. Moore notes that the AX stroke VK0TH operation is in addition to the VK0TH that has already been approved for DXCC recognition.

On the air look for the E51M DXpedition that is going to North Cook Islands. Its now announced that it will also be active as E51MCW from Rarotonga, South Cook Islands between April 11th and the 14th. Operations will be on all bands, including 60 meters using CW, SSB and the Digital modes. QSL via DJ8NK, direct or via the bureau.

AG1LE will be active stroke KP2 from the Radio Reef Contest Station KP2M on St. Croix between April 4 to the 11th. QSL as directed on the air.

Lastly, F8FGU will be active as CN2RN from High Atlas, Morocco between April 3rd and the 30th. His operations will be on the High Frequency bands using CW and SSB. QSL via his home callsign, either via the bureau or direct.

(Above from various DX news sources)

**

THAT FINAL ITEM: PHILADELPHIA JOURNALISTS HONOR A FAMOUS RADIO AMATEUR

And finally this week, a special honor has been bestowed on a broadcast journalist who is considered to be the driving force that put manned amateur radio operations into space. He was truly a broadcast pioneer and a part of the Amateur Radio Newsline family as well. Mark Abramovich, NT3V, is here with the details:

--

Many Newsline listeners recognize the name Roy Neal - the space voice of NBC News for many years and a big contributor to Newsline.

Well, what most may not know is the late Roy Neal, K6DUE, actually grew up here in Philadelphia and got his start in the broadcasting business right here.

A few months back, the Broadcast Pioneers of Philadelphia, inducted Roy Neal into their Broadcasters Hall of Fame.

Gerry Wilkinson, chairman of the board of the Broadcast Pioneers of Philadelphia, says Roy Neal got his start in the early days of radio and TV in Philadelphia.

"He was public affairs/news director at WIBG," Wilksinson says. "Then, he went over to WPTZ, Channel 3, which is now KYW-TV. It was owned by Philco and for four or five years he did television programs for them."

Wilkinson says Neal was bitten by the space bug early and there was no doubt that's what he wanted to talk about and cover the most.

And, Wilkinson says, he had the privilege over the years of keeping in touch with Neal - even after his retirement from the broadcast business.

"When you talked to him on the phone there was just story, after story, after story that he would tell you and he was just really a remarkable gentleman," Wilkinson recalls.

Wilkinson says Roy Neal never forgot his roots.

"He still loved Philadelphia," Wilkinson says. "The first three chapters of his book all deal with Philadelphia and he certainly never forgot Philadelphia."

Book you say?

Don't bother looking. Roy never finished that book. But sent several of his close friends, including Wilkinson, the first three chapters.

You can read it at the Broadcaster Pioneers website by going to the web address inserted in the text version of this story on our website arnewsline.org.

Finally, Wilkinson says while it took some time to getting Roy into the Philadelphia Hall of Fame, it was an honor well-deserved.

"He's one of us," Wilkinson says. "He's from Philadelphia. And, we really believed that what he did in Philadelphia and then later on in his career that he deserved to be honored."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

For us here at Amateur Radio Newsline its hard to believe that Roy has been gone some nine years. It seems like only yesterday when his signature sign off would end one of these newscasts. (Link to Roy Neal's book: http://www.broadcastpioneers.com/roynealbook.html) (NT3V)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

WIANEWS WEEK COMMENCING MARCH 11 2012.

VK's ROSS HULL CONTEST WON BY ZL

Proposals for 2013 WIA Annual Conference

ALARA and WARO news from ALARA President Tina VK5TMC

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAR 11 2012.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

One of the Show Piece contests put on by the WIA is the Ross Hull Contest.

The 2012 Ross Hull results have now been finalised.

In Section A, the top two scores were gained by Bob McQuarrie ZL3TY and
Stephen Hayman ZL1TPH - the first time the Ross Hull Contest has been won
by a station outside Australia.

Coming third as the top scoring VK station was Ted Thrift VK2ARA.

Next in line was Barrie Burns VK6ADI.

In the digital section, top score went to Dave VK2JDS with a log of 1296 MHz EME contacts, followed by one station from each of VK1, 4, 6, 7 and ZL.

Full details are available on the contest web page.

Proposals for 2013 WIA Annual Conference

At its February meeting, the Board of the WIA considered the venue for the 2013 Annual Conference weekend.

It had before it two submissions, one complete and another under development.

The Board has deferred its decision in this mater until the end of March and encourages any club (or group of clubs) considering applying to do so by close of business Friday March 30th.

Full details of what should be included in any application can be found by referring to the President's Comment in the July 2011 edition of "Amateur Radio" magazine which is reproduced at:

http://www.wia.org.au/joinwia/wia/presidentsmessage/

WIA Proposes Operating Principles

The Board of the Wireless Institute of Australia has adopted the following Operating Principles as a guide for all amateurs:

We, the Australian Radio Amateurs will at all times:

act and operate with integrity;

be honest in our dealings;

ensure that the operating equipment of our station is safe for ourselves and for visitors to our station;

show respect to and extend courtesy to fellow amateurs and other spectrum users;

be aware of and comply with our license conditions and the other laws and regulations that govern the installation and operation of our station;

encourage others to participate in amateur radio;

strive to improve our technical and operating skills;

assist our community in emergencies;

ensure that any spectrum interference issues resulting from the operation of our station are resolved promptly and with courtesy, and

promote the benefits of amateur radio to the community.

EMDRC

You don't need to pack a lunch or cut the hump of a camel to get to VK3's best hamfest, just pull your diary out now and mark down:

10am Sunday March 25th, for the Eastern and Mountain District's Annual White Elephant Sale at Great Ryrie Primary School, Great Ryrie Street Heathmont.

Full details and table bookings at EMDRC.COM.AU

The Rosebud RadioFest will be held on Sunday 25th November 2012 (exactly 1 month before Christmas), commencing 0930 am at the Recreation Stadium, Eastbourne Primary School, Allambi Ave Rosebud, Victoria.

This is said to be a wonderful venue, & well-suited to staging a RadioFest.

There is plenty of parking close to the site, easy access and the event is fully catered. As well as excellent technical forums, & all the regular favourites plus a number of new and innovative features for SPARC's first ever RadioFest.

There is a commitment from the Rosebud Fire Brigade to display their brand new appliances including Forward Communications Vehicle along with their specialised comms gear.

SPARC is totally committed to putting on a first class show!

SPARC will also offer a free table to each club that wants to promote it's own activities at the Novemer 25th RadioFest.

Contact is 0407 844 063

(Mark, Assistant Secretary, Southern Peninsula Amateur Radio Club (SPARC)).

VK4WIT at the John Moyle Field Day 2012

theTARCinc will be active during this years John Moyle Field Day alongside the mighty Burdekin River at Bivouac Junction near Macrossan Friday March 16 to Sunday March 18.

Its easy to get to Bivouac Junction, just take to the Flinders Highway between Townsville and Charters Towers and take the right hand turnoff just before heading across the Burdekin River. Head upstream for about 2km and you are there!

The site is only a couple of km away from the VK4FNQ Majestic Towers and 20km away from Charters Towers for any scheduled shopping trips.

REAST AGM

Sunday 11 March at 11am will be the REAST AGM for 2012. We look forward to as many members as possible coming along and even take the opportunity to pay your 2012 membership at the same time. This will be followed by a BBQ which is a BYO event.

All the details of the AGM can be found on the REAST website.

(Tony VK7VKT, Secretary REAST)

INTERNATIONAL NEWS With thanks to IARU, RSGB, Southgate AR Club, the ARRL, NZART, ARVictoria and from ARNEWSLINE in the USA

IRTS NEWS DESK

CQIR, St. Patrick's Day

The CQIR contest is fast approaching and we are pleased to report that radio news services and contest reflectors worldwide have been giving the event great publicity. Both QST and RadCom have carried feature pieces and we expect a really excellent turnout right around the globe.

The Society is appealing to all EI and GI stations to make a special effort to come on the bands, at least for a few hours over the 24 hours of the contest and hand out much needed points and multipliers. Many of the overseas Irish who will be participating will not be contesters but will be taking part to celebrate St Patrick's Day, so even if you are not a contester yourself, you will find many

operators looking to have a bit of a ragchew as well.

Paul EI5DI advises that his contest logger SD is now free and unrestricted in CQIR. Entrants should be aware that the Russian DX contest overlaps with CQIR, and Russian stations will send a 2-character district code instead of a serial. SD may be downloaded from ei5di.com, and users should experiment with test logs before the contest.

Full rules for the contest are available on the IRTS website. This contest is the international showpiece event for the Society's 80th celebrations and while we know most of our serious contesters will be making a big effort on the bands we would again ask all stations to join in the festivities over the St. Patrick's weekend.

ARNEWSLINE.ORG

MV ISLAND DELETED FROM THE DXCC ENTITY LIST

As of February 17th, Malyj Vysotskij Island, better known as MV Island in ham radio circles has been deleted from the D-X-C-C. This after an announcement by the Finnish Ministry of Transportation and Communication that the Saimaa Canal Treaty between Finland and Russia has been finalized and that MV Island is no longer included in it.

For amateur radio this means that M V Island was deleted from the DXCC and added to the Deleted Entities List. Also that the entry level for DXCC Honor Roll number has dropped to 331.

LIGHTSQUARED ANNOUNCES LAYOFFS FOLLOWING FCC DECISION AGAINST ITS NETWORK

LightSquared Inc. the wireless company whose controversial plan to operate in spectrum adjacent to that used by the space-based G-P-S navigation system says that it plans to lay off nearly half of its employees to save money. In a press release, the company said it will cut 45 percent of its 330 employee workforce and called the move a necessary cost savings measure to ensure the long-term success of the company.

As previously reported, the Federal Communications Commission dealt the company a severe blow when it said it would revoke permission for LightSquared to move ahead with its wireless network. This, after tests found that it would interfere with Global Positioning Systems used by the military, the airlines and the general public.

NASA SHUTS DOWN LAST MAINFRAME

There was a time when IBM's mainframe computers
were the cutting-edge machines for scientific and
engineering calculations. Now, for NASA that's
all come to an end. Cheryl Lasek, K9BIK, has the details:

The day of the giant mainframe computer began in
the 1960s, when IBM's System 360 rewrote the
rules of computing and before humans walked on
the moon. When NASA acquired two of the then
super-speed System 360 Model 95 mainframes in
1968, IBM touted the machines' mathematical abilities.

But February marked the end of the era in NASA
computing. This as the space agency powered down
its last IBM Z9 mainframe that was located at Marshall Space Flight Center.

In the old days, mainframes were the size of
several large rooms. Today these units are only
the size of a refrigerator. And even though NASA
has shut down its last one, there is still a
requirement for mainframe capability in many other organizations.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

By comparison with days gone bye, today's fastest
mainframe supercomputers can perform 10.5 quadrillion calculations per second.

RSGB

Senegal gets six metres

Following an application to the Regulatory Agency, Senegal has gained
access to the 6m band.

50 to 51MHz has been officially allocated to that nation's amateur
service on a Primary basis. This allocation becomes effective when the
new ITU Radio Regulations come into force. Any contacts made on 6m
before that date have to be considered as unauthorised.

International Museums Weekend

The International Museums Weekend special event will take place on the
weekends of 16th & 17th June and 23th & 24th June.

Radio amateurs are encouraged to participate in this event by setting
up stations in their local museums. Organiser Harry, M1BYT asks that
all those intending to take part in the event should register at
www.ukradioamateur.co.uk/imw.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

(EPISODE 20111016 USED MARCH 11)

It's good to get inspiration and it arrives in the strangest ways at the most unexpected time. I've been pretty busy in my non-amateur radio activities over the past months. Not that you'd notice, a bit like a duck floating on a lake, the picture of serenity itself, furiously paddling under water.

I have a regular activity, the VK6 F-troop which I host on behalf of Foundation Licensees across VK6 every Saturday at 8am local time. It forces me to turn my radio on and gives me an opportunity to talk to other amateurs on at the very least a weekly basis.

One of the amateurs, Ronald VK6FRSK continues to throw new ideas and experiments into the air and every now and then one of them speaks to me at an unexpected level. Ronald reported listening and attempting to talk to overflying satellites and the International Space Station with a rubber-ducky antenna which gave me an unexpected thrill. I tuned to an ISS frequency and almost without effort managed to hear it overhead.

I didn't have more time
spare to do anything else, but just the thrill of hearing that gave me inspiration and it was just a little thing!

So, if you've done something, heard something, learnt something, tell another amateur about it, not to brag, though that's always fun, just to inspire the next experiment when it seems hard to see the wood for the trees.

So, whom have you inspired lately?

I'm Onno - VK6FLAB

ZL NZART Memorial Contest July First full weekend
VK Remembrance Day Contest August 11-12
WW International Lighthouse Lightship Wknd August 18-19

This is Trent VK4TS the WIA Director for Contests -

2012 sees a new RD contest manager after the retirement of Peter VK4OD -

The new manager of the Rememberance Day was recommended by Peter as someone who understood the value and history of the contest and that person is Alan VK4SN

Alan is a consistent competitor in most contents and brings with him a new way of looking at the RD Contest

With every change comes housekeeping and Alan has moved forward at a rapid pace with changes to the operating conditions in the RD - These have been put forward to the Contesting Committee and are now on display on the WIA website for final comment prior to publication in AR.

Some of the big changes Alan has proposed is the introduction of a Single Transmitter Multi operator class and the introduction of a combined teams section.

Please go over the new rules and send your feedback to Alan at his WIA Address

Yes overall the rules have been simplified and will make it much easier for the casual contester.

In the past the smaller clubs could not compete against the logistics of the larger clubs - Now they can compete against themselves - many affiliated clubs are under 20 members.

All Phone modes have been combined as has MF, HF and VHF. The idea behind this is to force band changes.

(sourced to a mailer from Alan Shannon VK4SN WIA RD Contest Manager)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

DX news from India. By Dot VK2DB

A group of Indian hams, lead by a YL, Sarla VU2-SWS will be operating from Bet Dwarka IOTA AS 175 from the 15th to the 23rd of March 2012.

This island has not been activated before.

Hopefully three stations will be set up by the 17th and a team of 6 operators will operate till the 23rd March on CW, SSB, RTTY.

The special call sign for this event is *AT2-DW. *

There will be an online log check facility and all logs will be uploaded onto the Logbook of the World.

Hopefully many YLs will work this call on all modes.

A free QSL card to all YL station contacts will be sent if they give the QSO details via email.

VU2-SWS will be the qsl manager.

More information about the website will be available soon.

This news is also on the ALARA website as Sarla is a member of ALARA.

The Society of Newfoundland Radio Amateurs (SONRA) will make history on April 25, 2012

April 25th each year marks the birthday of Guglielmo Marconi, who received the first wireless signal at Signal Hill, Newfoundland. This April 25th, SONRA will celebrate the event with making an Amateur Radio contact with Princess Elettra (Marconi) who will be in Bologna Italy to celebrate her father's birthday. It is planned to have the Canadian Heritage Minister, the NL Premier, the City of St. John's Mayor along with the NL Lieutenant Governor, exchange greetings with the Princess via Amateur Radio from VO1AA at Cabot Tower.

This is the first time that this event has been attempted, and it is anticipated that it will be a high level media exposure for Amateur Radio in Canada.

SONRA appreciates the wonderful relationship that it enjoys with Parks Canada, Signal Hill National Historic Site, and looks forward to many years of commemorating this important event.

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

The Sydney Morning Herald

Researchers say radio waves shaped like fusilli pasta could help unclog airwaves.

Radio waves that move like pasta spirals could help unclog the wireless world by boosting the power of radio communications, say Italian and Swedish researchers.

The new way to make radio signals more potent without boosting bandwidth is described in the Institute of Physics and German Physical Society's New Journal of Physics edition of March 2.

"In a three-dimensional perspective, this phase twist looks like a fusillli-pasta-shaped beam," lead study author Fabrizio Tamburini was quoted as telling the science website PhysOrg.

Tamburini told Nature magazine that his technique can boost radio power by up to nine times its current strength, and that the technology may be ready for market in the next two to five years.

WW SPECIAL INTEREST GROUPS --- DIGITAL

Hello, I'm John VK4BJT, from the Gold Coast Amateur Radio Society, and I'm here to announce our big DStar Demo and information "get-together" to be held on Saturday 24th March 2012 at 10am at the club rooms.

There will be an introduction to Dstar, and later, a hands-on session, where different equipment used to connect to the Dstar network, will be made available.

If you have any interest or just want to know more about digital radio, then come along, and enjoy the day with fellow radio amateurs. A BBQ will be available at approximately 12:30.

Anyone interested from SE Queensland and Northern NSW, and visitors to the Gold Coast, are most welcome.

As additional information, I can announce that two UHF DStar repeaters connected to the ircDDB network, are now operating on the Gold Coast. They are VK4RDK and VK4RDW. Any queries about this "get-together" please call VK4BJT on 07 55 30 55 57

YL International Meet 2012 Adelaide latest news

We now have 48 YLs with 28 others joining us for the YL International 2012 from the 3rd of May to the 9th of May this year in Adelaide, South Australia.

We have 20 DX YLs from Great Britain, Denmark, Sweden, Norway, Germany, Switzerland, Japan, Korea, USA, and New Zealand in the group.

The Meet in Adelaide will see us touring around the area for 6 days. Some highlights are tours to Hahndorf, Clealand National Park, Port Adelaide and a three winery progressive lunch in the Barossa Valley. Then 26 of us go on the optional tour. We will be flying to Alice Springs, with a tour around Central Australia including Uluru and Kings Canyon then travelling on the Ghan from Alice Springs to Darwin.

Most events are into the final stage of planning. Late registrations are still available but the 15th of April is the absolute deadline for all registrations and payments. You can find all the latest information at www.ylinternational2012.com or just do a search on YL International and the search engines find the webpage where you will find costs and my contact details or you can email me at vk5tmc@internode.on.net

This has been Tina VK5TMC organiser of the YL International Meet 2012 in Adelaide, South Australia.

WARO turned 50

Saturday the 10th March, WARO celebrated their 50th anniversary.

On the 10th of March 1962 a group of YLs gathered together in Rotorua New Zealand at the Millenium Hotel and formed the Women's Amateur Radio Organization or WARO.

Yesterday on the 10th of March 2012, exactly 50 years to the day later, a large group of YLs gathered together at the same hotel to celebrate the anniversary of this wonderful organization. The group included representatives from ALARA including the President Tina VK5TMC, the senior Vice President - Jean VK3VIP, the Treasurer - Catherine VK4GH and honorary Life member Christine VK5CTY as well as Jenny VK5FJAY and most of their OMs.

A great day was had by all and we are off to the museum today to continue the friendship.

All members of ALARA and the WIA wish WARO another 50 years of radio contacts.

This has been Tina VK5TMC president of ALARA

ARISS CELEBRATES 700th ISS TO SCHOOLROOM CONTACTS

A milestone for manned ham radio operations from Earth orbit. ARISS Operation Team Mentor Charlie Sufana, AJ9N reports that the total number of Amateur Radio on the International Space Station or ARISS sponsored ISS-to-Earth school events has passed the 700 mark.

The 700th school contact was with the Academy at Shawnee City in Louisville, Kentucky. It took place via telebridge with ON4ISS on February 14. The special John Glenn event to commemorate the 50th anniversary of Perth Australia's, City of Lights on February 20th marked event number 701.

For those hams not aware. ARISS offers an opportunity for students in schoolrooms to experience the excitement of amateur radio by

talking directly with crewmembers on-board the
International Space Station. Further information
on the ARISS program is available at www.ariss.org

IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Phil Longworth VK1PL reports,

With just on 3 weeks until the Canberra 2 Day Walk, we need to get a roster built for this years event. the walk weekend is Saturday 31st March / Sunday 1st April 2012. Check the website http://www.aussiewalk.com.au/ for info about the walk itself.

As I have stood down as the State Coordinator & Matt VK1MA is busy with another competing activity, we need somebody to stick their hand up and become the "Exercise Coordinator".

The Exercise coordinator is the person that puts together the roster, and makes sure everyone knows where they need to be and so on, it is different to the "WICEN Commander" who is in charge of the Net Control Station and the efficient running on the day (we'd love somebody to volunteer for that too !)

I am okay to assist and "Mentor" in these roles, so anyone who does stick their hand up will not be left in the lurch with no support !

Okay, as far as I am aware, the 2 Day Walk will need 9 field stations on the Saturday & 6 on the Sunday, with a couple of people to do HQ / NCS each day. This is a little uncertain as we haven't seen a route map and checkpoint list as yet but I have been told it will be similar in most respects as the 2009 event.

So, who is able to assist with this years event ?

Please send an email to wicen@crarc.ampr.org and say YES or NO, and if YES, then include your preferences / availability.

Thanks in advance,

Cheers,

Phil Longworth VK1PL,

WICEN Tas (Sth)

Of late there have been 13 people involved in providing radio communication operators for the Tasmania Fire Service. This included relaying and logging radio messages from the Meadowbank fire ground to the Incident Management Team based at the TFS Cambridge Training facility.

The fire started on the 25th Feb and there has been 24hr operations since then. Over 5000 hectares has been burnt out. See the TFS website site for more information.

http://www.fire.tas.gov.au/Show?pageId=colCurrentBushfires

All shifts have included at least one trained operator.

If there is sufficient demand, another PUAOPE002A - OPERATE COMUNICATIONS SYSTEMS AND EQUIPMENT course will be run following the end of the fire season.

The unit is one of those included in the WIA's Certificate 2 in Public Safety (SES Operations) PUA20500, a prerequisite to appointment as a WIA Emergency Communications Officer.

Amateur radio operators are still needed in Clark County, IN. Contact info is below if you can assist. Thanks!!

Just wanted to put the word out we are still continuing operations in Clark County. We are up to manning 10 posts throughout the county. We could use operators to man posts even if it is for a few hours, many of our team have put in many hours and relief is greatly appreciated. This is also great on the job training for ARES / RACES groups in the surrounding counties. Please contact me via phone 502-777-7304 or if you can reach the 146.94 (67hz tone) repeater, check in with Clark EMA W9JBQ.

Thanks to everyone that has helped us out so far, we couldn't have done it without you!

Disaster volunteers, please curb your enthusiasm! Says this Article

Posted: 05 Mar 2012 09:45 PM PST
http://forums.qrz.com/showthread.php?336758-Disaster-volunteers-please-curb-your-enthusiasm!-Says-this-Article&goto=newpost

In the wake of every U.S. disaster there is an influx of people who want to help, and the situation in the Midwest and Southeast after last week's deadly tornadoes is no exception. But to many of the early arrivals who parachute in to help, disaster relief experts have a message: yes please, but not so fast.

For the first few days after Friday's twisters devastated large swathes of the Midwest and southeastern U.S., the Indiana Department of Homeland Security was strongly discouraging ad hoc volunteers as well as gawkers who flocked to the scene.

"We had people driving through looking immediately after it happened and it was a significant problem," said Denise Derrer, public information officer for the Indiana Department of Homeland Security. The dangers of downed power lines, debris and gas leaks meant that they needed to rely on trained emergency workers, and not worry about other people dropping in to help.

"If you have never run a chainsaw before, maybe now is not the time to learn," she said. "We are trying to get the word out."

"What people tend to do is they will go to where the actual tornado touchdown has been," said Joe Tolan, president of the United Way in Louisville, Kentucky which also covers the southern part of Indiana. "That is rarely the best thing to do in the first few days. It adds to the confusion and clutter."

That□s where the volunteer receiving centers like one that opened Monday morning in Jeffersonville, Indiana come in. The center, set up by the United Way and its partners is located in a vacant car dealership, hastily cleaned and adapted into a makeshift workspace over the weekend as a place to organize, train and deploy volunteer teams to do jobs after the disaster command center has determined what's needed.

Jeffersonville is about 15 miles down the freeway from devastated towns of Henryville and New Liberty, far enough to be out of the way of emergency teams still trying to restore services.

When the center's doors opened on Monday morning, more than 100 people were there, waiting to roll up their sleeves.

"We figured there was going to be a little organized bedlam this morning and we were right,□ said Tolan.

Tornado Outbreak March 2, 2012 Southern Indiana

Posted: 05 Mar 2012 06:42 PM PST
http://forums.qrz.com/showthread.php?336741-Tornado-Outbreak-March-2-2012-Southern-Indiana&goto=newpost

419705_2460177804397_1850751887_1492531_1534211658_n.jpg

On Friday March 2nd a strong cold front approached the Southern Indiana area. This system unleashed several powerful tornadoes.

Clark County Indiana RACES activated a weather net during the storm event and was relaying weather reports to the National Weather Service in Louisville. Once the storm passed we started getting reports of massive damage in the Northern parts of Clark County Indiana in the the vicinity of Henryville and Marysville. Clark County Emergency Coordinator John Shean N9TV made contact with our Les Kavanaugh Director of Clark County Emergency Management. Around 4pm it was determined that the Clark County RACES team was needed to provide communications.

Core members of our RACES group raced to the scene to setup our command post and started dispatching amateurs to posts through the affected area and setup tactical frequencies and call signs. During this time the county 800 mhz system was overloaded and all cell phone networks were down in the area. Operations continued through the night directing search and rescue efforts and health and welfare operations.

The National Weather service survey teams have determined the affected areas were hit with EF-4 and EF-1 tornadoes.

http://www.crh.noaa.gov/lmk/?n=march...ornadooutbreak

The situation is starting to stabilize but as of this evening we are continuing to provide communications linking volunteers and supplies to the appropriate places. The group anticipates maintaining operations during the

period of 0800 - 1800 through the remainder of the week. We have been taking notes and documenting things that have gone right and areas we could address with training or equipment.

Jeffrey Brady

AMSAT NEWS SERVICE

ANS-064

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* AMSAT Plans at Dayton 2012

* W4PUJ, Dick Daniels Memorial Video Posted

* COMPASS-1 Satellite End of Mission

* VO-52 Not Heard

* Satellite Special Events Announced

* Coverage of Next Cubesats on AMSAT-UK Web

* April 18 World Amateur Radio Day 2012 - 50 Years in Space

* ARISS Status Report February 27, 2012

AMSAT Theme at Dayton 2012: Running with Fox

The 2012 Dayton Hamvention will be held this year on 18 - 20 May 2012. As has been the case for the many years Hamvention will be at the Hara Arena Complex on the north side of Dayton. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area.

The AMSAT theme for 2012 is "Running with Fox". We will have multiple exhibits of the new AMSAT satellite on display.

Visit AMSAT's Dayton Hamvention page for all details on activities:

http://www.amsat.org/amsat-new/hamve...012/Dayton.php

Some of the activities will include:

+ Life size Fox models will be on display as well as diagrams of the modules inside the 10cm square satellite.

+ Operational prototype of ARISSat-1 on display.

+ AMSAT Thursday Night Get-together at the Tickets Pub & Eatery.

+ The sixth annual AMSAT/TAPR Banquet will be Friday night May 18 at the Kohler Banquet Center. The price for the Banquet is $30. Seating is limited and reservations are required. Follow the links on AMSAT's Dayton page.

+ The AMSAT Forum will be on Saturday May 19.

AMSAT has a limited block of rooms reserved at the Country Inn & Suites in Fairborn, OH. Please contact Martha at the AMSAT office for room price and availability during Hamvention. Priority for rooms will be given to those

volunteering to work in the AMSAT booth for multiple 2 hour shifts during Hamvention. The hotel web page is:

http://www.amsat.org/amsat-new/hamve...2012/Hotel.php

The phone number for the AMSAT office is 301-589-6062. Other hotels in the immediate area of the Country inn & Suites include the Fairfield Inn, Ramada Inn, Hampton Inn, Fairborn Holiday Inn, Red Roof Inn and the Homewood Suites if additional accommodations are needed.

Further information on Hamvention 2012, including advance ticket sales and motel accommodations, can be found at http://www.hamvention.org.

Dick Daniels, W4PUJ Memorial Service Video Posted

Bob McGwier, N4HY has posted a video of the February 25 memorial service attended by family, friends, and colleagues for AMSAT's Dick Daniels, W4PUJ who passed away on February 14, 2012:

http://youtu.be/pGhn1eC52Wo

AMSAT President Barry Baines, WD4ASW read excerpts from the obituary written by Jan King, W3GEY/VK4GEY and included personal comments of his experience knowing Dick and working with him. The text of Dick's obituary is posted on the AMSAT web at: http://tinyurl.com/W4PUJ-Obituary.

Barry observed in his comments at the memorial service that NASA announced AMSAT Fox-1 satellite's acceptance into their ELaNa launch program on February 14, the day Dick passed away. Dick's legacy for amateur radio in space will continue.

Bob recalled, "Dick was always supportive and helpful to me and like all who knew him, understand the size of our loss. Dick was the epitome of solidarity, always honoring his obligations, with a big sense of responsibility with no obvious sense of entitlement to anyone's thanks. Dick was always seemingly asking himself 'what have I done for you

lately?' We've lost the irreplaceable."

Eric Rosenberg, W3DQ wrote of his memories of Dick, "He was a great guy, wonderful to work with, both professionally and within AMSAT. He was treasure trove of information and defined corporate knowledge and memory. His collection of Oscar 10 telemetry on those hard sectored disks was legendary around here, but not as much as his pool table, upon which many of the early satellites were put together."

Bob, N4HY took a collection of photographs with his phone camera which has added to his online album:

http://n4hy.smugmug.com/AMSAT/Dick-D...W4PUJ-Memorial

[ANS thanks Bob McGwier, N4HY, Eric Rosenberg, W3DQ, Jan King W3GEY/VK4GEY, and AMSAT President Barry Baines, WD4ASW for the above information]

COMPASS-1 Satellite End of Mission

The COMPASS-1 CubeSat was designed and built by students from the Aachen University of Applied Sciences in Aachen, Germany. It has been in orbit since its launch from India on April 28, 2008.

This week Mike Rupprecht, DK3WN reported on his DK3WN SatBlog that on Saturday, February 25 a single beacon was received. COMPASS-1 underwent a complete restart and the thresholds for heater and battery voltages were set to new levels. Battery temperatures tracked with the received telemetry data have shown some very cold spikes. This may be affecting operation of the satellite.

On March 3, Mike received the following message from Professor Dr. Bernd Dachwald, Faculty of Aerospace Engineering FH Aachen at the University of Applied Sciences:

Dear supporters and friends of our COMPASS-1 mission,

First, let me thank you very much for your support in trying to

save the life of our COMPASS-1 satellite during the last days,

but also during the last years of "routine" operations.

It seems that our mission now comes to an end. The projected life-

time of COMPASS-1 was half a year. The tiny guy has outperformed

this value by a factor of more than seven. April 28th would have

been its 4th birthday and if it was a human, it would now be

about 500 years old (Cubesat-years are short).

So, if you have more important things to do (and I guess so), we

cannot expect you to continue your efforts in saving its live.

With your support, you have made things possible that we would

never have been able to achieve with our own resources and I

appreciate your support very much.

So, COMPASS-1, rest in peace. (Nevertheless, if you still want

to try to awake it from the dead, feel free to do so.)

I hope that we will soon be able to build and launch COMPASS-2

and that you will be still available, all over the world, as a

ground station to command and fly our new bird. We will keep

you informed.

Cheers and thanks for all,

Bernd

Operators may periodically listen for the COMPASS-1 CW beacon on 437.275 MHz CW beacon every 3 minutes. Any reports are very appreciated.

The DK3WN SatBlog tracked monitoring and attempts at recovery over the past week:

+ On Sunday, February 26 no signals were heard from COMPASS-1

+ On Monday, February 27 no signals were heard; Several attempts to reset the satellite were unsuccessful.

+ On Tuesday, February 28 first report received after nothing heard for two days. Decoded telemetry showed the satellite had reset. Control stations reset voltage and heater thresholds to conserve power:

Power Level Critical Battery Capacity

Heater Active Battery Heater ON

Power Safe Counter 0 http://www.dk3wn.info/p/?p=26334)

Please continue to monitor 437.275 MHz for the COMPASS-1 CW beacon. Current status can be read on-line on the DK3WN SatBlog at: http://www.dk3wn.info

Mike has written telemetry decoders for several satellites, including COMPASS-1. These may be found at: http://www.dk3wn.info/software.shtml

[ANS thanks Mike Rupprecht, DK3WN for the above information]

VO-52 Not Heard

Reports have been posted that India's VO-52 HAMSAT satellite, launched on May 5, 2005 from India, has not been heard during expected passes since February 28.

Summaries from stations monitoring for VO-52 cam be viewed at: http://oscar.dcarr.org/

AMSAT INDIA Secretary Nitin, VU3TYG, posted on February 29 their last known status, "We are aware of the current situation. Myself and Mani, VU2WMY tried listening to the beacon and work thru the satellite during the 04:05 UTC pass over India but nothing was heard."

Nitin will post further updates when more news is available from ISRO. Amateur satellite operators are encouraged to post VO-52 status on http://oscar.dcarr.org/ Status Page.

[ANS thanks AMSAT INDIA Secretary Nitin, VU3TYG for the above information]

Satellite Special Events Announced

TP8 - France March 9-11

The Council of Europe Radio Amateur Club (CERAC - TP2CE) will be active as TP8CE between March 9-11 to celebrate the 40th anniversary of the European Youth Center. Operations planned on all HF bands and modes, and possibly the satellites. QSL via F5LGF. An online log search will be available at:

http://ewwa.free.fr

6H - Mexico April 13-18

Members of the Grupo DXXE will activate the special event callsign 6H6IARU between April 13-18 to celebrate the 87th anniversary of the founding of the International Amateur Radio Union (IARU), and to celebrate "World Amateur Radio Day" on April 18th.

This year's theme for the "World Amateur Radio Day" is Amateur Radio Satellites: "Celebrating 50 Years in Space" in remembrance the launch of OSCAR 1 on December 12, 1961, and the launch of OSCAR 2 on June 2, 1962.

Operations will be on all bands between 160-6 meters, as well as the amateur radio satellites from different Grid Locators throughout Mexico. QSOs with this station are valid for the IARU Region 2 award, the various FMRE awards and the DXXE award . QSL via N7RO or LoTW.

[ANS thanks Ohio/Penn DX Bulletin No. 1051 for the above information]

Coverage of Next Cubesats on AMSAT-UK Web

AMSAT-UK has compiled a series of very informative web page reports about upcoming Cubesat launches. Read up on the next flock of birds slated for launch. Follow the links to photos, satellite videos, and additional technical data on the AMSAT-UK web.

Antares Launch Slip Delays Dove-1 Satellite

http://www.uk.amsat.org/5061

The 3U amateur radio satellite Dove-1 (145.825 MHz AX.25 FM) was originally planned to launch on the Antares launcher on February 28 but reports indicate it may be Fall before it is launched.

Space.com reports that on February 21 Orbital Sciences Corporation announced a further slip and the launch of Antares could now be delayed until as late as September. Read the space.com report at: http://tinyurl.com/Antares-Delay (space.com)

The new Dove-1 (DO-17 was the original Dove satellite) will transmit on 145.825 MHz 1200 bps AFSK AX.25 FM downlink with telemetry data, including temp/power supply/current/RSSI/solar vector/acceleration, approximately every 30 seconds. The beacon can transmit at up to 1 watt and will use a quarter wave monopole antenna cut from a tape measure.

It also has a 2.4 GHz half-duplex, spread spectrum radio with patch antenna that will be used for main payload downlink and telecommand uplink. The data rate will be 115 kbps.

The planned orbit is 280 by 270 km at 51.6 deg inclination which will give Dove-1 a lifetime of about 2 weeks before re-entry.

Vietnam Student CubeSat F-1

http://www.uk.amsat.org/5025

Vietnamese students have produced a video about their amateur radio CubeSat F-1, callsign XV1VN. The F-1 is an educational CubeSat to be launched in the summer of 2012. It will carry a low resolution C328 camera with 640×480 resolution and two Yaesu VX-3R transceivers using 145.980 and 437.485 MHz.

+ VX-3R1

-Frequency: 437.485MHz, FM Narrow

-Power supply: directly from solar cells, only operates in sunlight

-Output power: max 0.3W, half-wave dipole antenna -Modulation scheme: Morse code beacon (10 chars) using PWM CW -Beacon interval: every 30 seconds (configurable)

+ VX-3R2

-Frequency: 145.980MHz , FM Narrow

-Power supply: rechargeable battery, operates in the dark by default but can be commanded to operate in sunlight as well -Output power: max 1.0W, half-wave dipole antenna -Modulation scheme: AFSK 1200bps, half duplex -Telemetry interval: one AX.25 packet every 30 seconds

TechEdSat to use 'SatPhone'

http://www.uk.amsat.org/5018

TechEdSat will be deployed from the International Space Station (ISS). It is a 1U CubeSat that will demonstrate Plug and Play power architecture and two way communication via the satellite phone/data networks Iridium and Orbcomm.

There will be a 437MHz beacon transmitting 1 watt to 1/4 wave monopole. Commanding is via the commercial networks and there is a 2 week watchdog timer to stop the beacon in the event of no commands being received.

TechEdSat will be launched along with Raiko, FITSat-1, We-Wish and F-1 to the ISS aboard HTV-3, currently planned to launch July 18, 2012. From there, it will be deployed into Low Earth Orbit using the JAXA J-SSOD deployer, from the Japanese Experiment Module (JEM also known as Kibo).

Wiki - TechEdSat http://en.wikipedia.org/wiki/TechEdSat

Kibo Robot Arm http://kibo.jaxa.jp/en/about/kibo/rms/

FITSAT-1 CubeSat to use 5.8 GHz and Optical Comms

http://www.uk.amsat.org/2037

The Amateur Radio CubeSat FITSAT-1 plans to transmit 115.2 kbps digital data in the Amateur Satellite Service 5.8 GHz band and will also carry an Optical Communications experiment.

FITSAT-1 (aka NIWAKA) is a 1U CubeSat (10*10*10cm) that should be be deployed from the International Space Station by robot arm in late 2012. It will generate about 2W RF output using a 16W DC input.

The main mission will be to demonstrate high speed data transfer from a satellite, it can transmit a VGA-size (640×480 pixel) JPEG photograph in only 5 to 6 seconds.

The second mission is to determine if a satellite can be made to appear as an "artificial star" using high-output LEDs in flash mode. The light from this flash will be received by the ground station, which has a telescope with photomultiplier linked to a 5.8GHz parabola antenna. This is a basic experiment to investigate the possibility of optical communication with satellites.

A UHF AX25 1k2baud transceiver will be carried for telemetry and telecommand purposes and a UHF CW beacon will also be provided. It will be deployed along with the satellites RAIKO and WEWISH into a 350x350km 51.6deg inclination orbit.

The following downlink frequencies have been coordinated by the IARU Satellite Frequency Coordination Panel: CW 437.250 MHz, FM 437.445 MHz, High speed data 5840.00 MHz.

Euroluna OZ9LUNA CubeSat Launch Update

http://www.uk.amsat.org/5153

Euroluna are a Danish amateur team participating in the $30 million Google Lunar X PRIZE contest to be the first privately funded team to land and drive a rover on the Moon. The President of Euroluna, Palle Haastrup OZ1HIA gives an update on the Romit1 CubeSat and plans for Romit2 and Romit3.

Romit1 is a 2U CubeSat that is planned to launch on the Interorbital Systems Neptune 9 rocket. After deployment Romit-1 will stabilize itself prior starting its engine to power itself into a higher orbit. If everything goes well it should, after a year, be out in a 700 km orbit, having started in a 310 km orbit.

It is hoped that radio amateurs across the world will assist the team in retrieving the data sent down, for example, they can gather images from the six cameras. The downlink frequency is 437.505 MHz at 1200bps.

The group are currently looking for a launch opportunity for Romit2 as well as Romit3 that is planned to reach the Moon.

[ANS thanks AMSAT-UK for the above information]

April 18 World Amateur Radio Day 2012 - 50 Years in Space

Every year on April 18 the IARU celebrates World Amateur Radio Day to note its anniversary starting in 1925.

This year's theme for the World Amateur Radio Day 2012 is Amateur Radio Satellites: "Celebrating 50 Years in Space" in remembrance the launch of OSCAR 1 on December 12, 1961, and the launch of OSCAR 2 on June 2, 1962.

The AMSAT News Service would like to publicize the events your group is planning for April 18, 2012. Just send the information to JoAnne, K9JKM (k9jkm@amsat.org) and we'll get the news out.

[ANS thanks the IARU for the above information]

Amateur Radio on the International Space Station (ARISS) Status Report

February 27, 2012

1. Upcoming School Contacts

An Amateur Radio on the International Space Station (ARISS) contact was successful for Parkside Elementary School in Atlanta, Georgia on Friday, March 2 at 16:42 UTC via station K6DUE in Greenbelt, Maryland. The ARISS contact is part of a comprehensive education plan which will pique students' interest in Science, Technology, Engineering and Math (STEM). An article about this contact appears on the NASA Talk Web site where ideas are shared about the contact and lesson plans. Contact audio may be available on NASA-TV.

http://nasatalk.com/component/resour...ct-to-iss.html

The 5th Geniko Lykeio Katerinis in Katerini, Greece has been completed for their Amateur Radio on the International Space Station (ARISS) contact on Friday, March 2 at 17:03 UTC. This activity has been integrated into the school curriculum covering astronomy and ham radio issues. Special attention has been given to the ISS regarding its role

in humanity and science, its orbit, and the everyday life of the astronaut. ISS courses were based on ESA's education tool, "ISS Education Kit."

2. ARISS Contact Featured at John Glenn Event

On Monday, February 20, an ARISS contact was held during the John Glenn Event at the State Records Office of Western Australia in Perth, via telebridge station AH6NM in Hawaii. The contact was held in celebration of the 50th anniversary of John Glenn's orbit of the Earth, when the population of Perth turned on its lights and Glenn observed the city was visible from space, leading to Perth's nickname, "City of Lights." The event opened with a pre-recorded video address given by Senator Glenn. Speeches from Australia's leading scientists were also given, followed by the ARISS contact with Dan Burbank, KC5ZSX on the ISS. The event was streamed live on the internet and was covered by television stations and ABC (Australian Broadcasting Corporation) Radio.

3. Italian Students Experience ARISS Contact

An Amateur Radio on the International Space Station (ARISS) contact was held between 1° Circolo Didattico Nicola Fornelli located in Bitonto, Italy and on-orbit astronaut Don Pettit, KD5MDT on Friday, February 24. The students had all their questions addressed concerning what it takes to become an astronaut and what it is like to live on the ISS. The contact highlighted their studies covering life in space, communications, space conquests and research, artificial satellites and the ISS. Approximately

300 people turned out for the event, including Italian Air Force officers and media representatives.

4. ARISS International Team Teleconference Held

The monthly ARISS International Team teleconference was held on Tuesday, February 21. Topics of discussion included a World Radiocommunication Conference 2012 (WRC-12) abstract concerning Nano and Pico satellites, the status of Ham TV and an update on the replacement VHF Ericsson. Minutes have been posted: http://ariss.rac.ca/arisstel2012-02-21.htm

5. Astronaut Training Status

Astronaut Alexander Gerst, who passed his amateur radio license exam on February 13, has been given the callsign KF5ONO. He is scheduled to fly with Expedition 40 in May 2014.

An introductory session is planned for Gregory Wiseman, KF5LKT (Expedition 40, May 2014) on Monday, February 27 and a preflight session is scheduled for Expedition 32 astronauts Sunita Williams, KD5PLB and Akihiko Hoshide, KE5DNI on Monday, March 5. Williams and Hoshide will fly later this year.

[ANS thanks Carol, KB3LKI, for the above information]

Old Mulkey Meetinghouse Special Event in September

Posted: 08 Mar 2012 10:18 AM PST
http://forums.qrz.com/showthread.php?337156-Old-Mulkey-Meetinghouse-Special-Event-in-September&goto=newpost

The Monroe County Amateur Radio Group (of Kentucky) will be having "our"
4th annual Old Mulkey Meetinghouse Special Event in September on the dates
of the 14th, 15th and 16th. We will be on or close to the frequencies:
3.880 USB, 7.235 LSB, 14.275 USB and if 10 meters is running 28.425 USB. A
QSL card and Certificate will be offered. We will be commemorating the
burial site of Hannah Boone Pennington who was the sister to the famous
pioneer Daniel Boone. Friday the 14th we will be having kids day which it
gives the local school children a chance to learn about the science and
math of amateur radio. And also we let them make contacts on the radio's
after thier lecture. Last year we had over 118 kids show up and this year
we are schedualed to have over 150! If you type in the call sign KD4QHG
here on qrz.com you will see pictures of some of the kids that came last
year. The girls were more intrested in the radios then the boys were! A
S.A.S.E number 10 envelope "Will be required" to receive our QSL &
Certificate! The number 10 envelope is 4 1/8" X 9 1/2". Please note!...If
you send the small envelope. you will only get the QSL. If you dont send a
S.A.S.E. You "WILL NOT" get either one! We had a problem last year with
people sending the small envelope and then wondering why they didnt get the
Certificate. Also we need to mention if you do not want the certificate
folded, please send a 9"X12" yellow envelope with at least $1.20 postage to
cover the cost. The address to send for the QSL & Certificate is: Old
Mulkey Meetinghouse State Park 38 Old Mulkey Park Rd. Tompkinsville,
Kentucky 42167, and please do not send your QSL to my address (KD4QHG). The
printing of the QSL's & Certificates are all done by donations from a local
group called "The friends of Old Mulkey". In other notes....I am posting
The Old Mulkey Meetinghouse Special Event now because of issues we are
experiencing with the ARRL. I contacted them last year on 15-Nov.-2011 to
apply for our 1X1 call sign and its still not posted on thier website under
Special Events after it was approved 3 days later. I called them a week
before posting this and asked why its not on there after this many months.
I talked to China Chaney and she said she couldnt figure out why its not in
there. She talked to her supervisor and told me they dont know how to get
it on thier website!. Well I asked her then how did you get all the others
on there! There was total silence for 20 seconds!. I told her to use the

computer to do this!. Like DUH! So...This is why we are posting this event now because they cant figure out how to put it on thier website like its supposed to be. We want everyone to know we are having this event again this year. And as of the day I wrote this, its still not on there. We at the Monroe County Amateur Radio Group hope to make contact with you and the school children are already excited about this also!....73s from all of us!....

//
Amateur Radio is Attracting a New Generation of Enthusiasts:

Posted: 08 Mar 2012 04:08 PM PST
http://www.eham.net/articles/27884

At an age when most kids are cruising the Internet, Adam Simeth is exploring ham radio. Simeth, 16, has been intrigued with the century-old technology since his dad introduced him to it a few years ago. "With the Internet, you find a chat room, you click on and you join," Adam said. "With ham radio, you have to tune around and find a frequency that people are talking on. You can actually go all around the world and hear yourself as an echo." Adam is one of the young people keeping the tradition of amateur radio alive in the digital age. In an era of instant messaging, tweeting and text messaging, loyal ham radio practitioners young and old feel a sense of responsibility - and enjoyment - to keep ham radio use alive and well. They like the technological challenge of mastering the medium, the thrill of communicating with other like-minded people, and the ability to help out in times of crisis. "You're talking to people as opposed to typing," said Charles Wackerman, president of the Moore County Amateur Radio Society. "You're talking to a specific person that you may or may not ever meet."

//
Changes Needed to Antenna Rules, Say Rural Councilors:

Posted: 08 Mar 2012 04:07 PM PST
http://www.eham.net/articles/27883

EMC News - A proposed policy outlining the city's involvement in situating cell-phone towers and antennas didn't pass muster at the city's agriculture and rural affairs committee last week. The city doesn't have any authority over where the towers will be placed - that's the responsibility of Industry Canada, a federal agency. But the city can put together a protocol for how it will advise Industry Canada on proposed towers and that policy is something two city committees considered last week. The planning committee found little fault with the strategy, which provides a mechanism for residents and the city to provide comments to Industry Canada. But later in the week, on March 1, rural councillors brought up issues that would affect their wards. The agriculture and rural affairs committee directed the city's top planner to go back and make some changes to the protocol that would make it easier for amateur radio enthusiasts to continue to put up small antennas to be used for HAM radios. The draft city

policy would have exempted antennas of less than 15 metres in height, as long as they are installed at the back of homes. But that leaves little room for the antennas many radio operators install in their homes, often in rural areas, said members of the Ottawa Amateur Radio Club. Glenn MacDonnell, president of the club, pointed out that the city's proposed policy would cover any antennas on the front or sides of buildings, including satellite dishes.

Active Sunspot Region 1429 Produces Sola

Posted: 08 Mar 2012 01:39 PM PST
http://www.eham.net/articles/27876

This week has been an active week for our Sun. An X-1.1 class solar flare erupted from the Sun on March 4 at 11:13 PM EST (0413 UTC March 5), sending an explosion of plasma and charged particles -- a coronal mass ejection (CME) -- hurtling through space. Forecasters at NOAA's Space Weather Prediction Center are saying that this CME should miss Earth, but it will hit Mercury and Venus.

SARL NEWS - SUNDAY 11 MARCH 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

In the news today:

JOIN THE SARL INTECNET TONIGHT AT 19:30

THE SUN PLAYS ITS TRICKS

SADC VISITORS TO SOUTH Africa - NEW APPEAL TO ICASA

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

JOIN THE SARL INTECNET TONIGHT AT 19:30

The next interactive technical net or SARL Intecnet will be held tonight, Sunday evening 11 March, at 19:30 with Vincent Harrison, ZS6BTY, as guest speaker. The subject will be antennas. Vincent will look at HF antennas to work DX including dipoles, verticals and small beams. He will focus on the effect of the height above ground, radiation patterns and take off angles. He will also briefly touch on antennas for 80 and 160 metres. A PowerPoint presentation can be downloaded from www.sarl.org.za, click on Amateur Radio TODAY or click on the link at the end of this news item.

Clubs wishing to link their repeaters to the conference bridge should send details to artoday@sarl.org.za before noon today.

THE SUN PLAYS ITS TRICKS

During the past week there have been several solar flare warnings with severe solar storms impacting on the earth's magnetic field.

As Earth's magnetic field reverberates from the impact of one CME on March 8th, a second CME is on the way. Big sunspot AR 1 429 unleashed an M6-class solar flare Friday, and the eruption hurled a cloud of plasma almost directly toward Earth. Forecasters say the CME could reach our planet during the late hours of last night or the early hours of today. Strong geomagnetic storms are possible when the cloud arrives. Check http://spaceweather.com for more information and updates.

SADC VISITORS TO SOUTH AFRICA - NEW APPEAL TO ICASA

For the past two years the SARL has been petitioning ICASA to set up a SADC arrangement similar to the CEPT licensing agreement which allows visiting amateurs from CEPT countries to operate in South Africa for up to three months. The same applies to class-A South African licensed amateurs visiting countries that have joined the CEPT agreement. ICASA agreed to take the request to CRASA, the Communication Regulators' Association of Southern Africa, which it did in December. It is now on the agenda of the March meeting.

At the recent ICASA/SARL liaison meeting the SARL requested ICASA to consider making an interim arrangement and allow licensed visiting radio Amateurs from SADC to operate in South Africa. In support of this the SARL told the committee that several SADC countries already provide this privilege to South African amateurs and that it would be a good neighbourly gesture to do the same. The ICASA delegates agreed with the request and have undertaken to take it to the ICASA Council for signing off. The SARL has formalised the proposal in writing and is awaiting a written response from the ICASA Council.

OPERATE ON FREQUENCIES YOUR ARE LICENSED FOR

During a recent contest it came to light that class B licensed radio amateurs were operating on frequencies which they are not licensed for. ZU licensees may operate on the following bands 80 and 40 metres, on 10 metres 28 050 - 28 150 and 28 300 - 28 500 kHz, on the 2 metre and 70 cm bands.

SARL OFFICE CLOSED

The SARL office will be closed during March as Mariska Faasen is overseas on holiday visiting family. Between Henry Chamberlain and Francois Botha they will attend to emails and telephone messages. Please send emails to the usual address admin@sarl.org.za.

ARRL HANDBOOK 2012 AND ANTENNA BOOK AVAILABLE FROM SAARDT

The SA Amateur Radio Development Trust has the ARRL 2012 Handbook and the new Antenna book available in hardcover for sale. To make use of the mail order facility visit www.amateurradio.org.za. There are also a number of other interesting titles available.

ZS2X 50 MHz BEACON HEARD IN FLORIDA

Tim Joubert, ZS2X, who operates the 50 MHz beacon on his property has received the following e-mail.

"A few six metre ops in South Florida K4MM EL97 and KE4WBO EL96 heard a FSK beacon signal on 50,007 MHz this morning at 1300 UT on 23 February 2012, with antenna headings towards ZS. The FSK signal was severely distorted by propagation Doppler. Neither K4MM nor KE4WBO were able to identify the beacon message. I believe that the signal may have been ZS2X/b. We will continue monitoring 50,007 MHz for more signals. 73 Terry Posey K4RX EM70."

2012 LEAP YEAR CHALLENGE

Only two logs were received for the 2012 Leap Year Challenge. Andrew Thompson, V51YJ, was active on 12 meters operating CW and made 468 QSOs. Damien Lagan, ZR6DBL, operated HF and VHF and made 8 QSOs.

Andrew is the winner and his SARL membership fee for 2012/13 will be paid for him. Congratulations Andrew.

You will now have to wait until 29 February 2016 for the next Leap Year Challenge and getting that date in your logbook!

EAST RAND CONSTRUCTION DAY

All radio amateurs and electronics enthusiasts are cordially invited to the ERB Construction day on Wednesday 21 March. Human Rights day is in the middle of the week. Don't waste a good day's fun. Go to the construction day. Everyone is WELCOME.

Details available on the ERB Website www.zs6erb.co.za.

Send mail to zs6erb@vodamail.co.za to book.

Payments are due by 15 March 2012.

Bookings are essential.

Take your own tools and soldering iron.

See you at the build.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is once again on the rise with huge sunspot 1 429 producing X class flares. There is a high possibility of further C and X class flares.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 83, nearly double that of the previous week.

10 m is once again alive and well due to the higher solar activity. All the bands from 20 to 10 m will provide lots of DX fun with even some 6 m openings possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

11 March - Intecnet at 19:30 CAT this evening. 17/18 March - SARL VHF/UHF Analogue/Digital contest. 30 March - Last day to submit items on regulatory issues for discussion with ICASA to artoday@sarl.org.za. 21 March - ZS6ERB construction day. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73. /EX

Mt. Carmel High Schoolers Launch Helium Balloon:

Posted: 09 Mar 2012 04:21 PM PST
http://www.eham.net/articles/27886

Students at Mount Carmel High aim high, about 100,000 feet straight up. Recently, the Amateur Radio Club at the school launched a helium balloon into near-space. The balloon was tied to the student's spacecraft: a small styrofoam box equipped with sensors to track data as well as tiny video cameras and a still camera to record the journey. The students named the craft Icarus-1. Lindsay White, a sophomore, is the club's president. "What we did that was unique in this launch was we had pictures being sent down live to anyone who had the right decoding software. That really hasn't been tried on many other balloon launches," she said. It was a team effort to put the project together. Tim Kinsey, a senior, said they launched the balloon on a Saturday morning at the school. They used all the helium they had to give the nylon balloon its 8 pounds of lift. Club member Alex Kim worked on the antenna with two of the mentor engineers. 'We were trying to find the point where the feedback would be lowest. Once we found it, we soldered the wires together and it worked," he said.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 11th March 2012

CQIR Contest

The CQIR contest takes place next weekend - from mid-day on Saturday 17th March to mid-day the following day. This contest is the international showpiece event for the Society's 80th celebrations and while we know most of our serious contesters will be making a big effort on the bands we would ask all stations to join in the festivities over the St. Patrick's weekend. The multipliers are the 32 EI and GI counties, so those in the "rarer" counties will be very much in demand!

Paul EI5DI advises that his contest logger SD is free and unrestricted for the CQIR contest. SD may be downloaded from ei5di.com, and users should experiment with test logs before the contest.

Entrants should be aware that the Russian DX contest overlaps with CQIR, and Russian stations will send a 2-character district code instead of a serial. Full rules for the contest are available on the IRTS website.

Galway Radio Experimenters Club

Galway Radio Experimenters Club will be hosting two very interesting presentations at their next club meeting on Monday 12th March at 8.00 p.m. in The Anno Santo Hotel, Threadneedle Road, Galway. Larry EI9CN will talk about Software Defined Radio, demonstrating the Flex 5000 and linking it with third-party software such as CW Skimmer and Logger32, while Tom EI3ER will talk about the 100th anniversary of the Titanic disaster and the radio communications techniques used at that time.

Any amateurs, SWLs or other interested people are invited to come along on the night. This would be particularly interesting for any amateur thinking of going down the Software Defined Radio route.

South Dublin Radio Club

The Annual General Meeting of the club will take place Tuesday 13th March. All members are requested to attend.

Shannon Basin Radio Club

The Shannon Basin Radio Club is holding a meeting on Wed 28th March at 20:30 in Hannons Hotel, Roscommon.

It is planned to give practical demonstrations on computerised logging, dx cluster and Logbook of the World.

All members are requested to attend and visitors are welcome. For more info see www.shannonbasinradioclub.com

---

North Cork Radio Group

The North Cork Radio Group will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

EI8GQB activity : March 18th-26th

Oliver/ON4EI will again be QRV from Ireland near Fethard (IO62EL) on top of Benneshill (170m ASL) with his Irish callsign EI8GQB. He will enter the CQ WPX SSB CONTEST on March 24th/25th.

During the week before the contest Oliver will set up 5 antennas to support SO2R operation. Reference frequency is 7.100 MHz +/- QRM.

Olivier will hold a daily blog on www.qrz.com/db/EI8GQB and post regularly video on YouTube ON4EI's channel www.youtube.com/user/ON4EI

If you want to visit him during the week, please send a mail to ON4EI/at/VANDENBALCK/dot/EU

IRTS 80th Anniversary AGM & Rally

The event this year is hosted by Dundalk Amateur Radio Society. The annual dinner takes place on Saturday April 21st, with the Rally and AGM on the following day. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors.

This is a must attend event in the 80th Anniversary year of your national society. Full details of this event are on the IRTS web site www.irts.ie

Dinner tickets can be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie

---

VHF / UHF Squares Table

VHF Manager, Trevor EI2GLB is aiming to get the 2011 Squares Table up to date, and he is asking all EIs that have been active on the VHF and higher bands in 2011 to submit their totals to him.

Contacts can be on any band 6m and higher, any mode excluding repeaters. Please send your totals to Trevor, EI2GLB at hotmail.com

He just needs to know the number of squares per band. If your electronic log won't output that data he can take a log extract and work it out for you.

DXCC Entities

We have lost one DXCC entity! Malyj Vysotskij Island -often known as "MV Island" (prefix R1M) which is part of Russia, was leased to Finland from the 1960s until very recently and, under the DXCC rules, was considered a separate DXCC entity. Since February this year, the island is no longer leased to Finland and is therefore a "Deleted Entity" in the DXCC programme. This reduces the number of current DXCC entities to 340.

See www.irts.ie/dxcc for an updated list of EI call signs in the DXCC listings. Congratulations to two new entrants to the EI DXCC list - Seamus EI9CF and Claus EI7JZ. Claus is no stranger to the DXCC programme, as he is on the Honor Roll under his Austrian call sign OE6CLD.

DX News

Barney ZS6TQ will be working in the Democratic Republic of the Congo from 14 March - 8 April. He will operate as 9Q6/ZS4U outside working hours. He will be located in Grid Square KI16 and his QSL Manager is K3IRV.

Retu OH4MDY will be back in Vietnam from 17 March - 16 April. As before he will sign XV2RZ. QSLs go via his home call.

The island of Svalbard will be activated by LA2XNA and LA8HGA. They will use the calls JW2XNA and JW8HGA respectively from 16-20 March.

For the island chasers a brand new one in the form of AT2DW will be on the bands from 16 - 23 March. This expedition station will be active from the Indian island of Bet Shankhodar. The IOTA reference number is AS-175.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1053
BID: $OPDX.1053
March 12, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & ARRL DX, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, N7UN, K8YSE, NL8F, W8GEX & 60m News, 9M2TO, AT International, DK8JB & The DX News Letter, DL1SBF, DL2VFR, DxCoffee.com, DX-World.Net, EI7CC, F6AJA & Les Nouvelles DX, I1JQJ/ IK1ADH & 425 DX News, IK7JWY, IZ8BGY, JG7PSJ, JI5RPT, LY5W, OZ6OM & 50 MHz DX News, PY2WAS, Pete's DX-Newsdesk, PY2YP, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal, VU2CDP and YT3W for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-March, through Sunday, 11th-March there were 220 countries active. Countries available: 3A, 3B8, 3C0, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5X, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB for 7 days beginning March 24th. Activity will be from the eastern side of Scotland in the Cairngorms National Park (WFF GMFF-001). Activity

will be on 160m, 80m, and the satellites (mostly AO-7 B/A mode), as well as 2m SSB. Check out QRZ.com under 2M1EUB for more info.

3C0, ANNOBON ISLAND (Update). By the time you read this, operators Elmo/EA5BYP and Javier/EA5KM should be going QRT as 3C0E from Annobon Island (AF-039; Pagalu). QSL 3C0E (as well as 3C6A) via EA5BYP: Elmo Bernab&#65533; Coll, P.O.Box 3097, 03080 Alicante, Spain. For more details and updates, watch the Web page at: http://www.gdgdxc.net/3c0e/index.php

5Z, KENYA. Sig, NV7E/ZS6SIG, who has relocated from Pretoria, South Africa, to Nairobi, Kenya, is signing 5Z4EE for about the next three years. Sig announced this past week that he will once again be active in the following contests this year:
CQWW DX RTTY Contest (September 29-30th) as a SOABHP entry
CQWW DX SSB Contest (October 27-28th) as a SOABHP entry
CQWW DX CW Contest (November 24-25th) as a SOABHP entry
Activity (as usual) outside of the contests will be on all bands 160-10 meters. QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

7P, LESOTHO. Peter, EI7CC, will once again be active as 7P8PB from Lesotho between March 15th and April 3rd. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL via EI7CC, by the Bureau or direct. Logs will be uploaded to LoTW immediately upon his return to Ireland. If possible, Peter may try to upload them while in Lesotho.

9M0, SPRATLY (Update). Members of the Malaysian Amateur Radio Transmitter Society (MARTS) and the 9M4SDX Team will be active as 9M0L from Pulau Layang Layang Island (Swallow Reefs - AS-051) near Sabah, East Malaysia, between April 10-24th. The current team consists of Tex-san/9M2TO (Project Coordinator), Neoh/9M2CLN (Team Leader Malaysia), Tack-san/JE1CKA (Team Leader Japan), Hajime/7K4QOK, Takuto/9M2/JE1SCJ, David/9M2PX, Yasuma/9M8YY, Nigel/G3TXF, Joe/JA1LZR, Miyama/JE1KUC, Naoyuki/JK1FNL, Hiroyuki/JP1TRJ and Yutaka/JQ2GYU. Activity will be on 160-6 meters using CW, SSB and RTTY. They will try to have as many RTTY QSOs with NA/SA as much as possible. The team will have 4 stations using Spider Beams and a Layang Special. Suggested frequencies are:
CW - 1811, 3511, 7011, 10121, 14011, 18071, 21011, 24891 and 28011 kHz
SSB - 3791, 7081, 14160, 18130, 21275, 24940 and 28405 kHz
RTTY - 3521, 7031, 10141, 14081, 18101, 21081, 24921 and 28081 kHz
6m - 50101/CW and 50110/SSB
Special Notes:
1. All frequencies are 9M0L transmitting frequency. They will announce listening Frequency when QRV.
2. 80m RTTY: They will listen 3590 and up for EU.
3. 40m SSB: They will announce listen up 7100 for US.

QSL direct to 9M2TO: 9M0L TEAM PENANG, PO BOX 125 GPO 10710, Penang Island, MALAYSIA or by the Bureau to Malaysian Amateur Radio Transmitter's Society (MARTS). A Web page is up an running at: http://9m0l.legendchew.com

9Q, DEM. REP. OF CONGO. Sergiy, UV5EVJ (ex-5X1VJ), is currently active from Lubumbashi using the Amateur Radio Association of the Democratic Republic of Congo's (ARAC) club callsign as 9Q0HQ/7. Activity has been on 80-10 meters using CW and SSB. He is expected to be there through the end of March. Sergey is part of the UN mission MONUSCO. QSL via UV5EVJ.

CN, MOROCCO. Florent, F4CYZ, (MDXC Member #141) is now active as CN2YZ from Morocco until the end of year. His activity from this African country will be from Tangier and especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site (with a log-check included) at: http://www.mdxc.org/cn2yz

CQ3/CT3, MADEIRA ISLANDS. Operators Walter/DJ6QT, Uwe/DL8OBF, Alex/RA1AGL, YL Elena/RC5A, Alex/RM2M, Paul/RN3A, Sergey/UA1ANA and Gennady/UA9MA will be active as CQ3L during the CQWW WPX SSB Contest (March 24-25th) as a Multi-2 entry. QSL via DJ6QT. Look for operators to be active before the contest between March 11-26th, as CT3/homecall. QSL via Bureau. Visit the CR3L Santana, Madeira Island (AF-014), Web page at: http://www.cq3l.de

D6, COMOROS. A D64K DXpedition is in the works and details will be forthcoming. QSL via IZ7KHR. Watch the following for updates:
http://www.d64k.com
https://twitter.com/#!/D64K

DAYLIGHT SAVING TIME (DST). Did you remember to move your clock ahead one hour for Daylight Saving Time (DST)?

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
6O0M - Somalia; 2011 Operation
9U3TMM - Burundi; Reported as December 2011 and January 2012
AX/VK0TH - (as well as VK0TH) Macquarie Island; Current operation
T6BP - Afghanistan; Current operation commenting in 2011

If you had this operation rejected in a recent application, send a note to bmoore@arrl.org to have your record updated. Note, due to extremely heavy E-mail, DXCC may not respond to your message. Once updated, this will be reflected in your LoTW account and/or in the live, daily DXCC standings on the website. <www.arrl.org/dxcc>

EE8, CANARY ISLANDS. Luis, EA8AY, will be active as EE8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x

EF8, CANARY ISLANDS (Update). Jaime, WP3A, will be active as EF8C from Tenerife Island (AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via EB7DX (not NP3O as first announced). Look for more info on: http://kp2b.net

FR, REUNION ISLAND. Michael, DF8AN, will be active as FR/DF8AN from Reunion Island (AF-016) between September 2-10th. Activity will be

mainly on CW on all bands including 6 meters with just 100 watts into a long wire. QSL via DF8AN, direct or by the Bureau.

FW, WALLIS AND FUTUNA ISLANDs. Patrice, F1GHY, is now currently active as as FW/F1GHY from Wallis Island (OC-054), but the length of his stay is unknown at this time. Activity has been on 20 meters SSB using 100 watts into a long wire antenna. QSL via his home callsign.

H40, TEMOTU PROVINCE. Looks like Sigi, DK9FN, will once again return to Temotu Province for a fourth time and be active as H40FN between (approx.) December 22nd and January 7th (2013). QSL H40FN via HA8DD. More details will be forthcoming.

HI, DOMINICAN REPUBLIC. Luis, HI8LAM, from Santo Domingo will be active during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via direct to his home callsign.

HU0, EL SALVADOR. Members of the Club de Radio Aficionados de El Salvador will be active as HU0A during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Sinlge entry. Operators mentioned are Mario/YS1GMV, Mario/YS1MAE, Jose/YS1MS, Roberto/YS1RS, Florencio/YS1ZC, Federico/YS1FEA and Francisco/YS1FAF. QSL via YS1GMV.

INTERNATIONAL GOOD WILL. Yuri, UT1FG, who has been active as UT1FG/MM and sailing from port to port operating on the satellites and 6 meters to activate wet Grid Squares, has left from a port in Nicaragua a few days ago. However, Yuri's 12 volt power supply that runs his IC-706 has failed and could not be fixed. John, K8YSE, informs OPDX, "This prompted an effort to find a way to replace that power supply and insure continued operations as he sails up to Montreal, Canada. The solution was eventually found and thanks to the efforts of Captain Manolis Joannou, HP1CQ, Yuri continues to operate. An abbreviated version of the story of 'International Good Will' and extreme determination to succeed is now posted on my Web site. This hobby is more than just operating and making contacts." For the rest of the story, please visit John's Web page at: http://www.papays.com/sat [Click on the UT1FG/MM Panama link]

IOTA NEWS.....
AS-061/
AS-092. "DX-World.net" is reporting: "Tentative plans by Russian Robinson Club members to activate Big Diomede (Ratmanova - AS-061) and one of the islands in the Bering Sea Coast South group (AS-092) are underway. Activity is scheduled for the end of July/early August 2012. Big Diomede Island was last activated in early 1990's."

AS-175. (Update/Change) NEW IOTA! Look for an Indian team to be active using the callsign AT2DW (not ATBDW as announced) from Bet Dwarka Island (Bet Shankhodar) between March 16-23rd. This island is in the Gujerat State West IOTA Group and has never been activated before. Activity will be on 80-10 meters using CW, SSB and the Digital modes. The team plans to be active

with 2 stations with the possibility of a 3rd station, and will use vertical antennas. Operators mentioned are YL Sarla/ VU2SWS (Group Leader), Mickey/VU2IZO, Nandu/VU2NKS, Deepak/ VU2CDP, Basappa/VU2NXM, Laxman/VU2LX and Ajoy/VU2JHM. QSL via VU2SWS, direct or by the Bureau. There will be an OQRS available on the ClubLog. Logs will be uploaded to LoTW within 1 month. A Web page is now online with more details and an online log at: http://www.dxcoffee.com/at2dw

EU-042. A German team of operators will be active as DM50IOTA from Hallig Langeness between March 16-18th. Activity will be on CW, SSB and PSK, and on all HF bands and on VHF. The "Hallig Langeness" is situated in the "Wadden Sea" (North Sea) and counts also for WFF DLFF-013 and for the German Islands Award N-19. QSL preferred by the Bureau. ADDED NOTE: DM50IOTA will activate all German IOTA groups during the IOTA 50th Anniversary Marathon (2012/2013). If you have worked DM50IOTA from all German IOTAs you can apply by sending an E-mail for a special award (pdf-style, will be sent by E-mail free of charge in 2013).

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545) for the CQWW WPX SSB Contest as (March 24-25th) as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

NA-057. By the time you read this, Michael, DF8AN, will be active as HR9/DF8AN from two islands in the Bahia Islands IOTA Group between now and March 26th. He plans to activate Roatan Island and Utila Island. Activity will be mainly on CW on all bands including 6 meters with just 100 watts into a long wire. QSL via DF8AN, direct or by the Bureau.

OC-066. Hiro, JI1JKW, will be active as FO/JI1JKW from Rangiroa Island, French Polynesia, between March 18-22nd. Activity will be on the HF bands. QSL via his home callsign.

OC-185. Craig, VK8AS, will be active as VK8BI from Bremer Island between April 18-23rd. Activity will be on 20/17/15/12/10 meters running 400 watts into a Spiderbeam yagi. Operation will be SSB only. However, he does have the capability of running PSK31/RTTY at rare moments. Craig states, "OC-185 was last activated in 2004 for two days and prior to that in 1999 and is only claimed by 20% of IOTA program participants. A strong focus will be on North America and Europe. Full operation details are available at QRZ.com which gives details of the blog site that outlines best operating times to different regions of the world."

OC-199. It was announced earlier in the week that Wally, VK6YS, would activate West Lewis Island between March 8-10th. However, this operation was postponed. No other details were provided.

JD1, OGASAWARA. Harry, JG7PSJ, will be active again as JD1BMH from Chichijima Island (AS-031) between April 22nd and May 4th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via the Bureau to JD1BMH or direct to JG7PSJ. Visit his Web page for more details at: http://sapphire.es.tohoku.ac.jp/jd1bmh

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between April 29th and May 5th. Activity will be on 80-6 meters, including the satellites, using CW, SSB and the Digital modes (NO 6m EME). QSL via his home callsign JI5RPT. His log search will be available on his Web site at:
http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at:
http://twitter.com/jd1bly

JD1, OGASAWARA. Operators JD1BLC and JD1YBT will be active from Ogasawara between April 29th and May 5th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL both callsigns via JP1IOF.

KH6BZF PROPAGATION FORECAST/REPORT (March 12-18th)....
Mar/12th AN Mar/15th AN Mar/17th AN-HN
Mar/13th AN Mar/16th AN Mar/18th HN
Mar/14th AN

HN - High Normal Unsettled K� 8-15
LN - Low Normal Active K� 16-29
BN - Below Normal Minor Storm K� 30-49
DIS - Disturbed Major Storm K� 50-99
VRY DIS - Very Disturbed Severe Storm K�9 100-400

KH9, WAKE ISLAND. Coin, WA2YUN, is currently active as KH9/WA2YUN from Wake Island (OC-053) and will be active another year or more. Activity is on the HF bands including 160/80m. He has also been active on 6 meters. QSL via K2PF.

LY22, LITHUANIA (Attn. Prefix Hunters!). Jonas, LY5A, will be on the air with the new all time prefix using the callsign LY22A between March 11th and April 11th. Activity is to celebrate the 22nd anniversary of "The Act of the Re-Establishment of the State of Lithuania". QSL via LY5A. Contacts are good for the LY WPX Award and Baltic States WPX Award.

PACIFIC TOUR (Preparing for Conway Reef). In preparation of the upcoming DXpedition to Conway Reef (3D2/C) in September, Hrane, YT1AD, will be in the Pacific during April, and plans to activate Rotuma, Fiji, Samoa and

American Samoa. The following are the tentative dates:
April 7-9th - Callsign KH8/N9YU from Pago Pago, American Samoa,
and from AH8LG QTH
April 9-11th - Callsign 5W7A from Apia, Samoa
April 13-20th - Callsign 3D2R from Rotuma *

* Hrane's last destination on his trip is to visit the Island of Rotuma
with Tevita Rokobaro, 3D2TR, from the Fiji Ministry of Tourism and
Communications. During this visit they will visit the students at the
Rotuma High School (at the 3D2RI radio club station) and help install
the new donations (antenna rotor donated by K6MKF and an HF LPA 500W,
donated by YT1AD).

PY0S, ST. PETER AND ST. PAUL ROCKS (DXCC Entity To Become Rarer!).
Already ranked 16th, on the "DX Magazine's Most Needed Countries World-
Wide List", it was announced this past week that amateur radio DXpedition
is now prohibited from the archipelago of Saint Peter and Saint Paul
Rocks (PY0S). The prohibition is published on the Web site of SERCIM
<http://www.mar.mil.br/secirm/proarq.htm> - Secretariat of the Inter-
ministerial Commission for Sea Resources that coordinates and controls
the "Program Archipelago of Saint Peter and Saint Paul". Members of the
Federal LABRE DX and some groups in Brazil have shown a true outrage on
Social Networks on the Internet. There is already a great mobilization on
the part of Amateur Radio with the Brazilian Federal Senators and Repre-
sentatives to try to reverse the decision to ban DXpedition to PY0S. The
biggest concern among hams is that this decision could open a precedent
for restrictions on other entities in Brazil as in other parts of the
world. For more details, visit the following Web page:
http://www.teresinadxgroup.com/?pG5

NEW QSL ROUTE. Tim, NL8F, informs OPDX that Ted, K8NA, will be his QSL Manager for his upcoming CE0Y/NL8F Easter Island operation this month. He is still waiting for confirmation of a possible CE0Y callsign.

PR2I LOGS. QSL Manager Fred, IK7JWX, reports that the logs for the recent IOTA operations from SA-024 and SA-071 are online at:
http://www.i8lwl.it
He will accept the QSOs data (with the IOTA refer.) via E-mail at <ik7jwx2003@yahoo.it> and will send the QSLs via the Bureau. For QSLs via direct, please send a SASE to his address on QRZ.com.

QSL RECEIVED VIA LoTW: 5P12EU, AL7L, C6ANM, E76C, EF8R, EP3PK, FM/R5GA, FP/M0VFC, EI80IRTS, HL5KY, MI0M, MI0SAI, PJ2T, SV8IIR, T96C, TG7/NC2N, US6EX, V25WY, YU1FW, ZD7XF, ZD8O and ZP6CW

QSLS RECEIVED VIA MAIL: 3D2R, 4O3A, 9X0PY, CO8LY, E51CG, FP/W6HGF, KG4AS, KP2M, MU/PA9M, PJ7I, ST2AR, T32C, V31RI, V63KZ, ZP5DBC and ZY1A

QSLS RECEIVED VIA THE BUREAU: OA1F and OJ0X

S7, SEYCHELLES (Update/Reminder). Just a reminder that operators Tom/DL5NEN and XYL Claudia/DO5NEN will be active as S79NEN from Mahe (AF-024) and La Digue Islands (AF-024) between March 12-28th. They are calling this a "Honeymoon Dxpedition". Activity will be on 40-6 meters using CW, SSB, RTTY and PSK. Also, look for activity to be in the CQWW WPX SSB Contest (March 24-25th) and the BARTG HF RTTY Contest (March 17-19th). QSL via DO5NEN. PLEASE NOTE: All donations will be transfered one by one to:
http://www.unicef.org
They state, "Please help us. DX for kids." There is a donate button on their QRZ.com page, as well as a ClubLog log search.

SILENT KEY. The DX community has lost a legendary Pacific DXer and DXpeditioner on March 6th. Well-known DXer Ron Wright, ZL1AMO, became a "Silent Key" (SK) at the age of 75. Word went out last week that Ron was admitted to the hospital because of a collapsed lung but recovered in stable condition and remained in the hospital until his passing.

Many DXers may remember Ron from all of his DXpeditions in the Pacific; some he visited more than once. Your editor and the members of NODXA will remember Ron when he attended a club meeting in the 80's and showed the club a slide show on his DXpedition to Kermadec Island. NODXA has also presented Ron with a "Lifetime Achievement". OPDX and its readers would like to send out our deepest sympathy to the family and friends of ZL1AMO. His CW signal will be missed by many.
Read Ron Wright's obituary from the New Zealand Herald and sign the guest book at:
http://notices.nzherald.co.nz/obituaries/nzherald-nz/obituary.aspx?n&#65533;nal
d-walter-wright&pid6341245

SV5, DODECANESE. Jeff, N6GQ, will be active as SV5/N6GQ from the beach during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/QRP entry. He will use a wire antenna. QSL via N6GQ.

T30, WESTERN KIRIBATI (Press Release #1). The following was received by Alex, PY2WAS, dated March 6th [edited]: "We proudly announce a DXpedition to Tarawa Island (OC-017), Western Kiribati, between October 16-25th, 2012, when two callsigns will be used: T30PY for operations between 160-10m, and T30SIX to be used on 6m. It is expected to have 3 stations running simultaneously on HF and one on six meters. The following modes will be used: SSB, CW and RTTY. EME on six meters may be possible, but not yet confirmed. The team, at this time, is formed by the following Brazilian ham ops: Orlando/PT2OP, Rick/PY2PT, Fred/PY2XB, Alex/PY2WAS, Fernando/ PY4BZ, Jim/PY7XC, Ciro/PY7ZY, Miguel/PY3MM and Marcelo/PY1KN.
The DXpedition Web site will be launched in a couple of days at <http://www.mcdx.org/t30py>, to be supported by the Mediterraneo DX Club. Considering the high cost of logistics, donations are welcome to help the team to support all related costs. There will be a donation button on the site, for which the donor may click and use Paypal to accomplish it..... 73, T30PY/T30SIX Team"

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/Low-Power/Sinlge-Band (10m - Possibly 20m if 10m conditions are not good) entry. He will be using 100 watts into a OCF dipole at 30 feet. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau.

TK12, CORSICA (IOTA Op). Laurent, F8BBL, will active as TK12IOTA from Corsica (EU-014) and two of its IOTAs between July 7-21st. Activity will be holiday style and will start from Olmeto, Southern Corsica Beach (EU-014). Operations will be mobile on 80-10 meters, mainly CW, with some SSB and Digital, using a FT-857D and MP1 antenna. He will travel to the following islands on the tentative days:
July 14th: Lavezzi Island (EU-164, DIFM TK-011, Loc. JN41OI); starting around 0800z.
July 18th: Bloodthirsty (Sanguinaires) Island (EU-104, DIFM TK-002, Loc. JN41HV); starting around 1000z.
QSL via F8BBL, direct or by the Bureau. Also via LoTW. For more details and past operations, see: http://rnb.dx-cw.net

TO3, SAINT BARTHELEMY. Operators Wim/ON4CIT and Paul/ON4BEC will be active as TO3X from St. Barthelemy (NA-146) between April 16-30th. Activity will be on 40-6 meters using mostly SSB and RTTY with some CW. They will look for JA staions every day during 2300-0200z on 15/12/10 meters on SSB and RTTY. QSL via ON4CIT, direct or by the Bureau. An online log will be available at ClubLog, as well as an OQRS. Log will be uploaded to LoTW later in the year. For more details and suggested frequencies, see the TO3X Web page at: http://www.dxpedition.be/TO3X.html
ADDED NOTE: Wim, ON4CIT, is looking for operators for the next DXpedition at the end of 2012 or 2013 to Togo (5V) and to Benin (TY). If interested, contact him at: on4cit@telenet.be

TZ, MALI (Postponed!). Members of the "Italian Dxpedition Team" announced two weeks ago that they were planning to be active as TZ5T from Mali between April 12-27th. However, their Pilot station Art, IK7JWY, announced this past week [edited]: "We regret having to give bad news about the planned DXpedition. The situation of civil war in Mali between the govern-ment and Tuareg is getting worse lately, and for safety reasons, the authorities do not issue licenses to radio amateurs who may be targeted because of radio equipment. For this reason the DXpedition is postponed until a later date." It is suggested to watch their official Web site for updates at: http://www.i2ysb.com
Official forum: http://www.hamradioweb.org/forums/forumdisplay.php?fe
Further notices will follow.

V3, BELIZE. Colin/KU5B will once again be active as V31UB between May 23-29th. Activity will be on 160-6 meters using CW, SSB, and RTTY. He will also be in the CQWW WPX CW Contest (May 26-27th) as a Single-Op/ All-Band entry. QSL direct to his home callsign or LoTW.

V6, MICRONESIA. Kay, JH3AZC, will be active as V63AZ from Pohnpei Islands (OC-010) between April 30th and May 4th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via JH3AZC. ADDED NOTE: "The Daily DX" reports that Kay will head to Guam after his V63AZ operation and be active as W2AZ/KH2 between May 5-6th.

VK9N, NORFOLK ISLAND (6m Op!). Bob, ZL1RS, will be active as VK9N/ZL1RS from Duncombe Bay, Norfolk Island, between March 26th and April 8th. His activity will be 6 meters - Monitoring and calling CQ on 50.110 MHz SSB and 50.1106 MHz CW. He may also be on 6m EME, but at moonrise and moonset only. His equipment will be an IC-706mk2g, HB PA and HB stacked Yagis. QSL only direct to his home callsign. For more details and an operating schedule, go to: http://www.qsl.net/zl1rs/vk9n.html
ADDED NOTE: Bob is planning a 6m and 2m operation from Niue (ZK2) between early September and mid-November (see details below).

VP2M, MONTSERRAT. The "Buddies in the Caribbean" mini-DXpedition group is off to Montserrat (VP2M) between April 8-16th, with a new group of operators who have never experienced the "other side of a pileup"! Because of severe baggage limits on the flight from Antigua to Montserrat (one bag under 50 lbs!), they will be limited to 100 watt or less low power radios and the Buddipole portable antenna systems. Yet their goal is to demon-strate "ultralite" DXpeditioning into magnificent "vista" locations,

operating a field portable battery-only radio with backpackable, light-weight antennas and most of all "having fun" on the "volcano isle". The eight operators are: Budd/W3FF (VP2MFF), Guy/N7UN (VP2MUN), Paul/KB9AVO (VP2MVO), Larry/W7DGP (VP2MLR), Russ/N7QR (VP2MQR), Tom/K2GSJ (VP2MTM) and Chris/N2YYZ (VP2MYZ). There will be several villa stations in operation on 160-10 meters using CW, SSB, and RTTY or PSK. At the same time, several teams will be battery-only, field portable either from Montserrat beaches or scenic mountain tops. QSL via LoTW, eQSL, or mail to the operator's home callsign (SASE required).

XQ, CHILE. Esteban, XQ7UP, will be active from Coyhaique (Patagonia) between March 17-25th. Activity will be holiday style on the HF bands using mostly SSB, RTTY and PSK31. He will also be active during the CQWW WPX SSB Contest (March 24-25th). QSL via direct to the address on QRZ.com.

ZA100, ALBANIA. Operators Franck/F4DTO and Patrick/F4GFE will once again be active from Albania, but as ZA100I between April 22-29th. Activity will be on 40-10 meters SSB only. QSL via F4DTO, direct or by the Bureau.

ZK2, NIUE (6 and 2 meter Op!). Operators Lance/W7GJ and Bob/ZL1RS will once again team up to do a 6 meter (Lance) and 2 meter (Bob) EME DXpedition between September 9-21st, like they did together from E51 and 3D2. Lance will use the callsign ZK2GJ, while Bob will probably use his old callsign ZK2RS. Lance has the preliminary information about the DXpedition at:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
QSL ZK2GJ via W7GJ and ZK2RS via ZL1RS DIRECT ONLY.

ZL7, CHATHAM ISLANDS. Only a few more days to work David, VO1AU, as ZL7/VO1AU from the Chatham Islands (OC-038). He will go QRT in March 13th. QSL via VO1MX.

Kids will Ham It Up, Radio Style:

Posted: 10 Mar 2012 04:20 PM PST
http://www.eham.net/articles/27888

In the event of hurricanes, fires, floods, earthquakes and other disasters, you can count on amateur (or Ham) radio to provide vital links to agencies and city services such as fire, police and ambulance. On Tuesday, March 20, local kids can join Surrey Museum and Surrey Emergency Program Amateur Radio Society (SEPAR) in an amateur radio emergency communications workshop at the museum, at 17710 56A Ave. The session (from 2 to 4 p.m.) will focus on how amateur radio provides communities with emergency communications when commercial systems are not operational.

//
Ham Radio Network to Help Disaster Communications:

Posted: 10 Mar 2012 04:19 PM PST
http://www.eham.net/articles/27887

He was responding to a representation made by a member of the HAM radio community on their readiness and availability to act in disaster situations during a discussion on the topic 'Media and Disasters' here today. Organised in connection with the ongoing international workshop on disaster risk reduction and contingency planning, Surakshaayanam 2012, representatives of the media including Deputy Editor, Frontline Ventikesh Ramakrishnan, Associate Editor of India Today M G Radhakrishnan and Malayala Manorama Bureau Chief John Mundakkayam delineated various aspects of media reportage on disaster management.

GB2RS NEWS

Sunday 11th March 2012

The news headlines:

RSGB Olympics Facilitator appointed

News on RSGB Consultations

American hams get CW on 60m

The RSGB has announced that Steve Fletcher, G4RFC, has agreed to become the RSGB's Olympic Facilitator. Steve will be drawing together all the information on radio amateur special events associated with the Olympic and Paralympic Games. Steve wants to hear about your plans so the RSGB website can show who is doing what, when and where. The Games are a once off opportunity to demonstrate amateur radio and at the same time have some fun. Steve can be reached at g4rfcinfo@yahoo.co.uk.

The pilots for the recently introduced consultation processes are now reaching their conclusion. The Litmus Test on proposals for a Queen's Diamond Jubilee QSO Party will be offering an amended version to reflect the consensus that is emerging. The amended proposal will be available on the RSGB website from Monday 12 March, and the Litmus Test will remain open for final comments. All are reminded that the Litmus Test on proposals for a new 5MHz NoV and the consultation on the Society's draft Spectrum Strategy are also ongoing. All consultations can be reached by following the ``We need your views'' link on the RSGB website home page.

On 5 March, radio amateurs in the USA were allowed to use CW on 60 metres for the first time. G4BUE, operating as N4CJ, and G3VTT believe they made the first 60 metre CW QSO between the USA and Europe. At 0501UTC on 5 March, just one minute after USA amateurs were allowed to use CW on the five 60m channels for the first time at 0001EST, Colin answered Chris' CQ on 5373kHz. They exchanged 549 and 339, later changing it to 569 as QSB took effect. They also exchanged details that Chris was using 100 watts from his K3 to an inverted vee at 35 feet and Colin was using 50 watts from an IC-735 to a 120 foot end-fed wire. A good result for the first EU-USA 60m CW QSO.

The RSGB was surprised to learn, on Friday 9 March, that a number of amateurs have received a letter telling them that they would be unable to renew their amateur radio insurance policy after 31 March. The Society had been in discussions with Bluefin, also known as Amateur Radio Insurance Services, as recently as 17 February about a new

insurance underwriter taking on the policies. Bluefin have now advised the RSGB that this deal had fallen through, which is why they have been forced to advise their clients of the situation.�The RSGB is exploring possible alternative arrangements, and hopes to be able to make further announcements before the 31 March cutoff.

Everyone, whether you are Irish or not, is invited to a party on St Patrick's Day. The Irish national society, the IRTS is celebrating its 80th birthday and, as part of the fun, have organised a 24 hour contest that begins at noon UTC on St Patrick's Day, 17 March. This is an everybody works everybody contest .Full rules, including a list of Irish counties, are available on the IRTS website, www.irts.ie/CQIR.

The IARU Region 1 Executive Committee is holding its annual meeting this weekend at the DARC HQ in Baunatal, Germany. The agenda will include outstanding actions from the 2011 General Conference, WRC-12 and WRC-15, spectrum defence, EMC, Youth, Political Relations, Development, Working Groups and Member Societies.

And now for the details of rallies and events for the coming week

The Wythall Radio Club Radio and Computer Rally takes place today, 11 March, at the Woodrush Sports Centre, Shawhurst Lane, Hollywood, nr Birmingham B47 5JW. The venue is on the A435, 2 miles from J3 of the M42. There will be trade stands and a Bring & Buy, with admission costing ?2.50. Contact Chris, G0EYO on 07710 412 819.

The next rallies we have information on take place on 25 March.

The Spring Militaria & Electronics & Radio Amateur Hangar Sale will he held at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and there will be, civil, military & vintage radio equipment, vehicle spares & more. Contact Rod Siebert, 01270 623 353.

The Devon & Cornwall HAMFEST takes place the same date, 25 March, at The Engine House, Compton Park, Callington PL17 8EA. There will be trade stands and special interest groups. Compton Park is a peaceful, simple unspoilt site formerly the site of an old Cornish tin mine, with the old Cornish steam engine house and the Engine House Tea Rooms. More information from Dereck, M0YDW, via e-mail to disco5live@btinternet.com.

Now for the news of special events

Two special event stations are taking to the air for St Patrick's Day, 17 March. GB5SPD will be on the air from County Tyrone and GB1SPD will be on the air in Omagh. More details on both stations can be found on qrz.com.

And now the HF DX news compiled from 425 DX News and other sources

V5/GI4FUM, V5/GI8MIV, V5/GI4DOH and V5/DM3BJ will be operating from Namibia from the QTH of Andre, V51B starting on 19 March. The team will

be QRV for CQWW WPX SSB on 24 and 25 March with the callsign V55B. All QSLs for the operation should go via David, GI4FUM, who is QTHR.

A large group from Germany and Poland plan to be active from the Pacific island of Tonga until 24 March. Callsign is A35YZ and QSL manager is DL7DF.

Willy, ON4AVT will be active as C5AVT from near Banjul, The Gambia until 20 March. He will operate PSK only, mainly on 15 metres. QSL via home call, direct or bureau.

John, W5JON will be active as V47JA from St. Kitts, which is IOTA reference NA-104, until 28 March. He will operate SSB on the 6 to 80m bands. His wife Cathy will also operate occasionally as V47HAM. All QSLs via W5JON.

LA2XNA and LA8HGA plan to be active from Svalbard as JW2XNA and JW8HGA respectively from 16 to 20 March, all bands. JW2XNA will be on SSB and PSK, while JW8HGA will be on CW. QSL via their home calls either direct or via the LA QSL bureau.

Now the contest news

The 432MHz UK Activity Contest takes place on 13 March from 2000 to 2230UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

The following day, 14 March, the CW leg of the 80m club championships takes place from 2000 to 2130UTC. The exchange is signal report and serial number.

You will need to be up very early if you want to catch the start of the BARTG HF RTTY Contest at 2am on 17 March. It runs for 48 hours until 0200UTC on 19 March. Exchange signal report, a serial number and the time. Please note that although this event is not run or administered by RSGB, it does count towards the HF Championship.

You can also be Irish for the day by taking part in the CQIR Ireland Calling event, commemorating the 80th anniversary of IRTS. SSB QSOs are worth 2 points, while CW QSOs are worth 3. It runs from 1200UTC on 17 March until 1200UTC on 18 March, using both CW and SSB on all bands from 3.5MHz to 28MHz, the exchange is signal report, serial number and Irish county.

Starting at exactly the same time as the IRTS event is the Russian DX Contest, which runs until 1200 on 18 March. There are lots of entry categories, mostly for single ops. An interesting twist is that it is permitted for a single op station to make two single-band entries. Usually this would be to take advantage of bands that aren't open at the same time, for example 10m and 80m. Using CW and SSB on the 1.8 to 28MHz bands, the exchange is signal report and serial number. Russians also send their oblast code.

And now the solar factual data for the period from Friday the 2nd to the 8th of March, compiled by Neil Clarke, G0CAS on Friday the 9th of March.

Warnings were made as recently as last week in this report regarding a sudden upsurge in solar activity. Well, this happened when a large active sunspot region rotated into view. Since then this region as produced 12 M class and 2 X class solar flares during the period, plus numerous C class flares every day. A second group also produced an X class flare. The largest flare of the period was an X5/3B proton flare, which took place early on the 7th. Since then activity has declined. Coronal mass ejections took place along with some of the larger solar flares and are headed our way. Solar flux levels increased from 108 units on the 2nd to 140 by the 7th. The average was 127 units. X-ray flux levels showed an increase also, from B2.6 units on the 3rd to C1.1 by the 7th. The average was B6.6 units. Geomagnetic activity started at just unsettled levels but by the early hours of the 7th activity increased to major storm levels, though activity did not last long at that level. The Ap index on the 7th was 64 units. Again, by mid-morning the next day another CME arrived, this time stronger than the previous day. The Ap index on the 8th was 28 units. However, the Bz remained mostly positive, which explains the lower Ap figure for that day. The average was Ap 20 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 350 and 500 kilometres per second until the early on the 7th. Particle densities were low but increased on the 7th to 22 particles per cubic centimetre. From around 0900 on the 7th solar wind speed and particle data was corrupted due to the proton solar flare several hours earlier. Bz varied between minus 8 and plus 9 nanoTeslas until the 7th when fluctuations to minus 19 and plus 14 nanoTeslas on the 7th and between minus 13 and plus 41 nanoTeslas during the morning of the 8th. Bz data remained unaffected from the protons. For anyone wanting regular daily reports, then enter spots and flares as one word into a search engine. Aurora occurred on 50, 70 and 144MHz extending down to central England during the afternoon and evening of the 7th. MUFs were depressed by several MHz during that phase of the disturbance but recovered enough during the 8th for the 3C expedition to be workable on 28MHz.

And finally the solar forecast. With a very active region already in view solar activity this week is expected to up to moderate levels on some days and high levels on the occasional day. Solar flux levels should decline towards next weekend as the active region nears the north-west limb and rotates out of view. Levels should be around the 120's by then. Geomagnetic activity could increase around midweek when a small recurring coronal hole disturbance arrives. However, there is a good chance that a coronal mass ejection associated with any large solar flares could increase activity substantially within 24 to 48 hours after a large solar flares takes place. MUFs during daylight hours at equal latitudes should be around 27MHz for the south and 24MHz for the north. Darkness hour lows should be around 9MHz. A warning though, levels could be much lower on any days when high geomagnetic activity is taking place. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working

frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 0800 and 1100 hours. This path should be difficult to work this week.

And that's all for this week from the propagation team.

Next, the Local News:

NEWS FOR THE MIDLANDS

On Sunday 11 March Wythall Radio Club is running the Wythall Radio Rally. Details from Chris, G0EYO, on 07710 412 819.

On Sunday 11 March Midland Amateur Radio Society is visiting the Wythall Radio Rally. Details from Norman, G8BHE, on 07808 078 003.

On Sunday 11 March South Birmingham Radio Society is running a club stand at the Wythall Radio Rally. Contact Don, on 01214 581 603.

On Sunday 11 March Worcester Radio Amateurs Association is having a club stand at Wythall Radio Rally. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Monday 12 March Gloucester Amateur Radio & Electronics Society is operating in the new shack. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 12 March South Birmingham Radio Society is having a rally debrief and putting the shack on the air. Contact Don, on 01214 581 603.

On Monday 12 March Stratford Upon Avon District Radio Society is having a test equipment evening with John, G0JUQ. Contact G0CHO, on 01608 664 488.

On Tuesday 13 March Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 13 March Eagle Radio Group is having a talk on HF walking mobile by Charlie, G0CBM. Contact John, M6JMS, on 01754 873 926.

On Tuesday 13 March Lincoln Short-Wave Club is taking part in the 432MHz UK AC from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 13 March Loughborough & District Amateur Radio Club is holding its annual dinner. More information from Chris, G1ETZ, on 01509

504 319.

On Tuesday 13 March Worcester Radio Amateurs Association is having a talk. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

On Tuesday 13 March Wythall Radio Club is having a committee & post-rally meeting. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 14 March Derby RAYNET Amateur Radio Group is holding an open evening at Ascot Drive Fire Station Community Room. Contact Martin, G7MKS, via email to contactus@derbyraynet.co.uk.

On Wednesday 14 March Lincoln Short-Wave Club is having a social night and quiz from 20.15. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 14 March Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 14 March Telford & District Amateur Radio Society is holding its Main and Novice construction competitions. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 15 March Lincoln Short-Wave Club is running a club net on 145.375MHz from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 15 March Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 15 March South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 16 March Coventry Amateur Radio Society is holding a construction night. Contact John, G8SEQ, on 07958 777 363.

On Friday 16 March Melton Mowbray Amateur Radio Society is having a presentation on software defined radio by G8EBM. For more information contact Geoff, G3STG, on 01664 480 733.

On Friday 16 March South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

NEWS FOR THE NORTH OF ENGLAND

We start with advance notice that Southport and District Amateur Radio Club will be starting their next Intermediate course on 17 March, leading to the exam on 21 April. The programme is by distance learning plus tutor support, a practical training session and a theory revision session followed by the exam. The venue is Ormskirk, Lancashire. The club still has some places available and any Foundation licensees wishing to upgrade their licence should contact Rob Harwood, G0HRT, on 07413 937 075 or via rob@g0hrt.co.uk.

On Monday 12 March Angel of the North Amateur Radio Club is having a talk on 4G, the next generation cellular technology by Steve Townsley. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 12 March Sheffield Amateur Radio Club is holding an open evening as part of National Science Week. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 12 March Thornton Cleveleys Amateur Radio Society is having a demonstration on how to solder RF plugs by G8KBH. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 13 March Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 13 March Halifax & District Amateur Radio Society is on the air and continuing its Foundation course. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday 13 March Morecambe Bay Amateur Radio Society is having an HF & 70cm night, organised by Russ, M3LCZ. Contact Sheila, on 07867 516 836.

On Wednesday 14 March Hornsea Amateur Radio Club is participating in the 80m CC CW and having a talk by G0TPS. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 14 March Mid-Cheshire Amateur Radio Society is having a discussion on coax cable termination, led by G8XMZ. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday 14 March Sheffield Amateur Radio Club is taking part in the RSGB 80m Contest CW from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Wednesday 14 March Wirral & District Amateur Radio Club is having a talk on King Telegraph versus Rival Radio by Lisa Mossop, M0LSA. Details from Simon, G6XHF, on 01516 013 269.

On Thursday 15 March Keighley Amateur Radio Society is having a talk on Echolink by Steve, G8ZMG at Parkside Social Club, Butt Lane, Haworth BD22 8QJ. Details from Phil Hey, G4JHS.

On Thursday 15 March Wakefield & District Radio Society is holding a committee meeting and is on the air from the club shack. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 16 March East Cleveland Amateur Radio Club is holding a bring in something interesting evening.. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 16 March Tynemouth Amateur Radio Club is having a live flight simulator experience. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 17 March Wakefield & District Radio Society continues its Foundation course from 13:30. Contact Dr David Lockwood, G4CLI, on 07748

221 855.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 13 March Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 14 March Glenrothes & DRC is having a talk and demonstration on Slim Jim aerials by John, GM4AQ. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Wednesday 14 March Lothians Radio Society is having a talk on WWII utility radios by Peter Dick, GM4DTH and Colin Wright, GM4HWO. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 15 March Aberdeen Amateur Radio Society is having a talk by James MacKinnon, GM4EKC. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 15 March Paisley Amateur Radio Club is having a talk on APRS by MM6ANL. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

On Thursday 15 March Wigtownshire Amateur Radio Club is having a talk on 10 ways to make your station work better by Ian, GM3SEK. Details from Ellis Gaston, GM0HPK, 07979 692 580.

On Friday 16 March Cockenzie & Port Seton Amateur Radio Club is having a talk on planning permission by Len Paget, GM0ONX. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 12 March Coulsdon Amateur Transmitting Society is having a talk on junk box antennas by M0NDJ and M1MRB. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday 12 March Maidstone YMCA Amateur Radio Society is holding a junk sale. Admission is ?1 and all are welcome. More information from Howard Vicary, G0RJN, by email to hvicary@hotmail.com.

On Monday 12 March Norfolk Amateur Radio Club is running a club net from 19.30 on GB3NB. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 12 March West Kent Amateur Radio Society is holding a surplus auction run by Dave, G4OTV. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 13 March Bedford and District Amateur Radio is looking at antenna analysers, how they work and what they can and can't tell you. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 13 March Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 13 March Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 13 March Harwell Amateur Radio Society is having a talk on HF DX working by John, G3VPW. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 13 March Hilderstone Radio and Electronics Club Amateur Radio is working with the pupils of the Marlowe Academy from 10am to 3pm. Contact Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Wednesday 14 March Chelmsford Amateur Radio Society is holding a committee meeting. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 14 March Chesham & District Amateur Radio Society is holding a members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 14 March Harwich Amateur Radio Interest Group is holding an inter club quiz with Colchester & Clacton Radio Clubs. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday 14 March Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday 14 March Loughton & Epping Forest Amateur Radio Society is attending Loughton Town Council's Annual Town Meeting. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Wednesday 14 March Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Championship CW, holding an informal meeting making the workshop available. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 14 March South Essex Amateur Radio Society is having a talk by Dave, G4AJY, on frequency, wavelength and waveform. Details from Dave, G4UVJ, on 01268 697 978.

On Wednesday 14 March Southgate Amateur Radio Club is holding a surplus sale. Contact Mr. D. F. Berry, by email to G4DFB, dfberry@eggconnect.net.

On Thursday 15 March Bredhurst Receiving and Transmitting Society is having a talk on model radio control techniques technologies. Details from Andrew, M6AAE, on 07403 325 075.

On Thursday 15 March Chelmsford Amateur Radio Society starts its Intermediate course. Contact Martyn, G1EFL, on 01245 469 008.

On Thursday 15 March Colchester Radio Amateurs are having a self training evening. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday 15 March Cray Valley Radio Society is planning its Olympics station. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 15 March Horndean & District Amateur Radio Club is having a talk on forgery in British currency by Mr Richard Burton. Contact Stuart, G0FYX, on 02392 472 846.

PRM12WT is Open for Comments

Posted: 11 Mar 2012 01:17 PM PDT
http://forums.qrz.com/showthread.php?337613-PRM12WT-is-Open-for-Comments&goto=newpost

Dear friends,

PRM12WT which is a Petition for Rule Making regarding PRB-1 extension using a 14th Amendment argument needs your comments and support.

Even if your comments are very short, it will be helpful to show community interest. The Petition is very difficult to find on both versions of the

FCC website, however you can locate it using google and searching for PRM12WT. The link below will bring you right to the comment area on

the FCC site for this petition. You then click on "Submit a filing on PRM12WT" and you can make your voice heard.

Please feel free to forward this to anyone or post it elsewhere.

Sincerely,

Leonard J. Umina

W7CCE

//
OLTMS LEO-1 Flight Report

Posted: 09 Mar 2012 07:56 AM PST
http://forums.qrz.com/showthread.php?337279-OLTMS-LEO-1-Flight-Report&goto=newpost

The flight of LEO-1 was a great success. Aside from technical difficulties, the launch went well and was a lot of fun for all. The flight reached a maximum altitude of 97,000 which was verified by a chase team member from a direct packet received directly on his HT. The flight was not that fast going up, but it was a scorcher on its way down. It was launched from Gluckstadt, MS and landed near Ashville, AL on a fighting bull farm.

All equipment and science projects were accounted for since it landed in a pine tree at the edge of a pasture. The pine tree was about 100 feet tall

and was hanging from about the 70 foot level. Luckily a friend, Shane-N4XWC, who likes to climb trees was on one of the chase teams and was there and helped recover it all. There were many hams involved in the chase teams. Listed below are some of the individuals and hams that contributed to this extraordinary event.

(Team 1) Jim Coker(AE5SK), Jim Rapp(WS7EOC);

(Team 2) Bill Richardson(N5VEI), Coley Richardson, Martin McCandless, Adam Lewis(KF5JSY)

(Team 3) Shane Wilson(N4XWC) and friend

(Team 4) Bobby Robinson(Science Teacher) and daughter

(Team 5) Zac Hollingsworth W4ZAC and Brady Bunt KF4YPT

(Team 6) Tom Randle is (W4BM)

All science projects were accounted for and are being analyzed at this time. We also duplicated a phenomenon that we got from an experiment last year. The phenomenon happened when we sent up a roll of film in a plastic roll container. Last year, the film was developed and a few of the frames had orange and red flame images across them and some had an ethereal blue flame or haze across them. No scientist that we have talked to has been able to identify what particle might have collided with the film or the phenomenon. This year the same thing happened on one frame of the film. We took great measures to ensure that there were no accidental exposures. The phenomenon around the third frame in from the end this year. Once all science experiments are fully completed, I will have a report available.

On a final note, we are now in 2nd place for VHF/UHF telemetry reception distance at ARHAB.org. They track worldwide amateur radio ballooning records. A single packet was received in North Carolina when the balloon was at or near peak altitude. It traveled 512 miles. Due to a weather front in the area it provided perfect conditions for VHF propagation. The 50mw voice beacon was heard near the balloons peak from Sumrall, MS. Jimmy Ready (N5LRQ) trained his beams on it and was able to make out a portion of the secret message. Overall the balloon was a great success, and next year□s launch is already being planned. A slideshow of all the pictures can be found at www.tinyurl.com/otmsradio under the photo gallery.

73,

Bill Richardson, N5VEI

TRIATHLON DX Contest

Posted: 11 Mar 2012 01:52 PM PDT
http://forums.qrz.com/showthread.php?337616-TRIATHLON-DX-Contest&goto=newpost

Triathlon DX Contest announcement

It all started in August of 2011. That was about when it occurred to Mike, SV5BYR that a big Greek Contest was missing from international Ham Radio Contest Calendar. By the end of September this idea became mature and so the "Triathlon" was born! A triathlon is a multi- sport event involving the completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word. We had to change a bit the name to Triathlon Dx Contest to match our activity. Actually, trying here to simulate the original Triathlon athletic event, we involved three major ham radio modes, SSB, CW, RTTY. It will be a 24 hour non-stop event divided in three sections, each one devoted to a different mode. There are some tentative rules of the contest that you can take a look. It will take place every Saturday, the 1st full weekend of February, debuting on 02-02-2013.

After all, what makes this particular contest unique is the special gift for the winner! (take a look to the prize page)

In this point we have to mention all the Greek amateurs who are working to make this event alive: SV1DPI, SV1NK, SV2AGW, SV2DCD, SV5BYR, SV7JAR, SV8CS, SV8RX, SV9GPV, SV9DJO

There is still a lot of work to be done and more details to be announced.
Stay tuned!

DX Contest / QSO party rules

Posted: 11 Mar 2012 09:38 AM PDT
http://forums.qrz.com/showthread.php?337564-DX-Contest-QSO-party-rules&goto=newpost

Being relative new to Ham life (Jan 2012), I am unfamiliar with DX Contest and QSO party rules. If I don't plan to submit a log for the contest, is it OK for me to answer the CQs? Or, to put it another way, if I am not a contest participate, is it OK for me to answer the CQs? Any info and/or guidance is appreciated.

RAC Bulletin 2012-017E - New ARES logos
2012-03-11

The attached ARES/SURA logos (see url below), designed by Tyler Tidman VA3DGN are now available for use by all ARES/SURA members and groups. The black and yellow will be used on a "go forward" basis for caps, shirts, crests etc, while the black and white lends itself well when used in print form. Making these logos available in both official languages illustrates the RAC Field Organization's desire to grow the ARES network in all areas of Canada, and I would like to sincerely thank Tyler for his assistance in bringing these to you.

73,

Doug Mercer VO1DTM/VO1DM CEC
Chief Field Services Officer

Amateur Radio Groups Given Donation:

Posted: 11 Mar 2012 06:28 PM PDT
http://www.eham.net/articles/27894

Amateur radio operators in Berks County will have improved long-range capabilities to help civil authorities with auxiliary communications thanks to a donation from the corporation that owns the Titus Station power plant in Cumru Township. GenOn Energy has donated $3,600 to the Amateur Radio Emergency Service, known as ARES, and Radio Amateur Civil Emergency Service of Berks County. The latter is the local club of amateur radio enthusiasts. ARES operates during emergencies under the auspices of the Federal Emergency Management Agency and consists of amateur radio operators throughout the United States.

//
Home Sweet Ham: Good Conditions for Ham Radio Sways Couple to Buy ND Home:

Posted: 11 Mar 2012 06:28 PM PDT
http://www.eham.net/articles/27893

FARGO, N.D. -- James Stiles doesn't hunt, fish, bird watch or yet dig for dinosaur bones -- the typical hobbies that draw people to North Dakota. He's moving to the state to increase his stock as a ham radio operator. The 57-year-old Stiles, retired for five years from a career as a computer whiz with the U.S. Department of Defense, recently bought with his wife Sue a house sight unseen -- on the Internet auction site eBay, no less -- in the small southeastern North Dakota town of Edgeley. The town is not named for being on the edge of the world. But Stiles hopes he can hear it from there. Yes, the price was right, the state is safe, the people are friendly, the town has a welcoming website. But perhaps most importantly, there's plenty of room for a 40-year amateur radio operator to become famous. "Yes, I am a ham radio operator. This really was a factor," Stiles said in a phone interview from Myrtle Beach, S.C., where he's spending the winter. Stiles said the state is ideal for his hobby because there's less congestion on the radio frequency and the Aurora conditions, or Northern Lights allow for communications over greater distances. In addition, no place is the best place for a ham radio operator, many of whom compete to find people in obscure places.

S555E & S55CERKNO Special Event Callsign throughout 2012

Posted: 13 Mar 2012 03:34 AM PDT
http://forums.qrz.com/showthread.php?337853-S555E-amp-S55CERKNO-Special-Event-Callsign-throughout-2012&goto=newpost

Members of the Radio club Cerkno, S50E will be active as special event callsign S555E and S55CERKNO throughout 2012 activity is to celebrate the 55th club foundation anniversary. A special full color four face folded QSL will confirm each contact via the bureau in early 2013. S555E and S55CERKNO logs are also uploaded on ARRL LoTW on a regular basis please feel free to match your log for digital certification. Online logs can be found at club website http://www.s50e.si. For those who want to send card direct please send SASE with 2$ to cover return postage to Radioclub Cerkno, P.O. BOX 16, 5282 Cerkno, Slovenia with priority return when getting cards from the printer. Cards with insufficient postage or no return envelope will be returned via the QSL bureau.

CU bands, Dan S50U

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
05 - 11 March 2012

Solar activity ranged from low to high levels during the period. Activity was at high levels during 05 - 07 and 09 - 10 March due mostly to a series of long-duration major flares from Region 1429 (N18, L=301, class/area Dkc/1270 on 07 March) which included an X1/2b at 05/0409Z, an X5/3b at 07/0024Z, an M6 at 09/0353Z, and an M8 at 10/1744Z. All four flares were associated with Earth-directed CMEs. Region 1429 was large and magnetically complex during the period, exhibiting a beta-gamma-delta configuration with multiple deltas. It appeared to slowly decay during 09 - 10 March, but retained much of its magnetic complexity. Region 1430 (N20, L=315, class/area Dai/200 on 07 March) produced an X1/Sf at 07/0114Z during a period of rapid development. Region 1430 appeared to be in a gradual decay phase during 08 - 10 March.

The period began with a greater than 10 MeV proton enhancement in progress. This increase from normal backgrounds was associated with a long-duration M2/1n flare that occurred prior to the period and sourced from Region 1429. The flux enhancement continued until the onset of greater than 100 MeV and greater than 10 MeV events early on 07 March associated with the X5/3b flare at 07/0024Z. The greater than 100 MeV event began at 07/0405Z, reached a maximum of 69 pfu at 07/1525Z, and ended at 10/1650Z. Also, a greater than 10 MeV event began at 07/0510Z, reached a maximum of 6530 pfu at 08/1115Z, and was in progress at the close of the period.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal to high levels during 05 - 06 March. Flux readings were unreliable during 07 - 09 March due to proton contamination. Fluxes were at moderate to high levels on 10 and 11 March.

Geomagnetic field activity was at quiet to severe storm levels during the period. Quiet to unsettled levels occurred during 05 - 06 March with brief minor storm periods observed at high latitudes.

Activity increased to unsettled to major storm levels on 07 March following a geomagnetic sudden impulse (SI) at 07/0427Z. The SI measured 20 nT at the Boulder magnetometer. This enhanced activity was due to a CME arrival associated with the X1/2b flare on 05 March. Quiet to minor storm levels occurred on 08 March, with major storm periods at high latitudes, as another CME, associated with the X5/3b on 07 March, impacted the geomagnetic field with an SI, as measured by the Boulder magnetometer of 59 nT, at 08/1105Z. Activity increased to quiet to severe storm levels on 09 March due to sustained southward IMF Bz combined with increased IMF Bt as CME effects persisted. Activity decreased to quiet to minor storm levels with major storm periods at high latitudes on 10 March as CME effects gradually subsided. A return to quiet levels was observed on 11 March.

Forecast of Solar and Geomagnetic Activity
14 March - 09 April 2012

Solar activity is expected to be at low levels during 14 - 16 March with a chance for M-class activity from Region 1429. Activity is expected to decrease to predominantly background levels during 17 - 27 March, following the departure of Region 1429 on 15 March. An increase to low levels with a slight chance for M-class activity is expected from 28 March through the end of forecast period, as Region 1430 returns on 28 March and Region 1429 returns on 29 March.

A chance exists for another proton event from 14 - 16 March, as Region 1429, rotates off the visible disk. No events are expected until Region 1429 returns on 29 March, when a slight chance for another event from this proton producing region exists through the end of the forecast period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels during 14 - 19 March and 29 March - 03 April. Normal to moderate flux levels are expected during 20-28 March and 04 - 07 April.

Geomagnetic field activity is expected to be at predominantly quiet levels from 14 - 16 March. Activity is expected to increase to quiet to active levels during 17 - 18 March due to recurrent coronal hole high-speed stream effects. Activity is expected to decrease to mostly quiet levels during 19 - 27 March. Quiet to unsettled levels are expected during 28 - 31 March as another coronal hole high speed stream becomes geoeffective. A return to quiet levels is expected from 01- 02 April. Another increase to quiet to unsettled levels is expected on 03 - 04 April as a coronal hole high speed stream becomes geoeffective. A return to predominantly quiet levels is expected to prevail for the remainder of the period.

On the Record With Cornel Topala, W9CA:

Posted: 12 Mar 2012 05:43 PM PDT
http://www.eham.net/articles/27897

Growing up in Romania, Cornel Topala fell in love with amateur radio. With that love came a desire to be able to speak and broadcast freely -- something he knew he could not do under the Communist regime of Nicolae Ceausescu. He immigrated to the United States in 1980 at age 21, got married and started his own business, CorTek Endoscopy, which builds medical equipment. His Wauconda business houses the radio equipment for W9CA, or Whiskey Niner Charlie Alpha in ham radio speak, which is the name of the local ham radio operators' club. The club has a national reputation because it frequently wins its class in the American Radio Relay League's annual Field Day competition. The competition, meant to see how many contacts a group can make worldwide in 24 hours, has a very practical purpose. Ham radio operators are a critical backbone for emergency response when disaster knocks out phone service and other communications.

//
'We're The Eyes And Ears':

Posted: 12 Mar 2012 05:43 PM PDT
http://www.eham.net/articles/27896

There is a not-so-secret force patrolling area events in neon vests, helping to keep the public safe in case of emergencies. The Chautauqua Amateur Radio Service is a 28-member strong group of volunteers that can be seen at many area events, including Saturday's DJDC St. Patrick's Day Parade and The Resource Center's 3-on-3 basketball tournament. "We set up a perimeter of emergency communications. Basically, we're the eyes and ears for the police, the fire departments," said Dan Trippy, president of the Chautauqua Amateur Radio Service. If the group spots anyone in need of assistance at an event, they are able contact the proper authorities through their radios.

DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3D2, FIJI, OC-156
Yoshida,JA1NLX, will show up from Yageta Island (OC-156) as 3D2YA
mainly in CW and some RTTY/SSB on 80-10m from Mar 15-21. His equipment
includes a FT-857D, a vertical dipole Bravo-5 by N6BT for 14-28 MHz and
a longwire for the other bands. See: http://ja1nlx-aki.blogspot.com
QSL via homecall, LoTW; he confirms every QSO via bureau.

4K, AZERBAIJAN
Axel,DL6KVA, will be QRV again as 4K0CW from QTH of Vlad,4K9W, in Baku
working only in CW from Mar 15-20. He will join the Russian DX Contest.
QSL via DL6KVA, LoTW.

6W, SENEGAL
Mike,RA9FW, and Igor,UA9CDC, plan to become active as 6V7Z from the
"Le Calao Resort" from Mar 16-28 including the Russian DX Contest and
the CQ WPX SSB Contest. QSL via RA9FW.

7P, LESOTHO
Peter,EI7CC, will be QRV as 7P8PB holiday style from Mar 15 till Apr 3.
The log will be uploaded to the Club Log daily. QSL via homecall, LoTW.

9Q, DEMOCRATIC REPUBLIC OF CONGO
Barney,ZS6TQ/ZS4U, announced to be active as 9Q6/ZS4U between Mar 14
and Apr 8. Due to his QRL he will be active mainly from 1300-1500 UTC
in SSB, CW and PSK31 on 40m/20m/15m/10m/6m. QSL via K3IRV.

Sergiy,UV5EVJ (ex 5X1VJ), will be QRV from Lubumbashi using the club
callsign of the "Amateur Radio Association of the Democratic Republic
of Congo" (ARAC) 9Q0HQ/7 in CW and SSB on 80m-10m until the end of Mar.
Sergey is part of the UN mission MONUSCO. QSL via UV5EVJ.

A2, BOTSWANA
Frosty,K5LBU (A25CF), Keith,VE7MID (A25KW), Don,VE7DS (A25DS), and

Joel,N5JR (A25JR), are planning to visit the Lotsane Safari Lodge
from Mar 18-27. They will join the upcoming WPX SSB Contest as A25HQ
and use three stations, a log-per antenna plus a wire for 160m,
an Inverted L- and a Beverage antenna. QSLs via homecalls.
See also: http://www.lotsane.com

CE, CHILE
Esteban,XQ7UP, will be QRV in holiday style from Coyhaique in Patagonia
mainly in SSB, RTTY and PSK31 on the HF bands from Mar 17-25 and also
in the WPX SSB Contest. QSL via homecall.

CN, MOROCCO
Florent,F4CYZ, is signing CN2YZ from Tanger mainly during the weekends
until the end of the year. QSL via IZ8CCW. http://www.mdxc.org/cn2yz

CT9, MADEIRA, AF-014
Walter,CT9/DJ6QT, Uwe,CT9/DL8OBF, Alex,CT9/RA1AGL, Elena,CT9/RC5A,
Andrey,CT9/RM2M, Paul,CT9/RN3A, Sergey,CT9/UA1ANA, and Gena,CT9/UA9MA,
are working from Santana (AF-014, DIP MA-001, PIP MD-001, WLOTA 0053)
till Mar 26. They will join the WPX SSB Contest as CQ3L (QSL via DJ6QT)
in the M/2 category. QSLs via homecalls.

D4, CAPE VERDE, AF-086
Rick,N6KT, will be active as D44TRS from Monte Verde near Mindelo on
Ilha do Sao Vicente (AF-086, WLOTA 1976, Loc HK76mv) from Mar 17-29.
He will sign D4A in the WPX SSB Contest. QSL via KU9C.

FO, FRENCH POLYNESIA, OC-066
Hiro,FO/JI1JKW, is working from Rangiroa (OC-066) from Mar 18-22.
QSL via homecall.

FW, WALLIS ISLAND, OC-054
Patrice,FW/F1GHY, is running 100 watts into a longwire on 20m SSB
from Wallis Island (aka: Uvea, OC-054, DIFO FW-001, WLOTA 0389).
The length of his stay is not known. QSL via homecall.

HR, HONDURAS, NA-057
Michael,DF8AN, is activating the islands Roatan (NA-057/WLOTA 1671)
and Utila (NA-057) in CW as HR9/DF8AN until Mar 26. QSL via homecall.

IT, SICILY, EU-025
IT9HBT, IT9GNG, IT9FXY, IT9ECQ, IF9ZWA, IW9FRA, IW9GTD, IW9HII and
IT9RDZ will join the WPX SSB Contest as II9K in the M/S HP category.
QSL via IT9HBT.

JW, SVALBARD, EU-026
Magne,LA2XNA (JW2XNA), and Jon,LA8HGA (JW8HGA), will be QRV on 160m-10m
but mainly on the highbands from Mar 16-20. Listen for JW8HGA in CW and
for JW2XNA in SSB and PSK31/63. QSLs via homecalls.

KH9, WAKE ISLAND, OC-053
Colin,KH9/WA2YUN, is working on the HF bands (incl. 160m/80m/6m) for
the next year. QSL via K2PF, unfortunately only direct.

LY, LITHUANIA
Jonas,LY5A, uses the special prefix LY22 for the first time till Apr 11
signing LY22A to mark the 22nd anniversary of the new Lithuania.
QSOs are valid for the LY WPX award and the Baltic States WPX award.
QSL via LY5A.

P4, ARUBA, SA-036
John,W2GD, will be QRV as P40W from Santa Cruz on Aruba (SA-036,
WLOTA 0033) from Mar 20-27 including the WPX SSB Contest.
QSLs unfortunately only direct via N2MM or via LoTW.

PY0/S, ST PETER AND ST PAUL ROCKS, SA-014
The "Southgate Amateur Radio News" states that the Brazilian government
has forbidden all amateur radio activities from this archipelago.
The "Brazilian Amateur Radio League" and other DX groups are already
working on this issue.

S9, SAO TOME, AF-023
Matt,K0KKO, and Ed,K0GUV, plan to become active as S92DX, S9CW and S9SX
from Ilheu das Rolas (AF-023) on HF, 6m (50105 kHz/SSB; 50105,7 kHz/CW)
and via EME from Mar 16-23.
See also: http://www.k0kko.net/pb/wp_5bd6e10c/wp_5bd6e10c.html

V5, NAMIBIA
Mathew,V5/DJ2HD, will be QRV again in CW/SSB/RTTY on 160m-10m (with
focus on 160m/80m/40m and RTTY) from Mar 17-27. QSL via homecall.
Winfried,DK9IP, Suad,DK6XZ, and Tobias,DH1TW, want to join Mathew
as V55V in the WPX SSB Contest. QSL for V55V via DJ8VC.
See also: http://www.qrz.com/db/dj2hd

David,GI4FUM, his XYL Gillian,GI8MIV, Richard,GI4DOH, and Kalle,DM3BJ,
are visiting Andre,V51B, in Oranjemund from Mar 14-27. They will use a
special contest call in the WPX but will sign V5/homecalls before and
after the contest (when they are not travelling around).

VE, CANADA
The special callsign XL3T remembers the Titanic disaster until the end
of April. QSL via VE3AT.

XV, VIETNAM
Retu,OH4MDY, is working as XV2RZ on 6m-80m especially in digital modes
between Mar 14 and Apr 16. QSL via homecall. See http://www.clublog.org

XW, LAOS
Alex,XW3DT, wants to join the Russian DX Contest as single op on 10m.
QSL QSLs unfortunately only direct via: Alex Sinchukov, XW3DT, SKY,
PO Box 7374, Vientiane, Laos (see also QRZ.com).

EUROPE Award Honor Roll lists a new record
Hajo Weigand,DJ9MH, has set up a new record in the Honor Roll of the
EUROPE Award with 2110 points. He is followed by HB9BOS (1978 points)
and DL7BQ (1894 points). The EUROPE Award Honor Roll is listed on the
website of the DARC Committee DX and HF Contesting.
The EUROPE Award is awarded for working amateurs in as many European

countries on different bands in different calendar years. There are no restrictions as to bands or modes.
See also: http://www.darc.de/referate/dx/diplome/europa-diplom/#english

True Ham Spirit
Yuri,UT1FG, was recently active as UT1FG/mm via satellites and on 6m from several wet grids. He lost his 12V power supply after he has left the port in Nicaragua. Captain Manolis Joannou,HP2ECP, gave him a spare supply when they met at sea.
See the full story at: http://www.papays.com/sat/power/ut1fgpanama.html

OPs wanted
There are still some places open on the DXpedition to Conway Reef from Sep 24 until Oct 5. If you are interested please contact Dragan,YT3W: dragan.acimovic@gmail.com
See also: http://www.yt1ad.info/3d2c

Approved for DXCC award
Following DXpeditions were approved for DXCC credit:
Somalia, 6O0M, 2011
Burundi, 9U3TMM, December 2011 and January 2012.
Afghanistan, T6BP, since 2011.
If you got one of these cards rejected before please send an e-mail to: bmoore@arrl.org

LoTW upload
Jacques,F1VEV, is uploading his logs of TR8CJ (1988-1990) and V85CJ (1990-94) to the LoTW.

Log online
Fred,IK7JWX, has put the logs of his PR2I DXpeditions to SA-024 and SA-071 online. You can send him an e-mail to: lik7jwx2003@yahoo.it
See also: http://www.i8lwl.it

SILENT KEY
The legendary DXpeditioner Ron Wright,ZL1AMO, died on March 6, at the age of 75. Since the late 1970s he has made well over 100 DXpeditions in the Pacific region, including 3D2RW, 3D2RW/R, 5W1CW, C21/ZL1AMO, A35EA, FW0BX, H44RW, T28RW, T28RW, T30BH, VR6HI, YJ0RW, ZK1CQ (South), ZK1CQ (North), ZK1MB (North), ZK2RW, ZK3RW, ZL7AMO, ZL8AMO and ZL9AMO. Our condolences and sympathy go to his family and friends. We do not want to be sad that we lost him, but grateful that we could get to know him as a radio friend. We will always keep him in the highest esteem.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 15 YL-Aktivitaets-Party
Mar 17 Mecklenburg-Vorpommern-Contest
Mar 17 AGCW-DL VHF/UHF Contest
Mar 17/18 DARC HF-SSTV-Wettbewerb
Mar 17/18 Russian DX Contest
Mar 17/18 CQIR-Ireland Calling
Mar 17-19 BARTG HF RTTY Contest
Mar 24/25 CQ WPX SSB Contest

Worldwide Iron Ham Contest
The Brazilian "Araucaria DX Group" (ADXG) announced a new contest for
Jun 9/10. See: http://www.araucariadx.com/ih

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AS-175 (new), VU, Gujarat State West group: Members of the Thane Amateur
Radio Association (TARA) and the Amateur Radio Society of India (ARSI)
will activate Bet Shankhodhar Island in the Gulf of Kutch as AT2DW for
the very first time from Mar 15-30. They plan to use two stations in
SSB, CW and digital modes on 80m-10m. QSL via VU2SWS (bureau/direct).
An OQRS for direct and bureau QSLs will be set up, too.

EU-042, DL, Schleswig-Holstein State North West group: Ric,DL2VFR, and
some friends will use the special callsign DM50IOTA (marking the
"IOTA 50th Anniversary Marathon 2012/2013") in CW, SSB, RTTY and PSK31
from Hallig Langeness (GIA N-19, DLFF-013, WLOTA 1245) from Mar 16-18.
QSL via DL2VFR (bureau/direct).

NA-189, XE1, Nayarit/Jalisco State group: Enrique,XE2AA, and nine other HAMs
of the "Aguascalientes Amateur Radio Club" are going to hit the bands
with three stations in SSB, CW and digital modes signing XF1AA from
Isla Isabela (Loc DL71BV) on Mar 16-21. QSL via IT9EJW.

OC-221, YB8, Kai Islands: A group around Joppy,YB8XM, plans to activate the
very rare Ohoiew Island (Loc. PI64HH) from Mar 20-27. Listen for YB8Y
in SSB/CW/RTTY on 160m-6m. They will join the WPX SSB Contest as M/2.
QSL via YB1GJS (bureau/direct).
More details can be found at: http://yb8y.com

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 14, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- March Radio Mania - Russian DX Contest
- Everywhere Rare - CQ WPX SSB Contest
- Three-Way Contests Around the World
- ZL1AMO and W1BIH/PJ9JT - Silent Keys
- Our Numbered Day
- Using HFTA At Your Location
- Locusts and Ohio
- Note Names of Noise
- Scheme-It Online Schematic Capture
- Two Score and More

NEW HF OPERATORS - THINGS TO DO

The Russian DX Contest is rapidly becoming a popular spring-time DX
contest and counts for WRTC scoring points, too. Then on the month's
last weekend, put your call on the air as a sought-after prefix in the
CQ WPX SSB contest! You can also work on your WAS by chasing the OK,
VA, and ND QSO Parties.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

No discombobulations were reported in the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

March 17-18

- CWops Monthly Mini-CWT Test (Mar 14)
- Feld-Hell St Patrick's Day Sprint
- 10-10 Mobile QSO Party
```

- BARTG HF RTTY Contest
- CQIR - Ireland Calling
- Russian DX Contest
- Oklahoma QSO Party
- Virginia QSO Party
- North Dakota QSO Party
- Run For the Bacon--CW

March 24-25

- CLARA and Family HF Contest (Mar 20)
- NAQCC Monthly QRP Sprint--CW (Mar 22)
- CQ WPX SSB Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The threes are cleaning up in operating events lately and I don't mean Maryland-DC, Pennsylvania, and Delaware. The ARRL Triple Play award <http://www.arrl.org/triple-play> and other multi-mode contests have now been followed by the World Wide Iron Ham Contest <http://www.araucariadx.com/ih/> from Brazil and the Greek Triathlon DX Contest <http://triathlon-dx-contest.blogspot.com/>. Limber up the fingers to type, squeeze, and send in all three modes! (Thanks, Kostas SV1DPI and Oms PY5EG)

The 16th Annual SVHFS Conference <http://www.svhfs.org/conference.html> will be held on April 20-21 in Charlotte, NC. There will be an antenna gain "shootout" and a noise figure test on Friday. ARRL President, Kay Craigie N3KN will be the featured speaker on Friday. There are plenty of technical and operating presentations, commercial vendors, plus a flea market on Friday evening. The Saturday banquet keynote speaker will be Nobel laureate Joe Taylor K1JT. (Thanks, Jim W4KXY)

Many clubs are looking for ways to help their newly-licensed members become active and learn HF operating skills. The upcoming ARRL Rookie Roundup <http://arrl.org/rookie-roundup> (April 15th) has added the Multioperator category along with Team competition to help clubs do just that. Set up an all-day operating event, activate the club station, arrange for an open house - whatever is best for your club. Challenge another local club for bragging rights - competition is fun! As an extra bonus, you'll be training and recruiting a crop of brand-new Field Day operators, too!

The tongue-in-cheek suggestion by Guy N7ZG of using the Q signal QTK to tell a pileup of spot-clickers to spread out got a lot of interest. I found, however, that QTK is actually a real Q-signal and means "What is the speed of your aircraft in relation to the surface of the Earth?" (Upon which I naturally wondered, "Laden or unladen?" but I digress...) Doing a little research on Q codes <http://www.kloth.net/radio/qcodes.php>, I found the far better amateur net operations Q signal, QNY, which means "Shift to another frequency". Seriously - why not use QNY to mean "spread out"? Even if no one knows

exactly what it means, it will confuse enough of the stations to let you work a few of the remaining callers.

K5RQ eloquently compared ham radio to Facebook as the "original social network" in this Sarasota SRQ article <http://www.srqmagazine.com/JMailer/SRQDailyV2LeftContent.cfm?conID=4554&masID=2748>. Come to think of it, QSLing is a lot like collecting friends! (Thanks, Dan K1TO)

Richard Krajewski WB2CRD authors a regular blog for EE Times called "The Noble Profession <http://www.eetimes.com/electronics-blogs/4211400/The-Noble-Profession>". Recently, he penned the article "Who Needs Career Fairs When We Have Best Buy? <http://www.eetimes.com/electronics-blogs/pop-blog/4237093/Who-needs-career-fairs-when-we-have-Best-Buy->" that takes a look at how kids get interested in technology. His key point is that you give them access and let them play with it!

I wonder if this speech-squashing gun <http://www.physorg.com/news/2012-03-speechjammer-gun-quash-human-utterances.html> would work on an out-of-control pileup? (Thanks, Tom K1KI)

Contest logging for the blind is a lot easier if they can use software that is friendly to screen reader programs such as JAWS <http://www.freedomscientific.com/products/fs/jaws-product-page.asp>. One such program is White Stick Log <http://www.easilog.co.uk/whitestick.htm> from the UK. (Thanks, Mike NF4L)

This nice note was received by Tim K3LR after the ARRL DX Phone contest, "hi my name is jake or m6jbr i made contact with you today at 6:55 GMT and i thought that i would give you a bit more info i am 14 i have been licenced since september 2011 you are the 3rd hf contact and i was using a ts 440s from the south west of england a place called bristol nice talking to you 73s" Welcome to the world of HF radiosport, Jake! It's good to see enthusiastic operating from our newest hams.

Pete N4ZR writes in to let us know of an updated article on the Reverse Beacon Network (RBN) website called "What Does a Flare Look Like? <http://reversebeacon.blogspot.com/2012/03/what-does-fglare-look-like.html>". While you're there, you might also be interested in the article on the listings of RBN stations and use the Options menu to display a real-time map of stations the RBN is hearing. It's so fascinating that you need to remember to get on the air, too!

NOAA has released a test version of Ovation <http://helios.swpc.noaa.gov/ovation/> - a new space weather product that provides a real-time estimate of the auroral intensity, including that of the aurora australis at the South Pole. The program also shows where the aurora is expected to be visible. This was an interesting

site over the past week as major flares and coronal mass ejections (CMEs) were occurring. (Thanks, John N2NC)

NASA invites you watch the 2012 Exploring Space Lectures held at the National Air and Space Museum in Washington, D.C. live on the web:

- Big Bang for the Buck: Cosmology from WMAP <http://www.nasm.si.edu/events/eventDetail.cfm?eventID=3725> (March 22)
- The Little Satellite That Could <http://www.nasm.si.edu/events/eventDetail.cfm?eventID=3726> (April 11)
- Gamma Ray Bursts and the Birth of Black Holes <http://www.nasm.si.edu/events/eventDetail.cfm?eventID=3727> (May 16)
- Seeking Planets Like Earth <http://www.nasm.si.edu/events/eventDetail.cfm?eventID=3728> (June 5)

(From the AMSAT <http://www.amsat.org/> ANS-071 bulletin)

VHF+ DXers may be interested in this article on the new Sub-millimeter Array <http://www.cfa.harvard.edu/sma/> of radio telescopes atop Mauna Kea in Hawaii. The array is the most accurately guided RF antenna in the world and receives 180 through 700 GHz with a beam width of less than one arc-second. No gain figures are reported but I imagine there are a lot of zeroes involved. (Thanks, Jeremy W7EME)

Can the astronauts on the ISS see you shining a light at them? The AMSAT ANS-071 bulletin reports that "On March 4, about 65 amateur astronomers were in position at the Lazano Observatory in Springbranch Texas (near San Antonio). They turned on searchlights and waited as the ISS was set to make an appearance in the sky. Astronaut Don Pettit, KD5MDT had no trouble seeing the flashes." Watch the video <http://tinyurl.com/ISS-Flash> and take a look at this light-frequency QSO.

Legendary DXpeditioner and keen CW operator Ron Wright ZL1AMO died last week at the age of 75. Ron put many Pacific multipliers in many logs - in and out of contests. A cab driver who enjoyed sharing his holidays with all of us, Ron's last expedition was to Fiji in 2002. (Thanks, Jess W6LEN)

Another giant was added to the list of Silent Keys, as well, as John Thompson W1BIH died in the month of his 97th birthday. John took to the air from Curacao as PJ9JT in the 1970s and was the first to construct a large contest station on the Dutch islands off the northern coast of South America. His signals were legendary and so were the scores from the station you now know as PJ2T. (Thanks, Jack W1WEF)

Web Site of the Week - Happy Pi Day <http://www.piday.org/>! (3.14) Have an irrationally transcendent day!

WORD TO THE WISE

Checklog - if you realize you've operated in some way that makes you ineligible to participate in the contest, submit your log as a

checklog. That's an option in the Cabrillo format - place the line CATEGORY-OPERATOR: CHECKLOG in the log file's header section. That way, your contacts can still be used for log checking and the sponsors appreciate that.

==> SIGHTS AND SOUNDS

The Northern California Contest Club (NCCC) has published a video <http://nccc.cc/misc/HFTA.wmv> of program author Dean N6BV giving tips on using his HFTA terrain analysis program. (Thanks, Jim K9YC)

Take a look at a great YouTube video on the RZ9OZO family club station <http://www.youtube.com/watch?v=qubu0t-J7F4&feature=results_video&lr=1&ob=0> and some amazing 4 and 6-year-old operators. You want young operators? Here they are! (Thanks, Yuri VE3DZ)

While you're enthusing about the new operators appearing on the air, Mauro PP5MCB just posted this video of 13-year-old Vitor, PU5DCB <http://www.youtube.com/user/pp5mcbpp5mcb/videos> operating in the ARRL DX Phone contest. Vitor was operating in the Single-band, 15 meter category.

The N1MM Logger Overview Webinar has been posted on the Potomac Valley Radio Club <http://www.pvrc.org/> (PVRC) website under the "Recorded Webinars" link. As a reminder, Part 2, Multi-Op & Digital Contesting is also available. PVRC President, Ken K4ZW also wishes to thank Pete N4ZR, Rich VE3KI, Steve N2IC, and Larry K8UT for putting together this series of presentations.

How tall is your tower? Not as tall as the Tokyo Sky Tree <http://news.cnet.com/8301-17938_105-57388126-1/japan-builds-tokyo-sky-tree-worlds-tallest-tower/>
- the world's tallest free-standing broadcast tower!

Here's what a solar flare sounds like - the M8-class flare that hit Earth on March 10th was captured in this audio recording of the blast <http://spaceweather.com/images2012/10mar12/m8.mp3?PHPSESSID=fgqd0hlg48je589pr3bptsvcr5> by an amateur astronomer in New Mexico.

==> RESULTS AND RECORDS

The results of the 2011 Ohio QSO Party are now available at the Ohio QSO Party web site <http://www.ohqp.org/>. (Thanks, Jim K8MR, OhQP Chairman)

Sponsor, Rick K6VVA reports that the 2012 Locust QSO Party (LQP) final results <http://www.k6vva.com/lqp> have been posted and include a first-ever surprise 3-way tie in one category, a special poem offering by N6ZFO, and a few other unusual Soapbox Comments this year.

OPERATING TIP

A reminder - asking to be spotted is considered "self-spotting" and is specifically not allowed in nearly all contests.

==> TECHNICAL TOPICS AND INFORMATION

Pink or White? No, we're not talking about your dinner wine selection,
we're talking about noise. What do all those different names for noise
mean? Find out in this Electronic Design article
<http://electronicdesign.com/article/analog-and-mixed-signal/understanding-noise-terms-in-electronic-circuits>
that summarizes the terminology - pass the popcorn noise, please!

The documentation on K2AV's Folded Counterpoise Antenna (FCA)
<http://www.w0uce.net/K2AVantennas.html> contain a lot of good
information. Take a look around the W0UCE web site for more!

Pres N6SS reports how he discourages nibbling of his "Beverage On
Ground (BOG)" wires by the local rodentia: "BOGs here are made from #14
stranded insulated house wire...before rolling (them) out at the start
of each low band season the reel is submerged for a week in a tub of
diesel fuel mixed with a bag of chili powder. This procedure renders
the wire far less tasty to Arizona critters. In 15 years not a single
'chew thru' has occured."

Jim W6RMK reports that the IEEE/ANSI RF safety standard, C95.1-2005
<http://standards.ieee.org/findstds/standard/C95.1-2005.html>, can now
be downloaded for free now. OET Bulletin 65 is the usual amateur
reference and a good summary but you can also download the actual
standard now.

If you would like to see what a real college Electrical Engineering
course is like these days and have the necessary math background, MIT
is making their course 6.002x (Circuits and Electronics)
<https://6002x.mitx.mit.edu/> available. Circuits and Electronics is a
first course and is in the core of department subjects required for all
undergraduates in EECS (Electrical Engineering and Computer Science).
(Thanks, Steve N2IC)

Everybody has encountered the dreaded Philips-head slots worn down to
the point where a screwdriver can't grip enough to turn the screw. This
Apartment Therapy article
<http://www.apartmenttherapy.com/how-to-remove-a-stripped-screw-1-107582>
has a good idea - use a rubber band!

If you deal with electromagnetic compatibility (EMC) testing or
certification, you'll encounter tests that require a Line Impedance
Stabilization Network (LISN)
<http://en.wikipedia.org/wiki/Line_Impedance_Stabilization_Network>.
This fixture enables a device to operate from ac power while test
equipment measures emissions from the device conducted on the power
conductors. (Thanks, Kurt KD7JYK)

Scope probes are explored in the article "Probing Pointers
<http://www.nxtbook.com/nxtbooks/cmp/esd0312/#/36>" by Jack Ganssle
N3ALO in the March 2012 issue of Embedded System Design.

Here's a great antenna and tower tip from a veteran of many skyhook projects - "Always drill U-bolt holes two drill sizes (that's two-64ths) bigger than the actual size of the U-bolt. Got a 3/8"-stock U-bolt? Make the holes 13/32-inch. Be happy up there." (Thanks, Glenn K6NA)

Mitch DJ0QN discovered this handy db-and-watts calculator <http://www.rohde-schwarz.de/de/service_support/downloads/application_notes?discontinued=all&type=20&downid=5499> on-line from Rohde & Schwarz. It also handles voltage conversions and VSWR-return loss, among other things. No need now to convert units back and forth when making a combined calculation.

Technical Web Site of the Week - Al AB2ZY reports success in using Scheme-It, a new web-based schematic capture tool <http://electronicdesign.com/article/eda/Still-Drawing-Circuits-On-A-Napkin-Consider-Using-Scheme-it-A-Web-Based-Schematic-Capture-Tool-Instead.aspx?cid=ed_newsletter&NL=1&YM_RID=akozak@fortitech.com> hosted by Digi-Key. The tool also compiles a Bill of Materials (BOM) and the results are shareable across the web. As the article points out, this will probably save a few napkins and tablecloths - since the service can be accessed by a web browser wherever you are, including a restaurant or coffeehouse!

==> CONVERSATION

Two Score and More

After I got home from operating at K3LR in the ARRL CW contest I remembered that February of 1972 was the month I received my FCC license after having passed the Novice test in late December - it took a long time to get the paperwork through back then.

My first glimpse of a call sign (WN0GQP) came, interestingly, on the mailing label of an envelope from The Little Print Shop - the dominant QSL printer in those days. They had access to the FCC database and were no doubt contacting every new Novice as soon as the call was assigned. I remember looking at the envelope thinking, "Who is WN0GQP?" before realizing that was MY CALL! Then I had to wait a few more days for the actual license to arrive - a very long wait, I remember.

So when I got back home after the contest, I decided to take a look and see just when I finally did get on the air four decades ago - I still have the QSL from my first contact with WB5FXC so I sent him a QSL yesterday, commemorating that first contact. The QSO took place on the 16th of February - just one day before my annual flight to Pittsburgh this year. It is truly great to have spent my 40th anniversary of ham radio manning the 15 meter position with K1DG and sharing the weekend with the team. I couldn't have written a better script!

In relating this to the K3LR team, we happily discovered there were five of us celebrating our 40th ham radio anniversaries: host Tim K3LR, 20 meter operator John VE3EJ, and the 80 meter team of Phil K3UA and

Dave K5GN. It must have been something in the 1971 air!

As I considered those 40 years, I started thinking about the events and equipment and other memories along the way. Although some of them had been captured in my station log on paper - these days I log on computer and rarely add the kind of notes so common when entries were in pencil or pen. John K1AR gave me a good idea - to start an open file to capture some of these moments before I forget them.

Sure enough, once I began typing in milestones, memories started popping out of the dusty trunks in my mental attic and I could barely type fast enough. Now each time I open the file, more appear as if they had been waiting for me to call them up. My rate has been terrific!

Start noting what makes ham radio exciting and enjoyable today - even if you just got your ticket last week. All you have to do is open a simple text file or a notebook and start recording. Don't wait two score and more!

73, Ward N0AX

==> CONTESTS

14 March through 27 March 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Monthly Mini-CWT Test--CW, from Mar 14, 1100Z. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Feld-Hell St Patrick's Day Sprint--Digital, from Mar 17, 12 PM (local) to Mar 17, 2 PM. Bands (MHz): 1.8-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

10-10 Mobile QSO Party--Phone, CW, Digital, from Mar 17, 0001Z to Mar 17, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10 number. Logs due: Mar 31. Rules <http://www.ten-ten.org/>

BARTG HF RTTY Contest--Digital, from Mar 17, 0200Z to Mar 19, 0200Z. Bands (MHz): 3.5-28. Exchange: 3-digit serial and 4-digit time. Logs due: May 1. Rules <http://www.bartg.org.uk/>

CQIR - Ireland Calling--Phone, CW, from Mar 17, 1200Z to Mar 18, 1159Z. Bands (MHz): 3.5-28. Exchange: Serial and county code. Logs due: Apr 15. Rules <http://www.irts.ie/>

Russian DX Contest--Phone, CW, from Mar 17, 1200Z to Mar 18, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or oblast abbr. Logs due: See web. Rules <http://www.rdxc.org/>

Oklahoma QSO Party--Phone, CW, Digital, from Mar 17, 1300Z. Multiple operating periods. Bands (MHz): 3.5-28, 50, Frequencies: CW 35 kHz above band edge; Phone 3.860, 7.195, 14260, 21.335, 28.470, 50.130 MHz. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.k5cm.com/okqp.htm>

Virginia QSO Party--Phone, CW, Digital, from Mar 17, 1400Z to Mar 18, 0200Z and Mar 18, 1200Z to Mar 18, 2400Z. Bands (MHz): 1.8-28, 50-440. Frequencies: CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, calling frequencies on 144/220/440. Exchange: Serial and VA county/city or S/P/C. Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

North Dakota QSO Party--Phone, CW, from Mar 17, 1800Z to Mar 18, 1800Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs due: May 15. Rules <http://www.w0nd.com/>

Run For the Bacon--CW, from Mar 18, 0200Z to Mar 18, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

CLARA and Family HF Contest--Phone, CW, from Mar 20, 1700Z, Multiple operating periods. Bands (MHz): 3.5-28. Frequencies: CW 3.688, 7.033, 14.033, 21.033; Phone 3.750, 3.900, 7.033, 7.200, 14.120-130, 14.288, 21.288, 28.488 MHz . Exchange: RS(T), name, QTH, and CLARA. Logs due: Apr 15. Rules <http://www.claranet.ca/>

NAQCC Monthly QRP Sprint--CW, from Mar 22, 0030Z to Mar 22, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CQ WPX SSB Contest--Phone, from Mar 24, 0000Z to Mar 25, 2400Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: Apr 18. Rules <http://www.cqwpx.com/logcheck>

VHF+ CONTESTS

Oklahoma QSO Party--Phone,CW,Digital, from Mar 17, 1300Z. Multiple operating periods. Bands (MHz): 3.5-28, 50, Frequencies: CW 35 kHz above band edge; Phone 3.860, 7.195, 14260, 21.335, 28.470, 50.130 MHz. Exchange: RS(T) and OK county or S/P/"DX". Logs due: Apr 30. Rules <http://www.k5cm.com/okqp.htm>

Virginia QSO Party--Phone,CW,Digital, from Mar 17, 1400Z to Mar 18, 0200Z and Mar 18, 1200Z to Mar 18, 2400Z. Bands (MHz): 1.8-28, 50-440. Frequencies: CW 1.805, 50 kHz+ band edge; Phone 1.845,3.86,7.26,14.27,21.37,28.37; 50.130, calling frequencies on 144/220/440. Exchange: Serial and VA county/city or S/P/C. Logs due: Apr 15. Rules <http://www.qsl.net/sterling>

North Dakota QSO Party--Phone,CW, from Mar 17, 1800Z to Mar 18, 1800Z.
Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs
due: May 15. Rules <http://www.w0nd.com/>

Triathlon DX Contest announcement

It all started in August of 2011. That was about when it occurred to Mike, SV5BYR that a big Greek Contest was missing from international

Ham Radio Contest Calendar. By the end of September this idea became mature and so the "Triathlon" was born! A triathlon is a multi- sport event involving the completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word. We had to change a bit the name to Triathlon DX Contest to match our activity.

Actually, trying here to simulate the original Triathlon athletic event, we involved three major ham radio modes, SSB, CW and RTTY. It will be a 24 hour non-stop event divided in three sections, each one devoted to a different mode. There are some tentative rules of the contest that you can take a look. It will take place on Saturday, the 1st full weekend of February, debuting on 02-02-2013.

After all, what makes this particular contest unique is the special gift for the winner! (take a look to the prize page)

In this point we have to mention all the Greek amateurs who are working to make this event alive: SV1DPI, SV1NK, SV2AGW, SV2DCD, SV5BYR, SV7JAR, SV8CS, SV8RX, SV9GPV, SV9DJO. There is still a lot of work to be done and more details to be announced. Stay tuned!

Mike E. Balaskas, SV5BYR

http://forums.qrz.com/showthread.php?338005-95me-Anniversaire-Bataille-d-ARRAS-du-09-Avril
-1917&goto=newpost

95ème Anniversaire de la Bataille d'Arras (9 Avril 2012)

Il y aura précisément 95 ans en ce lundi
9 avril à 5h30 (heure anglaise) que 24000 soldats
britanniques ont surgi par surprise des entrailles de la
ville pour livrer la fameuse Bataille d'Arras. Il
s'agissait là d'une impressionnante opération de diversion
menée par les Alliés quelques jours avant la grande
attaque française du Chemin des Dames dans l'Aisne.
Plusieurs manifestations célébreront cet événement
historique. A commencer par une cérémonie à 6h30 (heure
française) sur le site de la Carrière Wellington, dont les
galeries médiévales d'extraction de craie, reliées entre
elles pendant la Première Guerre mondiale par les
tunneliers néo-zélandais, servirent de caserne souterraine
durant les semaines qui précédèrent l'offensive.

SPONSOR

Sponsored by the Sterling Park Amateur Radio Club, Call Box 599, Sterling VA, 20167.

OBJECTIVE

To promote amateur radio activity in the 95 Virginia Counties and 39 Virginia Independent Cities.

DATES

Saturday, 17 March 1400 UTC - Sunday, 18 March 0200 UTC and Sunday, 18 March 1200 UTC - 2400 UTC.

(For Virginians this is Saturday 10 AM - 10 PM and Sunday 8 AM - 8 PM Virginia local time.)

AMSAT NEWS SERVICE

ANS-071

ANS is a free, weekly, news and information service of AMSAT North America,
The Radio Amateur Satellite Corporation. ANS reports on the activities of a
worldwide group of Amateur Radio operators who share an active interest in
designing, building, launching and communicating through analog and digital
Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* Howard Long, G6LVB featured speaker at the 2012 AMSAT/TAPR Banquet

* AMSAT-NA Receives US Space Command Authorization for Keps Distribution

* AMSAT-UK Announces Colloquium 2012 & Issues First Call for Speakers

* New Satellite Group Formed in Cuba

* India VO-52 Satellite Recovery in Progress

* March 17 for AMSAT-LU Balloon Test Flight of LUSEX Satellite Systems

* KB8VCO and W8ZCF ARISSat-1 SSTV Contact Featured in the Press

AMSAT News Service Bulletin 071.01

From AMSAT HQ SILVER SPRING, MD.

March 11, 2012

To All RADIO AMATEURS

BID: $ANS-071.01

Howard Long, G6LVB featured speaker at the 2012 AMSAT/TAPR Banquet

The AMSAT/TAPR Banquet on Friday night, May 18 is one of the main AMSAT activities during the 2012 Hamvention at Dayton.

AMSAT is pleased to announce that Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. This innovative USB device is the size of a thumbdrive and has an SMA antenna socket. Multiple SDR control and display software programs can

be used with the FUNcube Dongle.

Banquet tickets will not be sold at the AMSAT booth during the Hamvention so reservations must be made through the AMSAT Store: http://www.amsat-na.com/store/item.php?id=100158 Tickets are $30 apiece.

Volunteers are needed to help at the AMSAT booth at Dayton. Gould WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor http://www.amsat.org/amsat-new/hamve...012/Dayton.php for the latest AMSAT at Dayton news and developments

[ANS thanks Gould Smith, WA4SXM for the above information]

AMSAT-NA Receives US Space Command Authorization for Keps Distribution

AMSAT's Keeper of the Keps, Ray Hoad, WA5QGD wrote, "I am pleased to announce that AMSAT's request to re-distribute AFSPC Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013. Our USSTRATCOM ODR (Orbital Data Request) to distribute the KEPs was approved on March 1, 2012. We are "good to go" for another year."

Thanks to the US Air Force Space Command, Perry Klein, W3PK and Paul Williamson, KB5MU for their help in this process.

[ANS thanks Ray Hoad, WA5QGD for the above information]

AMSAT-UK Announces Colloquium 2012 & Issues First Call for Speakers

The AMSAT-UK International Space Colloquium will be held on September 14-16, 2012.

The colloquium attracts an international audience from across Europe as well as North America and the Middle East. Attendees range from the builders of the CubeSats and Nanosats, those who communicate through them and beginners who wish to find out more about this fascinating branch of

the hobby.

It provides a rare opportunity to chat with satellite designers and builders, discussions frequently continue until the early hours of the morning.

A Gala dinner is held on the Saturday evening along with the fund raising auction.

AMSAT-UK invite speakers, about amateur radio space and associated activities, for this event. They are also invited to submit papers for the ☐Proceedings☐ document which will be published at the same time but printed papers are not mandatory. We normally prefer authors to present talks themselves rather than having someone else give them in the authors☐ absence. We also welcome ☐unpresented☐ papers for the Proceedings document.

FIRST CALL FOR SPEAKERS

This is the first call for speakers for the AMSAT-UK International Space Colloquium 2012 which, due to the Olympic & Paralympic Games, will be held this year on the weekend of September 15-16, 2012 at the Holiday Inn, Guildford, GU2 7XZ, United Kingdom.

This Colloquium will take place a few weeks before the planned launch of AMSAT-UK☐s FUNcube-1 satellite carrying a 435/145 MHz linear transponder for SSB/CW communications.

AMSAT-UK invites speakers, to cover topics about micro-satellites, CubeSats, Nanosats, space and associated activities, for this event.

They are also invited to submit papers for subsequent publishing onthe AMSAT-UK web site. We normally prefer authors to present talks themselves rather than having someone else give them in the authors☐ absence. We also welcome ☐unpresented☐ papers for the web site.

We appreciate that it is not always possible to give a firm indication of attendance at this stage but expressions of interest would be appreciated.

Submissions should be sent *ONLY* to G4DPZ, via the following routes:

e-mail: david dot johnson at blackpepper dot co dot uk

Postal address at http://www.qrz.com/db/G4DPZ

AMSAT-UK also invite anyone with requests for Program Topics to submit them as soon as possible to G4DPZ. Invitations for any papers on specific subjects will be included in the future call. Likewise if anyone knows of a good speaker, please send contact and other information to G4DPZ.

[ANS thanks Dave Johnson, G4DPZ and AMSAT-UK for the above information]

New Satellite Group Formed in Cuba

Hector Martinez, CO6CBF reports that the Cuban Amateur Radio Federation (FRC) has created its first official Satellite Group.

Hector said that himself, Raydel CM2ESP, and Pavel CO7WT worked to form the group and made the request to the FRC headquarters. The request was approved on March 3, 2012. The official name is Grupo de Radioaficionados para Operaciones Satelitales (GROS).

The principal mission is to promote amateur radio by satellites in Cuba and motivate Cuban hams to operate on the satellites.

Grupo de Radioaficionados para Operaciones Satelitales is planning their first meeting in Havana City, Cuba.

[ANS thanks Hector Martinez, CO6CBF for the above information]

India VO-52 Satellite Recovery in Progress

Mani, VU2WMY, Secretary & Station-In-Charge at the Upagrah Amateur Radio Club VU2URC in India reported that on March 6 the ISRO Satellite Centre recovered operation and control of HAMSAT VO-52. This satellite had been heard during expected passes since February 28.

Mani wrote, "I can share at this moment is 'HAMSAT VO-52' is in 'Excellent Health' after recovery operations. Right now, it is under observation. The decision in regards to switching 'ON' the transponder is pending clearance from ISRO. This decision expected soon. The user community will be informed well in advance about the transponder switching."

ISRO Announces Plan to Turn on Dutch Transponder

On March 8, Mani, VU2WMY, reported that news had been received from Mr. T. Parimalarangan, HAMSAT VO-52 Operations Director at ISTRAC/ISRO that, "After 'In-Orbit Maintenance Operations' the decision to turn 'ON' Transponder No 2 i.e. The Dutch Transponder made by William Leijenaar PE1RAH on March 8 during orbit # 37006 over India."

Dutch Transponder Activation on Hold for One Week

Unfortunately, we are sorry to inform that the 'Expert Committee' overseeing the VO-52 (HAMSAT) performance has advised to extend the 'Observation Period' by an other week.

Hence, the decision to switch on the transponder # 2 is now put 'ON HOLD' till further notice. Inconvenience caused to the users is regretted.

This latest decision is just only a postponement and nothing to worry about the health of the spacecraft. W re-assure you all that VO-52 is very strong and in a 'Perfect Health' condition.

Once the Dutch transponder is switched on it will use the following frequencies:

Uplink frequency: 435.250 MHz

Downlink frequency: 145.900 MHz

Beacon: CW at 145.859330 MHz (145.86 MHz)

Output level of Beacon Carrier: 18 dBm

ISRO invites a 'Critical Comparative Signal Report' between the Indian and Dutch transponder would be of great help for further evaluations and necessary actions for the maintenance the transponder in good and healthy condition for better services and also, the inputs would be very valuable to the respective transponder designers. Please send your feedback to tprangan@istrac.org.

Summaries from stations monitoring for VO-52 can be entered and viewed on the Live OSCAR Satellite Status Page: http://oscar.dcarr.org/

[ANS thanks Mani, VU2WMY, Secretary & Station-In-Charge at the Upagrah Amateur Radio Club for the above information]

March 17 for AMSAT-LU Balloon Test Flight of LUSEX Satellite Systems

AMSAT-Argentina announced they are planning to test systems of the LU Satellite EXperiment (LUSEX) satellite during a high altitude balloon flight up to 100,000 feet. This is scheduled for March 17 at 1500 UTC. Direct reception of the balloon flight is estimated to extend to 400 miles from the City of Junin, west of Buenos Aires, Argentina. (See http://www.amsat.org.ar/junincubr.jpg for estimated coverage map.)

The payload will feature several radio and telemetry experiments:

Crossband FM Repeater

Uplink 435.950 MHz FM (123 Hz tone)

Downlink 145.950 MHz FM

SSTV Downlink 145.950 MHz FM

ROBOT-36 in real time, showing the view from the balloon every 5 minutes during ascent/descent, longer interval at high altitude. Video will also be recorded and recovered at the end of the flight.

APRS Data

APRS 1200 baud packet on 144.930 MHz, and 145.950 MHz.

Telemetry Downlink 145.950 MHz

If the crossband repeater is in use a warning bip at 40 seconds will indicate telemetry is coming, which is sent if the repeater is not in use. If the repeater continues to be busy then 2 bips will indicate APRS packets will be sent.

CW telemetry (modulated FM on 145.950 MHz)

Sent every 5 minutes with the following sequence: CQ LU7AA, sequence number, external and internal temperatures °C and battery voltage.

User Telecommand Experiment

The 435.950 up / 145.950 down crossband repeater will accept user DTMF command to return a signal report. Sending B* on the uplink will return S5 (average signal strength) or P10 (S9+10 signal strength) modulated CW tones

on the 145.950 MHz FM downlink.

APRS trajectory will update every minute, including speed, height, external and internal temperatures and 7.2v battery voltage. This can be monitored directly on 144.930 MHz for stations in range. It will also display at: http://aprs.fi/?call=lu7aa-11 . The APRS symbol will display as a balloon during ascent, and as a glider during parachute descent. The AMSAT-LU APRS Igate LU7AA-10 on 144.930 and 430.930 MHz will be active. Maps for UI-View APRS tracking can downloaded from http://www.amsat.org.ar.

Stations making a contact via the balloon payload may qualify for a certificate. See http://www.amsat.org.ar/certsat.html for details.

AMSAT-LU thanks the members of Radio Clubs of Junin, QRM Belgrano, APRS Group, Don Bosco Ramos Mejia School, gliders Clubs of Zarate, Junin and Cañuelas, and the twelve Amsat-LU members development team. Reports from radio amateurs during previous flights are appreciated and they look forward to your reports during the March 17 flight.

Photos and reports of prior flights can be viewed on-line at:

http://www.amsat.org.ar/lu4aao/exper..._parapente.htm

The LU Satellite EXperiment web page is at: http://lusex.org.ar

[ANS thanks AMSAT-LU for the above information]

KB8VCO and W8ZCF ARISSat-1 SSTV Contact Featured in the Press

The Cincinnati (Ohio) Press web featured a story about the successful SSTV contact via ARISSat-1 between Farrell Winder, W8ZCF and his son, Jeff Winder, KB8VCO.

The Winders teamed together and after many, many tries were successful in sending and receiving a picture of Farrell Winder's automobile license plate.

The Winders used two computers, two radios, and two rotatable outside antennas on towers to aim and to pinpoint the satellite antenna. Conditions were challenging as the satellite was traveling at 18,000 MPH at an altitude of 225 miles, which provided a window of opportunity of only up to about nine minutes while its footprint was passing within

range of Cincinnati.

The successful end result was a lot of hard-earned fun and excitement to work with very small signals from □outer space□ and overcome the setback caused by the missing antenna on ARISSat-1.

The picture the Winders sent and received is apparently one of the only complete pictures sent and received. Two other operators tried a similar undertaking, but received just portions of pictures.

Since ARISSat-1 had no propulsion system to sustain altitude it entered the Earth's atmosphere on Jan. 4, 2012 and disintegrated.

The story can be read on-line at: http://tinyurl.com/ARISSat-Cincinnati

[ANS thanks Farrell Winder, W8ZCF and Jeff Winder, KB8VCO for the above information]

Echolink Satellite Nets Launched

New Echolink SAT-CHAT Net

Vince Waelti, K9TSU has established a new, open net, the "Sat-Chat" on the *AMSAT* server on EchoLink. This net meets at 1900 Central US Time (UTC-5) every Saturday evening. Everyone is invited to check in. Also links to -L and -R systems for on-air repeater coverage are welcome. Vince can be reached at k9tsu(at)hotmail(dot)com if you have

any questions.

Hudson Valley SatCom Net on Echolink

Stu Ballinger, WA2BSS says the next Hudson Valley SatCom net will meet on-air (146.97 MHz. Mt. Beacon Repeater) and on the Echolink node N2EYH-L on March 15 at 2000 Eastern US time (UTC-4).

Houston AMSAT Net on Echolink

The Houston AMSAT Net meets on the Echolink *AMSAT* server every Tuesday evening at 2000 Central US Time (UTC-5). Checkin to the net is taken via Echolink if you are not in radio range of Houston.

[ANS thanks Vince Waelti, K9TSU; Stu Ballinger, WA2BSS; and Bruce Paige, KK5DO for the above information]

Amateur Radio on the International Space Station (ARISS) Status Report March 5, 2012

1.School Contacts

Dilworth Elementary School in San Jose, California had an Amateur Radio on the International Space Station (ARISS) contact on Monday, March 5 at 18:33 UTC. The ARISS contact is part of a comprehensive education plan which will pique students' interest in Science Technology, Engineering and Math (STEM).

An Amateur Radio on the International Space Station (ARISS) contact was held with ESA ESTEC in Noordwijk, Netherlands on Tuesday, March 6 at 13:11

UTC via station ON4ISS in Belgium. The radio activity is part of an educational program around André Kuipers' mission Spaceship Earth which targets children who are 10-14 years of age. Part of this program consists of mission assignments Kuipers gives to Dutch school children. The winners of each challenge will be invited to the radio contact. Other activities include lessons and experiments.

2. ESA Awards ARISS Contact to Winners of Competition

Students from three schools, the American School of the Hague, the International School of Amsterdam and the British School in the Netherlands, took part in an Amateur Radio on the International Space Station (ARISS) contact on Monday, February 27 via station IK1SLD in Italy. This ARISS contact with astronaut André Kuipers was offered as a prize by the European Space Agency (ESA) to those schools who submitted the best suggestions for experiments or demonstrations that could be performed in microgravity on board the ISS using common everyday items. The youth were given lessons on radio signals and communications which involved local radio ham experts.

3. Atlanta, Georgia Youth Radio ISS Astronaut

On Friday, March 2, an Amateur Radio on the International Space Station (ARISS) contact was held between astronaut Don Pettit, KD5MDT on the ISS and Parkside Elementary School in Atlanta, Georgia. The radio link was provided by station K6DUE in Greenbelt, Maryland. Questions were asked concerning the education and training needed to become an astronaut and about how space affects one's appetite and sleep. The contact was part of a comprehensive education plan using NASA related activities to pique students' interest in Science, Technology, Engineering and Math (STEM). Audio was carried live on the NASA TV hour. East Atlanta Patch posted an article on the contact.
http://eastatlanta.patch.com/article...#video-9240102

4. Pettit Chats with Greek Students via ARISS

Students attending the 5th Geniko Lykeio Katerinis in Katerini, Greece experienced a successful Amateur Radio on the International Space Station (ARISS) contact on Friday, March 2. The youth spoke with Don Pettit about the experiments onboard the ISS and asked how he communicates with his family during his mission. The contact complemented lessons covering astronomy and amateur radio with special attention given to the ISS regarding its role in humanity and science, its orbit and the every day life of the astronaut. ISS courses were based on ESA's education tool "ISS Education Kit." Five hundred were in attendance and another hundred connected to the internet to view the streaming video. Media coverage included two television stations.

5. Amateur Radio Newsline Covers ARISS

On March 2, Amateur Radio Newsline report #1803 carried an article about the recent ARISS contact held during the John Glenn Event in Perth, Australia. The event celebrated the 50th anniversary of John Glenn's orbit

of the Earth, when the population of Perth turned on its lights and Glenn observed the city was visible from space, leading to Perth's nickname, "City of Lights." To view, "Ham Radio in Space: Amateur Radio Celebrates John Glenn over Perth Australia," see: http://www.arnewsline.org/storage/scripts/nsln1803.txt

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

And, with that please keep in mind that the Sun accounts for 99.8% of the Solar System's mass. 1,300,000 Earths could fit inside of the Sun. Jupiter is as big as the Sun's core. 1,300 Earth's could fit inside of Jupiter.

KG6YPI's "RemoteHams.com" Enhances Remote-Controlled Radio Capability

Posted: 12 Mar 2012 03:55 PM PDT
http://forums.qrz.com/showthread.php?337792-KG6YPI-s-quot-RemoteHams-com-quot-Enhances-Remote-Controlled-Radio-Capability&goto=newpost

Brandon Hansen, KG6YPI, continues to make significant improvement to his www.RemoteHams.com remote radio service with the addition of a custom client installed on a users computer. Remotehams.com offers Internet-controlled receivers and transceivers from around the world, including transmit capability. The custom client includes VoIP capability eliminating the need for a service such as Skype for audio. It also includes such features as visual level displays of both receiver and transmit audio, easy selection of audio sources, and simple adjustment of audio levels. The audio quality on such remotes as that offered by Scott, WA6LIE in Salinas, California is excellent.

Beyond these features Brandon has done a superb job of creating a very attractive, easy-to-use radio interface that makes using these radios both simple and fun. It even includes capability to send and receive CW. I use

WA6LIE's radio on a regular basis from my home and find that it is almost like having his Elecraft K3 right on my desk here in Hong Kong.

You can give the system a try by going to:

Mobile operations at risk for Missouri Ham Radio Operators

Posted: 12 Mar 2012 11:29 AM PDT
http://forums.qrz.com/showthread.php?337756-Mobile-operations-at-risk-for-Missouri-Ham-Radio-Operators&goto=newpost

Norm Lampton, KC0FNA, the MO Section State Goverment Liasion has alerted Missouri ham radio operators of a bill that has been filed that if unmodified could make operating an Amateur Radio mobile a crime because of Missouri Senate Bill No. 717. Missouri state Senator Stouffer introduced this to the Missouri Senate. To summarize, his statement,

- This act creates the traffic offense of distracted driving. Under the terms of the act, a person commits the offense of distracted driving if the person, while operating a motor vehicle on the highways of this state:

(1) Fails to give full time and attention to the operation of the motor vehicle;

(2) Fails to maintain a proper lookout while operating a motor vehicle; or

(3) Engages in any other activity which causes the operator to be distracted from the primary mission of driving such motor vehicle.

A person who violates the provisions of the act shall be guilty of a Class C misdemeanor, unless an accident is involved then it shall be a Class A misdemeanor.

Using a mobile would be a violation of this act. In fact if you sneeze then wipe your nose you violate the act. It is directed at texting and cell phone use, but it is so overly broad that it catches almost anything that isn□t driving the car.

I am going to try to get this fixed but it would be of much help if we could alert the membership to contact their state senator and voice concerns.

Members can find their Senate and House members at this link

.

Contact with the Senators is urgent but contact with House members would be helpful.

The ARRL has taken a position on distracted driving:

.

On that page is a link to the President□s letter to the National Safety Council in July 2009 and the League□s policy statement on distracted driving:

.

This info was brought to me via Larry's List

ARRL Reaction: Missouri Section Manager Dale C Bagley, K0KY k0ky@arrl.org

Bill info: ARRL Missouri Section State Government Liasion Norm Lampton, KC0FNA kc0fna@arrl.net

York Radio Club and Fox Radio Relay League Participate in First Hamvention:

Posted: 13 Mar 2012 06:14 PM PDT
http://www.eham.net/articles/27904

Elmhurst, IL -- The York Radio Club will host the first annual Hamvention at 8 p.m. March 16 at the Community Bank of Elmhurst. All local HAM radio operators and anyone interested are invited to come and find out more about what York Radio Club and Fox River Radio League do throughout the year.

//
John 'Harvey' Chase, W4TG (SK):

Posted: 13 Mar 2012 06:13 PM PDT
http://www.eham.net/articles/27903

Silent Key - The term given to a deceased amateur radio operator. The amateur radio hobby besides being science based enjoys something few other hobbies can boast... Meeting people from all over the world, even if it's seldom face to face. In the United States, there are just over 700K ham radio operators, twice that many in Japan. Every time I turn on my ham radio, I never know where or who I may talk to next. Besides the ability to communicate world wide, getting to know some of my fellow operators via the airwaves is much of the hobbies appeal to me. I think my speech is poor enough that frankly not a lot of people want visit with me... except when I'm talking though my amateur radio's "bug" or straight key. Normal speech for me is impossible, but using Morse code I'm pretty good, and that has allowed me the opportunity to get to know some of my fellow operators around the world. One such operator I was fortunate enough to work (communicate with) twice in the last year was Harvey - W4TG. Harvey died this week at the age of 96 in the heart of Georgia. Since I never actually spoke to Harvey, I expect he had a southern drawl... I mentally put one with the Morse code he sent. Harvey was a WWII vet. In fact, he was there where the war started for the USA on December 7, 1941. Harvey told me he couldn't believe the things he saw at Pearl Harbor that day... from the pictures and movie film I've seen of the attack, I can see why.

input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Aurora

The sun has be active last week and triggered some aurora's. QSO's
are reported in Europe at least as south as northern Hungary. MMMonVHF
is trying to make maps of aurora openings on 144 MHz in the same way
as we do for Sporadic E. However, creating reflectionmaps for aurora
is more tricky than for Sporadic E and the logs need to have a format
like:
14:03 PA4EME JO20WX 30 ; hh:mm call locator QTF
Please do not put more info in your reports. If you do we have to rewrite
your report to be able to use it.
There are a few logs on MMMonVHF from the aurora from last week. If you
made any QSO...please report them to MMMonVHF. Please don't forget to
add your antennabearing! It is possible that your QSO will in the reported
logs but you will not find them on the map. In that case the given QTF will
probable not fit into the great circle calculations and the given bearing
is not accurate enough.
Check http://mmmonvhf.de/au.php?year=2012&month=03&day=09

SOURCE: PA4EME on behalf of MMMonVHF

** Tropo over Northern Europe

After a long time there is finally some tropo to report. Northern Europe
is the place to be and QSO's are reported up to 1500 km from the United
Kingdom into Italy.

Check http://mmmonvhf.de/tr.php for details.

SOURCE: PA4EME on behalf of MMMonVHF

** DXCC: ZP; 2M EME

After months of planning and weeks of work, Paraguay made it on the moon as ZP9EH on March 8 and 9. The station is located at the clubhouse of the Encarnacion Radio Club in southeast Paraguay (GG22BQ). This club once had 130 members before the introduction of cellphones and Skype. We are down to about eight members now.

The two M2 9 element yagi antennas were donated by Gary KB8RQ and refurbished by Mike K6MYC. I brought them down here along with Mike's TE brick amp, some LMR400 coax and various connectors and parts. By weight I had figured an importation cost of $400 - $500. The clerk first informed me that the packages had arrived and that they would cost $1702.00! Instant headache! After I gasped he then re-calculated that it was "only $442.00."

The club members built a small tower for the 2 meter antennas on the edge of the roof. I already had a Yaesu 5400B AZ-EL, an Icom 910H, and a SignaLink interface. With the amp on a battery and charger we get 250 watts output.

At moonrise Thursday March 8th I was on the roof with German ZP9GOM trying to point the antennas at the moon and get the rotor indicator to agree with the program's azimuth prediction. Amid much noise and confusion we made our QSO with Gary at about 0115z on the 9th (144.141 Mhz) and then a bit later with Dave W5UN. Then we broke for a late night victory meal -- a traditional Paraguayan "asado" with roasted beef, chicken and pork, boiled mandioca, and white bread, along with your local beverage of choice. Most of us returned to the operating desk where around midnight local time we made our sked with Mike near his moonrise. The first three 2m EME QSOs from Paraguay were in the log! (We think there was a least one earlier EME QSO on 6 meters but cannot verify it.)

I returned the following night at our moonrise (March 9 around 2300z) to try for Europe. In a calmer atmosphere with just German, Francisco and myself present we worked OH7HXH, UA3PTW, SM5CUI, and OH2BC. We copied but could not complete QSOs with Rene PE1L and DL8GP.

At this point we cannot leave the station hooked up and ready. For security reasons we have to dismantle the rig/amp/computer at the end of each session. It takes me at least 40 minutes to drive down to the club, so we have to plan in advance when we will operate. For now we will use my call ZP9EH (QSL via LoTW, eQSL, or via Gert, K5WW, but NOT direct please), but when the club's call (ZP9EE) is registered with LoTW and we have a good QSL path for it, we will use that call.

All of us in the club are novices at EME. My first ever EME QSO was the other night with Gary. We will probably bust a few QSOs or sequences as we learn the ropes. Thank you for your patience! We do have internet access at the club and I try to stay in touch through the N0UK logger.

73 from Paraguay de Steve ZP9EH

LATEST NEWS:

First of all, thanks to everyone for suggestions about elevation rotor. Consensus is that I have miscalibrated it. Next time in the club I will work with the two pots associated with the elevation.

Second, I do not have an online log. Should I for the EME work? What would be an easy way to do that?

Third, next operation on March 20 beginning around 1830z (looking for Lance W7GJ) and at 1930z trying for Guy VK2KU. Guy suggested the date and time, as VK-ZP is always going to be hard. Preference will be to VK/NZ, but working the U.S. should be possible as well. I will be on 144.141 calling first.

Fourth, does the "Log It" button in WSJT7 work? Where does this log show up and how can I get to it? So far I have been logging with a pencil and paper and transcribing it into MLOG later. But before you snicker, on HF I have been running N1MM Logger for five years in contests.

Thank you for help and suggestions. I am new at this and you won't hurt my feelings :-)

73 de Steve ZP9EH

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: 4U1ITU; square JN36BF; start 2012-03-23

After both C37MS and C56EME did win the trophy MMM expedition of the year 2011 section MS and
EME, Chris and Rene where thinking to celebrate this by doing something back for all those voters.

We will be QRV moonbounce 2 meter from the ITU building in Geneva as 4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days! Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: J5; square IK21DT; start 2012-03-23

LATEST NEWS by Lucio, I3LDP, dated 2012-03-13:

Another update prior to departure for J5.
The whole team is very excited waiting for the departure.
Today visas arrived from the Consulate of Guinea Bissau.
We are preparing the equipment.
Latest tests are positive, also the home-made 5 elements
LFA antenna for 6 m works perfectly and we'll try to use it
on EME in the last days of the expedition, when the Moon conditions
will be better, with HM preamplifier and Acom 1000 PA.
We are still waiting for the 430 preamplifier, while the TX
system is ready with antenna and 700W amplifier by ITB mod. Colibri'.
144MHz are ready: antennas are OK as is the Pre by WA2ODO and 1Kw PA
by Nico of ITB mod. Colibri'.
HF are OK with 2 Kenwood 590s, antennas: 3 el. for 10/15/20 mt and Spiderbeam
(WARC frequencies), Delta Loop, Dipole for 40/80/160 mt.
We'll operate all modes on HF, in order of preference: CW, RTTY, PSK31, SSB.
A microscope for the Cumura hospital was purchased with the received donations.
The calls J52EME for EME activities and J52HF for HF and
6m (tropo and sporadic-E) are confirmed.
For more info see our website http://www.ari.verona.it/veronadxteam/en/ or
http://www.mmmonvhf.de/

We expect to listen to you in the pile-up from Guinea Bissau ! 73

Lucio I3LDP Team Leader Verona DX Team

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most

difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio
expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm
and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

E2E EME-DXpedition in Thailand around April 2012
Karsten will try to setup a MMMonVHF DXBlog to spread his latest News.

LATEST NEWS from Swen, HS0ZFZ, dated 2011-12-24:

The Radio Amateur Society of Thailand Under the Patronage of His
Majesty the King - HS1A - The clubstation of RAST ? HS0AC ? was
submerged by 2m of waters during the previous century flood ? which
was in the media worldwide - I believe ? some pictures of the club
station after the water tide was gone ? www.qsl.net/RAST or RAST
forum.com RAST and HS0AC lost equipment worth around 200,000 USD
(150.000 Euro) incl. our mainstation rig FT-1000 MK Mark V ? which
is believed will not be able to be repaired. RAST settle up an
account for donations to help the clubstation getting back on air
soon. Donations could be done directly to the club or via paypal
to donate@rast.or.th (wrong in the Newsletter!).
There is also a EME activation ?E2E? planned
during April to help to raise some funds for HS0AC

** DXCC: EY; square MM48; start 2012-04-27

From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. Callsign not known yet. Locator will
be MM48JN near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012

Hello! Well, I wanted to provide as much advance time as I could so you could
mark your calendars and/or get everything in your 6m station optimized by the
end of August ;-) As those of you know who completed JT65A mode contacts with
me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be
active during our common moon windows - especially during the optimum days of
the month for 6m EME. The callsign is not in hand yet (but assured by email),
and the QTH has not been finalized, but all the plane tickets have been purchased
(as usual, any contributions are VERY welcome), and the equipment (a KX3 portable
transceiver with compatible 6m amplifier) is in the works. As soon as the license
is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:

http://www.bigskyspaces.com/w7gj/Niue2012.htm

I don't know if it will be possible to find a QTH that provides my usual preference
for a takeoff shot over water on moonrise. However, that is not necessary to work
NA stations during their moonsets (I will be elevating), so we will get the ground
gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset
over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period,
as we did together from E51 and 3D2; Bob's call will probably be his old callsign of ZK2RS.
More details will be posted on the above website as the departure time at the end of August
gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73,
Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: LA; square KQ50; start 2012-08-11

Only 3 Squares remaining on a visit of the OH8K Team in the northern area -
KQ50 will be one and will be tried to activate in August 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to be qrv from KQ50
during 11-16. August 2012 as LA/OH6ZZ on 2m FSK/EME. QRG and more details

will be spread later...

the 2012 Field days are about to start so how do you do your field day
cooking?

Posted: 15 Mar 2012 04:47 AM PDT
http://forums.qrz.com/showthread.php?338129-the-2012-Field-days-are-about-to-start-so-how-do-you-do-your-field-day-cooking&goto=newpost

Just found this review of my field day BBQ cook book,

A Dot of Butter and a Dash of Spice is a new cookbook dedicated to Field
Day culinary delights from UK amateur Steve Norman, M0MVB.

In explaining his new work Steve says that as we all need to eat, he has
combined his love of doing field days and of food by writing a

BBQ cook book aimed at the ham radio operator.

A Dot of Butter and a Dash of Spice" contains 112 recipes in 10 chapters
covering Breakfasts, Chicken, Lamb, Beef, Pork, Fish, nice 'n spicy,
Vegetables, Sauces and Marinades even deserts are there as well as covering
what is the best BBQ to take on field days and loads of other advice.
Priced at £8.96 British Pounds or $15 US dollars, it can be ordered on-line
in the US from lulu.com and other booksellers.

Theres now a 10% discount in place for a little while.

N4G Special Event Station March 17th-18th

Posted: 15 Mar 2012 03:08 AM PDT
http://forums.qrz.com/showthread.php?338125-N4G-Special-Event-Station-March-17th-18th&goto=newpost

In order to help our community celebrate the 231st anniversary of the
Battle of Guilford Courthouse,North Carolina, and to further practice
emergency communications skills for service to our community, the
Greensboro, NC Amateur Radio Association is collaborating with Guilford
Courthouse National Military Park to host and operate a Special Event
Station to commemorate this event in American history.

The genesis of this idea was an event that is held each year on July 4th, the "13 Colonies" event where amateur radio operators all over the world try to make contact with 13 special radio stations, one in each of the original 13 colonies. Many amateur radio operators in the Greensboro area participated in this event, and this sparked a discussion about our very own significant event during the American Revolutionary War, the Battle of Guilford Courthouse, and how we could help celebrate this important event in American history.

Every year, the Guilford Battleground Company, a non-profit organization that is dedicated to the preservation of the land around the site of Guilford Courthouse, holds a re-enactment of the Battle, and the events surrounding it. The re-enactors camp out during this time with period weapons, clothing, and tools.

The station will have the special event call sign of N4G for Nathanael Greene for the time that we will be operating, which is March 17th -18th, 2012. For more details about the station and the history of the Battle of Guilford Courthouse, see: www.n4g-gch.org

Put March 17th and 18th 2012 on your ham radio calendar, and listen for the November Four Golf Special Event Station!

http://forums.qrz.com/showthread.php?338080-Invitation-Last-New-One-IOTA-NA-240-activation-Alaska-May-9-17-expedition&goto=newpost

Hello,

If you have some time on your hands and would like to participate in activation of last New-One IOTA island in Alaska (NA-240), we would like to invite you to be part of out team!

Here is our plans:

Dates around May 9-17, Most of equipment is stored in Bethel. Estimated 3-4 days on the island, rest just travel time and few days for potential bad weather. It will be fresh, ice still will be floating in Bering Sea.

Travel to Alaska and especially last 100 miles expensive.

As of now Tim NL8F and Yuri N3QQ are members of expedition and potentially Alex RW3RN and Yuri UA9OBA.

Please contact Yuri Sushkin N3QQ (206)529-5168 for details.

73, Yuri N3QQ

336. FW: TI-2 is a Go! New Online Forum for Teachers

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-15 18:14:43 UTC
From: ARRL Education Services <memberlist@www.arrl.org>
Message-ID: <20120315174305.6649E203BF@bmail.arrl.org>
Source record: 3353
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Teachers,

I'm pleased to share two pieces of good news-

Now Accepting Applications!

1) Dayton Amateur Radio Association will sponsor our Teachers Institute on Space in the Classroom (TI-2) again this summer and we are now accepting applications. This expenses paid, 4-day professional development opportunity will be July 9-12 in Dayton, Ohio. Eight seats will are available. An Amateur Radio license and prior attendance at a foundational TI (TI-1) are required. You'll find more details on our website at: www.arrl.org/ti-2-space-in-the-classroom

As previously announced, we will also be offering two sessions of the Teachers Institute on Wireless Technology (TI-1): www.arrl.org/teachers-institute-on-wireless-technology:

o July 9-12 at Parallax in Rocklin, CA

o July 23-26 at ARRL Headquarters, Newington, CT

Application deadline is May 15, 2012.

Contributions to the Education & Technology Program Fund <http://www.arrl.org/education-and-technology-fund> from individuals and ham radio clubs, as well as in-kind support from Yaesu USA, Ham Radio Outlet and Parallax make the Teachers Institute possible.

Join our Online Forum for Classroom Teachers

2) We are implementing an online forum for classroom teachers on the ARRL website. You'll find a link to "Forums" on the home page of the ARRL website, or simply go to: www.arrl.org/forums and scroll down to "Amateur Radio in the Classroom." Mark Spencer, WA8SME will be moderating the forum, and other Teachers Institute instructors as well as past participants will be available to answer questions and respond with ideas from personal classroom experience. Some rich dialog has been shared in private email communications over the years; I'm pleased that now we can provide a way to open up that dialog for the benefit of all.

Log in and post your questions or share an idea-- let's create an active online community that will generate ideas and inspiration for Wireless Technology instruction!

==> + PUBLIC SERVICE: HAMS IN INDIANA, KENTUCKY AND OHIO PROVIDE
SUPPORT DURING AND AFTER TORNADO OUTBREAK

A devastating storm system moved across the United States on March
2, spawning a slew of tornadoes that contributed to at least 28
fatalities in Indiana, Kentucky and Ohio. These tornadoes followed an
earlier outbreak that began on February 28 and left 13 dead across
Kansas, Missouri, Illinois and Tennessee and battered parts of
Kentucky. The Clark County (Indiana) Emergency Management Agency
activated the local RACES team to help provide communications support,
hams in Eastern Kentucky set up SKYWARN nets to assist the local
National Weather Service office and Cincinnati-area hams supported the
National Weather Service and the American Red Cross. Read more here
<http://www.arrl.org/news/hams-in-indiana-kentucky-and-ohio-provide-support-d
uring-and-after-tornado-outbreak>.
```

==> + ON THE AIR: UNDERSTANDING THE NEW 60 METER PRIVILEGES

On March 5, radio amateurs were granted new privileges on the 60 meter band. The effective radiated power level was increased from 50 to 100 W, along with the ability to use CW and the digital modes PACTOR III and PSK31.

"CW operators seem to have little problem figuring how where they need to transmit, but some PSK31 operators are reading the text of the FCC's Report & Order and coming away a bit confused," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The R&O states: 'We adopt a modified instruction for PSK31 channel use to correct an error introduced in the NPRM. To have a PSK31 signal transmitted on the center frequency, the control operator should not set the carrier frequency to the center frequency but should instead set the carrier frequency 1.5 kHz below the center frequency (i.e., the same as for phone and data emissions).'

"The word 'carrier' in this context means the suppressed carrier frequency of a transceiver when operated in the USB mode, but some have taken it to mean the PSK31 signal itself," Henderson noted. "They read this text and come to the conclusion that the PSK31 signal should be 1.5 kHz below the channel center. They are mistaken. The PSK31 signal must be in the center of the channel." Read more here <http://www.arrl.org/news/60-meters-one-week-later>.

==> + ON THE AIR: MARK YOUR CALENDARS: IT'S TIME FOR THE SPRING FMT

The Frequency Measuring Test (FMT) continues its successful "round-table" format when it takes to the airwaves on the evening of April 19 (April 20 UTC). The test moves to Thursday from the November FMT's usual Wednesday evening, giving everyone an opportunity to participate. Recognizing the higher solar flux, the FMT will lead off with a 20 meter segment -- one transmission beaming east, and the other west from Connie Marshall, K5CM, in Oklahoma -- with both transmissions on the same frequency. The sponsors are particularly interested in your comments on frequency differences observed between the directions due to propagation-related effects. Read more here <http://www.arrl.org/news/mark-your-calendars-it-s-time-for-the-spring-fmt>.

==> + AT THE WORKBENCH: THE ARRL HOMEBREW CHALLENGE III -- AND THE WINNER IS...

The previous ARRL Homebrew Challenges have been to build a 5 W PEP 40 meter sideband and CW transceiver (Homebrew Challenge I) and then a 50 W linear amplifier to follow it (Homebrew Challenge II). This third challenge moved up the spectrum into frequencies that might be of interest to Technician class amateurs -- 10 and 6 meters.

There were two separate entry categories for this challenge: single band or multiband. The single band unit could have been for either 10 or 6 meters and had to output 25 W PEP on SSB and CW, with a cost target of $150. The multiband unit had to put out the same power on both bands and be built for under $200 of parts. Each entry category

had detailed requirements for receiver and transmitter performance. The FCC requirements for transmitter spurious response of -43 dB on 10 meters -- and particularly the -60 dB on 6 meters -- were expected to be tough. The first category had a prize of $200, while the second offered $300. While we heard from others who expected to participate, two entrants brought or sent us working transceivers by the November 1, 2011 deadline. Read more here <http://www.arrl.org/news/the-arrl-homebrew-challenge-iii-and-the-winner-is>.

==> + FCC NEWS: FCC SEEKS TO MODIFY HAWAIIAN HAM'S LICENSE

On March 15, the FCC issued an Order Proposing Modification, seeking to change the license class of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician. The FCC stated that granting General class Amateur Radio operator privileges to Wilson was "improper." In November 2011, the ARRL VEC sent an electronic data file to the FCC, requesting that the FCC issue Wilson a new General class license. Based on this application, the FCC granted Wilson a General class license on November 29, 2011. In January 2012, the ARRL VEC notified the FCC that Wilson's information was incorrect and he did not qualify for a General class license; the ARRL VEC asked the FCC to modify Wilson's license to show him to hold a Technician class license. Read more here <http://www.arrl.org/news/fcc-seeks-to-modify-hawaiian-ham-s-license>.

==> W1AW ANNOUNCES SPRING OPERATING SCHEDULE

With the switch from Standard Time to Daylight Saving Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. Your local standard times have not changed, but the UTC times they reference have. Read more here <http://www.arrl.org/news/w1aw-announces-spring-operating-schedule-1>.

==> ON THE AIR: ARRL SEEKS COMMENTS ON PROPOSED 9 CM BAND PLAN

A few months ago, the ARRL UHF/Microwave Band Plan Committee asked the Amateur Radio community about current, planned and projected uses of the amateur bands between 902 MHz and 3.5 GHz. The response was beyond our expectations, with hundreds of comments and suggestions received. Thanks to all of you who took the time to share information with us. After reading the feedback, the committee began working on the band plans; the first draft plan ready for review is for the 9 cm band (3300-3500 MHz). Read more here <http://www.arrl.org/news/arrl-seeks-comments-on-proposed-9-cm-band-plan>.

==> SOLAR UPDATE

Tad "Waiting for the Sun <http://www.youtube.com/watch?v=M24Yhd7N91s>" Cook, K7RA, reports: The average daily sunspot numbers over the past reporting week (March 8-14) were 88.3, a rise of nearly 19 points; the average daily solar flux rose more than 12 points to 134.2. Three new sunspots emerged. The first was sunspot group 1421 on March 9, which began with a relative

area of 90. In the days following, it went to 80, 50, 80, 70 and 60. Two more sunspot groups -- numbered 1433 and 1434 -- appeared on March 11, with a combined relative area (in millionths of a solar hemisphere) of 240, then 130, 140 and 150. The sunspot number peaked on March 11 at 103, and the solar flux on March 10 at 148.9 and again on March 13 at 140.7. The outlook for the next few days has solar flux at 115 on March 15, 110 on March 16, 105 on March 17-21, 110 on March 22-23, and back down to 105 on March 24-27. There was a great deal of geomagnetic activity on March 9, with a planetary A index at 68, and again on March 12 with planetary A index of 28. An M-class x-ray flare occurred on March 15 at 0752 UTC, and if you catch it soon enough, you can see the resulting x-ray flux <http://www.swpc.noaa.gov/rt_plots/xray_5mBL.html> on the GOES monitor. The predicted planetary A index for March 15-18 are 15, 20, 15 and 8, and then 5 for March 19-27. The vernal equinox will occur at 0514 UTC on March 20. The shift to spring generally means favorable conditions for HF propagation. Look for more information on the ARRL website on Friday, March 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Simon and Garfunkels's Old Friends/Bookends <http://en.wikipedia.org/wiki/Bookends>.

==> + ARRL WARNS MEMBERS TO BE AWARE OF BOGUS E-MAILS

Some ARRL members with arrl.net e-mail accounts have recently received bogus e-mails, notifying them of a bill that supposedly needs to be paid. The e-mail instructs the reader to click on a link to view the bill; clicking on the link could release a virus that can infect your computer. Please be aware that these e-mails are not coming from the ARRL. "If you receive an e-mail like this and it looks like it originated from ARRL, please do not respond," explained ARRL IT Manager Michael Keane, K1MK. "The best thing you can do when receiving bogus e-mails is to simply add them to the spam list in your computer's e-mail program and delete it. Please don't forward it to ARRL HQ -- we will have already seen it and are already responding to it."

==> THIS WEEK IN RADIOSPORT

This week:

- March 17 -- 10-10 International Mobile Contest; Feld Hell Sprint; AGCW VHF/UHF Contest
- March 17-18 -- North Dakota QSO Party; Oklahoma QSO Party; Virginia QSO Party; Russian DX Contest
- March 17-19 -- BARTG HF RTTY Contest
- March 19 -- Run for the Bacon QRP Contest
- March 22 -- NAQCC Straight Key/Bug Sprint

Next week:

- March 24-25 -- CQ WW WPX Contest (SSB)
- March 26 -- QRP Homebrewer Sprint

- March 28 -- SKCC Sprint
- March 28-29 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> + ENTER THE SEVENTH ANNUAL ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2013 ARRL Calendar. Read more here <http://www.arrl.org/news/enter-the-seventh-annual-arrl-photo-contest>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 17 -- ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-end-of-winter-hamfest>,
Lincoln, Nebraska; ARRL Southern Florida Section Convention <http://www.arrl.org/hamfests/southern-florida-section-convention-2>,
Stuart, Florida; ARRL West Texas Section Convention <http://www.arrl.org/hamfests/west-texas-section-convention-57th-annual-st-patrick-s-day-hamfest>,
Midland, Texas
- March 23-24 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine
- April 7 -- ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-1>,
Raleigh, North Carolina
- April 14 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-3>, Bartlett,
Tennessee
- April 14-15 -- Communications Academy 2012 <http://www.arrl.org/hamfests/communications-academy-2012>, Seattle,
Washington
- April 20-22 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-2>, Boise, Idaho;
63rd International DX Convention <http://www.arrl.org/hamfests/63rd-international-dx-convention>,
Visalia, California
- April 21 -- ARRL Delaware State Convention

NZART Headquarters Infoline Issue 247

16 March 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· News from the President ZL1TGC

· Administration Liaison Officer – update on fees.

· WIA ANZAC Day Event

· WIA Ross Hull Memorial Contest Results 2012

· NZARD branch success

· Special Event Station 75th Anniversary of Golden Gate Bridge. Attachment

Debby Says…

I have received an e-mail from Roger and Ann Klaver. They have found an NZART neck tie at a basketball court at the Fitzherbert Reserve, West Harbour, Auckland. Anyone who may have dropped it there can contact me for more information.

Remits and branch voting figures will be sent to all branch secretaries by the end of March. I am unable to send the remits out to any person or branch electronically beforehand.

Headquarters will be closed on Thursday 29th and Friday 30th March.

Talk soon…Debby ZL2DL

News from the President Vaughan ZL1TGC

Marlborough Branch Donation

I am delighted to report that Marlborough Branch 22 has made a donation of $1000 towards the cost of sending our ALO, Don Wallace ZL2TLL to Geneva for the World Radio Conference. This is a very generous donation and I would like to thank the Executive and members of the branch very much.

Vacancy on Council filled

My taking on the position of President created a casual vacancy in the Northern electoral district and I’m very pleased to be able to advise that Neill Ellice ZL1TAJ has agreed to join us on Council to fill this vacancy. You may recall that Neill narrowly missed out on being elected to Council during the last round of elections. Please give Neill a warm welcome, as I am sure he will bring to Council some new ideas and a fresh perspective which will serve us well.

Vaughan Henderson ZL1TGC

President, NZART Inc.

Fees Review

NZART Council was keen, for budgeting purposes, to know if and when there might be any changes to the current fees we pay for repeaters, beacons, etc. Radio Spectrum Management have advised that a fees review is planned but no changes to Amateur repeater, beacon and similar fees will occur before 1 July 2015.

Factors that may influence future fees payable include the > $1 million reduction in RSM licence income by the closedown of the high power VHF television transmitters, the rate of take up of other licences in the UHF spectrum, costs caused by each sector, etc.

It is not know at this stage what effect the review will have on the fees paid for Amateur licences but we have been assured that it will be preceded by full consultation (which is likely to start in 2013) with all users.

Don Wallace ZL2TLL

NZART ALO.

Commemorating ANZAC day with WIA

We have got it rolling early and the Townsville Radio Club will be operating from a WW2 Bunker on Castle Hill and the Hill at Charters Towers that was used as part of the huge military presence . We'll be operating from WW2 site on the Atherton Tablelands as well.

That's great that ex HMAS Castlemaine will be in and we hope ex HMAS Diamintina, ex HMAS Whyalla will be on air as well. I have included the Australian Maratime Museum in Sydney so hopefully we'll have ex HMAS Vampire or anther ship on as well, maybe some from the museums at point Cook and others as well.

The aim is to encourage as many RADIO AMATEURS as possible to have Amateur radio operating on the same modes, AM and CW, that were used during World War 1, and 2 plus Korea, Malaya, Confrontation, and early Viet Nam as an Amateur Radio salute to those servicemen and servicewomen who then served and those still serving.

We ask that it start in the afternoon and not interfere with the morning marches, services or reunions and simply use AM and CW on the afternoon

ets instead of the SSB.

It brings it home the difficulties that those servicemen and servicewomen had passing all the signals etc.

Can you please distribute this info as widely as possible so as many as possible will be involved. I'll try and get our New Zealand and other amateur radio organisations in the loop as well.

Regards and hoping for a successful AM and CW afternoon on the 25April2012

Mike Patterson VK4MIK

Wireless Institute of Australia

ROSS HULL MEMORIAL VHF-UHF CONTEST 2012:

RESULTS Contest manager: John Martin VK3KM

2012 Ross Hull Contest Results
The Ross Hull results have now been finalised.
In Section A, the top two scores were gained by Bob McQuarrie ZL3TY and Stephen Hayman ZL1TPH - the first time the Ross Hull Contest has been won by a station outside Australia. Coming third as the top scoring VK station was Ted Thrift VK2ARA. Next in line was Barrie Burns VK6ADI.

In the digital section, top score went to Dave VK2JDS with a log of 1296 MHz EME contacts, followed by one station from each of VK1, 4, 6, 7 and ZL.
Full details are available on the contest web page here.
John VK3KM

Feedback from NZ Amateur Radio Day

Thank you to all those who assisted us to promote the hobby by working our NZ Amateur Radio Day stations yesterday.We teamed up with local Civil Defence and put on a public display at the Glenview Shopping Mall complex car park,HAMILTON. Contacts were via the IRLP,National System,APRS,70cm,2m,40m and 80m.Due to car park constraints our HF antennas were limited to mobile whips on vehicles with extension coax leads leading to our ops bench display areas in neighbouring gazebos.The weather was in our favour and the public feed back was very positive with a number of follow ups.

John ZL1PO,
Radio Electronics Group(Inc.) ZL1REG
Branch 89 NZART

Special Event Station W6G

I am writing on behalf of the San Francisco Amateur Radio Club. We will be holding a Special Event Station - W6G - to celebrate the 75th Anniversary of the Golden Gate Bridge on May 26, 2012 at 2000z to May 27, 2012 at 2200z. Details are in the attached PDF and also at

http://www.sfarc.org/timeline05262712.htm

More details are attached to this bulletin.

Tony Dowler K6BV

DXer now a Silent Key - Excerpts taken from the Daily DX Vol 16 No 047
dated 6 March 2012.

It is with great sadness that I report the passing of the legendary

DXpeditioner ZL1AMO, Ron Wright. He was 75.

Ron was the 23rd Amateur Radio operator inducted into the CQ DX Hall of
Fame in 1985, as well as recently (2009) the “2nd inductee to
the NZ DX Hall of Fame”.

ZL1AMO was one of the best CW ops and operated most of his DXpeditions

exclusively on his favorite mode. His CW DXCC count was 339/346

(current/total), only needing one country to have them all on Code!

RESCUE RADIO: ARES HAMS FILL MULTIPLE ROLES DURING KENTUCKY SEVERE WEATHER OUTBREAK

Amateur Radio operators in Hardin and surrounding Kentucky counties provided critical communications during and after the severe weather outbreaks on February 29th, and again on Saturday March 3rd. Amateur Radio Newsline's Cheryl Lasek, K9BIK, is here with the details:

--

Members of the Hardin County Kentucky Amateur Radio Emergency Service were activated initially by the National Weather Service. This as a resource to relay significant weather information directly to their office in Louisville.

Hardin County ARES provided weather spotting, logistics, disaster assessment, and shelter coordination assistance. Throughout the severe weather, they were busy maintaining communications with served agencies, with hams in adjacent counties, other ARES units, and to amateur radio station WX4NWS which is located at the Louisville National Weather service office.

Knowing in advance the high probability for dangerous weather, several of the volunteer radio amateurs took personal time off from work in order to perform this public service.

In the aftermath of these deadly storms, Hardin County Amateur Radio operators continued to serve with agencies in affected areas in Southern Indiana and Eastern Kentucky, providing communications, disaster assistance, and support for ongoing search, rescue and recovery operations.

Fred Jones, WA4SWF, is the Region 4 Assistant Section Emergency Coordinator for the ARES in Eastern Kentucky. He e-mailed Newsline that as of March 11th there were Amateur Radio emergency Service nets still in operation on 8 repeaters in Eastern Kentucky. Whether or not these nets have been secured is unknown as we go to air.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to Shelby Ennis, W8WN, who is the Emergency Coordinator of the Hardin County ARES, 20 operators were active during the emergency on February 29th and 27 volunteered on March 3rd. (WA4SWF, KE4EK)

**

RESCUE RADIO: FEMA WANTS FCC TO ALLOW CAP TEXT TO SPEECH NOW

The Federal Emergency Management Agency better known by the acronym FEMA has asked the FCC to reconsider portions of its latest EAS Report and Order. Specifically in the area dealing with message standards.

In its filing, FEMA told the commission that portions of its 5th Report and Order on EAS limit the ability of local emergency management officials to obtain all of the benefits of Common Alerting Protocol messaging standards for EAS. Especially those that deal with text to speech conversion .

The FCC had put off the text-to-speech conversion issue for a separate rule making proceeding. But FEMA claims that one possible consequence of not allowing such conversions now is that Common Alerting Protocol messages supplied without audio content could cause a C-A-P equipped EAS device to interrupt a stations normal programming and only convey an EAS header tone. Or it might only transmit an alert signal and an end-of-message notification.

FEMA says that for radio stations this would mean that no information usable by the public would be conveyed. As such, FEMA is urging the FCC to reconsider and to allow speech-to-text technology to support EAS radio operations now.

(RW, Radio Today, Observer)

**

COMMUNICATIONS LAW: HOUSE ENERGY AND COMMERCE COMMITTEE APPROVES TWO FCC REFORM MEASURES

The House Energy and Commerce Committee voted 31 to 16 on Tuesday March 6th to approve an FCC reform bill that puts shot clocks on FCC decisions, requires disclosure of items before votes, and limits on merger conditions.

The cable, phone and broadcast industries all supported the FCC reform efforts as outlined in HR 3309, while House Democrats said the measure

will needlessly tie the FCC's hands and could lead to endless litigation. Democrats have vowed to defeat the measure.

At the same time the House also passed a second, non controversial FCC reform bill. HR 3310 that simply requires the FCC to conduct a biennial survey of the state of competition in the marketplace that will be published online and submitted to Congress. (B&C)

**

ON THE AIR: IRLP TOPIC CHANNELS INAUGURATED

The long-awaited Internet Radio Linking Project or IRLP Topic Channels have now gone live. IRLP- users are now able to log onto reflector channels allocated for interests ranging from DX'ing to music, media, history, the upcoming 2012 election and many others.

For those not aware, the Internet Radio Linking Project was the result of research and development by Dave Cameron, VE7LTD, back in 1998. This as a way of using the Internet to interconnect repeaters world-wide. With the advent of IRLP Topic Channels the concept has developed into a global discussion real-time forum on almost any topic of interest to those signed on.

For up-to-date information on the IRLP Topic Channels please visit www.irlptopics.net. To locate an IRLP node near you go to status.irlp.net on the world-wide-web. (W7RAT, Southgate)

INTRUDER WATCH: BUOYS ON 10 METERS

The source of some mysterious weak signals on 29.684 MHz with an 81.9 Baud and 130 Hz shift have been located. According to the February IARU Region One newsletter, the signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and only by directional antennas.

It turns out the source of transmissions by Datawell buoys. These buoys, produced in the Netherlands are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40 MHz.

Dick Van Empelen, PA2GRU, of Heemstede in the Netherlands has since visited the Datawell Company and has informed them that the buoy transmissions on the amateur service 10 meter band are illegal. The operations chief promised to inform all Datawell offices about the situation. (IARU-R1)

BREAKING NEWS: PLANNED MALI DXPEDITION ON HOLD DUE TO POLITICAL UNREST

Some breaking news in the world of DX. This with word that political unrest has led to a planned DX operation to Mali being put on

indefinite hold.

Two weeks ago members of the "Italian Dxpedition Team" announced that they were planning to be active as TZ5T from Mali between April 12th to the 27th. However, their Pilot station Art Lorenzo, IK7JWY, has now issued a statement that the situation of civil war in Mali between the government and Tuareg insurgents is worsening. Because of this and other concerns Mali authorities will not issue licenses to radio amateurs who may be targeted because of radio equipment.

For this reason the DXpedition has been postponed until a yet to be determined later date. For updates please check in regularly at www (dot) i2ysb (dot) com on the World-Wide Web. And we will have more DX news later on in this weeks report. (OPDX)

PROPAGATION: YET ANOTHER CME HEADS TOWARD EARTH Spaceweather reports that the sun has again erupted in a way that will likely affect radio propagation here on Earth for several days. Especially on the High Frequency bands. We have more in this report:

--

Sunspot AR1429 unleashed another strong flare on March 13th. The category M 7.9 explosion produced a significant Coronal Mass Ejection or CME that solar forecasters predicted would reach Earth at 06:20 UTC, plus or minus 7 hours, on March 15th and whose effects on propagation could last for several days.

As a result, geomagnetic storms are possible when the charged cloud arrives that could produce auroral displays in the Northern-most latitudes. This in turn could lead to aurora propagation at 50 Mhz and above.

Ironically, a bright comet is at the same time diving into the sun. The comet was recently discovered NASA's Solar and Heliospheric Observatory SWAN instrument. As such its been named "Comet SWAN."

The comet's death plunge or "swan dive" as some astronomers are calling it comes just as the sun has unleashed the strong flare. Because of

this some of the SOHO images of the comet are confused to some degree by energetic protons striking the camera's imaging sensor.

For the amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

For updates on this and other solar activity we suggest that you check spaceweather.com for the latest information. (Spaceweather, Space.com)

ENFORCEMENT: FCC AFFIRMS $25000 FINE FOR UNLICENSED SAN JOSE CA FM BROADCAST OPERATIONS

The FCC has affirmed a $25,000 Notice of Apparent Liability issued to Gabriel A. Garcia of San Jose, California. This for a 2010 series of unlicensed radio transmissions heard on 92.9 MHz, 93.7 and 104.3 MHz all traced to Garcia residences.

Garcia was issued four notices of unlicensed operation from the FCC before being issued the proposed fine in 2011. The base penalty in such cases is $10,000 but the agency has said that Garcia operated on multiple frequencies, on multiple occasions, and called his behavior particularly egregious. This because his transmissions allegedly interfered with the Aviation Radio Services band.

Garcia never responded to the proposed fine. Having not heard an appeal from him since issuing the NAL last March, the FCC now has finalized the $25,000 fine and given him the customary 30 days to pay. If he fails to do so the case may be referred to the Department of Justice for collection. (FCC)

**

COMMUNICATIONS COORDINATION: FREQUENCY COORDINATION FOR 2012 POLITICAL CONVENTIONS COMMITTEE FORMED

Broadcast engineers have formed a committee to coordinate spectrum use at the Democratic and Republican conventions this summer. According to member Ray Benedict PolComm 2012 was formed in an effort to head off radio and TV personnel who may show up at the conventions and then try to use their wireless mics and two-way radios without first going through the frequency coordination process.

The Republican convention is Aug. 27th to the 30th in Tampa, Florida and the Democratic convention is September 3rd to the 6th in Charlotte, North Carolina. The committee says that it will seek a temporary rules waiver to allow TV Channels 14, 16 and 17 to be used as communication channels in Tampa and TV Channels 14, 16, 17, 18, 19 and 20 in Charlotte.

Broadcast engineering consultant Louis Libin is the PolComm 2012 chairman. Libin has chaired frequency coordination committees for past seven national political conventions. (RW)

**

NEW PRODUCTS: THE TALENT POD FROM HENRY ENGINEERING

A fascinating new piece of merchandise has come along that while not meant for ham radio, deserves a mention.

Henry Engineering, the California-based company owned by Hank Landsberg, WB6MEU, has come out with a broadcast product that could also be of interest to contesters, DX'ers as well as dedicated multi-operator stations such as during Field Day. Called the Talent Pod, the unit is a desktop local host controller for microphones and headphones that the company says solves audio problems often encountered when doing remote broadcasts.

Talent Pod is a mini-console made for use by an announcer. It gives that person full control of his or her mic and headphones. It lets the announcer turn the mic on and off and create a mix of local and return audio in the headphones. The mic button is illuminated and is visible in outdoor settings. A cough button momentarily mutes mic audio.

There are also two separate inputs for local and return audio, with a volume control for each. The operator can control the volume level and mix of the headphone audio.

To prevent confusion between the local and return audio, Talent Pod also has two pan switches, so the announcer can independently position the local and return audio in the center, left or right channel of the headphones.

As most hams involved in contesting and multi-op DXing will note, all of these functions could easily be adapted to use in an amateur radio multi operator station environment. All it takes is a bit of imagination. More information on the Talent Pod is on line at www.henryeng.com. (RW)

**

HAM RADIO HONORS: ARRL OPENS NOMINATIONS FOR SEVERAL AWARDS

The nomination period is now open for a number of ARRL awards that are designed to recognize educational and technological pursuits in Amateur Radio, as well as an award to honor a young Amateur Radio operator. These include the Herb S. Brier Instructor of the Year Award for educators and the Hiram Percy Maxim Award is for a licensed radio amateur under age 21 to name only two. In all there are a half a dozen awards this year. For more information take your web browser to tinyurl.com/arrl-awards-2012 or contact Steve Ewald, by e-mail to wv1x (at) arrl (dot) org. (ARRL)

**

HAM HAPPENINGS: INTERNATIONAL MUSEUMS WEEKEND REGISTRATION NOW OPEN

The International Museums Weekend special event operations will take place on the weekends of June 16th through the 17th and again on June 23rd and 24th. Radio amateurs are encouraged to participate in this event by setting up stations in their local museums.

The International Museums Weekend organizer Harry Bloomfield, M1BYT in Leeds in the U-K. He asks that all those intending to take part in the event to register their museum operation at www.ukradioamateur.co.uk/imw.

This is not only a fun event but one that permits you to showcase amateur radio to non-hams world wide. (WIA News)

**

HAM HAPPENINGS: CELEBRATING THE MORSE CODE

New York's QSY Society Amateur Radio Club will be hosting a special event station at the Samuel F. B. Morse Estate at Locust Grove in the city of Poughkeepsie. This in celebration of his creation of the Morse Code in 1832. The operation will run from 8:30 a.m. to 1:30 p.m. Eastern Daylight Time on Saturday April 14th using the special event callsign K2QS. Transmissions will be centered on 7.034 on 40 meters and 14.034 MHz on 20. Hams making contact with K2QS will be eligible for a special commutative QSL card. QSL requests go to David Ruth at 48 Hoof Print Road, Millbrook, New York, 12545. ((KB2VJP)

**

NAMES IN THE NEWS: STEVE FLETCHER G4RFC NAMED RSGB OLYMPIC FACILITATOR

Some names in the news. The Radio Society of Great Britain has announced that Steve Fletcher, G4RFC, has been appointed as the U-K national society's Olympic Facilitator. According to a press release, Fletcher will be drawing together all the information on radio amateur special events associated with the upcoming Olympic and Paralympic Games in the UK. S As such he wants to hear about any individual plans so the RSGB website can show who is doing what, when and where. Fletcher can be reached by e-mail to g4rfcinfo (at) yahoo (dot) co (dot)uk. (GB2RS)

**

NAMES IN THE NEWS: G6LVB TO SPEAK AT AMSAT-NA - TAPR HAMVENTION BANQUET

Howard Long, G6LVB will be the featured speaker at the 2012 AMSAT/TAPR Hamvention Banquet on Friday night, May 18th in Dayton, Ohio. Long will be talking about his FUNcube Dongle and the 64 to 1700 MHz Software Defined Receiver. Banquet tickets will not be sold at the AMSAT booth during the Hamvention therefore reservations must be made ahead of time through the AMSAT Store. Its located in cyberspace at tinyurl.com/amsat-na-store. Tickets are priced at $30 each. (ANS)

THE CHANGING OF THE GUARD: PACIFIC DXER RON WRIGHT ZL1AMO S.K.

Another of those sad changing of the guard moments. This with word that the ham radio community has lost legendary Pacific DX'er and DXpeditioner Ron Wright, ZL1AMO.

Word went out two weeks ago that Wright had been admitted to the North Shore Hospital in New Zealand because of a collapsed lung but recovered. The last medical update noted that ZL1AMO was in stable condition.

According to reports, Wright was still in the hospital at the time of his death on March 6th. Services for ZL1AMO were to be held at the Morrison Fuenral Home in Henderson, New Zealand on Saturday March 10th. At the time of his passing Ron Wright, ZL1AMO, was age of 75. (OPDX, NZ Herald)

HAM RADIO IN SPACE: CALL FOR SPEAKERS AT 2012 AMSAT UK SPACE COLLOQUIUM

A call has gone out for speakers for the AMSAT-UK 2012 International Space Colloquium. This years gathering will take on the weekend of September 15th to the 16th at the Holiday Inn, Guildford, England. Also being sought are papers for subsequent publishing on the AMSAT-UK web site.

Submissions should be sent via e-mail to david dot johnson at blackpepper dot co dot uk or to the postal address for G4DPZ found on QRZ dot com. More information on this event is on-line at www (dot) uk (dot) amsat (dot) org/colloquium/twelve.

This years Colloquium will take place only a few weeks prior to the planned launch of AMSAT-UK's FUNcube-1 ham radio satellite. (AMSAT-UK)

**

HAM RADIO IN SPACE: AMATEUR RADIO SATELLITE COORDINATION FORMS REVISED

Hans van de Groenendaal, ZS6AKV, reports that the Amateur Satellite Frequency Coordination request form has been updated and is available for download from www.iaru.org/satellite. Also on the IARU satellite web page are a number of guideline documents which will assist satellite builders, including a document on the ITU requirements for amateur radio satellites. ZS6AKV is the IARU Satellite Advisor. (ZS6AKV)

**

HAM RADIO IN SPACE: AMSAT-NA RECEIVES OKJ TO RE-DISTRIBUTE KEPS

AMSAT's Ray Hoad, WA5QGD has announced that the organizations request to re-distribute US Air Force Space Command Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013. AMSAT's request to distribute the orbital element data was approved on March 1st. (ANS, WA5QGD)

**

WORLDBEAT: RNW MEDIA NETWORK WEBLOG TO END MARCH 22

The Radio Netherlands Media Network Weblog will be closing for good at the end of the winter shortwave broadcast season on Saturday March 24th. This as the result of a new mandate by the the Holland-based broadcaster that effective on January 1, 2013, it will no longer be possible to provide coverage of international media news.

The Weblog is written and edited by Andy Sennitt and contains over 15,000 media news items published since October 2003. Sennitt says that it will remain online as a searchable archive. To prevent spam, it will no longer be possible to add comments, but the nearly 14,000 comments already received will still be available for viewing.

The last Media Network newsletter will be e-mailed to subscribers on March 22nd. (Media Network)

**

WORLDBEAT: GREECE TURNS OFF 11 MEDIUM WAVE TRANSMITTERS

The Administrative Board of the Greek Public Broadcaster has ordered the switch-off of eleven medium wave transmitters. This as a result of new austerity measures due to the financial situation being faced by that European nation. This leaves only nine medium wave transmitters with their respective Greek Public Radio programs in operation. The action was adopted by the Administrative Board after a meeting on February 17th. (GreekRadio.com)

RADIOSPORT: 2012 CQIR CONTEST CELECRATES IRTS 80TH ANNIVERSARY

>From the radiosports file, word that the CQIR contest is taking place at not long after this newscast goes to air. That being from mid-day on Saturday March 17th to mid-day on the 18th.

This years contest will be the international showpiece event for the Irish Radio Transmitters Society`s 80th anniversary celebration. Paul O'Kane, EI5DI, advises that his contest logger will be free and unrestricted for the contest. Also that his SD may be downloaded from ei5di.com.

CQIR entrants should be aware that the Russian DX contest overlaps with it. You can easily tell the difference between the two in that Russian stations will send a 2 character district code instead of a serial report as used in the CQIR competition.

Full rules for the CQIR contest are available on-line at www.irts.ie. (IRTS)

**

DX

2E1EUB, will once again be active as from Eastern Scotland as 2M1EUB for 7 days beginning March 24th. He will be located in the Cairngorms National Park operating on 160 and 80 meters and several ham satellites. QSL as directed under 2M1EUB on QRZ.com.

The current XW1A and XWOZJZ operations from Laos have been approved for DXCC credit. Bill Moore, NC1L, who heads up the DXCC Desk at ARRL headquarters made the approval official on Tuesday, March 13th.

EI7CC will be on the air from Lesotho as 7P8PB through April 3rd. Activity will be holiday style and he will operate when circumstances permit. QSL via EI7CC, either direct or via the bureau. Logs will be uploaded to Logbook of the World immediately after his return to Ireland.

A large group from Germany and Poland plan to be active from the Pacific island of Tonga until March 24th. They are using the callsign is A35YZ. QSL via DL7DF.

Down the road a bit comes word that DK9FN will once again return to Temotu Province be active as H40FN between this December 22nd and January 7th of 2013. QSL H40FN via HA8DD. More details will be forthcoming.

Lastly comes news that F4CYZ will be operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier and especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check. Its in cyberspace at www.mdxc.org/cn2yz.

(Above from various DX news sources)

THAT FINAL ITEM: BILL BEFORE CONGRESS TO LET ASTRONAUTS KEEP SPACE SOUVENIRS

And finally this week, a dispute between NASA and some former astronauts over ownership of space artifacts has led to a bill in Congress that would give the Mercury, Gemini and Apollo astronauts "full ownership rights." This, to items such as checklists and personal logs from their missions. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

--

Known as H.R. 4158 the proposed legislation grows out of an effort last year by Apollo 13 Commander Jim Lovell to sell the lunar module activation checklist that had been used to convert the moon lander into a space lifeboat on the periled 1970 Apollo 13 mission. The sale brought record-setting $388,375 but it was put on hold after the National Aeronautics and Space Administration demanded proof that the former astronaut owned the item.

Now comes H.R. 4158 that was introduced by Representative Ralph Hall of Texas. Hall is the chairman of the House Science, Space and Technology Committee. He measures cosponsor was Representative Eddie Bernice Johnson, also of Texas. It has since amassed an additional fifteen cosponsors.

In a letter to heir congressional colleagues the two key sponsors wrote that the legislation would allow the first generation of astronauts to retain spaceflight artifacts that have been in their possession. In many cases for more than 40 years.

Under the proposed measure, astronauts from the Mercury, Gemini and Apollo programs would be allowed to keep items such as personal logs and checklists. The only thing off limits would be rock samples gathered on those early lunar missions. The so-called &#65533;_oMoon Rocks.&#65533;__

After meeting with Lovell and several other former astronauts last month, NASA Administrator Charles Bolden said that these are American heroes. He called them fellow astronauts and personal friends who have acted in good faith. As such, Bolden says that they are committed to working together to find the right policy and legal paths forward to address outstanding ownership questions.

H.R. 4158 has bi-partisan support and is expected to make it all the way through the Congressional rule making process.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

This was not the first time that NASA has challenged the sale by an astronaut of a piece of space memorabilia. In 2010, NASA challenged Apollo 14 astronaut Edgar Mitchell's attempt to sell a camera he took to the moon. Mitchell eventually agreed to donate the camera to the Smithsonian's National Air and Space Museum. (collectspace.com; physorg.com, others)

WIA

HAMS ACROSS AUSTRALIA.

VK1

Two local Hams were interviewed live last Sunday on ABC 666 AM with
Ginger Gorman on the Month of Sundays morning program.

Peter Ellis vk1pe and Chris Carroll vk1gg demonstrated and talked about
the historical and current usage of Morse Code.

The producer has since conveyed that the caliber of the Morse interview was
"EXCELLENT"!

Congratulations guys, a job well done.

Now on this weeks WIA News Broadcast the rundown from the boys themselves!

VK1WIA STUDIO:
Peter Ellis VK1PE and Chris Carroll VK1GG did a 20 minute interview on ABC Local Radio in Canberra last Sunday. It's part of the Sunday program's month focussing on communication, and the guy's interview was talking about Morse Code and Amateur Radio. Let's listen in.

SUMMARY (120 seconds):Intro by Peter VK1PE
Chris VK1GG demonstrating Morse to Ginger Gorman, the ABC presenter.
Peter VK1PE talking about the 137kHz band and the need for Morse to be used.
Ginger Gorman talks about 'enthusiasm' for Morse.
Chris talks about the 'romance' of the code.
Sign-off by Peter VK1PE.
VK1WIA STUDIO:
Peter said they were immediately followed by a short pre-recorded interview with two Navy veterans from the Korea War who talked about Morse's use back then; and, the next segment was about communication between ants. (Laugh!)

Tasmania's Torpedo Boat

After the gradual draw-down of the British Garrison 1850-1870, and the perceived
threat of a Russian invasion, senior Royal Engineer defence experts,

Sir William Jervois and Colonel Peter Scratchley were sent to the Australasian Colonies to advise them to their best means of defence.

Among Scatchley's recommendations was the purchase of Torpedo boats, and the Tasmanian Government obtained one 2nd Class torpedo boat from celebrated British builder, J.I.Thornycroft & Son.

This presentation is given by retired HEC engineer Donald Chisholm-Smith on 29 March 2012from 7:30pm at the Royal Engineers Building.

If intending to attend then let Catherine know on 6234 2228 or email: creading@engineersaustralia.org.au

Thanks to Richard Rogers VK7RO for passing on the information

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

North West Tassie News

Cradle Coast Amateur Radio Club

The CCARC would like to advise all shortwave listeners and ex CB'ers who may be thinking of trying for a foundation licence or better, that they have a very experienced team of accredited licence examiners who are only too pleased to answer any information that you may require to obtain your Amateur Licence and they are happy to provide their services at any reasonable time to suit the individual without waiting for more than one applicant, Licence testing is basically available on command and if necessary will travel to the applicant, this also applies to anyone wishing to upgrade to the next level or going for the big one.

Check out Cradle Coast Club in the vk7 section of club pages, wia.org.au

What use is an f-call?

I keep having the same conversation, almost word-for-word, over and over again. I cannot do anything with just 10 Watts, it's not enough, it's useless, I cannot make any contacts, no-one hears me, I'm wasting my time.

The United Arab Emirates and Denmark, are two countries far from our shores. Seemingly these two have nothing in common, other than that we share our globe with their citizens. However, these two countries were contacted by an F-call last week with a 4/9 signal report.

This time it wasn't me making
the contact it was another station who is free to brag about their contact to the community. I'm bring it up here because it's not just me saying that you can make contacts, it's not just me making contacts, there are many amateurs who on a daily basis make contacts across the planet. Some of them hold a foundation license.

What it takes to achieve is some patience and a dose of luck. Neither of which are hard to come by or hard to achieve. Sitting at the radio for a few hours will likely get you a result.

Don't despair if it doesn't, try again, try a different band, check your radio settings, is your antenna pointing in the right direction? Is it connected? See if you can make a local contact and nut out if there are ways to improve your signal.

It keeps coming back to the same thing. Amateur Radio isn't an Instant Gratification kind of activity. It's one where some preparation and patience goes a long way. If you're looking for a quick fix, get on the Internet. If you want to get a sense of personal achievement, try making a long distance contact. There are amateurs on air all day long calling CQ, just waiting for a call from a station on the other side of the globe - this is your domain as much as it is theirs.

I cannot make you push the PTT button, but I can encourage you to have a go.

I've seen a ten year old key the mike like an old hand, if he can do it, so can you. It won't bite!

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

NEW US 60 METER RULES NOW IN EFFECT

Effective Monday, March 5th United States radio amateurs were granted new operating privileges on the 60 meter band. In addition to an increase in effective radiated power from 50 to 100 watts, hams can now transmit CW and PSK31. More information on what modes can be used on what frequencies is on-line at the ARRL website.

JAPAN HOME TO WORLDS TALLEST BROADCAST TOWER

A ceremony to mark the completion of the world's tallest freestanding broadcasting tower was held in Tokyo on Friday, March 2nd. Construction on the Tokyo Sky Tree tower began in 2008. It was completed a few days prior to its dedication ceremony.

The Sky Tree stands 2,080 feet tall and is claimed to be the tallest structure of its type ever built. It will eventually be the home of most broadcasting and two-way radio operations in that city.

==========

WEIRD AND WONDERFUL

RESCUE FROM RADIO TOWER: NAKED CLIMBER REMOVED FROM ATOP LOS ANGELES RADIO TOWER

>From the wEIRD AND wONDerFUL file comes the story of a naked man atop a downtown Los Angeles radio tower who was wrapped in a blanket and lowered to

safety by a makeshift pulley system on Wednesday night February 8th.

The unidentified tower climber was believed to be in his 30s or 40s and possibly an Arizona resident. It was unclear why he climbed the 220 foot high structure, which is part of a city personnel building just west of downtown L.A..

Witnesses say that he removed items of clothing after he began scaling the tower about 4 p.m. Pacific time just prior to sundown. His rescue went without incident after he asked to be given some MacDonalds hamburgers.

The mission which involved a heavy presence of Los Angeles Fire Department personnel was completed at about 9:45 Pacific Standard Time. Police said that the man will not be charged with a crime and his name will not be released.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

In DX, word that the AX stroke VK0TH operation from Macquarie Island, the December 2011 and January 2012 9U3TMM DXpedition to Burundi and the 2011 6-Oh-Zero M operation from Somalia have all now been approved for DXCC credit.

Also approved is the current T6BP operation from Afghanistan.

If you had any of these operations rejected in a recent application send a note to bmoore@arrl.org to have your record updated.

B Moore notes that the AX stroke VK0TH operation is in addition to the VK0TH that has already been approved for DXCC recognition.

FLEMISH RADIO AMATEURS COMMEMORATE THE SINKING OF THE TITANIC
100 YEARS AGO

Three special call signs will be activated from
April 1st to the 30th from Belgium by the Flemish
Radio Amateurs organization. This to honor those
who perished 100 years ago in the sinking of the steam ship Titanic.

OO100MGY by operated from the city of
Antwerp. OR100MGY will take to the air from
Knokke-Heist while OT100MGY will be on from Londerzeel.

During the weekend of April 14 through April 15,
all three stations will be active during a
marathon session from 12:00 Saturday until 16:00
Sunday UTC. Each of these stations has a special
and unique QSL card available so that three
different styles can be acquired.

BRAZIL BANS PY0S DX OPERATIONS

The Southgate News reports that radio amateur are
now prohibited from operating DXpeditions from
the Brazilian Archipelago of Saint Peter and
Saint Paul also known as PY0S. This is a remote
group of islands near the equator whose maximum
elevation is only 18 about meters above sea
level. It's also the nearest point of Brazil to
Africa, lying about 1820 kilometers from Guinea
Bissau. St. Peter & St. Paul was rated number 16
in 2011 DXCC list of most wanted entities.

In a report credited to PS8RF and the Brazilian
Amateur Radio League and some DX groups in Brazil
have shown their displeasure with this government
ban in postings on various social
websites. PS8RF told Southgate that there is
already a major mobilization by the Brazilian ham
community aimed at urging the nations Senators
and Federal Representatives to reverse the
decision on the to ban. PS8RF notes that the
biggest concern among Brazilian hams is that this
decision could open unheard restrictions to other
entities in Brazil as in other parts of the world
where there is no amateur radio activity.

DRM COMING TO INDIA

All India Radio has outlined its digitization
plan. This during the 18th Annual Broadcast
Engineering Society of India event.

According to All India Radio Director General, a pair of one megawatt transmitters at Rajkot and Kolkata are likely to be operational by the end of March and an additional 72 Digital Radio Mondiale transmitters would be commissioned between June of this year and March 2013.

The ongoing rollout by All India Radio has gained the interest of receiver manufacturers, who were present at the event with their latest products. Digital Radio Mondiale member companies Nautel, Digidia, Fraunhofer, Harris and Thomson Broadcast attended the conference this year.

MEDIA WATCH

W5LFL AND W5KWQ - MAN ON A MISSION - THE MOVIE

We travel back in time to 1983.

That's when then NASA astronaut and ham operator Owen Garriott, W5LFL, made the first manned amateur radio transmission from space. His pioneering effort from flight STS-9 paved the way for todays International Space Station ARISS program.

Several decades later, Owen's son Richard, W5KWQ, would fly to the ISS and use the same method to talk to his dad and many others here on planet Earth. Now, these historic moments have been captured in the exciting new documentary titled Man on a Mission. A film that reveals Richard Garriotts quest to become the first second generation American in space.

A DVD release is planned for May 2012. More about this documentary is on-line at firstrunfeatures.com

(Firstrun Features VIA ARNEWSLINE)

WW SPECIAL INTEREST GROUPS --- ATV

A VIDEO TOUR OF W1AW

In case you missed the live web tour of the February 12th of ARRL headquarters' flagship station W1AW you can now watch the 18 minute video on the ARRL website. In the show W1AW Station Manager Joe Carcia, NJ1Q, led Geoff Fox, K1GF, on a tour of the famed station. Al Petrunti, KA1TCH, of the New Day Group recording it for future netcasting.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Connecting Students with Space

The GENSO project features in an article in the February 2012 edition of the free magazine ESA Bulletin.

GENSO is a worldwide network of education and amateur radio ground stations linked together via the internet.

Student satellite teams can normally only gather around 20 minutes of data per day from their satellite using their own ground station.

GENSO will give them free access to potentially hundreds of stations around the globe and increase their data return to many hours per day.
It will also allow them to command their spacecraft from the other side of the world.

GENSO http://www.genso.org/

(sourced to southgate)

Matt Bennett KF6RTB reports that the amateur radio CubeSat, Radio Auroral Explorer 2 (RAX-2), has detected the communication-disrupting anomaly in the upper atmosphere it was searching for.

The team express their thanks to the amateur radio community.

The primary objective of the mission is to use the onboard radar receiver in conjunction with a powerful radar station in Alaska to study the formation of a plasma anomaly known for causing the scintillation of radio signals in the UHF and higher bands. This scintillation effect is known to inhibit our space radar tracking capabilities and ground-space communications.

Studying this anomaly in this bi-static radar configuration (ground based transmitter, space-base receiver) will provide scientists with a better understanding of these anomalies that has not been achievable with ground radars alone.

(sourced to southgate)

SPECIAL INTEREST GROUPS - LOW DOWN

UK SPECIAL 600 METER PERMITS EXTENDED

AMATEUR RADIO NEWSLINE say UK Notices of Variation to amateur licenses for special research permits to operate in the band 501 to 504 kHz have been extended to December 31st 2012.

This as telecommunications regulator Ofcom has begun discussions with the Radio Society of Great Britain about the timetable for implementing the new secondary allocation to the amateur service, 472 to 479 kHz that was recently approved at WRC-12.

The agreed upon availability date for this band to begin to become available for administrations world-wide to

begin proceedings to open to their ham radio communities is
effective as of January 1st, 2013.

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on
wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and
Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a
range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

RAC Bulletin 2012-018E - Public Information Officer appointed to the
Field Organization National Secretariat
2012-03-15

**
I am extremely pleased to announce the appointment of Alan Bauld
VE3CBR to the Field Organization National Secretariat effective
immediately. Alan resides in Stittsville, Ontario just outside Ottawa,
and will be a welcome addition to our ever growing team.

Alan has an impressive CV and I'll list just a couple of highlights.

- Holds a Master of Arts in Education
- Bachelor of Arts in Geography/Anthropology
- Has an Electronics Technology Diploma
- Has other qualifications and certificates too numerous to mention
- He is currently Eastern Canadian Storage Architect with Softchoice Canada
- Has experience as a Professor and Lecturer
- He is a Lieutenant and Training Officer in the Canadian Forces Reserves with the 736 Communications Squadron
- Has published many, many articles.

Alan, I join with the entire National Secretariat, RAC Board of
Directors and RAC Executive and say welcome aboard. We look forward to
working with you.

New Kensington Ham Radio Group Goes 'Old-School' Global:

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27928

He has to listen closely to hear through the static, but University of Pittsburgh student Geoff Wolf can just barely make out the strained beeps of Morse code emanating from somewhere in the south Asian country of Sri Lanka. Wolf, of Harrisburg, belongs to the Skyview Radio Society, an amateur ham radio group that draws members from throughout Western Pennsylvania. Members meet at their radio station and clubhouse in New Kensington and broadcast locally and throughout the world. "All you need is a radio, a wire and a power source," said Larry Kelley of Murrysville, one of about 80 society members. "People will get on and see how many folks throughout the world they can talk to." In today's age of cellphones, the Internet and numerous other modes of communication, it might seem quaint that ham radio is still around. But it has a distinct advantage over many other forms of modern communication.

//
John W. Watson, W9MGI (SK):

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27927

Aledo, Ill. -- John William Watson, 92 of Preemption, passed away Tuesday March 13, 2012 at the Monmouth Nursing Home. Funeral service will be Saturday March 17, 2012 at 2:00 p.m. at the Corman Memorial Home Roseville. Family will receive friends one hour prior to the service. Burial will be in the Roseville Cemetery, Roseville. Memorials may be made to the Preemption United Methodist Church or Roseville American Legion. Please sign the online guestbook at www.cormanmh.com. Corman Memorial Home in Roseville is in charge of the arrangements.
He was born June 23, 1919 in Roseville, the son of Tracy Ivan and Lula Fisher Watson. He married C. Maxine Wallis on July 3, 1949 at the Roseville United Methodist Church. He graduated from Roseville High School in 1937. He enlisted in the Army Air Corps April 1, 1941 and served overseas until the end of WWII as an aircraft radio repairman. He was employed by the Rock Island Arsenal from April 1949 to Oct.2007 - 58 years. He was an avid amateur radio operator since 1937 along with two high school buddies Kirk Sanderson and George Kirkpatrick who have continued to keep a weekly schedule throughout the years W9MGI. John also

enjoyed fishing.

Listen to Solar Storm Activity in New Sonification Video:

Posted: 15 Mar 2012 06:05 PM PDT
http://www.eham.net/articles/27926

(PhysOrg.com) -- What does a solar storm sound like? It's a "sonification" of measurements from two spacecraft during the most recent storm. Take a listen in this video. This sonification of the recent solar storm activity turns data from two spacecraft into sound. It uses measurements from the NASA SOHO spacecraft and the University of Michigan's Fast Imaging Plasma Spectrometer (FIPS) on NASA's MESSENGER spacecraft at Mercury. The creator is Robert Alexander, a design science doctoral student at the University of Michigan and NASA fellow. The researcher who created it is Robert Alexander, a University of Michigan design science doctoral student. Alexander is a composer with a NASA fellowship to study how representing information as sound could aid in data mining.

Hams in IN, KY and OH Provide Support During and After Tornado Outbreak:

Posted: 15 Mar 2012 01:01 PM PDT
http://www.eham.net/articles/27919

A devastating storm system moved across the United States on March 2, spawning a slew of tornadoes that contributed to at least 28 fatalities in Indiana, Kentucky and Ohio. These tornadoes followed an earlier outbreak that began on February 28 and left 13 dead across Kansas, Missouri, Illinois and Tennessee and battered parts of Kentucky.

//
Understanding the New 60 Meter Privileges:

Posted: 15 Mar 2012 12:59 PM PDT
http://www.eham.net/articles/27918

On March 5, radio amateurs were granted new privileges on the 60 meter band. The effective radiated power level was increased from 50 to 100 W, along with the ability to use CW and the digital modes PACTOR III and PSK31.

//
Mark Your Calendars: It's Time for the Spring FMT:

Posted: 15 Mar 2012 12:59 PM PDT
http://www.eham.net/articles/27917

The Frequency Measuring Test (FMT) continues its successful "round-table" format when it takes to the airwaves on the evening of April 19 (April 20 UTC). The test moves to Thursday from the November FMT's usual Wednesday evening, giving everyone an opportunity to participate.

//
The ARRL Homebrew Challenge III -- and the Winner Is...

Posted: 15 Mar 2012 12:58 PM PDT
http://www.eham.net/articles/27916

The previous ARRL Homebrew Challenges have been to build a 5 W PEP 40 meter sideband and CW transceiver (Homebrew Challenge I) and then a 50 W linear amplifier to follow it (Homebrew Challenge II). This third challenge moved up the spectrum into frequencies that might be of interest to Technician class amateurs -- 10 and 6 meters.

//
FCC Seeks to Modify Hawaiian Ham's License:

Posted: 15 Mar 2012 12:58 PM PDT
http://www.eham.net/articles/27915

On March 15, the FCC issued an Order Proposing Modification, seeking to change the license class of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician. The FCC stated that granting General class Amateur Radio operator privileges to Wilson was

"improper." In November 2011, the ARRL VEC sent an electronic data file to the FCC, requesting that the FCC issue Wilson a new General class license. Based on this application, the FCC granted Wilson a General class license on November 29, 2011.

Need Legal help NY -- Dutchess County:

Posted: 15 Mar 2012 12:57 PM PDT
http://www.eham.net/articles/27898

I am writing this letter in hopes that I may get some really needed help and support from the ham community at large. My name is Myles N2EHG, I am a telecommunications engineer and radio amateur. I live in a small town outside of Poughkeepsie New York. I moved there a year ago to take care of my mother, who is ill and needs around the clock care. My idea was to enjoy the quiet and beauty of the area in hopes that the setting would help my mother improve and allow me also to enjoy my only hobby, amateur radio.

http://forums.qrz.com/showthread.php?338247-Amateur-Radio-Newsline-Report-1805--March-16-2012&goto=newpost

Amateur Radio Newsline☐ Report 1805 ☐ March 16 2012

Amateur Radio Newsline report number 1805 with a release date of March 16th, 2012 to follow in 5-4-3-2-1.

The following is a QST. More on ham radios role in the wake of a recent tornado outbreak; FEMA asks the FCC to permit text to speech EAS transmissions; interference from ocean buoys discovered on 10 meters and a DXpedition to Mali is cancelled due to political unrest in that nation. Find out the details are on Amateur Radio Newsline☐ report number 1805 coming your way right now.

South Dakota QSO Party April 21 - 22 2012

Posted: 16 Mar 2012 08:20 PM PDT
http://forums.qrz.com/showthread.php?338366-South-Dakota-QSO-Party-April-21-22-2012&goto=n
ewpost

This is your chance to make contact with the "5" active hams in South
Dakota. (just kidding)

We hope to have a good showing for this years QSO party including a few
rover stations. Please pass this on to your email lists and message boards.
Anyone who wants to request the activation of rare counties can email
brian@k0mcm.com and we will see what we can do.

Thanks to the Dakota Terrirtory DX & Contest Club for creating the website for the QSO Party

Stay tuned for an announcement of a new South Dakota Worked All Counties Award

Event and awards sponsored by the Dakota Amateur Radio Network

//
U.S.S. South Dakota Memorial W0B

Posted: 16 Mar 2012 08:14 PM PDT
http://forums.qrz.com/showthread.php?338365-U-S-S-South-Dakota-Memorial-W0B&goto=newpost

Greetings From South Dakota:

We are excited about the U.S.S. South Dakota Memorials first (official) participation in the Museum Ships Weekend June 2 and 3rd 2012. During the past several years we have been on the air for a few hours for the event but never been apart of the official list of participating stations. Other groups have activated the Battleship Memorial on Veterans Day and other times of the year.

We have a website for our special event station thanks to the Dakota Territory DX & Contest Club. This year we will be selling T-shirts (Cotton Plaques) for the special event station. There is a photograph and information available on the website.

If you have any questions about visiting the Battleship Memorial or the operation of the special event station feel free to contact me. I would be happy to answer any questions that you may have.

p.s. There may be some early activations of the Battleship Memorial in April and May stay tuned for more details.

73

http://forums.qrz.com/showthread.php?338250-Ws-qrp-event-on-friday-april-13th-(cw-only)&goto=newpost

QRP EVENT ON FRIDAY, APRIL 13TH (CW ONLY)

To Kick-off the 100th Anniversary Commemoration of the Sinking of the Titanic

From Special Event Station WØS operating from the Titanic Museum in
Branson, Missouri

April 13, 2012

7:00 p m to 10:00 p m CDT

Frequencies

40 Meters 7.055 to 7.060 MHz

80 Meter 3.555 to 3.560 MHZ

Remember this is "QRP" 5watts or less-

Please check our website (www.w0s.org) for QSL instructions

This is not a contest, this is a commemoration of the operators who stayed
with the ship on that fateful cold night to send the CQD/SOS distress
signal.

We honor respect their commitment to saves lives.

WØS will make every effort to answer any and all calls made to us. Please
be patient and space out your calls.

If you have any questions, please communicate to erecom@hotmail.com or
K9ZTV@socket.net

Thank you.

Kent Trimble, K9ZTV & Al Gallo, WØERE

TITANIC WØS/QRP Event Coordinators, Branson, Mo.

GB1SPD Special Event Station

Posted: 15 Mar 2012 12:10 PM PDT
http://forums.qrz.com/showthread.php?338178-GB1SPD-Special-Event-Station&goto=newpost

St Patrick is the patron saint of Ireland and is celebrated on the 17th of
March each year.

Special event station GB1SPD will operate on 17th March 2012.

GB1SPD is the callsign issued to West Tyrone Amateur Radio Club to
celebrate St Patrick's Day.

As part of Omagh District Council's St Patrick's Day Connecting Cultures @
Strule Arts Centre the club will be QRV on HF, VHF, UHF, DSTAR and Echolink

from the arts centre on the 17th March from 12:00 until 17:00 UTC.

A special QSL card is being designed for the event; all contacts will receive the special QSL card.

Around 17,280 people live in Omagh town and the town is now, with the exception of Derry/Londonderry, the second largest town in the west of Northern Ireland. It is the County town of Tyrone. Located where the Camowen and Drumragh rivers come together to form the Strule, the town is said to owe its origins to an abbey founded in 792 AD.

Omagh is situated 70 miles from Belfast and 34 miles from Derry/Londonderry and is the perfect launch pad to explore the beauty of the local countryside and an ideal stopover for visitors travelling to and from the Republic of Ireland.

SARL NEWS - SUNDAY 18 MARCH 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that it is announced that the key of Jeff Mosmann, ZR6JPO, became silent on 24th Feb 2012. Jeff suffered a heart attack while driving from Durban back to his home in Johannesburg.

Our sincere condolences to his relatives and friends.

(PAUSE)

In the news today:

BIRTHPLACE OF RADIO BECOMES A CITY

LISTEN AGAIN TO THE INTECNET

EXTRA-GALACTIC MILESTONE FOR SOUTH AFRICA'S KAT-7 TELESCOPE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

BIRTHPLACE OF RADIO BECOMES A CITY

Chelmsford, acknowledged as the birthplace of radio and home to the Marconi Company for many years, is one of three new cities created to mark the Queen's Diamond Jubilee. This year also marks the 100th anniversary of the establishment by Marconi of the first purpose built radio factory in New Street, Chelmsford in 1912. New Street is marked with a blue plaque noting the historic significance.

LISTEN AGAIN TO THE INTECNET

If you missed last Sunday's INTECNET on antennas, you can listen to it again. You can download both the audio and PowerPoint files from www.sarl.org.za, select Amateur Radio TODAY from the left hand menu.

Vincent Harrison, ZS6BTY, discussed HF antennas to work DX, including dipoles, verticals and small beams. He also focused on the effect of the height above ground, radiation patterns and take-off angles and touched on antennas for 80 and 160 metres.

EXTRA-GALACTIC MILESTONE FOR SOUTH AFRICA'S KAT-7 TELESCOPE

South Africa's KAT-7 telescope, a seven-dish array which is a precursor to the much larger MeerKAT telescope in the Karoo and to the Square Kilometre Array, has reached another major milestone by observing the radio emission from the neutral hydrogen gas (HI) in a nearby galaxy. Hydrogen gas emits radio emission in a spectral line at a very specific frequency of 1 420 MHz.

The astronomers pointed the telescope towards a galaxy called NGC 3 109 - a small spiral galaxy, about 4,3 million light-years away from Earth, located in the constellation of Hydra. The observation allowed them to see the HI radio emission of this galaxy, as well as to see how this galaxy is moving. Where the gas is moving towards us, the frequency of the spectral line is Doppler-shifted upwards; where the gas is moving away, the frequency is shifted down. In this way, astronomers can map the way in which all of the gas in the galaxy is moving.

"These exciting results achieved by KAT-7 have given us confidence that we know how to build a cutting-edge radio telescope in Africa to answer some of the fundamental questions in radio astronomy", says Dr Bernie Fanaroff, director of SKA South Africa. "Our team in the SKA South Africa Project and universities has again shown that they can deliver cutting-edge technology and do excellent science on a very tight schedule."

BUOYS ON 10 METRES

The source of some mysterious weak signals on 29,684 MHz with an 81,9 Baud and 130 Hz shift have been located. According to the February IARU Region One newsletter, the signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and only by directional antennas.

It turns out the source of transmissions is by Datawell buoys. These buoys, produced in the Netherlands, are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40 MHz.

Dick Van Empelen, PA2GRU, of Heemstede in the Netherlands has since visited the Datawell Company and has informed them that the buoy transmissions on the amateur service in the 10 metre band are illegal. The operations chief undertook to inform all Datawell offices about the situation. Here is challenge for amateurs in Africa and South Africa to listen for some very weak signals. The frequency is 29,684 MHz. Make a

recording and send it to artoday@sarl.org.za.

SARL OFFICE CLOSED

Remember, the SARL office will be closed during March as Mariska Faasen is overseas on holiday visiting family. Between Henry Chamberlain and Francois Botha they will attend to emails and telephone messages. Please send emails to the usual address admin@sarl.org.za.

MAINTENANCE TO SARLNEWS AND SARLNUUS MAIL LISTS

This item has been received from Peter, ZS6PHD, who did a lot of housekeeping on the SARL website: The SARL website contains a facility to allow anyone to receive a copy of SARLNews or SARLnuus automatically via email. Some major housekeeping has now been done to the email list, and many invalid email addresses have been removed.

For technical reasons it is possible that one or two valid email addresses have also been removed. If you have stopped receiving your email news bulletin, or wish to sign up, please go to the SARL web site at www.sarl.org.za, and select News / Nuus by email on the left-hand side.

Please make this problem known to your friends who may suffer this problem.

CONTEST NEWS

Results, SARL Digital Contest - February 2012

9 logs were received for this contest. According to the logs the following band contacts were made 40 m = 108, 20 m = 52. 131 x PSK and 29 x RTTY contacts were also made. It was also nice to receive the first DX log from VU2UR. The results are as follows 1st ZR6MS 385 2nd ZS6A 368 3rd ZS6PX 360 4th ZS2J 351 points.

The full results will appear in the HF Happenings.

WESTERN CAPE ANTIQUE WIRELESS ASSOCIATION EXPO

The Western Cape section of the Antique Wireless Association of South Africa will be holding an Expo which will be open each day for the whole of the Easter long weekend, 6th to 9th April at the farm QTH near Stanford of John and Judy Martin, ZS1D, and ZS1JEG. A large display of radios of yesteryear and associated equipment will be on show and a classic radio station will be in operation.

GPS coordinates for the farm are 34 25,458S and 19 24,922E. There will be call in on 145,500 and on the Hermanus repeater on 14,725.

The focal point will be from 16:00 SAST on Saturday which will commence with presentations by AWA President Richard, ZS6TF, and other members on some of the equipment and their restoration projects. An interactive discussion forum will follow for anyone to contribute or for those who need questions answered or need assistance. There will be a bring and

braai in the evening and for those who wish to camp over on the Saturday night, just bring your camping kit as there are camping facilities on the farm.

Please contact organizer and AWA committee member John, ZS1WJ, on 082 673 5337 for more information, and to let him know if you are attending. Visitors are encouraged to bring an antique radio to exhibit, maybe a restoration project, homebrew, or "as found" to add to the interest of the Expo.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is dropping off now that huge sunspot 1 429 has rotated out of view of the Earth. It sure was fun while it lasted.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 57.

All the bands from 20 to 10 m will provide lots of DX fun with even some 6 m openings possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 March - SARL VHF/UHF Analogue/Digital contest ends today at 12:00 CAT. 30 March - Last day to submit items on regulatory issues for discussion with ICASA to artoday@sarl.org.za. 21 March - ZS6ERB construction day. 6-9 April - Western Cape Antique Wireless Association Ekspo near Stanford, contact John, ZS1WJ, on 082 673 5337 for more information. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 4 895 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73. /EX

Amateur Radio Operators to Gather at St. Patrick's Day Hamfest:

Posted: 16 Mar 2012 05:04 PM PDT
http://www.eham.net/articles/27934

While those attending this weekend's St. Patrick's Day Hamfest may not all know each other by name, they likely will recognize each other's call signs. Randy Karch, president of the Midland Amateur Radio Club, has been known for about 30 years by the sign N50VH. Others opt for "vanity call signs" that are made up of their initials or stand for their favorite team. Whatever the jumble of letters, Karch said the call sign is a signature for those who pride themselves on their status as a "ham" or amateur radio operator. "We try to promote our own self-learning, self-study, self-participation," he said. The group will share secrets of their trade with the public during Saturday's 57th annual St. Patrick's Day Hamfest and ARRL West Texas Section Convention. The event is planned for 8 a.m. to 2 p.m. at the Downtown Lion's Club and will include informational booths, competitions and demonstrations.

//
Prevention is In the Air: Getting Ready for National Public Health Week:

Posted: 16 Mar 2012 05:02 PM PDT
http://www.eham.net/articles/27933

"CQ, CQ Celebrating National Public Health Week!" "CQ, CQ Celebrating National Public Health Week!" If you're an aficionado of amateur radio -- or ham radio as it's also known -- this is the call you might hear coming out of Oklahoma City on April 6. In layman's terms, it means "Calling all stations, calling all stations! Celebrating National Public Health Week!" In honor of this year's National Public Health Week observance, which runs April 2-8, officials with the Oklahoma City-County Health Department will hold a special drill in which all of its amateur communications equipment will be activated and users will attempt to make as many contacts as possible within 24 hours. It's not your typical National Public Health Week activity, but it may be the most unique. "With amateur radio, the best way to learn to communicate effectively is to immerse yourself," said Dave Cox, deputy director of the Oklahoma City-County Health Department and a 25-year ham radio operator. "Our ultimate last option when everything else fails is amateur radio." Amateur radio is part of the department's emergency response toolkit and allows officials to continue to communicate with staff in the field as well as fellow first responders in the event that a

disaster disables traditional communication channels. As Cox said, "you can take everything else down...and ham radio still works." This is the second year the department has held a National Public Health Week-inspired amateur radio drill. Last year, Cox said operators made contact with fellow ham radio operators in 32 states and four different countries.

//
SCRAMS Special Event Radio Station:

Posted: 16 Mar 2012 05:01 PM PDT
http://www.eham.net/articles/27932

From April 12 through April 18th, a special event radio station will be established and demonstrations of wireless communications will be held at the Mystic Aquarium just off I95, Exit 90 in Mystic, CT. This event is being held as part of the aquarium's recognition of the 100th anniversary (April 15th) of the sinking of the Titanic. Come join us to learn about the Titanic's sinking; listen and learn how the ship sent wireless emergency messages. Try Morse code for yourself. View demonstrations of old and new amateur radio communications. Learn about the exciting hobby of Amateur Radio. Become part of this lifetime hobby!

IARU Announces New Amateur Satellite Frequency Coordination Form

Frequency coordination for amateur radio satellites is provided by the International Amateur Radio Union (IARU) through its Satellite Advisor, an official appointed by the IARU Administrative Council, its top policymaking body. This post is currently held by Hans van de Groenendaal, ZS6AKV.

Hans describes his role, "The IARU Satellite Advisor is assisted by an Advisory Panel of qualified amateurs from all three IARU Regions. The panel meets regularly via Skype to consider amateur satellite frequency coordination requests for satellites planned for operation on frequencies in the amateur service. The panel members often provide advice and assist satellite builders with the selection of the best possible frequencies to meet the objectives of their mission."

The Amateur Satellite Frequency Coordination request form has been updated (Version 27) and is available for download from: http://www.iaru.org/satellite.

On the IARU web satellite page there are also available a number of guideline documents which will assist satellite builders, including a document on the ITU requirements for Amateur Radio Satellites.

The list of amateur radio satellites coordinated by the IARU is posted on-line at: http://www.amsat.org.uk/iaru

[ANS thanks Hans van de Groenendaal, ZS6AKV for the above information]

Watch for Packets from US Naval Academy Ice Goat 1 Buoy

This month a group of Oceanography and Aeronautical engineering students from the US Naval Academy, led by Lt. Commander John Woods, a military instructor in oceanography, deployed a buoy rigged to monitor weather in the harsh conditions of the arctic. They delivered the "Ice Goat 1," buoy to the northern part of Alaska traveling by plane, then helicopter and finally snowmobile to the arctic ice off of the coast of Point Barrow, Alaska. Once the ice melts the buoy will begin its sea voyage.

Ice Goat 1 also carries an APRS beacon operating on 145.825 MHz. The position packets can be relayed via the ISS digipeater. However, the ISS only rises 1.5 degrees above the horizon at arctic latitudes. Reports of direct reception of the 145.825 MHz beacon are sought from any lucky

Alaskan, and perhaps eventually Pacific Northwest amateur radio stations (depending on ocean current) who may be in range. Please send reports of reception to: wb4apr@amsat.org.

This week, W3ADO, the US Naval Academy Amateur Radio Club has posted a notice via the ISS digipeater:

W3ADO]APRS,RS0ISS-3*,qAR,N4XS-3::BLN1 :APRS Arctic Buoy in Barrow Alaska. Watch for pkts!

The science mission of this buoy will broadcast webcam images and measure a variety of environmental parameters including air temperature, barometric pressure, and possibly under ice acoustics. As the buoy collects information about the surrounding parameters all data will be compiled on an internal data logger and transmitted back to USNA using an Iridium satellite data link.

[ANS thanks Bob Bruninga, WB4APR for the above information]

India HAMSAT VO-52 Recovery Successful

A report received from the ISRO Satellite Centre at Bangalore, India on March 14 says the HAMSAT VO-52 is back on the air. Mani, VU2WMY wrote, "The commands to 'Turn On' the PE1RAH Dutch transponder was successfully sent during 14:00 UT 35 deg ascending node pass over Bangalore, India. The commands were successfully received,

acknowledged and confirmed by telemetry. The beacon signal was heard loud and strong here at Bangalore."

Stations in Europe and North America reported good signals from VO-52 immediately after the transponder was activated. The beacon was heard with two-way contacts completed through the transponder.

The HAMSAT team requests detailed initial reports be sent to: tprangan@istrac.org and a copy to wmy@isac.gov.in

would be greatly appreciated.

HAMSAT VO-52 frequencies are:

Uplink: 435.2250 - 435.2750 MHz SSB/CW

Downlink: 145.9250 - 145.8750 MHz SSB/CW

Beacon: 145.8600 MHz CW

The CW beacon is sending: HI HI HI THIS IS VU SAT WITH THE DUTCH MODE UV TRANSPONDER MADE BY WILLIAM LEIJENAAR 73 DE PE1RAH

Upon successful recovery of VO-52 Mani, VU2WMY sent the following message on behalf of the HAMSAT team:

I take this opportunity to sincerely thank each and every

user and well wishers, who have been following and monitoring

closely all those events and activities that followed since

the interruption on 28th February 2012.

Thanks for all those encouraging and supporting expressions!

The initial telemetry reports indicated all the crucial and

critical parameters to be normal and satisfactory and we do

hope 'HAMSAT VO-52' would be available with much stronger power.

The overall spacecraft health is in 'Excellent Condition' and

all that we need to do is to monitor the transponder parameters.

14:05 UT on 14 March was a moment of great satisfaction and joy

to all of us here in bringing 'HAMSAT VO-52'back to life. It also

gives us great pleasure to note that 'HAMSAT VO-52'from India/ISRO

has a earned a name in the history of 'Amateur Radio Satellites'.

On behalf of everyone, I take this opportunity to sincerely thank

particularly, Mr. Parimalarangan-Operations Director for his hard

work and great efforts besides his exemplary technical competence

and skills exhibited in recovering back 'HAMSAT VO-52'.

Also my sincere thanks to Mission Director Mr. R. Suresh and the

entire 'HAMSAT VO-52' Mission Management and Project teams for all

the support, encouragement and recognition provided to 'Amateur

Radio World'.

My Good wishes to VO-52 and the transponders on-board for a 'Healthy

and Long Life'. My Good wishes & greetings, once again to William,

PE1RAH.[ANS thanks Mani, VU2WMY, Secretary & Station-In-Charge of the Upagrah Amateur Radio Club VU2URC at the ISRO Satellite Centre for the above information]

International Effort at Sea Gets UT1FG/MM Back on Satellites

This week John Papays, K8YSE shared an international amateur radio goodwill success story in getting Captain Yuri Bodrov, UT1FG/MM back on the air after a power supply failure at sea.

UT1FG/MM was enroute aboard his cargo ship from a Pacific port in Nicaragua bound for Montreal Canada via the Panama Canal and into the Gulf of Mexico. Yuri, an avid 6 meter and satellite operator, reported that his 12 volt power supply had failed shortly after leaving port.

John wrote, "The bad news was relayed amongst those of us who had been following Yuri and working him in wet grids as he traveled. Brainstorming started with ideas tossed around via emails. One idea was to buy a power supply and ship it Fedex to Yuri's agent in Panama and hope it got there in time. But Yuri felt that there would not be enough time for that to happen. We only had a few days."

Searching with Google and QRZ achieved contact with Captain Manolis Joannou, HP1CQ, also a sea captain and president of the Panama Canal Amateur Radio Association. Manolis was able to find a power supply that could operate off the 220 VAC ship mains and provide 12 volts to Yuri's IC-706 radio.

Captain Manolis made his way via a motor launch to Yuri's ship and hand delivered the new power supply. The two Captains spent an hour together before parting. Yuri was back on the air, working satellites from the Gulf of Mexico.

For a full story, complete with photos visit:

http://www.papays.com/sat/power/ut1fgpanama.html

[ANS thanks John Papays, K8YSE for the above information]

Open Source CubeSat Space Protocol Flight Test Aboard GOMX-1

Cubesat Space Protocol (CSP) is a small network-layer delivery protocol designed for Cubesats. The idea was developed by a group of students from Aalborg University in 2008. The protocol is based on a 32-bit header containing both transport and network-layer information. Its implementation is designed for, but not limited to, embedded systems such as the 8-bit AVR microprocessor and the 32-bit ARM and AVR from Atmel. The implementation is written in GNU C and is currently ported to run on FreeRTOS or POSIX operating systems like Linux and BSD.

GOMX-1, a 2U CubeSat designed and built by more than 15 students at Denmark's Aalborg University is expected to launch in late 2012 into a near sun syncronous orbit on a DNEPR rocket from Yasny in Russia with a number of other amateur radio satellites.

The GOMX-1 mission will qualify a number of satellite subsystems in space, providing extensive in-flight data. A camera payload will take color images of the Earth and an experimental Software Defined Radio receiver will be carried and its performance characterized. The mission will also test the use of the open source Cubesat Space Protocol for a complete mission including the space link.

GOMX-1 plans to use GMSK telemetry with selectable 1k2/2k4/4k8/9k6 rates on UHF with approx 28dBm power to a deployed antenna.

For more information refer to these web pages:

GOMX-1 web page: http://gomspace.com/

RAX-2 Amateur Radio Cubesat Scientific Success

The University of Michigan RAX-2 amateur radio cubesat has achieved success in detecting the communication disrupting anomaly in the upper atmosphere it was designed for.

On March 9, Matt Bennett KF6RTB reported on behalf of the RAX-2 team, "This is unbelievable!! After more than three years of hard work and dedication by my team and professor at Michigan, our chief scientist confirmed today that the RAX-2 spacecraft we designed, built, and launched into space has detected the communication-disrupting anomaly in the upper atmosphere that we've been looking for!"

The primary objective of the mission is to use the onboard radar receiver in conjunction with a powerful radar station in Alaska to study the formation of a plasma anomaly known for causing the scintillation of radio signals in the UHF and higher bands. This effect is known to inhibit our space radar tracking capabilities and ground-space communications. Studying this anomaly in this bi-static radar configuration (ground based transmitter, space-base receiver) will provide scientists with a better understanding of these anomalies that has not been achievable with ground radars alone.

Mark concludes, "The RAX Team would like to acknowledge and say thank you to the amateur radio satellite community for all of their support on this mission. We've really enjoyed interacting with fellow operators while collecting and analyzing telemetry. We've also learned a great deal about satellite operations from each other."

RAX-2: 437.345 MHz, 9600 bps GMSK http://rax.engin.umich.edu/

ARISS Status Report - 12 March 2012

1. Upcoming School Contacts

An ARISS contact has been scheduled for Istituto Tecnologico Statale Trasporti e Logistica "Leone Acciaiuoli", Ortona, Italy on Sunday, March 18 at 11:31 UTC. The Ortona Maritime Institute "Leone Acciaiuoli" (I.T.N) is a technical high

school that prepares the student for a career as a merchant ship officer or to continue his university studies in the field of engineering disciplines. Among the subjects taught at the school are navigation, astronomy, celestial navigation, satellite navigation, telecommunications (including satellite telecommunications), mathematics and physics. Since 1991, the Institute has taken part in the "International Day of Planetaria" which provides an opportunity for educating the public in the areas of planetaria, science and technology. On this day, the public is able to

visit the Planetarium, laboratories, astronomical telescope and other

astronomical equipment. The ARISS contact will be held as part of the day's activities.

2. California Students Radio Dan Burbank on Space Station

On Monday, March 5, Dilworth Elementary School in San Jose, California participated in an Amateur Radio on the International Space Station (ARISS) contact with Dan Burbank, KC5ZSX. Burbank fielded 19 questions put to him by the students about the challenges encountered while living in space. The contact took place during the NASA Destination Station exhibit at The Tech Museum located nearby and complemented lessons on Science Technology, Engineering and Math (STEM).

3. Astronaut André Kuipers Answers Children's Questions via ARISS

An Amateur Radio on the International Space Station (ARISS) contact was held between André Kuipers and school children at the Space Expo in Noordwijk, Netherlands on Tuesday, March 6 via station ON4ISS in Belgium. The radio

activity was part of an educational program around Kuipers' mission Spaceship Earth which targets youth who are 10-14 years of age. Part of this program consists of mission assignments that Kuipers gives to Dutch school children. The winners of each challenge were invited to the radio contact. Other activities included lessons and experiments.

4. Hams who Experimented with ARISSat Make the News

Farrell and Jeff Winder, the father and son who helped in the development of SuitSat-1, made the news recently when they used ARISSat's transponder and after several tries, successfully sent and received a picture of Farrell Winder's automobile license plate. Community Press posted the story, "Father, son team up

in 'outer space'." See:

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Halifax On The Air (Special Event)

Posted: 17 Mar 2012 09:20 AM PDT
http://forums.qrz.com/showthread.php?338397-Halifax-On-The-Air-(Special-Event)&goto=newpost

About a year ago I posted a desire to organize a special event for all towns and cities named Halifax to get on the air. I am in the final process of this project. We have picked the third weekend of July this year for our first event. That is July 21 and 22.

We are doing the full weekend because of the involvement of Halifax, England, and maybe other countries. Our station will go on the air by 10am EDST Saturday and remain on the air until 4pm EDST Sunday.

If you are in a "Halifax", or your club serves a Halifax, and are interested in being in this event, please contact me at HalifaxOnTheAir@gmail.com . I am preparing a web site for the event that will not only inform the contacts about the event, but also have a page for each participating town/city from which the QLS card/certificate may be downloaded with your contact info printed on it.

We will be working 40 meters and 20 meters phone bands for this event.

TNX, 73

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th March 2012

Call Book and Echo Ireland

A new printed call book has just been published by IRTS and will be distributed to members along with the April 2012 edition of Echo Ireland. The new call book contains a listing of current EI call signs and a summary of the activities of the society. Also, to celebrate the fact that IRTS is 80 years in existence this year, the call book includes some background on the radio clubs and societies that pre-dated the formation of the Irish Radio Transmitters Society in 1932.

The April Echo Ireland contains the committee's nominations for the offices of President and Vice-President as well as other committee positions. It also has updates from affiliated clubs: South Dublin Radio Club gives details of how to get up and running with the new Dublin ATV Repeater. From the North Cork Radio Group, Lisa EI9GSB writes about her involvement with some of the activities of the group over the past two years - including operation from Cork City Gaol, Blackrock Castle, Mizen Head, Blarney Castle and Mallow Castle. The North Cork Radio Group will be back on Mizen Head for International Marconi Day (April 21st) and, speaking of Marconi, the newsletter has an article about Marconi's first radio reports from the Kingstown Regatta in 1898.

The regular "HF Happenings" column from Anthony EI2KC covers recent DX activity by way of contributions from Trevor EI2GLB, John EI7BA and Paddy EI1DG. Anthony also brings us up to date on forthcoming DXpeditions that may be of interest. Another popular regular column is the HX Files from Pat EI2HX. This time, Pat explains how he experimented with mobile ATV; his tips would be of interest to anyone planning to operate mobile, even without a camera.

There is plenty more of interest in April's Echo Ireland, which will be posted to members along with the call book within the next few days.

IRTS 80th Anniversary AGM & Rally

The event this year is hosted by Dundalk Amateur Radio Society. The annual dinner takes place on Saturday April 21st, with the Rally and

AGM on the following day. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors.

This is a must attend event in the 80th Anniversary year of your national society. Full details of this event are on the IRTS web site www.irts.ie

Dinner tickets can be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie

---

Cashota

CASHOTA (Castles and Stately Homes on the Air) will be holding the first Monument Month over April 2012. This annual award event involves activating Monuments which As defined by Wikipedia, a monument is a type of structure either explicitly created to commemorate a person or important event or which has become important to a social group as a part of their remembrance of historic times or cultural heritage, or simply as an example of historic architecture.

Everyone is welcome to participate, with all details of the event, including how to register, being available at http://www.cashotamonuments.webs.com/, if you require more information contact Steve EI5DD at http://cashota-ireland.org/home.

San Francisco Radio Club

San Francisco Amateur Radio Club will be holding a Special Event Station - W6G - to celebrate the 75th Anniversary of the Golden Gate Bridge on May 26, 2012 at 2000z to May 27, 2012 at 2200z. Details on www.sfarc.org.

South Dublin Radio Club

The SDR Annual General Meeting took place recently. Their discussion at the meeting covered club activities for the coming year as well as options for re-starting radio theory classes. A new committee was elected for 2012; the members are: Jim Holohan EI4HH Tony Doyle EI7GUB Tom McGrath EI7HT Tony Byrne EI7JN Daniel Cussen EI9FHB Martin Farnan EI9GCB Michael Fitzgerald EI9GGB

Medway Amateur Receiving & Transmitting Society

The Medway Amateur Receiving & Transmitting Society will be on air from Tuesday 27th March to Saturday 31st March activating Fort Amherst in Chatham Kent. This is part of their 90th birthday celebrations and they will be using special callsign GB5MW. More details can be found at www.cashota.co.uk or http://www.g5mw.org.uk/.

Shannon Basin Radio Club

The Shannon Basin Radio Club is holding a meeting on Wed 28th March at 20:30 in Hannons Hotel, Roscommon.

It is planned to give practical demonstrations on computerised logging, dx cluster and Logbook of the World.

All members are requested to attend and visitors are welcome. For more info see www.shannonbasinradioclub.com

---

EI8GQB activity : March 18th-26th

Oliver/ON4EI will again be QRV from Ireland near Fethard (IO62EL) on top of Benneshill (170m ASL) with his Irish callsign EI8GQB. He will enter the CQ WPX SSB CONTEST on March 24th/25th.

During the week before the contest Oliver will set up 5 antennas to support SO2R operation. Reference frequency is 7.100 MHz +/- QRM.

Olivier will hold a daily blog on www.qrz.com/db/EI8GQB and post regularly video on YouTube ON4EI's channel www.youtube.com/user/ON4EI

If you want to visit him during the week, please send a mail to ON4EI/at/VANDENBALCK/dot/EU

DX News

An American/Canadian team led by Frosty K5BLU will be active from Botswana from 18 - 27 March. The individual calls will be A25CF, A25DS, A25KW and A25JR. Look out for activity also during the CQ WPX SSB Contest next weekend.

A group from Japan plan to be QRV from Burkina Faso in West Africa from 21 - 28 March. Calls will be XT2VWT, XT2IVU, XT2AEF, and XT2VVO. They will operate SSB on all bands 80 - 10m.

Hartwig DL7BC will operate from the Indian Ocean island of Mayotte from 20 March until 6 April. Look for him initially as FH/DL7BC and from 23 March as TO7BC. QSLs for both calls go via his home call.

An international team will activate the callsign E51M from the North Cook Islands from 28 March - 10 April. They will operate on all bands 160 - 6m using CW, SSB and RTTY. QSL manager is DJ8NK.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 11th-March, through Sunday, 18th-March there were 226 countries active. Countries available: 3A, 3B8, 3C0, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VK9C, VP2E, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5T, MAURITANIA. Jean, ON8RA/5T0JL, at the age of 84, will once again be active from Nouakchott starting possible March 21st. Activity will be on 80/40/20/15/12 meters and mainly on CW. QSL via ON8RA (see QRZ.com

for new QSLing practices).

7U50, ALGERIA (Special Event). Members of the Djelfa Radio Club (7X2VFK) will activate 7U50ND to celebrates the 50th anniversary of the Algerian independence and the 20th anniversary of the Djelfa Radio Club. Activity will take place between May 20-26th, during the 4th International Ham Meeting in Djelfa. Details are available on <QRZ.com>.

8Y, GUYANA (Update). Operators Anderson/PY2TNT and Alex/PY2WAS will be active as 8R1PY from Lethem, Guyana, between April 5-8th. Activity will be on 80-10 meters, including 30/17/12 meters, using CW and SSB. QSL via PY2WAS, direct or by the Bureau, and a OQRS will be available. The Mediterraneo DX Club (MDXC) is supporting the 8R1PY DXpedition and has activated a Web site (with updated news, log search and propagation charts - TNX to IK8LOV) at: http://www.mdxc.org/8r1py

9M6, EAST MALAYSIA. Pekka, OH2YY, will activate the Hillview Gardens club station 9M6AAC between March 21-22nd. Activity will be on 40-10 meters SSB. Bands will depend on the antennas available. QSL via N2OO.

A3, TONGA. There is less than a week to work A35YZ DXpedition. The A35YZ team is expected to be on until March 24th. Many have been asking where is the SSB. Operator Frank, DL7UFR, informs OPDX that they will operate on SBB when it is possible, but the conditions currently are so bad that SSB is very difficult. All the signals they hear are very weak there. Their SSB ops hope that the conditions will approve so they can make more SSB QSOs. QSL via DL7DF, direct or by the Bureau.

C5, THE GAMBIA. Jan, OZ1IIL, is now active as C56LH until March 26th. Activity this past week has been mainly on 20/17/10 meters SSB, but can operate on 80-10 meters using a G5RV and an IC-746. QSL via OZ1IIL.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
XW1A - Laos; Current Operations
XW0ZJZ - Laos; Current Operations

* (ARRL Announces New DXCC Fee Structure!) Effective Monday, April 2nd, the way DXCC fees are assessed will change. These changes will include both rate increases and rate decreases. There are several reasons for the fee change:
- Promoting more frequent applications
- Removing the "hybrid application" problem
- Simplifying the price structure for DXCC
- Raising the rates slightly to help offset ARRL's increased costs
- Improving customer service
Here are "some" of the interesting changes to take place:
- There are no limits on the number of applications that can be submitted. There will be no more surcharges added to the second or subsequent applications.
- A DXCC application submitted using LoTW will have an application

fee of 5 USDs for ARRL members and 10 USDs for non-members. There are no limits on the number of QSOs that can be included as part of a LoTW application. Each QSO used in LoTW for an award will cost 12 cents, down from a minimum of 15 cents in 2011. They will no longer sell LoTW "credits" in bulk. If you have credits stored, you will still be able to use them.
- The free DXCC Yearbook that was sent to ARRL members will now be made available electronically, and it will appear in an edition of Digital QST. For those who want a League-printed Yearbook, it will still be available at a modest cost.

To read the complete press release and details of all the changes, go to: http://www.arrl.org/news/view/arrl-announces-new-dxcc-fee-structure

DXCC ONLINE (Web Tool!). Over the past several years, the DXCC has been working on a system where applicants would enter QSO data from their QSLs into a digital DXCC application. With DXCC staff's data entry time reduced, they could charge less than a traditional application, process more applications in the same time, and provide better customer service. Well word has come out that their programmers are near completion and are currently beta-testing the system which will be called "Online DXCC".
The following is a brief description of this system and the Card Checker's role: "For the most part, the DXCC Card Checker's job hasn't changed much. After the applicant has typed-in the QSO data from the QSLs (or loaded-in an ADIF file that comes from a logging program), he/she will print the application and either bring it to a DXCC Card Checker or mail it and the cards to HQ, like normal. They will still heavily rely on a DXCC Card Checker's expertise and knowledge to inspect the QSL cards and ensure that the data that has been entered and printed by the applicant is correct. The DXCC Card Checker will still need to carefully mark changes on the printout. When all is done, the DXCC Card Checker will sign-off on the application and mail it to HQ, as before."
What is different is that the applicant will not have to organize cards by band and mode, but instead can simply enter the data from each card in any order they are found. The applicant must leave the cards in the same order in which they are entered, as it obviously that makes it easy for the DXCC Card Checker to work through the cards and compare against the record sheet. If a QSL has two or more QSOs listed, and the applicant needs them all, he/she no longer must put these cards at the back of the application.
Also new is that there is an option for the applicant to pay for the application with a credit card inside "Online DXCC". Unfortunately, there is no easy way to have the applicant pay electronically for the DXCC Card Checker's mailing expense, so they will still have to collect cash for mailing in the same manner as they do now. The "Online DXCC" forms themselves are representations of the paper forms to which everyone is currently accustomed too. The "Online DXCC" is expected to possibly be available in less than a month. Be looking for more details to be forthcoming.

ED9, CEUTA AND MELILLA. Operators Jorge/EA7HZ, Al/EA7JR, Manolo/EA7LL, Chris/EA7RU, Pedro/EA7IZJ, Jorge/EA9LZ and possibly others will be active as ED9Z during the CQWW WPX SSB Contest (March 24-25th) as a Multi-? entry. The group will be using Spiderbeam antennas. QSL via EA9LZ.

HB0, LIECHTENSTEIN (HF and EME). Operators Kasimir/DL2SBY and Georg/DF1SR will be active from Liechtenstein between April 25th and May 5th. Activity will be on 80-10 meters using CW, SSB and RTTY. Their HF equipment includes a TS2000, FT900AT, Acom1010, HF9V vertical and a Spiderbeam for 10/12/15/17/20m. There will be EME activity. On April 28-29th, the Dubus EME Contest will take place, and they will be on 13cm. Between April 30th and May 3rd, they will be active on EME on 9cm and 6cm (this would be a first-ever EME activity on both bands from Liechtenstein!). They state, "You will find us in the HB9Q-Chat room." EME equipment will be a FT726R, Dish 3, 7m and 2m amplifier for both bands. They will use two separate callsigns for this operation. For the HF bands, they will use HB0/DL2SBY, and for the EME activity they will sign HB0/DF1SR. QSL via their home callsigns by the Bureau or direct.

II9, ITALY. The II9K Contest Team will be active from Sicily (EU-025, IIA SC-001, MIA MI-107, WLOTA 1362) during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single/High-Power entry. They will be using a new antenna setup improvement for the contest. Operators mentioned are Giuseppe/IT9HBT, Girolamo/IT9GNG, Rino/IT9FXY, Vincenzo/IT9ECQ, Mike/IF9ZWA, Maria/IT9FRA, Domenico/IW9GTD, Antonino/IW9HII and Dario/IT9RDZ. QSL via IT9HBT.

IOTA NEWS.....
EU-008. Operators Ray/M1REK, Mark/M0UTD and Tom/M0DCG will be active as GM6TW from The Isle of Jura between March 31st and April 6th. Activity will be on the HF bands. The trio also plans to be active from Islay and Colonsay; also all EU-008. For more details, see: http://www.m1rek.co.uk/jura-2012

EU-012. A group of YL operators will be active as GB2YLS from Fair Isle between August 16-22nd. Activity will also be during the International Lighthouse/Lightship Weekend (August 18-19th) from the Southern Lighthouse (UK0127). Operators mentioned are Unni/LA6RHA, Chantal/PA5YL, Ruth/IT9ESZ, Nicky/MM5YLO, Elaine/2E1BVS and Denise/MM6ZDW. Activity will be on CW and SSB. QSL via MM5YLO.

EU-017. Members of the "RadioAmatori Siciliani nel Mondo" (RASM) will be active as ID9Z from Lipari Island between May 17-20th. Operators mentioned are Carmelo/IT9TFX, Fabio/IT9AHI, Antonino/IT9YMM, Sergio/IW9FSG, Max/IT9AKC and Gino/IZ8MWG. QSL via LoTW.

EU-042. Klaus, DL7UXG, will be active as DL7UXG/p from Foehr Island (GIA N-017, WFF DLFF-013, WLOTA 4067) between April 10-12th. Activity will be on the HF bands on/or near the usual island and IOTA frequencies. QSL via his home callsign, direct or by the Bureau.

EU-114. The Martello Tower Group will be active as GP0PKT from Herm
Island between October 5-7th. Operators mentioned are Keith/
G6NHU, Tony/G0MBA, Yan/M0YNK, Colin/M1EAK, Chris/M6GSD and
Richard/G7HJK. Activity will be on all HF bands and modes.
QSL via G6NHU, by the Bureau or direct.

NA-240. (Update/NEW IOTA!) Members of the Russian Robinson Club (RRC)
with the support of the Bethel Amateur Radio Club (BARK) will
activate the last new IOTA in Alaska in the Bethel County
IOTA Group possibly around May 9-16th (they postponed their
January 5-8th operation due to weather earlier in the year).
The callsign will be KL7RRC/p. The group's main reason for
this activation is to participate in the RSGB IOTA Marathon.
See details at: http://www.rsgbiota.org/marathon/index.php
The current team members are: Yuri N3QQ and Tim/NL8F. QSL via
UA9OBA (Europe/Russia) and N7RO; either manager can confirm
any contact. More details, updates and "real time team's
location" can be seen at: http://www.na-234.com

OC-156. Aki, JA1NLX, is now active as 3D2YA from Yageta Island until
March 21st. Activity will be on 80-10 meters using mainly CW
with some SSB and RTTY. He will QSL all QSOs via the Bureau.
Log will be uploaded to LoTW. For more details, check his
Blog Page at: http://ja1nlx-aki.blogspot.com

SA-039. Members of the "RADIO CLUB URUGUAYO" will activate the special
event callsign CW4R for the first time from Isla Gorriti (WW
Loc. GF25ma) between March 23-25th. Activity will be on all
HF bands using CW, SSB and te Digital modes. Also, look for
CW4R to be in the CQWW WPX SSB Contest (March 24-25th) as a
Multi-Op entry. QSL this activity by the Bureau or direct to:
Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY,
SOUTH AMERICA (w/SAE and 1 new IRC or 2 green stamps).

JW, SVALBARD. Magne, LA2XNA, is now active as JW2XNA from the JW5E club
station in Longyearbyen on Spitsbergen Island (EU-026) until March 20th.
Activity is on SSB and the Digital modes. QSL via LA2XNA.

JW, SVALBARD. Torkel, LA6VJA, will once again be active as JW6VJA from
the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026)
between August 10-12th. Fredrik, LA6TMA, will also join him and be active
as JW6TMA. Activity by JW6VJA will mainly be CW with some SSB, while
JW6TMA will be active mostly on the Digital modes. QSL via their home
callsigns, direct or by the Bureau. Also, JW6VJA will upload his log to
LoTW. For more details, visit: http://www.bitwrap.no/web/index.php?id=6

JX, JAN MAYEN. Svein, LA9JKA, will once again be active as JX9JKA from
Jan Mayen (EU-022) between March 29th through approx. March 20th, 2013.
He plans to operate SSB and the digital modes on 160-6 meters. QSL via
his home callsign direct only (see QRZ.com).

NEW OFFICERS FOR 2012. The members of the Northern Illinois DX Association (NIDXA) have elected the following officers for 2012:
President: Jim O'Connell, W9WU Directors: Joe Schroeder, W9JUV
Vice-President: John Becker, K9MM Howie Huntington, K9KM
Secretary: Randy Brothers, K9OR Gary Hornbuckle, K9MMS
Treasurer: Don Whiteman, KK9H

For more information about NIDXA, go to at: http://www.nidxa.org

PH, NETHERLANDS (Special Event). A group of operators will be active as PH4RTM/WHE between April 5-13th. Activity is taking place during the World Horticultural Expo, THE FLORIADE <http://www.floriade.com>, in Venlo. Operations will be on all bands and modes. QSLs will be returned 100% via the Bureau by PH4RTM.

QSL MANAGER OF THE YEAR. The Golist QSL Manager Data Service is reviving its "QSL Manager of the Year Award". The purpose of this award is to recognize the service of QSL Managers world wide for the service they provide to the World-Wide DX Community. Nominations for this award will be accepted by the Golist from DX and Contest clubs, world-wide, for the

year of 2012. Ending Date: August 1, 2012. Each DX club and Contest club is encouraged to poll their members for their nominations for the "Top 5 QSL Managers for 2012". The definition of a QSL Manager for this award is any person who confirms contacts via printed QSL Card for any station other than their Primary Callsign. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters as voted by members of their club. Votes should be tabulated and sent to the Golist by August 1, 2012, to be eligible for the QSL Manager of the Year award. Each club world-wide may only send one submission for voting purposes. Records of submission will be maintained by the Golist. A plaque, donated by DX Publishing, Inc., publisher of "QRZ-DX and THE DX MAGAZINE", will be awarded to the selected "QSL Manager of the Year" at the W4DXCC Convention held in Pigeon Forge, Tennessee in September 2012. The recognized format for your club's submission is as follows: Club Name; Club Officer (Name, Call Sign, club office and E-mail address); Top 5 QSL Manager Nominees (list name and callsign). In the subject line of your official E-mail put "QSL Manager of the Year-2012" and send it to: golist@gmail.com

TC18M VIA TA1HZ. Members of the Special Wireless Activity Team (TCSWAT) were active as TC18M this past week to commemorate the Naval Victory of March 18, 1915. QSL Manager is again TA1HZ, and information is available at <QRZ.com> and <www.tcswat.org>. The QSL cards will be ready for the Friedrichshafen Messe (end of June) distribution; therefore, please do not hurry for sending in your QSL cards direct (unless you need them for DXCC).

TO3J QSL STATUS. QSL Manager Nao, JA1HGY, reports that all direct and OQRS TO3J QSLs were answered as of March 12th.

UA4WHX QSLS STATUS. According to Vlad, UA4WHX, QRZ.com page:
1. By now there are no direct African QSLs left unanswered.
2. If you sent your QSLs directly but you have not received them, then it probably is that your cards have been lost either way. Contact me <ua4whx@udm.ru> to check their status.
If you need a paper QSL, request it directly, not via the bureau. All QSOs have been LoTW uploaded.

QSL RECEIVED VIA LoTW: 3G3M, 4U1ITU, C6ANM, CR6K, CW5W, E74AA, E7DX, EF8R, EO3Q, F5BZB, FY5KE, GM7R, HK1T, HK3JJB, I5HOR, II2E, J38A, J7Y, JQ2VVH, KH6LC, KH7Y, LS1D, OA4SS, P40L, PI4DX, PJ2T, PJ4X, PT5T, PW7T, PY1MK, PY1ZV, PY2LED, PY2MTV, PY4OG, PY4RGS, S53M, S58A, S57AL, TF3W, TG7/N6HD, TM6M, TO5A, TO5X, UV5U, UW5Q, V25WY, V31RR, VE3EY, VK7ZE, VP5B, VP5OU, VP9I, WH7Y, XE1MM, XE2S, XW3DT, YW4D, YW5T and ZF2AM

QSLS RECEIVED VIA MAIL: 3D2R, 4W0VB, 5W1SA, 8Q7DV, A31IO, AP2IA, C37N, EY7AD, GJ6UW, H40FK, H40KJ, J8/JA7SGV, PJ4/WA1Z, TL0CW, TN2T, TO3J, V25RV, VU3BPZ/mm and ZL1RS (6m)

QSLS RECEIVED VIA THE BUREAU: 3C0C, 5R8IC, 8P9NX, 9H3KX, AO8GLH, C37NL, EA9AK, ES0/F5BLC/P, EY8/F4EGS, FG4NO, FK8CP, FK/F5NHJ, FM/F5IRO, FR1LB, H44AS, IS0/DL8JJ/M, J27JUIN, J28CDX, J28RO, MJ/EA1SA, TK5EP, TK0WT,

TK/F5MCC, TA4CW, TT8PK, TT8ZZ and V55DLH

S55, SLOVENIA (Special Event). Members of the Radio Club Cerkno (S50E) will activate the special event callsigns S555E and S55CERKNO throughout 2012. Activity is to celebrate the 55th anniversary of the Club's foundation. A special full colored four page folded QSL card will be confirmed automatically by the Bureau sometime in early 2013. The logs for S555E and S55CERKNO will also be uploaded to the ARRL's LoTW on a regular basis. Online logs will be available on the Club's Web site at: http://www.s50e.si For those who want to send card direct, please send SASE with 2 USDs to cover return postage to Radioclub Cerkno, P.O. BOX 16, 5282 Cerkno, Slovenia, with priority return when getting cards from the printer. Cards with insufficient postage or no return envelope will be returned via the QSL Bureau.

SG, SWEDEN (Special Event). Richard, SM2TOS, and some other operators will be active as SG2SNF from Porjus between June 16-17th. Activity will be from the Lancaster bomber "Easy Elsie", which crashed at Porjus in Sweden on October 29th, 1944. For more details, pictures and QSL info, see QRZ.com.

TO5, MARTINIQUE. Vlad, RC0F, will be active as FM/RC0F from Martinique (NA-107) between March 20-28th. Activity will also include the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/High-Power entry using the callsign TO5K. QSL via RC0F or LoTW.

V5, NAMIBIA (Update). A group of German operators will be active as V55V from V52W's QTH in Omaruru during CQWW WPX SSB Contest (March 24-25th) as a Multi-? entry. QSL via DJ8VC. Operators currently mentioned are Winfried/DK9IP, Suad/DK6XZ, Tobias/DH1TW, Uwe/DL9NDS, Dietmar/DL3DXX and Mathew/DJ2HD. Look for operators to be active before and after the contest (as early as March 16th, and until the 27th) as V5/homecall. Activity will probably be on all bands 160-10 meters using CW, SSB and RTTY, but with a focus on 160/80/40m and RTTY. QSL via their home callsign (see QRZ.com).

V6, MICRONESIA. Swedish couple Jonas/SA0AAZ, and Carin/SA0BAC will be active as V63AAZ and V63BAC from the Truk Stop Hotel on Weno Island (OC-011) [a municipality and capital of Chuuk State of the Federated States of Micronesia (FSM)] between March 26th and April 10th. Jonas tells OPDX that this is a diving holiday trip, and all radio work will be limited. Activity will be on the HF bands using CW and SSB. Equipment is an IC-7000 with 100w into some wire type antenna with ladder feed. Jonas also suggests to please go easy on them because they are "only ordinary hams with ordinary standards, so please adjust operation technique and speed accordingly." QSL both via SA0AAZ.

V7, MARSHALL ISLANDS (Update). By the time you read this, Jim, K4FW, will once again be on Kwajalein Island (OC-028) between March 19-26th, because of his job with the Orbital Sciences Corporation. He works with the Pegasus launch vehicle. More specifically, as the Launch Panel Operator (LPO) and is part of the flight crew on the Orbital's L-1011. Jim informs OPDX that

the launch is scheduled for March 26th, and he plans to be active as much as he can between the time he arrives and the launch. Activity will be from the Kwajalein club station (V73AX) on the southern most side of the island, and he hopes to once again sign V73FW (application was sent in), if not then he will probably use V7/K4FW and not the club callsign. Activity will be after his work hours for the day on Kwajalein. He states, "I'm taking a Ten Tec Eagle out with me to use and plan to do SSB on any band that's open and use whatever V73AX has for antennas." QSL via K4FW, direct or by the Bureau.

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again be active as VC2G during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single entry. The QTH will be from Mercier, Quebec (Zone 5, Grid Loc. FN35ch). QSL via VE2BR, direct or by the Bureau.

VP2V, BRITISH VIGRIN ISLANDS. Operators Art/N3DXX and Steven/AA7V will be active as VP2V/homecall from Virgin Gorda (Tortola) between November 21st and December 1st. Activity will be focused on 160 meters and the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry signing as VP2V/N3DXX. QSL via K2PF.

VP5/VP52, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW from the VP5JM Hamlet QTH on the Island of Providenciales (NA-002, WLOTA 1476) between March 20th and April 11th. Activity will be on 160-6 meters using CW and SSB. Dave also plans to be in the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/Low-Power entry and using the callsign VP52V. QSL direct to his home callsign (QRZ.com address) at: PO Box 88, Morris, OK 74445-0088 U.S.A.

WORLD-WIDE IRON HAM CONTEST (Dates Changes). The Araucaria DX Group (GADX) has moved the dates of their "World-Wide Iron Ham Contest" (WWIH) to avoid having two South American contests on the same day. They decided to move their competition to: The last full weekend of December. So, this year's WWIH contest will be from 12:00 GMT Saturday, Dec. 29th, to 11:59 GMT, Sunday the 30th. Complete details and rules are available at: http://www.araucariadx.com/site

XU, CAMBODIA. Operators Seihachi/JA7LU and Hiroo/JA2VWG will once again be active as XU7NPC and XU7DDD, respectively, from Sihanoukville between March 16-26th. Activity will be on 40-6 meters using SSB and the Digital modes. They also plan to be active from Koh Rong Samloem Island (AS-133) between March 26-28th. QSL XU7NPC via JA7LU, direct or by the Bureau. QSL XU7DDD via JA2VWG direct only.

XV, VIETNAM. Mal, VK6LC, will once again be active as XV4LC from Vinh Long, Vietnam, between April 19-24th. Activity will be on 17/20 meters only, using CW and SSB (portable station and experimental new Mekong Delta site). QSL via VK6LC only direct. He does NOT use the QSL Bureau.

YJ, VANUATU. Chris, VK3QB, from the Oceania DX Group Inc. (ODXG), will once again lead a team of operators to Port Vila on Efate Island (OC-035), Vanuatu, and be active as YJ0VK between April 21st and May 5th. Operators

mentioned are Chris/VK3QB (team leader), Luke/VK3HJ, Lee/VK3GK, Mike/
VK3GHM, Benton/VK3CBV and Allan/VK2CA. Activity will be on all HF bands
160-10 meters, with an emphasis on 30/17/12 meter bands using CW, SSB,
and RTTY/PSK31. They do plan to have three stations on the air as often
as possible. QSL via VK2CA, direct or by the Bureau. LoTW log upload will
be available on completion of operation. For updates, visit the YJ0VK Web
page at: http://yj0vk.odxg.org/yj0vk2012/default.html

YO WEEKDAY CONTEST. Members of "The Romanian Society of Radio Amateur"
(YO3KSR) have organized the 35th Edition of the HF International Contest
"Bucuresti" to be held on 19th of March, between 1800-2059z, and on both
80m and 40m bands, using CW, SSB and PSK. Complete details are available
on the YO3KSR Web page at: http://www.yo3ksr.ro

ZS8, MARION ISLAND. Pierre, ZS1HF/ZS8M, informs OPDX that he is in the
planning stages to lead a DXpedition to Marion Island, hopefully in
April 2014. He states [edited], "This all depends on permission granted
for a DXpedition team by the Dept. of Environmental Affairs (Antarctic
Islands). South Africa is receiving its new polar supply ship, the 'SA
Agulhas II (number 2)', on the 3rd of May this year. The old/original
'SA Agulhas' will be doing her last trip to Marion Island in April this
year, and then she will be transferred to another state department."
At this stage, Pierre will only consider contacting the Director General
(DG) of the Department early next year once the new ship has completed
her maiden voyage to Gough Island (ZD9) in September and has returned
from their Antarctica base in December. This will give all the hype and
excitement of the new ship some time to sink in and subside. A team of
between 4-10 operators is a possibility, but this depends on how many beds
will be available for them on the ship. The hunt for operators is now
on its way. The operators must be able to have six weeks of free time,
in which fours weeks will be spent on the island. Pierre also mentions:
"Permission to erect Yagi's, vertical or dipoles will have to be negotiated.
HF antennas on Marion Island have a history of injuring and killing many
birds in the past, so there is an automatic tendency to be against ham
radio and HF antennas." Pierre states that he has many challenges to
consider in the coming year to plan for this DXpediton. He is looking for
any comments and support as well as names of potential DXers who would
be interested in joining his operation. Look for more details to be
forthcoming.

Thomas Cantine Jr. W2TQF Memorial Scholarship Available:

Posted: 17 Mar 2012 05:20 PM PDT
http://www.eham.net/articles/27935

FULTON, NY -- This scholarship was established after the untimely death of Thomas G. Cantine Jr, who was an active amateur radio operator for over 50 years. Obtaining his license at the age of 13 in 1957, Tom held the call sign: W2TQF. Tom's hobby of amateur radio led to a career as a sales engineer and engineering consultant. Tom taught amateur radio classes, was a volunteer examiner, active in ARES (Amateur Radio Emergency Service), RACES (Radio Amateur Civil Emergency Service) and was a charter member of the Fulton Amateur Radio Club and served as the president of the radio club for several terms. This scholarship has been set up in memory of Tom and his passion for amateur radio. The purpose of amateur (ham) radio is to foster the art of wireless communications, and to encourage goodwill, cooperation, education, and emergency preparedness among licensees at local, national, and global levels.

GB2RS NEWS

Sunday 18th March 2012

The news headlines:

* RSGB AGM next month in Bedford

* Birthplace of radio becomes a city

* Optical marking soon for amateur exams

The RSGB AGM will take place on 21 April at the Swan Hotel, Bedford. Full details are in the April RadCom. The hotel would like some indication of the numbers who will be having lunch on the day of the AGM. Lunch will be soup and a sandwich and will cost £8. To register your intent, please visit www.rsgb.org/agmlunch and submit your name and callsign.

Chelmsford, acknowledged as the birthplace of radio and home to the Marconi Company for many years, is one of three new cities created to mark the Queen's Diamond Jubilee. This year also marks the 100th anniversary of the establishment by Marconi of the first purpose built radio factory in New Street, Chelmsford in 1912. New Street is marked with blue plaque noting the historic significance.

New software will shortly be introduced to handle the administration of amateur radio exams. The design of the software that was commissioned includes optical marking technology. This will greatly improve the speed, accuracy and cost-effectiveness of the overall administration of the examination process. Optical marking will cover all three levels of examination. It will be used for marking the Advanced exam and for validating local marking at Foundation and Intermediate levels. For candidates, optical marking will mean recording their answers on a separate answer sheet. The timescale for introduction of optical marking will be announced once the software has been proven and tested. The RCF will give one months notice of its introduction so that candidates can be advised of the new answer process. Further details will be in the March tutors' newsletter.

The RSGB is aware that repeater and beacon keepers are frustrated by the lack of progress on the issuing of a number of NoVs. Applications for NoVs going back several years remain outstanding. It appears that some delays have been due to changes in staff in the Licensing Centre; the RSGB has worked with Ofcom to help overcome these problems and offer advice as necessary. As a result, NoVs for repeaters in Primary

amateur bands such as 2 metres are now being issued with little delay. This is also the situation with internet gateways and datacomms where, following considerable efforts by the ETCC, delays have now been resolved. Frequency clearances in those bands where the amateur service is secondary have been subject to considerable delay and these delays are likely to continue. To read all the details and learn how the RSGB is working with Ofcom to solve these delays, go to www.rsgb.org.

The AMSAT/TAPR Banquet on Friday night, 18 May, is one of the main AMSAT activities during the 2012 Hamvention at Dayton. Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 1700 MHz software defined receiver. For anyone going to the Dayton Hamvention this year, Banquet tickets are $30 each and available from www.amsat-na.com.

The source of some mysterious weak signals on 29.684MHz with an 81.9 Baud and 130Hz shift has been located. The signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and then only by directional antennas. It turns out the source of transmissions is Datawell buoys. These buoys, produced in the Netherlands, are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40MHz. Datawell has been informed them that the transmissions on the amateur service 10 metre band are illegal.

And now for the details of forthcoming rallies

The Spring Militaria & Electronics & Radio Amateur Hangar Sale will he held on 25 March at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and there will be, civil, military & vintage radio equipment, vehicle spares & more. Contact Rod Siebert, 01270 623 353.

The Devon & Cornwall HAMFEST takes place the same date, 25 March, at The Engine House, Compton Park, Callington PL17 8EA. There will be trade stands and special interest groups. Compton Park is a peaceful, simple unspoilt site formerly the site of an old Cornish tin mine, with the old Cornish steam engine house and the Engine House Tea Rooms. More information from Dereck, M0YDW, via e-mail to disco5live@btinternet.com.

Now for the news of special events

The Medway Amateur Receiving & Transmitting Society will be on air from Tuesday 27 March to Saturday 31 March, activating Fort Amherst in Chatham Kent. This is part of their 90th birthday celebrations and they will be using special callsign GB5MW. More details can be found at www.cashota.co.uk or www.g5mw.org.uk.

And now the HF DX news compiled from 425 DX News and other sources

A large group from Germany and Poland plan to be active from the Pacific island of Tonga until 24 March. They are using the callsign is

A35YZ. QSL via DL7DF.

David, GI4FUM will be carrying a Blackberry and a 3G iPad2 on the DXpedition to Namibia. They should be on the air on 19 March. The group will be happy to arrange skeds, just e-mail gi4fum@arrl.net. The DXpedition will be operating from the station of Andre, V51B in Oranjemund, locator JK81FK. V5/GI4FUM and V5/GI8MIV should operate SSB, PSK31 and RTTY. V5/GI4DOH will operate CW and V5/DM3BJ will operate PSK31 and RTTY.

Retu, OH4MDY will be active as XV2RZ from Vietnam until 16 April. He says that this time he will pay special attention to digital modes. QSL via his home callsign, direct only. He will upload his log to Club Log.

Esteban, XQ7UP will be on the air from Patagonia until 25 March. He will operate mainly SSB, RTTY and PSK31 and will participate in the CQ WW WPX SSB Contest. QSL via his home callsign.

Now the contest news

The Russian DX Contest runs until 1200UTC today, 18 March. There are lots of entry categories, mostly for single ops. An interesting twist is that it is permitted for a single op station to make two single-band entries. Usually this would be to take advantage of bands that aren't open at the same time, for example 10m and 80m. Using CW and SSB on the 1.8 to 28MHz bands, the exchange is signal report, serial number and Russians send their oblast code. The 1.3GHz UK Activity Contest takes lace from 2000 to 2230UTC on 20 March. Using all modes on the band, the exchange is signal report, serial number and locator.

On 22 March it's the SSB leg of the 80m Club Championships from 2000 to 2130UTC. The exchange is signal report and serial number.

Next weekend is the SSB leg of CQWW WPX. Taking place from 0000UTC on 24 March until 2359UTC on 25 March. Everybody works everybody, exchanging a report and serial number. Expect the contesting bands to be congested and some pretty large serial numbers to be exchanged across the 1.8 to 28MHz bands.

And now the solar factual data for the period from Friday the 9th to the 15th of March, compiled by Neil Clarke, G0CAS on Friday the 16th of March.

Solar activity varied between low and high. The large sunspot group mentioned in last weeks report only rotated off the solar disc on the 15th. Before then, 5 M class solar flares took place, all producing coronal mass ejections and sudden ionospheric disturbances. The largest flare was a M8, which took place on the 10th. Numerous C class solar flares occurred every day, and there were some from other groups as well. Solar flux levels declined from 149 units on the 10th to 111 by the 15th. The average was 130 units. The increase in solar flux levels did nothing to the 90 day solar flux average, which remained unchanged at 125 units on the 15th. X-ray flux levels declined from B8.8 units on

the 9th to B4.7 by the 15th and the average was B6.1 units. Geomagnetic activity was up to major storm levels at times, when one coronal mass ejection after another arrived. The most disturbed day was the 9th, with an Ap index of 94 units. Other disturbed days were the 12th with an Ap of 37 and the 15th with an Ap index of 38 units. The quietest day was the 14th, with an Ap of 8 units. The average was Ap 31 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase to 650, 770 and 800 kilometres per second on the 9th, 12th and the 15th respectively. Particle densities increased to 52 particles per cubic centimetre during the 12th. Bz on the disturbed days varied between minus and plus 20 nanoTeslas. For much of the period a stable high pressure system led to some excellent tropo openings, right through the VHF and UHF bands into the microwave range. For UK operators the opening favoured mainly the Low Countries, Germany and Switzerland but on 2 metres contacts were reported as far as Hungary. Auroral propagation also took place most days. Unfortunately, at HF, MUFs were at times substantially depressed due to the stormy periods.

And finally the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be at low levels most days. Solar flux levels should be around the 100 mark or slightly higher. Geomagnetic activity could be slightly unsettled today but then decline to quiet levels for the remainder of the period. MUFs during daylight hours at equal latitudes should be around 27MHz for the south and 24MHz for the north. Darkness hour lows should be about 9MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 1500 and 1900 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 19 March Friskney and East Lincolnshire Communications Club is running a club net on 144.165MHz USB from 1900. Contact Chris, M0MFP, on 01507 442 240.

On Monday 19 March Gloucester Amateur Radio & Electronics Society is having a newcomers night and informal evening. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 19 March Lincoln Short-Wave Club is holding a committee meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 19 March South Birmingham Radio Society is holding a committee meeting. Contact Don, on 01214 581 603.

On Monday 19 March Welland Valley Amateur Radio Society is having a radio test night plus building a Slim Jim antenna. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 20 March Derby & District Amateur Radio Society is holding its AGM. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 20 March Lincoln Short-Wave Club is taking part in the 1.3GHz UK AC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 20 March Loughborough & District Amateur Radio Club is having a talk on using a handheld GPS by Brian, G8BUB. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 20 March Wythall Radio Club is having a free 'n' easy evening. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 21 March Friskney and East Lincolnshire Communications Club is running a M3+M6 club net on GB3FR at 1930. Contact Chris, M0MFP, on 01507 442 240.

On Wednesday 21 March Lincoln Short-Wave Club is holding a formal meeting. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 21 March Midland Amateur Radio Society is holding training classes and checking field day equipment. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 21 March South Kesteven Amateur Radio Society is having a talk by the local RAYNET chief on emergency amateur radio. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 21 March Telford & District Amateur Radio Society is having a talk on AMSAT by Paul Robinson, 2E1EUB. Contact Mike, G3JKX, on 01952 299 677. On Thursday 22 March Lincoln Short-Wave Club is running a simplex club net on 145.375MHz from 2000 and taking part in the 3.5MHz CC SSB. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 22 March Salop Amateur Radio Society is having a talk on PCB schematic, simulation and design software by Richard, G3VZG. Details on the club website at www.salop-ars.org.uk.

On Thursday 22 March South Birmingham Radio Society is holding training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Friday 23 March Coventry Amateur Radio Society is having its President's Night. Contact John, G8SEQ, on 07958 777 363.

On Friday 23 March Friskney and East Lincolnshire Communications Club is running a HF club net on 3.748MHz from 2000. Contact Chris, M0MFP, on 01507 442 240.

On Friday 23 March Lincoln Short-Wave Club is preparing for the CQ World Wide WPX Contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Friday 23 March South Birmingham Radio Society is having a construction evening. Contact Don, on 01214 581 603.

On Saturday 24 and Sunday 25 March Lincoln Short-Wave Club is in the shack and taking part in CQ World Wide WPX all weekend. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Sunday 25 March Worcester Radio Amateurs Association is taking part in the CQWPX contest. Details from Rich Moles, M0UVA, via email to secretary@m0zoo.co.uk.

NEWS FOR THE NORTH OF ENGLAND On Monday 19 March Angel of the North Amateur Radio Club is on the air. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 19 March Bolton Wireless Club is having a talk on how to cut your losses on VHF and UHF by Richard, G4HGI. For details, send an email to boltonwireless@gmail.com.

On Monday 19 March Sheffield Amateur Radio Club is having a talk on home construction by Colin, M5FRA. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 19 March Thornton Cleveleys Amateur Radio Society is having a talk on pirate radio by G3EZM. More information from J Duddington, G4BFH, on 01253 853 554.

On Tuesday 20 March Chester & District Radio Society is watching a DXpedition Video. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 20 March Halifax & District Amateur Radio Society is holding its Foundation training class and is on the air. Martin, M0GQB, 01422 341 317

On Tuesday 20 March Morecambe Bay Amateur Radio Society is having an internet news night. Contact Sheila, on 07867 516 836.

On Tuesday 20 March Stockport Radio Society is holding a newcomer's evening with an introduction by Tony, M0SAV. More information from Nigel Roscoe, on 07973 312 699. On Wednesday 21 March Denby Dale Radio Club has its annual surplus auction, at which there are refreshments and a licensed bar. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 21 March Hornsea Amateur Radio Club is having a talk. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 21 March Mid-Cheshire Amateur Radio Society is holding a committee meeting. Contact Peter Paul Fox, G8HAV, on 01606 553 401.

On Wednesday 21 March Wirral & District Amateur Radio Club is at The Fox & Hounds, Barnston. Contact Simon, G6XHF, on 0151 601 3269, G6XHF@WADARC.Com

On Thursday 22 March Hornsea Amateur Radio Club is taking part in the 80m CC SSB. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 22 March Sheffield Amateur Radio Club is taking part in the 80m CC SSB from club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Thursday 22 March Wakefield & District Radio Society is having a social evening and is on the air. Contact Ken, 2E0SSQ, on 07900 563 117.

On Friday 23 March East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 23 March Tynemouth Amateur Radio Club is operating portable. Contact Bob, M6KLO, by email to mail@g0nwm.com.

On Saturday 24 March Hornsea Amateur Radio Club is taking part in the CQ WW WPX SSB Contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Saturday 24 March Wakefield & District Radio Society continues its Foundation course from 13:30. Contact Dr David Lockwood, G4CLI, on 07748 221 855.

On Sunday 25 March Hambleton Amateur Radio Society is having a talk on valves by Tony, G8FLV. More information from Tony Wilson, G3MAE, on 01609 881 530., tony55@clannet.co.uk

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 20 March Livingston & District Amateur Radio Society is having Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 21 March Glenrothes & DRC is holding a discussion meeting. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 22 March Aberdeen Amateur Radio Society is training for field events & contest logging with Allan Duncan, GM4ZUK. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 19 March Bedford and District Amateur Radio Club is holding a club net on GB3BF from 20:30. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Monday 19 March Braintree & District Amateur Radio Society is having a talk on opamps by Ian, G8MKN. For more information contact John,

M5AJB, on 01787 460 947.

On Monday 19 March Burnham Beeches Radio Club is taking a second look at D-Star with G6TSF. Contact Dave, G4XDU, on 01628 625 720.

On Monday 19 March East Kent Radio Society is holding a used equipment sale. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 19 March Maidstone YMCA Amateur Radio Society is having a coffee and natter night. More information from Howard Vicary, G0RJN, by email to hvicary@hotmail.com.

On Monday 19 March Norfolk Amateur Radio Club is running a club net from 19.30 on GB3NB. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 19 March Surrey Radio Contact Club is having a fix-it, move-it-on, advice clinic and informal chat. Contact John, G3MCX, on 02086 883 322.

On Tuesday 20 March Bedford and District Amateur Radio Club is planning to contact their twin town's radio club, Ortsverband Bamberg on 7.127 QRM. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 20 March Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 20 March Bromley & District Amateur Radio Society is having a surplus equipment sale with Andy, G4WGZ. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 20 March Chelmsford Amateur Radio Society is running a club net from 8.30. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 20 March Verulam Amateur Radio Club is having a demonstration of transceiver testing by David, G4HHJ. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 21 March Chesham & District Amateur Radio Society is looking at HF radio, setting up and demonstrating the IC-746. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 21 March Havering & District Amateur Radio Club is having a talk on the ham radio Olympics by Roger Western, G3SXW. More information from John, M0UKD, on 07890 222 111.

On Wednesday 21 March Norfolk Amateur Radio Club is having a talk on the ins and outs of a repeater by Mark, G0LGJ. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 21 March Worthing & District Amateur Radio Club is having a discussion evening and is on the air. Contact John, G8FMJ, on 01273 593 232.

On Thursday 22 March Bedford and District Amateur Radio Club is running a club net on GB3BF from 20:30. Details from Bob Leask, G3XNG, by email

to g4ceo@talk21.com. On Thursday 22 March Bredhurst Receiving and Transmitting Society is having a club meeting Details from Andrew, M6AAE, on 07403 325 075.

On Thursday 22 March Echelford Amateur Radio Society is running its construction contest. Contact John, G4GSC, on 01784 451 898.

On Thursday 22 March Edgware & District Radio Society is having a natter night. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 22 March Hilderstone Radio and Electronics Club is having a construction evening. Details from Chrissie Turner, by email to hilderstoneclub@gmail.com.

On Thursday 22 March Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 22 March Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Championship SSB contest. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 22 March Reading & District Amateur Radio Club is having an alignment evening with Andrew Barrett, G8DOR, with test equipment available. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 22 March Shefford & District Amateur Radio Society is having a talk and display on 1950s radio by Brian, G8GHR. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 23 March Cambridge & District Amateur Radio Club is having a talk on a super bright LED VSWR bridge by Mike, M0BLP. Contact Ron, G3KBR, on 01223 501 712.

On Friday 23 March Itchen Valley Amateur Radio Club is holding its AGM. Details from Liz, M0ACL, on 02380 254 599.

On Friday 23 March Radio Society of Harrow is having a talk on the emergence of modern humans by G6DOD. More information from Linda, G7RJL, on 02083 868 586.

On Sunday 25 March Bromley & District Amateur Radio Society continues its Foundation course. Details from Andy, G4WGZ, on 01689 878 089.

NEWS FOR THE SOUTH WEST On Monday 19 March Appledore & District Amateur Radio Club is holding its AGM. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday 19 March Weston Super Mare Radio Society is having a Bring & Buy evening. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 21 March Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 21 March Trowbridge & District Amateur Radio Club is holding a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 22 March South Bristol Amateur Radio Club is having a talk by Geoff Plucknett, G4FKA, of the Bristol Contest Group. Details from Andrew Jenner, G7KNA, on 07838 695 471. On Thursday 22 March Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317 750.

On Friday 23 March Torbay Amateur Radio Society is having an operating night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 19 March Dragon Amateur Radio Club is using the club antenna analyser. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Monday 19 March Wrexham Amateur Radio Society is having a talk by Pat, 2W0HUU on the First Responder. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

360. Weekly Highlights of Solar and Geomagnetic Activity, 12 - 18 March 2012

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
12 - 18 March 2012

Solar activity was at low to high levels during the period. Region
1429 (N17, L = 299, class/area Dkc/1270 on 07 March) produced the
largest event of the period, an M7/1b x-ray flare at 13/1741 UTC.
Associated with this event, were a 1400 sfu Tenflare, a Type II and
a Type IV radio sweep, with an estimated shock velocity of 1366
km/s, and finally an asymmetric full-halo CME, visible in both LASCO
C2 and C3 imagery. Plane-of-sky speed, as measured from LASCO
imagery was 1375 km/s. The CME associated with this event was
forecast to become geoeffective. As Region 1429 approached the west
limb, finally rotating off on 16 March, Region 1432 (N14, L = 223,
class/area Esi/100 on 15 March) became active and produced two
M-class events. The largest was an M2/1n x-ray event at 14/1521 UTC.
A faint CME, visible in LASCO C2 imagery, was observed with a
plane-of-sky speed of 392 km/s. On 15 March, a second M-class event,
an M1/1f x-ray event at 15/0752 UTC, was also observed. A Type II
radio sweep with an estimated shock velocity of 468 km/s was
associated with this event. Both CME&rsquo;s associated with the
solar flares from Region 1432 were expected to arrive at Earth, but
with such slow speeds and a coronal hole high speed stream (CH HSS)
preceding them, very little effects were forecast. Finally, Region
1434 (S22, L = 205, class/area on 11 March) produced an M1/Sf x-ray
event at 17/2039 UTC. Another Type II radio sweep with an estimated
shock velocity of 1140 km/s was associated with this event. However,
the associated CME with this event was not expected to become
geoeffective. Aside from the M-class x-ray events, multiple C-class
events were observed during the period. Many of the solar regions
remained active as they evolved around the disk, but Region 1435
(S25, L = 220, class/area Dao/150 on 18 March) showed rapid growth
towards the end of the summary period.

Two separate greater than 10 MeV proton events were observed during
the summary period. The period began with the greater than 10 MeV
proton flux above the 10 pfu threshold. This event was associated
```

with the X5/3b x-ray flare observed on 07/0024 UTC. This event began on 07/0510 UTC, reached a maximum flux of 6530 pfu on 08/1115 UTC, and dropped below the 10 pfu threshold at 12/2050 UTC. The second event, began on 13 March and was associated the M7/1b x-ray event, mentioned earlier, from old Region 1429 (N18, L = 299). This greater than 10 MeV proton event began at 13/1810 UTC, reached a maximum flux of 469 pfu on 13/2045 UTC, and dropped below the 10 pfu threshold on 15/0620 UTC. A greater than 100 MeV proton event was also associated with the M7/1b x-ray event. This event began at 13/1810 UTC, reached a maximum flux of 1 pfu at 13/1905 UTC, and dropped below the 1 pfu threshold at 13/2255 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at moderate to high levels for the entire summary period.

The geomagnetic field ranged from quiet to major storm periods with isolated severe storm periods observed at high latitudes. The summary period began at quiet levels, however midday on 12 March, a shock was observed by the ACE spacecraft with a Sudden Impulse of 96 nT, later observed by the Boulder magnetometer. This activity was due to the arrival of a CME associated with the 10 March M8 x-ray event from Region 1429. Measurements by the ACE spacecraft showed the solar wind speed increased from around 450 km/s to 775 km/s. The Interplanetary Magnetic Field (IMF) also increased from around 6 nT to 28 nT. As the effects of the CME continued, periods of major storms were observed with isolated sever storm levels at high latitudes from 12/0900-1500 UTC. From 13-14 March, quiet to active levels were recorded as effects from this CME event waned. On 15 March, another CME arrival was observed with another shock recorded by the ACE spacecraft, followed by a Sudden Impulse of 27 nT measured at the Boulder magnetometer. Solar wind measurements, as recorded by the ACE spacecraft, showed wind speeds around 800 km/s following the shock. Once again, quiet to major storms were observed at mid latitudes with isolated periods at sever storm levels at high latitudes. For the remainder of the summary period, 16-18 March, solar wind speeds remained elevated, well above 500 km/s, in response to a CH HSS behind the CME arrival on 15 March. The combined effects of the CME and CH HSS produced quiet to active levels at mid latitudes with continued minor to major storm periods observed at high latitudes.

Forecast of Solar and Geomagnetic Activity
19 March - 14 April 2012

Solar activity is expected to remain at low levels from 19 -26 March. On March 27, and then March 28, old Region 1430 (N22, L = 318) and Region 1429 (N18, L = 299) are expected to return, respectively. Even though these regions are on the far side of the solar disk, imagery supports that they are still active and producing CMEs. An increase to low to moderate levels is expected from 28 March - 11 April as both regions populate to front side of

the solar disk. A return to predominantly low levels is expected to prevail for the remainder of the forecast period.

No proton events are forecast from 19 - 29 March. An increase to a slight chance for proton events is forecast from 30 March - 11 April as old Region 1429 populates the visible disk. A return to background proton flux levels is expected from 12 April - 14 April.

Electrons, greater than 2 MeV, are expected to be at high levels from 18-25 March. A decrease to normal to moderate levels is expected from 26 - 28 March. From 29 March - 03 April, a return to moderate to high levels is forecast. From 04 April, through the end of the forecast period, 14 April, a return to normal to moderate levels is expected.

The geomagnetic field is expected to be at quiet to active levels on 19-20 March, in response to the arrival and lingering effects of a CME. Predominantly quiet levels are expected to prevail from 21-27 March. On 28 - 31 March, a CH HSS is expected to become geoeffective with quiet to active conditions expected. Quiet conditions are expected from 01 - 02 April. From 03 - 04 April, quiet to unsettled conditions are expected as another CH HSS moves into a geoeffective position. Predominantly quiet levels are expected to continue from 05 - 12 April. From 13-14 April, a CH HSS is expected to become geoeffective.

http://forums.qrz.com/showthread.php?338644-GB100MGY&goto=newpost

GB100MGY special event callsign for 100th anniversary of sinking of TITANIC
will take place from

FORT PERCH ROCK MARINE RADIO MUSEUM NEW BRIGHTON WIRRAL ENGLAND (SJ39)

between 6th April and 26th April 2012 on all amateur bands including
special permission to use this callsign on the 12th to 18th April

on the 501 to 504 khz band, transmisions will be on 502 khz CW.

We are having an OVERNITE on 14th/15th April, the date TITANIC sunk with
special emphasis on the 502 khz frequency as it was this band 500khz where
the TITANIC sent her CQD and SOS distress calls/messages.

Please listen out for us and QSO if possible. QSL cards direct to M0BZZ
either direct or via the buro. Many thanks.:)

Amateur Spectrum Used for Australian Formula One Grand Prix:

Posted: 18 Mar 2012 06:10 PM PDT
http://www.eham.net/articles/27936

Consistent with past major sporting events, such as the Sydney Olympic games, the Melbourne Commonwealth Games and previous Formula One Grand Prix, the ACMA will licence some organisations coming from overseas to use, on a temporary basis, a small number of channels within the 70cm band. The Amateur Service is a secondary user in this band and has no to claims for protection from interference. Also one frequency in the 2 meter band is being used. The period of temporary use will be from Wednesday 14th March to Monday 19th of March. The WIA has a flexible attitude to use of amateur spectrum to support these major events that show cases the operational ability of Australian organisers.

MOBILE HAMFEST

APRIL 14, 2012 8 AM ☐ 2 PM

ABBA SHRINE CENTER

7701 HITT ROAD Mobile, AL 36601

Corner of Hitt Rd and Schillinger Rd South

This is a drive in facility with 26,000 sq.ft. During setup hours you can drive up to your tables to unload. Coffee and doughnuts will be available Saturday morning.

SETUP: FRIDAY 2:00 PM ☐ 5:00PM

SATURDAY 6:00AM ☐ 7:30AM

ADMISSION: $5.00 Per Person

TABLES: $15.00 Each

TALK-IN: 146.82 (203.5 tone)

For more info or tables contact:

Special Event Stations for the London 2012 Olympic and Paralympic Games
2012-03-20

Press Release #1 19th March 2012.

Special Event Stations for the London 2012 Olympic and Paralympic Games

Some special event call-signs will be activated to celebrate the London 2012 Olympic and Paralympic Games: 2O12L (Two Oscar One Two Lima) from London, England and 2O12W (Two Oscar One Two Wales) from Barry, Wales. The Radio Society of Great Britain has been granted the 'Inspire mark' for these stations by the London 2012 Inspire programme.

The London station, 2012L will be active through the duration of the Games, located at the historic Eltham Palace, south-east London on 160m-2m, all modes. More information on the web site httpNJ//www.2O12L.com or contact the Press Officer, Mr. John Warburto
n
G4IRN at press@2o12l.com.

The Welsh station 2O12W will also be active on all bands from 160m to 23cms and all modes including SSTV and satellite from Whitmore Bay, Barry Island, Vale of Glamorgan, Wales. More information on web site http://www.2O12W.com or contact station manager: Mr Glyn Jones,GW0ANA, at glyndxis@talktalk.net.

Amateur radio operators everywhere will be able to share in the Olympic experience by making contact with the station and to exchange greetings messages with visitors and Games participants who visit the station - the team aim to make contact with as many of the Games participating countries as possible. Special QSL cards will be available to stations contacted.

The project aims to leave a lasting legacy by encouraging visitors to learn more about radio communications and the social, career and recreational benefits that it brings. Of course, visiting hams will be made very welcome at the stations.

If you would like to receive further information prior to the event, please respond to me at press@2o12l.com, telling me your deadline-date for publishing publicity material before the event. 2O12L and 2O12W go on the air on 27th July 2012.

73 de John Warburton G4IRN
Publicity Officer, Project Echo.

Connecticut ARES Takes on Increased Disaster Relief Role:

Posted: 19 Mar 2012 05:49 PM PDT
http://www.eham.net/articles/27942

The role of ham radio in emergency communications continues to grow, and will become even more vital in the future. That was the message from Wayne Gronlund, Connecticut Section Emergency Coordinator, at the annual meeting of Connecticut ARES over the weekend. A series of natural disasters last year showcased the importance of ham radio, including Tropic Storm Irene, the pre-season nor'easter in October, and the tornadoes that swept western Massachusetts last summer, Gronlund said. Illustrating his remarks with a powerpoint presentation, he noted that the snowstorm in particular strained the system because electricity and phone service were disrupted for up to two weeks, especially in the Farmington area. The two disasters led to formation of the governor's two-storm study panel, and ham radio has become part of disaster planning by the newly revamped Department of Emergency Management and Homeland Security (DEMHS).

Geomagnetic Data Reveal Unusual Nature of Recent Solar Minimum:

Posted: 19 Mar 2012 05:46 PM PDT
http://www.eham.net/articles/27941

Since the mid-1800s, scientists have been systematically measuring changes in the Earth's magnetic field and the occurrence of geomagnetic activity. Such long- term investigation has uncovered a number of cyclical changes, including a signal associated with 27-day solar rotation.

- Formidable Footprint: National Community/Neighborhood Exercise Series
- Changing of the Guard in North Carolina's Orange County
- K1CE For a Final

==> INDIANA, KENTUCKY AND OHIO HAMS WORK TORNADO OUTBREAK

A devastating storm system moved across the United States on March 2,
spawning a slew of tornadoes that contributed to at least 28 fatalities
in Indiana, Kentucky and Ohio. These tornadoes followed an earlier
outbreak that began on February 28 and left 13 dead across Kansas,
Missouri, Illinois and Tennessee and battered parts of Kentucky. The
Clark County (Indiana) Emergency Management Agency activated the local
RACES team to help provide communications support, hams in Eastern
Kentucky set up SKYWARN nets to assist the local National Weather
Service office and Cincinnati-area hams supported the National Weather
Service and the American Red Cross. The complete report can be found
here
<http://www.arrl.org/news/hams-in-indiana-kentucky-and-ohio-provide-support-during-and-aft
er-tornado-outbreak>.

==> 2012 NATIONAL HURRICANE CONFERENCE AMATEUR RADIO ACTIVITIES
```

The National Hurricane Conference <http://www.hurricanemeeting.com/>
will be held March 26-29, at the Hilton Orlando
<http://www.hilton.com/en/hi/groups/personalized/O/ORLOCHH-HUR-20120324/index.jhtml?WT.mc_id=POG>
in Orlando Florida. There will be several amateur radio activities going on during the week. The National Hurricane Conference (NHC) leadership continues to recognize the valuable contributions of amateur radio and again invited us to participate with two sessions. What a great opportunity for amateur radio!

NHC Session #1: Monday, March 26, 2012 from 1:30 pm to 5:00 pm, the main amateur radio session titled, "Amateur Radio Training Sessions: Disaster Communications Before, During and After Hurricanes." NHC Session #2: Tuesday, March 27, 2012 from 8:30 am to 10:00 am, at the National Hurricane Conference (NHC), there will be an amateur radio session designed for Emergency Management agencies called "Amateur Radio Rap Session-The Emergency Manager's Hidden Resource".

On Monday, March 26, 2012 from 7:00 pm to 9:00pm, the Orange County Communications Auxiliary, the Orange County EOC and the ARRL Southeastern Division will host an interactive free "NHC Workshop" for all ARES interested amateur radio operators at the Orange County Emergency Operations Center, 6590 Amory Court, Winter Park, FL 32792. You will be able to meet other like-minded hams, the presenters of the Hurricane Conference amateur radio sessions and special guest Dr. Rick Knabb, Tropical Weather Expert at The Weather Channel. The agenda will be: introductions, conference presenters summarize the NHC amateur radio presentations, special guest speaker, emergency communications discussion, questions & answers and door prizes.

The three presentations will be livestreaming on the internet at, www.nsradio.org/stream.htm <http://www.nsradio.org/stream.htm> and www.voipwx.net/files/stream.htm
<http://www.voipwx.net/files/stream.htm>

All hams are invited at no cost to attend session 1 and 2 at the National Hurricane Conference and the NHC Workshop at the Orange County EOC.

For additional information:

http://www.hurricanemeeting.com <http://www.hurricanemeeting.com/>

http://www.southeastern.arrl.org/2012NationalHurricaneConferenceActivities.pdf

http://www.hilton.com/en/hi/groups/personalized/O/ORLOCHH-HUR-20120324/index.jhtml?WT.mc_id=POG

http://www.southeastern.arrl.org <http://www.southeastern.arrl.org/>

http://www.voipwx.net <http://www.voipwx.net/>

National Hurricane Conference presenters are:

Special Guest Speaker: Bill Read, KB5FYA - Director National Hurricane Center

John McHugh, K4AG - Coordinator for Amateur Radio, National Hurricane Center, WX4NHC

Julio Ripoll WD4R - WX4NHC Amateur Radio Assistant Coordinator, http://www2.fiu.edu/orgs/w4ehw

Rob Macedo, KD1CY - Director of Operations for the VoIP Hurricane Net <http://www.voipwx.net/> and ARRL SEC, Eastern Massachusetts

Mike Corey, KI1U - ARRL Emergency Preparedness manager

Greg Sarratt, W4OZK - ARRL Southeastern Division Director

We encourage you to visit all the activities you can and learn more about amateur radio emergency communications. Hope to see you there!

==> ARRL'S EPM COREY ON FEMA THINK TANK CALL

On February 17, ARRL Emergency Preparedness Manager Mike Corey, KI1U, and Henry Katz, KB3NYW, of Baltimore County, Maryland participated as presenters in FEMA's Think Tank Conference Call. The conference was hosted by FEMA Deputy Administrator Richard Serino from city hall in San Francisco, California. In attendance at City Hall were representatives from FEMA, local and state emergency management, NGO's, and the private sector. An audience of over 400 from around the country also participated via teleconference.

The focus of the Think Tank conference call was the use of technology and social media in emergency management. The two specific topics discussed were: (1) How to communicate with disaster survivors and distribute information to mass audiences if cellular and on-line communications are unavailable immediately following a catastrophic disaster; in particular, how existing communications tools, such as Amateur Radio operators, can be leveraged and linked to other forms of mass communications following a disaster; and (2) How mobile applications can help emergency managers and individuals prepare for, respond to, and quickly recover from disasters.

Katz presented an overview of the Amateur Radio Service while Corey presented how radio amateurs relay vital messages during a disaster and how Amateur Radio works in conjunction with new technologies such as the Internet and social media. Following the presentations there was time for the audience to make comments and ask questions. The feedback received was good and the Deputy Administrator summed it up by saying "They're not Amateurs but they are very much professionals." For more information on the Amateur Radio portion of the FEMA Think Tank Conference Call see http://www.fema.gov/thinktank/.

==> MESSAGE FROM ARRL'S EMERGENCY PREPAREDNESS MANAGER KI1U: GET ON THE AIR

In the March 2012 issue of QST your ARES E-Letter editor Rick Palm, K1CE, had some great advice and insight on training and certifications for EmComm. Taking part in regular training, whether a new course or a refresher, has several benefits. First, it lets our served agencies know that we take not only our relationship with them seriously, but their mission, too. Second, the learning experience itself benefits the individual Amateur. And third, taking part in regular training keeps us informed on what is happening with our served agencies.

Our focus on training, though, has missed something very important. Where do we start training? What is the first thing you should do if you want to help with emergency communications and public service? What is the most important training we can take part in? The answer was found in your Amateur Radio license study manual.

At the risk of being tarred and feathered by die hard EmComm enthusiasts, Amateur Radio is not all about emergency communications. It is about getting on the air and making use of the spectrum we've been granted. Training starts by turning on your radio. Any time you get on the air is training and a learning experience. It doesn't matter what you do on the air: Field Day, rag chewing, nets, DXing, contests, etc. What matters is that you get on the air. Not just when there is an ARES event or an emergency, but at every opportunity. GET ON THE AIR!

Think about this: what would we be doing if we didn't have spectrum to use? We get to keep our spectrum not by spelling out all the "what ifs" and doomsday scenarios. We keep it by using it, and using it a lot. There are those that wouldn't mind taking some of our spectrum from us. Saying we need it in an emergency doesn't always work; after all, even public safety feels the sting of spectrum grabs.

So how is getting on the air training? By being active on the Amateur bands, you will increase your knowledge of propagation, rules and regulations, station building, antennas, modes of communication, and build networks through the QSO's you make. It is a perpetual learning environment. After 25 years as an Amateur, I still learn new things by being active on the bands. Don't take my word for it; ask around to those in your EmComm group that have been there, done that, and have a closet full of t-shirts. Getting on the air is a learning experience.

You may not get a certificate for getting on the bands (well perhaps if you try DXing or contesting) and your served agency may not understand your excitement for logging that new country on 10 meters, but you will be learning and growing as an Amateur. So start training and get on the air. I hope to see you in my logbook soon. - Mike Corey, KI1U, ARRL Emergency Preparedness Manager

==> TRAINING: ICS COMMUNICATIONS UNIT

Every incident requires that certain management functions be performed. The problem must be identified and assessed, a plan to deal with it developed and implemented, and the necessary resources procured and paid for. Regardless of the size of the incident, these management

functions still will apply.

There are five major management functions that are the foundation upon which the ICS organization develops. These functions are:

1) Incident Command -- Sets the incident objectives, strategies, and priorities and has overall responsibility for the incident.

2) Operations -- Conducts operations to reach the incident objectives, and establishes the tactics and directs all operational resources.

3) Planning -- Supports the incident action planning process by tracking resources, collecting/analyzing information, and maintaining documentation.

4) Logistics -- Provides resources and needed services to support the achievement of the incident objectives.

5) Finance & Administration -- Monitors costs related to the incident. Provides accounting, procurement, time recording.

The Communications Unit comes under the Logistics function, and develops the Communications Plan (ICS 205), to make the most effective use of the communications equipment and facilities assigned to the incident. Additionally, this Unit installs and tests all communications equipment, supervises and operates the incident communications center, distributes and recovers communications equipment assigned to incident personnel, and maintains and repairs communications equipment on site.

The Communications Unit is responsible for effective incident communications planning, especially in the context of a multiagency incident. All communications between organizational elements during an incident should be in plain language (clear text) to ensure that information dissemination is clear and understood by all intended recipients. Planning is critical for determining required radio nets, establishing interagency frequency assignments, and ensuring the interoperability and the optimal use of all assigned communications capabilities.

The Communications Unit Leader should attend all incident Planning Meetings to ensure that the communication systems available for the incident can support tactical operations planned for the next operational period.

Incident communications are managed through the use of an incident Communications Plan and a communications center established solely for the use of tactical and support resources assigned to the incident. Advance planning is required to ensure that an appropriate communications system is available to support incident operations requirements. This planning includes the development of frequency inventories, frequency-use agreements, and interagency radio caches.

Nets

Radio networks for large incidents may be organized as follows:

1. Command Net -- The command net links together Incident Command, Command Staff, Section Chiefs, Branch Directors, and Division and Group Supervisors.

2. Tactical Nets -- Several tactical nets may be established to connect departments, agencies, geographical areas, or specific functional units. The determination of how nets are set up should be a joint function designed by Planning, Operations, and Logistics.

3. Support Net -- A support net may be established primarily to handle changes in resource status but also to handle logistical requests and other nontactical functions.

4. Air-to-Ground Net -- To coordinate air-to-ground traffic, either a specific tactical frequency may be designated, or regular tactical nets may be used.

5. Air-to-Air Nets -- Air-to-air nets may be designated and assigned for use at the incident. An air-to-air net is designed to be used by airborne assets; ground units should not utilize this net. - FEMA ICS

==> LETTERS: VOLUNTEER MANAGEMENT MODELS

I was EC in Leon County, Florida, and read your "Final" in the last issue with interest as it matches closely with our typing list that I, with Brian Short, KC0BS, developed several years ago after FEMA first released their initial typing structure. At the time I was the Technology Projects Manager for the Mid-America Regional Council and was developing a regional typing standard(s) for the entire Kansas City region for all emergency services personnel including volunteer groups such as Amateur Radio, CERT, and the Medical Reserve Corps.

In my new role as an Emergency Manager I'm now on the receiving end of the hams who want to help but I don't dare risk putting ineffective or untrained personnel into key positions using limited resources. This typing has been helpful in sending the right people to other jurisdictions locally and we hope it will be just as helpful on a state to state basis. How long has Flagler county been using their typing structure? Did you get any kickback from the hams when you implemented it? What do you think it will take to get these adopted on a national level so that we can share resources with some confidence that as a receiving agency we are getting what we need (which is, of course, the purpose of typing in the first place)? -- Matt May, KCEM, MEP Assistant Director, Operations, Johnson County Division of Emergency Management, Olathe, Kansas [There is a wealth of good information on the Flagler County, Florida, model of volunteer management here <http://www.flagleremergency.com/pages.php?pid=75>, including a program manual, application forms, and a volunteer typing matrix that was feautured in the last issue. - K1CE]

==> TRAINING: IS-201 ON ICS FORMS

There is a new IS-201 class that overviews some of the ICS forms that could be used in an incident. While the mix covered in this class is different than what I have seen in actual incidents, the class does present the forms and should provide a good overview of how and why they are utilized. I would suggest that this class be considered for more advanced ARES/RACES personnel. We will be adding it to the certification requirements for personnel on our command vehicle. -- Garth Kennedy, W9KJ, Administrative Officer, Naperville, Illinois EMA [Course Overview: This is a web-based training course on the National Incident Management System (NIMS) Incident Command System (ICS). The course is designed to provide training through an independent study vehicle on the use of ICS forms. Take the course here <http://training.fema.gov/EMIWeb/IS/is201.asp>. - ed.]

==> LETTERS: MAPS AND GPS FALLIBILITY

The story Hams Help Save the Life of Fellow Ham <http://www.arrl.org/ares-el?issue=2011-12-21#toc09> in the December 2011 issue was interesting and heartwarming when learning of the safe rescue of the ham. The one thing that caught my eye was the misleading by the GPS in trying to lead to the motel the driver was looking for. I try to use the Internet mapping programs offered by Google and others. I print out the road and street layout of the location I am headed for when it is not a familiar location. I use my GPS to verify that I am on the roads that my map shows that I should be on, as I go along. When the GPS starts to send me to a road I know from the map is a wrong one, then I know not to trust or follow the GPS directions any longer. I then use the map and the roads shown on it to get where I need to get to.

Speaking in general, this is a good practice for any travel to an unfamiliar location such as for an assignment to an emcomm setup by an ARES member, and so on. These maps are incredible in detail, even including motels, gas stations, hospitals and so on. It is a resource that is free to anyone who has an Internet connection and a printer. Unfortunately, as we know, there is too much faith in cell phones and GPS devices, which are all too fallible, especially in an emergency. Printed maps do not depend on radio tethered devices. It is the one thing you can depend on, assuming you know how to follow a map, and it is not dependent on radio or satellites in any way. -- Murray Goldberg, KD2IN, Toms River, New Jersey

==> LETTERS: THE MODERN EOC

Thanks for the article Putting Amateur Radio in Context in the EOC [p.88, February 2012 QST]. I wholeheartedly agree with Troy and Bob's assessment stated in the last paragraph. I came to the same conclusion several years ago and joined up with CERT, the Medical Reserve Corps and the Local County Sheriff's Office Citizens on Patrol. The EMCOMM landscape has changed drastically here since 9/11, and Hurricanes Katrina and Ike.

Our county Mobile Command Center is equipped with every radio service imaginable, including satellite and Internet communications and Amateur Radio. Interoperability is vastly improved, though not perfect. Our local fire department reinstalled VHF radios in some of the trucks that are used for mutual aid to other counties since we have an 800 MHz trunking system but the more rural counties are on VHF FM. Currently there is a 700 MHz system being overlaid with the 800 MHz system for interoperability.

Half of our CERT members are radio amateurs. We have been called out for Search and Rescue, and use Amateur Radio and GMRS as our primary communication systems. The Medical Reserve Corp relies almost entirely on Amateur Radio for point to point communications as there are no funds for expensive Digital Trunking radio systems. Being a member of these different response groups allows one to meet and work with the decision makers at the county and city level. They see you as an emergency asset with a radio and not just someone who can talk on a radio. -- Eugene Murski, K5ZX, North Texas

==> FORMIDABLE FOOTPRINT: NATIONAL COMMUNITY/NEIGHBORHOOD EXERCISE SERIES

The series of Formidable Footprint <http://www.drc-group.com/> exercises for neighborhood, community and faith based organizations continues. The March 31 scenario is an earthquake. April 28's exercise involves flood scenarios. Exercises have also been scheduled for the following scenarios: Hurricane, Pandemic, Tornado, and Wildfire.

The Formidable Footprint exercise series has been developed in accordance with Homeland Security Exercise and Evaluation Program (HSEEP) protocols. The objective of the exercise series is for CERTs, Neighborhood Watch Programs, Neighborhood Associations, Community/Faith Based organizations, Citizen Corps, Fire Corps and others to work as a team to become better prepared for the next disaster their community may face. There is no charge for participation in any of the Formidable Footprint exercises. For additional information or to register for upcoming exercises, please access the following website: http://www.FormidableFootprint.org <http://www.formidablefootprint.org/> Stay informed regarding future exercises by joining the Formidable Footprint LinkedIn Group.

==> CHANGING OF THE GUARD IN NORTH CAROLINA'S ORANGE COUNTY

Laurie Meier, N1YXU, has retired as ARES EC for Orange County, North Carolina. During Meier's tenure as EC, the Orange County program was broadened with stellar leadership. Ms. Meier is the first to receive the North Carolina ARES Area 10 Outstanding Service Award. She humbly dedicated the award to the Orange County ARES group. Meier was instrumental in developing their ARES leadership team, structured and productive weekly nets along with meetings called "Ready Rallies" that have always produced better informed and trained ARES members.

With Meier's resignation, Steve Ahlbom, W3AHL, has gracefully accepted the position. Because of ramped up objectives by Emergency Management for interoperability and increased training demands, his new role will require strong leadership skills. Mr. Ahlbom is well respected among the amateur community, and brings a lot to the table as he has been part of the ARES leadership team as an AEC. Ahlbom has technical qualities and experience in an active role in supporting regional and state disaster groups. - North Carolina ARES Area 10 News, Volume 1, Issue 1, January 2012

==> K1CE FOR A FINAL

I'm back on D-STAR with my ICOM IC-2200H and will have some reports on my experiences in the next few issues. It certainly is an exciting mode and the implications for Amateur Radio emcomm are almost limitless, with numerous applications for digital voice and data.

Thanks go to the ARRL's Emergency Preparedness Manager Mike Corey, KI1U, for his contribution to this month's newsletter, and for his continuing work for the League's emcomm programs. He is also my editor up at the Ivory Tower, and the last filter before these words hit the streets. Thanks, Mike!

4J, AZERBAIJAN
The Ministry of Communications in Azerbaijan issued the two special
calls 4JS0NG and 4KS0NG till Jun 15 due to the Eurovision Song Contest.
QSL via RU3SD.

4U1ITU, ITU HEADQUARTERS GENEVA
After Chris,PA2CHR, and Rene,PE1L, have won the MMM Trophy in the
sections MS and EME for their C37MS and C56EME activities in 2011 they
want to thank everybody for that by activating 4U1ITU via EME from the
grid locator JN36bf together with Johan,PA3FPQ, and Jurgen,PE1LWT.
They will send and receive for one minute each on 144.134 MHz from
Mar 23-25 using a 2x8 Xpol yagi, 400 watts and a preamplifier after
WA2ODO. They will also have small radios for 6m and 70cm.
http://www.chris.org/cgi-bin/jt65emeA
http://www.emelogger.com/4u1itu

5T, MAURITANIA
Jean,ON8RA, will be active again as 5T0JL from Nouakchott mainly in CW
on 80m/40m/20m/15m/12m starting from Mar 21.
QSL via ON8RA, unfortunately only direct, see also QRZ.com.

5Z, KENYA
Charles,NV7E, announced to take part in the SOAB HP category of the
upcoming WPX SSB Contest as 5Z4EE. QSL via NV7E.

9M6, EAST MALAYSIA, OC-088
Steve,9M6DXX, will be on the air again from Sarawak (OC-088/WLOTA 0119)
signing 9M8Z from Mar 23-28, including the WPX SSB Contest.
QSL via M0URX, LoTW or OQRS (siehe http://m0urx.com/oqrs).

C5, GAMBIA
Jan,OZ1IIL, is signing C56LH only in SSB on 80m-10m during the mornings
and evenings until Mar 26. QSL via OZ1IIL.

CE0/Y, EASTER ISLAND, SA-001
Tim,NL8F, is working as CE0Y/NL8F or with a special CE0 callsign in SSB and digital modes mainly on 17m and 12m (possible from 80m-6m) before and after the WPX SSB Contest. Maybe he will also try to work greyline on 75m. He will join the WPX as SOSB LP on 10m or in the allband class. Rumours say he will stay until Mar 26 and that he plans to activate also one or two other South American IOTAs. QSL via K8NA.

E5, NORTH COOK, OC-014
The 3D20CR crew is on tour again. Jan,DJ8NK, Uwe,DJ9HX, Hawa,DK9KX, Werner,DJ9KH, Hans,DL6JGN, Ron,PA3EWP, and Leszek,SP3DOI, are going to visit the Manihiki atoll between Mar 27 and Apr 10. Listen for E51M in CW, SSB and RTTY on 160m-6m. They will use five stations with 500 watts each, seven verticals and a 4 ele yagi for 6m.
QSLs via DJ8NK, OQRS after Apr 20. See also: http://www.manihiki2012.de

E5, SOUTH COOK, OC-013
While waiting for their connecting flights the E51M crew plans to work as E51EWP from Rarotonga (OC-013) from Mar 23-26 and from Apr 11-14.
QSL via DJ8NK, OQRS after Apr 20.

EA8, CANARY ISLANDS, AF-004
Luis,EA8AY, will be QRV as EE8X (AF-004, DIE S-012, WLOTA 1276, EAA TF) in the SOAB category of the upcoming WPX SSB Contest. QSL via W2GR.

EA9, CEUTA AND MELILLA
Jorge,EA7HZ, Al,EA7JR, Manolo,EA7LL, Cris,EA7RU, Pedro,EA7IZJ, Jorge,EA9LZ, and others will join the WPX SSB Contest as ED9Z.
QSL via EA9LZ, unfortunately only direct.

FH, MAYOTTE, AF-027
Hartwig,FH/DL7BC, will show up from Mayotte (AF-027) between Mar 21 and Apr 6. He will sign TO7BC in the WPX SSB Contest.
QSL via homecall, see QRZ.com. http://www.qslnet.de/member/dl7bc

FM, MARTINIQUE, NA-107
Vlad,RC0F, is active as FM/RC0F from Mar 20-28 and plans to join the WPX SSB Contest as TO5K in the SOAB HP category. QSLs via homecall.

FR, REUNION, AF-016
Stephane,FR/F5UOW, will be active mainly in CW on 40m-10m from Reunion (AF-016, DIFO FR-001, WFF FFF-011, WLOTA 1812) between Mar 24 and Apr 14. He will use the special call TO2R from Mar 26 until Apr 9.
QSLs via F5UOW.

HI, DOMINICAN REPUBLIC, NA-096
Luis,HI8LAM, will take part in the WPX SSB Contest as SOAB LP from Santo Domingo (NA-096, WLOTA 2974). QSL unfortunately only direct.

J5, GUINEA-BISSAU
J52EME for VHF/UHF and J52HF for HF (80m-10m) will be the callsigns of the DXpedition to Guinea-Bissau from Mar 24 until Apr 6. The "Verona DX Team" will become active with two groups at the same time with emphasis put on EME. Frequencies: 144.130, 432.900, 50.200 MHz.

The distribution of tasks looks like this: Lucio,I3LDP (SSB/RTTY/6m)
Walter,I3VJW (CW/SSB/RTTY), Tony,IK3ESB (SSB/CW/RTTY/6m), Enzo,IK3VVD,
Silverio,IK3IUL (CW/SSB/RTTY), Libero,IK3RBE (SSB/RTTY/6m),
Milena,IK3VZJ (RTTY/SSB), Livio,IZ3BUR (SSB/RTTY), Renato,I3EJ, and
Llario,IZ3STA (SSB/RTTY/6m). They will use following equipment on HF:
2 Kenwood 590s, 3ele yagi for 10m/15m/20m, Spiderbeam for WARC bands,
delta loop and dipoles for 40m/80m/160m. The team is going to visit
Father Gianfranco,J52OFM, in Cumura (Loc IK21dt) and they plan to buy
a microscope for the hospital in Cumura from the donations.
QSLs only direct via I3LDP or OQRS with a donation. Greenstamps and
donations are going to the mission.
For more details visit: http://www.ari.verona.it/veronadxteam

K, USA
The "Mesilla Valley Radio Club of Las Cruces" in New Mexico will
activate the special event station K5B during the 23rd Bataan Memorial
Death March Marathon on Mar 25 from 1000-2300 UTC. Listen for K5B on
3893, 7225, 14330 and 21337 kHz. QSLs unfortunately only direct.
See also: http://www.n5bl.org

KH6, HAWAII, OC-019
Al,F5VHJ, announced to take part in the SOAB HP category of the WPX SSB
as NH7A from Keaau (OC-019, USi HI025S, WLOTA 0065, Hawaii county).
QSL via homecall.

KP2, US VIRGIN ISLANDS, NA-106
Yuriy,N2TTA, will sign KP2MM during the WPX SSB Contest (SOAB LP).
QSL via LoTW. See: http://www.n2tta.info

OH, FINLAND
The special event station OH150VR is active until the end of the year
and marks the 150th aniversary of rail transport in Finland.
QSL via OH4TY.

P4, ARUBA, SA-036
Helmut,DF7ZS, will be QRV from the QTH of P40V on Aruba (SA-036) during
his spare time from Mar 21-27. He will sign P4/DF7ZS (QSL via DF7ZS)
before and after the WPX contest and P41P during the WPX SSB Contest.
QSL for P41P via W3HNK, unfortunately only direct.

PJ4, BONAIRE, SA-006
Four HAMs from the US (John,PJ4/K4BAI, Fred,PJ4/WW4LL, Brian,PJ4/NA4BW,
Eric,PJ4/W4DXX) will join the WPX SSB Contest from the rental shack of
K2NG on Bonaire (SA-006, WLOTA LH-1279) from Mar 20-27. They will sign
PJ4Z as Multi/2 HP. Direct QSLs via K4BAI, bureau QSLs can be requested
via e-mail to k4bai@att.net. The logs will be uploaded to the LoTW.

PZ, SURINAME
Serge,RX3APM, is going to hit the airwaves as PZ5P from Paramaribo from
Mar 21-26. He wants to take part in the WPX SSB Contest as SOAB HP.
QSL via UA4LU, LoTW.

S5, SLOVENIA
The radio club in Cerkno (S50E) celebrates its 55th anniversary by activating the two special calls S555E and S55CERKNO until the end of this year. QSL via bureau, LoTW. See: http://www.s50e.si

SP, POLAND
The special event station HF4KUMURADOJO is activated until Mar 23 on the occasion of the 4th Days of the Japanese culture. QSL via SP9PDG. See http://sztygarka.republika.pl or http://kumuradojo.org
---
The special event station 3Z45HBW is QRV until May 7. QSL via SP5ZRW.

V6, MICRONESIA, OC-011
Jonas,SA0AAZ, and Carin,SA0BAC, will spend their diving holidays in the Truk Stop Hotel on Weno Island (OC-011) from Mar 26 until Apr 10. They will be QRV as V63AAZ and V63BAC in CW/SSB on HF using an IC-7000 and a wire antenna. QSLs via SA0AAZ.

VE, CANADA
Bill,VE6BF, from Beaumont in Alberta will use the special callsign VC6Z from Mar 24 until May 27. He will join the WPX SSB Contest and also the WPX CW Contest (May 26/27). QSL via VE6BF.

Noe,VE2BR, and Gregg,VE3ZZ, will sign VC2G (QTH Mercier/Quebec, Zone 5, Loc. FN35ch) during the WPX SSB Contest (M/S). QSL via VE2BR.

VK9/N, NORFOLK ISLAND, OC-005
Bob,ZL1RS, plans a 6m DXpedition to Duncombe Bay (Loc RG30xx) on Norfolk (OC-005, WFF VKFF-392, WLOTA 1469) from Mar 25 until Apr 8. Listen for VK9N/ZL1RS in SSB on 50.110 MHz and in CW on 50.1106 MHz using an IC706, 400 watts amplifier and stacked yagis. Bob will be QRV also on 6m via EME during the moonrise and moonset (50.190 JT65A). He also plans a DXpedition to Niue (ZK2) in September.
QSL via homecall, unfortunately only direct.
See also: http://www.qsl.net/zl1rs/vk9n.html

VP5, TURKS AND CAICOS ISLANDS, NA-002
David,W5CW, will be QRV from Caicos (NA-002) in the WPX SSB Contest. VP5/W5CW works in CW and SSB on 160m-6m from Mar 20 until Apr 11. Listen for VP52V during the WPX SSB Contest.
QSLs via homecall, unfortunately only direct.

XT, BURKINA FASO
Yuki,JA3VWT (XT2VWT), Kita,JA3IVU (XT2IVU), Jun,JH3AEF (XT2AEF), and Shu,JO3VVO (XT2VVO), are working from Ouagadougou in SSB and digital modes on 80m-10m from Mar 21-28. QSLs via homecalls.

XU, CAMBODIA
Sei,JA7LU (XU7NPC), and Hiroo,JA2VWG (XU7DDD) will show up in SSB and digital modes on 40m-6m from Sihanoukville (Loc OK21) from Mar 22-26 and also from Rong Samloem Island (AS-133, WLOTA 0096, Loc OK10) from Mar 26-28. QSLs via homecalls (JA2VWG unfortunately only direct).

YA, AFGHANISTAN
Eric,K9GY, will be QRV as T6MO from the Helmand province (grid MM21) during the WPX SSB Contest (SOSB LP). He is running 100 watts into a dipole at 9m height, if conditions are fine on 10m and 20m.
QSL via homecall, LoTW.

YS, EL SALVADOR
The "Club de Radio Aficionados de El Salvador" members Mario,YS1GMV, Mario,YS1MAE, Roberto,YS1RS, Florencio,YS1ZC, Francisco,YS1FAF, Jose,YS1MS, and Federico,YS1FEA, will sign HU0A in the WPX SSB Contest.
QSL via YS1GMV.

ZA, ALBANIA
Tevfik,TA1HZ, and Fatos,ZA1FD, will be active as ZA1TC from Durres using a TS570D and a Windom antenna from Mar 23-26. Tefvik wants to focus on 30m PSK31 outside of the contest. QSL via homecall.

PIRATES
The callsigns YI1IRQ, YI1HRP, YI1HR, YI1WR, YI1SR, YI1SA and YI1BGD are abused by pirates. See also QRZ.com.

Donations welcome
The "Radio Amateur Society of Thailand" is under patronage of his majesty the King of Thailand (HS1A). The RAST club station HS0AC was flooded last year and the damage is approx. 150.000 Euros. Donations are very welcome and are possible direct to the club or via PayPal to donate@rast.or.th
On the purpose of fundraising an EME action is planned for April.

QSL Manager of the Year
The Golist QSL Manager Data Service is reviving its "QSL Manager of the Year Award". The purpose of this award is to recognize the service of QSL Managers worldwide for the service they provide to the DX Community Nominations for this award for the year of 2012 will be accepted from DX and contest clubs until August 1.
Each DX club and Contest club is encouraged to poll their members for their nominations for the "Top 5 QSL Managers for 2012". The definition of a QSL manager for this award is any person who confirms contacts via printed QSL card for any station other than their primary callsign. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters as voted by members of their club. Each club may only send one submission for voting purposes. A plaque donated by DX Publishing, Inc. (publisher of QRZ-DX and THE DX MAGAZINE) will be awarded to the selected "QSL Manager of the Year" at the W4DXCC Convention held in Pigeon Forge, Tennessee in September 2012.
The recognized format for your club's submission is as follows:
Club Name, Club Officer (Name, Call Sign, club office and e-mail), Top 5 QSL Manager Nominees (list name and callsign). In the subject line of your official e-mail put "QSL Manager of the Year-2012" and send it to: golist@gmail.com. See also: http://www.golist.net

United Nations Global Service Center
The ARC of the UNGSC in Brindisi/Italy has got the club call 4U1GSC.

This station does not count as a new DXCC or a new WAE country.
However, pile-ups should be no problem with this prefix.

DXCC Approval
Following DXpeditions were approved for DXCC credit: XW1A, XW0ZJZ

New DXCC fee model
The ARRL has announced a new fee model which will come into effect on
April 2. There will be no mixed applications with paper QSLs and LoTW
anymore but there will be a new online portal to enter your QSL data.
This list is combined with the paper QSLs and sent to the examiners.
The fee can be paid online. These reasons have led to this step:
- Promotion of the application number
- Problems with mixed applications
- Simplifying the price structure
- Cost coverage
- Improve customer service
See http://www.arrl.org/news/view/arrl-announces-new-dxcc-fee-structure

Logs Online
The logs of the recent DXpeditions 3C0E and 3C6A were uploaded to their
homepage: http://www.gdgdxc.net/3c0e

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 24/25 CQ WPX Contest, SSB
Mar 26 DIG-PA Contest

World Wide Iron Ham Contest (update)
The Brazilian "Araucaria DX Group" (ADXG) has moved their new contest
(announced in last DXNL) to Dec 29/30: http://www.araucariadx.com/ih

Triathlon DX Contest
The Greeks had the same idea and invented the "Triathlon DX Contest"
which will take place for the first time on Feb 2, 2013.
See: http://triathlon-dx-contest.blogspot.com

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Jaime,WP3A, will be QRV as EF8C from Mar 21-27.
His stay on Tenerife Island (DIE S-012, WLOTA 1276, EAA TF) includes
a participation in the WPX SSB Contest (SOAB/LP). QSL via NP3O (d).

Felipe,NP4Z (member of the Los Chachos Contest Club), will join the
WPX SSB from Santa Cruz on Tenerife as EE8Z. QSL direct via W2GR (d).

AF-018, IH9, Pantelleria Island: Raffaele,IH9YMC, will take part in the
WPX SSB Contest as SOSB from Pantelleria (IIA TP-001, MIA MI-124,
WLOTA 0041, Loc JM56XT). QSL via eQSL only.

AS-004, 5B, Cyprus Island: Jack,R2AA, will be QRV as P3N from Pachyammos
on Cyprus (WLOTA 0051, Loc KM65HE) during the WPX SSB. QSL via RW3RN.

EU-003, CU1/2, Eastern group: Toni,OH2UA, will show up as CR2X during the
WPX SSB Contest from Ilha de Sao Miguel (DIP AZ-002, PIP AC-002,
WLOTA 2016). QSL via OH2BH (bureau/direct). See: http://www.cu2a.com

EU-005, GM, Scotland: Paul,2E1EUB, will visit the Cairngorms National Park
(WFF GMFF-001, Loc IO87MC, WLOTA 1234) for one week starting on Mar 24
and will sign 2M1EUB from the Eastern part of Scotland. Activities are
planned on 160m/80m, via satellite and in SSB on 2m.
QSL via 2E1EUB (bureau/direct). Website: http://www.qrz.com/db/2M1EUB

EU-013, GJ/MJ, Jersey: Craig,MJ/K3PLV, and Pete,MJ/K8PT are going to hit the
airwaves from Jersey (WLOTA 0818, Loc IN89) between Mar 27 and Apr 3.
They will use power amplifiers and beams in CW, SSB, RTTY and maybe
also PSK on 160m-2m. QSLs via homecalls.

EU-025, I*9, Sicily Island: Giuseppe,IT9HBT, Momo,IT9GNG, Rino,IT9FXY,
Enzo,IT9ECQ, Mike,IF9ZWA, Sal,IW9FRA, Mimmo,IW9GTD, Davide,IW9HII, and
Dario,IT9RDZ, will be QRV as II9K from Marsala (IIA SC-001, MIA MI-107,
WLOTA 1362) during the WPX SSB Contest. QSL via IT9HBT (bureau/direct).

EU-053, OJ0, Market Reef: Harry,OH6VM, and Pekka,OH6MC, will sign OJ0VM and
OJ0MC from Market Reef until the end of March. They also plan to join
the WPX SSB Contest. QSL for OJ0VM via OH6VM and for OJ0MC via OH6MC.

EU-054, I*9, Egadi Islands: Raffaello,IT9ATF, Renato,IT9NPR, Pippo,IT9PPG,
and Pino,IT9WDC, will sign IF9A from Favignana Island (IIA TP-011,
MIA MI-025, WLOTA 1545) in the CQ WPX SSB Contest (M/S).
QSL via IT9ATF (bureau/direct).

EU-120, G/M, English Coastal Islands: Kevin,2E0WMG/p, will be active in SSB
on 80m-10m from Lundy Island (WAB: SS14) from Mar 27-31.
QSL via homecall (bureau/direct).

EU-127, DL, Schleswig-Holstein State South group: A crew of about 30 HAMs
will activate the island of Helgoland (GIA N-15 WLOTA 0518, Loc JO34WE)
from Mar 21-28. DA0HEL will run four stations, Spiderbeam and wires
mainly on the IOTA frequencies. A separate station will be set up for
VHF. They also plan to go to little island "Helgoland Dune" (GIA N-15,
WLOTA 2130, Loc JO34XE) for 2 or 3 days. Activities can take place only
during the day. DL0IH will be QRV mainly on 40m and 20m.
QSLs for both stations via DF6QC (bureau/direct).

NA-034, W4, Florida State Centre West: David,K2DBK, is going to visit his
family from Mar 21-23 and will hand out IOTA points as K2DBK/4 during
his spare time. He will try to work in SSB on 14260 or 21260 kHz every
day from 1700-2200 UTC. QSL via homecall (bureau/direct).
He will upload his log to the LoTW as well.

NA-142, W4, Florida State North West: Brian,WB9QVR, and Conner,KC9NOX,
are planning to activate Santa Rosa/Okaloosa (USi FL003S, Escambia/
Okaloosa Counties) for one day between Mar 26 and 29.
Listen for WB9QVR/4 on the usual IOTA frequencies.
QSL only direct via WB9QVR (d).

SA-039, CX, Maldonado/Rocha Department group: The special callsign CW4R
will be activated by the Radio Club Uruguayo from Gorriti Island from
Mar 23-25. They plan to work in SSB, CW and digital modes on all HF
bands and also in the WPX SSB Contest. QSL via bureau or direct.
For more details visit: http://www.cx1aa.org

Interesting: Judy,KJ4HXC, and Ronald,WW4GA, activated a few lighthouses on
Prince Edward Island (NA-029) and Cape Breton (NA-010) in Sep 2011.
A short story and some nice pictures can be found on their website:
http://www.dxcoffee.com/eng/2012/03/14/lighthouse-hunting-atlantic-canada

RARS Fest April 7th, 2012

Posted: 19 Mar 2012 05:56 PM PDT
http://forums.qrz.com/showthread.php?338752-RARS-Fest-April-7th-2012&goto=newpost

Good evening one and all. This announcement is for RARS Fest which is going to be on the North Carolina State Fairgrounds in Raleigh, North Carolina on April 7th, 2012.

It's an ARRL State Convention and some big names in Ham Radio are going to be there including AMSAT and ARRL. There's also going to be Walk In VE Testing if you want to get your ticket for the first time or if you're looking to upgrade. There's also going to be a host of other activities. For more information go to http://www.rars.org/hamfest

73, Justin KK4HEK

372. Get Ready: Digital QST is Coming Soon

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-21 12:54:49 UTC
From: ARRL <memberlist@www.arrl.org>
Message-ID: <20120320150738.65FC120EE6@bmail.arrl.org>
Source record: 3389
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Coming Soon: NEW ARRL Membership Benefits

Dear <Member>

We are excited to announce two new ARRL membership benefits that will be introduced in June 2012.

In addition to the print copy of QST, all members will have access to an online, digital edition of QST at no extra cost. You will be able to access QST from anywhere--on nearly any computer, laptop, mobile device, smartphone and tablet (including Apple iPad, iPhone, and devices using the Android operating system).

Also in June, members will gain access to archived issues of QST from December 1915 to the present (previously, only issues through 2007 were available to members). If you are familiar with the current periodicals archive (which serves images of pages), that platform will be expanded to include all of QST from December 1915 through December 2011. A second, new archive will be introduced for issues beginning January 2012, featuring enhanced functionality including full-text search.

Be Prepared!

Members must have a valid ARRL website login to access the current digital edition of QST and archived editions. For a smooth launch of these exciting new benefits, and so that you will be able to quickly access the digital version of QST as soon it becomes available, we are e-mailing you some information that will help you login to the ARRL website prior to launch.

Login Instructions

Please follow these personalized, step-by-step directions below to login to the ARRL website:

- Go to www.arrl.org
- At the top, center of the page in "Site Login", enter your Username: and the password you selected during registration.

Forgot Password?

If you have forgotten your password, here are some steps to help you obtain a temporary password which you can use to Login. We recommend writing this temporary password down prior to logging in, then Login using your username and the temporary password.

Select "Forgot Password" on the Login page

- To reset your password by e-mail:

1. Select "By Email" from the dropdown menu
2. Enter your Username: and e-mail address. You must use the email address that you used to originally register for a website login account.
3. Click "Submit"

- To reset your password by member credentials:

1. Select "By Member Credentials" from the drop down menu
2. Enter your Username:
3. Enter your Member ID:
4. Enter your Call Sign OR Last name
5. Click "Submit"

Once you are logged in, select "Edit your Profile" to change your password to something you can more easily remember.

Questions?

Contact Member Services by email circulation@arrl.org or by telephone 860-594-0200 or 888-277-5289 (US only).

ARRL, the national association for Amateur Radio
225 Main Street, Newington, CT 06111-1494 USA

Ham Radio Deluxe 6.0 Preliminary Features List Released

Posted: 20 Mar 2012 06:44 PM PDT
http://forums.qrz.com/showthread.php?338912-Ham-Radio-Deluxe-6-0-Preliminary-Features-List-Released&goto=newpost

Tampa FL, St. Paul MN, Pittsburgh PA - September 19, 2011

HRD Software, LLC is pleased to announce a preliminary list of features for Ham Radio Deluxe v6.0, due to be released in time for the Dayton Hamvention. ☐In the past five months, we☐ve spent a lot of time addressing the backlog of bugs and defects. We☐ve also ported the code base from Visual C++ 6.0 to Visual Studio 2010,☐ said Mike Carper, WA9PIE. ☐But we also recognize that product development also needs to include new features that will sustain the appetite for improvement within the user base.☐

Ham Radio Deluxe v6.0 will include improved awards reporting, contest interfacing, additional digital modes, support for various keyer products, improved and simplified layouts, log export in a number of requested formats, and rig support for a number of popular unsupported radios like the Ten Tec Eagle and rotors like the M2.

☐In all, we have between 30 and 40 new compelling features planned for potential inclusion in version 6,☐ said Carper. ☐That☐s probably about 25% of the items on the drawing board. It☐s our intention to continue to grow the product for the users.☐

HRD Software, LLC plans to release the final specific list of features approximately 30 days prior to the 2012 Dayton Hamvention.

HRD Software, LLC is on the web at http://www.hrdsoftwarellc.com or http://www.ham-radio-deluxe.com

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: ZP; 2M EME

Greetings from Paraguay! Sadly today's operation trying for VE, VK, ZP,
and JA only gave us a few broken sequences that could be decoded. My
next dates both look good for EU and maybe for the U.S. April 3 1930z
(my moonrise) for as long as our battery holds out. April 6 2130z
(my moonrise) again for a long session. I would prefer not to take skeds
for these two dates. I will try to work whoever has the best decode.
The frequency will be 144.141 and I will transmit first. The weekend of
April 7th and 8th is not possible for me. I hope the 3rd and 6th will
produce a lot of QSOs and a new country for many of you! 73 and hope
to work you, de Steve ZP9EH

SOURCE: Steve, ZP9EH to MOON-NET

** DXCC: 4U1ITU; square JN36BF; start 2012-03-23

The mmonbounce activity at 4U1ITU will be starting end of this week!

We will be QRV moonbounce 2 meter from the ITU building in Geneva as
4U1ITU.
4U1ITU counts as a separate entity for the DXCC award and has never

been activated in WSJT.

We will be there from March 23rd till March 25th 2012, so only 3 days!
Don't miss it.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)
If all ok we will have a small 6 meter and 70cm setup with us too.

We will be on N0UK for last minute freq change.

Welcome to website! http://www.emelogger.com/4u1itu

** DXCC: J5; square IK21DT; start 2012-03-23

LATEST NEWS by Lucio, I3LDP, dated 2012-03-19:

Hello EMErs! The packing is done, loaded with equipment for
the DXpedition and aids for the Cumura Hospital. Each of us
has two suitcases of 23 Kg plus a backpack of 8 kg. The
pockets of our jackets and pants are loaded with coaxial
connectors, spare relays, some GaAsFET and the desire to
give a new Country via EME. Remember that we'll be active on
144, 430 and 50 MHz EME with the callsign J52EME and with the
callsign J52HF on HF and 50 MHz tropo. For info and updates,
and log online, visit the website of ARI Verona DX Team at:
http://www.ari.verona.it/veronadxteam/en/ The site is updated
by I3EJ which will be our link with you. Hoping to QSO you
from J52EME !

Hermann DL2NUD, and Peter DJ4TC will try to be active from Vietnam on EME

LATEST NEWS by Hermann, DL2NUD, dated 2012-03-13:

Hermann did send the latest information about RIG QRGs and Activity Times:
144.144 MHz 17el yagi, db6nt preamp, hlv2000 beko
432.090 MHz 38el yagi, db6nt preamp, 50 W
1296.120MHz 62el yagi, db6nt preamp, 400 W
They will try to be qrv: 28.3 - 10.4 in OK10 / 12.4 - 20.4 in OK20

MAIN NEWS:

The Team plan to be qrv from 28.03. until 20.04. as XV4HP (DL2NUD) and as 3W4TC(DJ4TC).
Maybe 2 Squares will be activated: OK10 and OK20 from Island of Phuqouc on 2m 70cm und 23cm
More Infos will follow if closer the dates...

LATEST NEWS from Phil, F1DUZ, dated 2012-03-17:

Operation details :
Call sign : FG4KH
Rig: FT897D, LNA, SSPA 500w, 2x10Xpol DK7ZB
QRG: 144,116 MHz , if any changes due to birdies Ill advise you
FG4KH TX always 1ST Period
If necessary, I repeat sequences 3 times but not more. If I dont receive
confirmation after 3 times, I jump to another station so you will have to
call me again.
Usaually I do not send 73
No restriction, you can call any time
Dont forget to spread out between +/- 600Hz.
In this second activity I will try to satisfy all but in first those
who are not in the first log.
It is an holiday style activity,you will find infos on MMMonVHF about
schedule, events and quick log. All others infos and complete log will
be in the expedition web site (see the link below).
See you soon from French West Indies

E2E EME-DXpedition in Thailand around April 2012
Karsten will try to setup a MMMonVHF DXBlog to spread his latest News.

LATEST NEWS from Swen, HS0ZFZ, dated 2011-12-24:

The Radio Amateur Society of Thailand Under the Patronage of His
Majesty the King - HS1A - The clubstation of RAST ? HS0AC ? was
submerged by 2m of waters during the previous century flood ? which
was in the media worldwide - I believe ? some pictures of the club
station after the water tide was gone ? www.qsl.net/RAST or RAST
forum.com RAST and HS0AC lost equipment worth around 200,000 USD
(150.000 Euro) incl. our mainstation rig FT-1000 MK Mark V ? which
is believed will not be able to be repaired. RAST settle up an
account for donations to help the clubstation getting back on air
soon. Donations could be done directly to the club or via paypal
to donate@rast.or.th (wrong in the Newsletter!).
There is also a EME activation ?E2E? planned
during April to help to raise some funds for HS0AC

** DXCC: EY; square MM48; start 2012-04-27

From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. Callsign not known yet. Locator will
be MM48JN near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.

If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz
We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012

Hello! Well, I wanted to provide as much advance time as I could so you could
mark your calendars and/or get everything in your 6m station optimized by the
end of August ;-) As those of you know who completed JT65A mode contacts with
me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be
active during our common moon windows - especially during the optimum days of
the month for 6m EME. The callsign is not in hand yet (but assured by email),
and the QTH has not been finalized, but all the plane tickets have been purchased
(as usual, any contributions are VERY welcome), and the equipment (a KX3 portable
transceiver with compatible 6m amplifier) is in the works. As soon as the license
is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:

http://www.bigskyspaces.com/w7gj/Niue2012.htm

I don't know if it will be possible to find a QTH that provides my usual preference
for a takeoff shot over water on moonrise. However, that is not necessary to work
NA stations during their moonsets (I will be elevating), so we will get the ground
gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset
over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period,
as we did together from E51 and 3D2; Bob's call will probably be his old callsign of ZK2RS.
More details will be posted on the above website as the departure time at the end of August
gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73,
Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: LA; square KQ50; start 2012-08-11

Only 3 Squares remaining on a visit of the OH8K Team in the northern area -
KQ50 will be one and will be tried to activate in August 2012

The plan from Jussi, OH6ZZ and Sami, OH9GDT will be to be qrv from KQ50
during 11-16. August 2012 as LA/OH6ZZ on 2m FSK/EME. QRG and more details
will be spread later...

Voices of Almonte Students Reached International Space Station 10 Years Ago

Posted: 20 Mar 2012 06:15 PM PDT
http://www.eham.net/articles/27948

EMC News - When the crew of Expedition 3 came over the western horizon a decade ago, at a speed close to 27,700 kilometres per hour (kph), about 370 kilometres (km) above the earth, a remarkable adventure was about to start at R. Tait McKenzie Public School in Almonte. At 5:46 a.m. Nov. 23, 2001, one student from each grade level, kindergarten to Grade 8, was ready to speak by amateur radio with the commander of the International Space Station (ISS) as he passed high overhead in orbit. This exciting educational project took place before most students and parents are usually out of bed. By 5:30 a.m. there was standing room only along the sides and back of the school gym. Shortly before 5:45 a.m., there was a hush as everyone waited for the ISS to come into radio range. This prearranged contact was the result of months of preparation and a successful school application to the newly established Amateur Radio on the International Space Station (ARISS) program. The radio arrangements were ready to go thanks to the support of volunteers from the Almonte Amateur Radio Club. When the telephone call from NASA came Nov. 1, we learned that our contact with the ISS was scheduled in 22 days. There was some drama in the school gym before the students were able to talk with the commander of the ISS. "November- Alpha -1-Sierra-Sierra, this is R. Tait McKenzie Public School calling." The first call to the ISS went unanswered. So did the second and third calls to NA1SS. Concerned faces were visible and whispered conversations started. "Something must be wrong." We didn't know our radio contact coordinator, Bob Clermont (VE3AKV) was watching the clock very carefully as he made each call. The ISS wouldn't be within radio range for more than a minute - and he knew it. On the fourth call, there was the voice of the ISS commander. "Oh, you are up," he joked. Visible relief swept across the gym. Great drama.

2012 Titanic Event Pigeon Forge TN:

Posted: 19 Mar 2012 05:00 PM PDT
http://www.eham.net/articles/27945

ONE OF OVER 2,208 PASSENGER CREW STORIES - CAPTAIN EDWARD JOHN 'E.J.' SMITH, DIED APRIL 15, 1912 Being the Captain of the RMS Titanic was to be the crowning glory of a long and distinguished career. Edward J. Smith was 62 years old and had been at sea for nearly 50 years. Serving on a variety of ships, he had become popular with his crew and with passengers, and many wealthy people would only sail on a ship under his command. As Captain of Titanic, he would receive a substantial salary, as well as a "no-collision" bonus. E.J. Smith was married and had a daughter. Retirement and spending time with his family filled his thoughts on the maiden voyage of the greatest ship ever built. As Titanic launched from Southampton, England, Captain Smith narrowly averted a collision with a smaller boat, the New York, and some saw the incident as a bad omen. He normally dined alone, but on the night of April 14, 1912, he was the guest of honor at a dinner hosted by wealthy Philadelphians George and Eleanor Widener. He excused himself from the dinner early, possibly because Titanic had received warnings of ice in the vicinity. He retired to his cabin and was later awakened by the collision with the iceberg. He quickly made his way to the bridge and was reportedly seen at various locations during the ensuing hours, but his actions during the chaos of the sinking remain largely a mystery. What he expected as his crowning glory instead became the end of his career:and the end of his life.

[IARU-R2-News 170] Special event stations WARD 2012
2012-03-21

On April 18, 2012 we will celebrate the World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union, IARU.

This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

For this reason there will be several special event stations from IARU's Member Societies active on different dates during April: 6H6IARU, 3G73IARU and LZ1WARD.

If IARU's Member Societies plan to have a special event station for this reason in April let us now so we can publish the details before the end of this month. Send us an email to news@iaru-r2.org with the information.

Joaqu&#65533;n Solana, XE1R
News Editor - IARU R2

Changes followed by "|".

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

379. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-22 06:05:01 UTC
From: rram@panix.com
Message-ID: <radio/rec-radio-info/guidelines-1-1332396300@panix.com>
Source record: 3396
Cross-posted to: rec.radio.info,rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.answers,news.answers

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/rec-radio-info/guidelines
Revision: 1.5 2007/03/22 16:30:49
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rri/index.html

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

I noticed a few snippets from a search engine that mentioned Herb's name along with 'kv4fz'. It sounds like he has his call sign back, is that correct?

I thought he was treated shabbily after his efforts to clean up the net that was breaking the law, so I hope he really does have the call sign again.

One of the great present-day amateur radio operators.

==> + NEW ARRL MEMBERSHIP BENEFITS COMING IN JUNE

The ARRL is excited to announce two new membership benefits that
will be introduced in June 2012. In addition to the print copy of QST,
all members will have access to an online digital edition of QST -- at
no extra cost. You will be able to access QST from anywhere -- on
nearly any computer, laptop, mobile device, smartphone and tablet
(including Apple iPad, iPhone, iTouch and devices using the Android
operating system). Members will also gain access to archived issues of
QST from December 1915 to the present; previously, only issues through
2007 were available to members. If you are familiar with the current
periodicals archive, that platform will be expanded to include all of
QST from December 1915 through December 2011. A second, new archive
will be introduced for issues beginning January 2012, featuring
enhanced functionality including full-text search. Read more here
<http://www.arrl.org/news/coming-soon-new-arrl-membership-benefits>.

==> + ARRL ANNOUNCES NEW DXCC FEE STRUCTURE
```

The DX Century Club (DXCC) is the premier Amateur Radio operating award. Available to hams around the world, tens of thousands of awards have been issued since 1945 under the modern award program. In 2012, the DXCC program is not only still thriving, but it is growing, both in participation and in numbers of award options. The addition of Logbook of the World and soon, the addition of an Online DXCC Application utility, will continue to help the program grow. Effective Monday, April 2, the way DXCC fees are assessed will change. These changes will include both rate increases and rate decreases. Read more here <http://www.arrl.org/news/arrl-announces-new-dxcc-fee-structure>.

==> + 2012 NATIONAL HURRICANE CONFERENCE TO FEATURE AMATEUR RADIO ACTIVITIES

The National Hurricane Conference -- scheduled for March 26-29 in Orlando, Florida -- will feature several Amateur Radio activities. The National Hurricane Conference leadership continues to recognize the valuable contributions of Amateur Radio and has invited several radio amateurs to participate in two sessions. Read more here <http://www.arrl.org/news/2012-national-hurricane-conference-to-feature-amateur-radio-activities>.

==> + ON THE AIR: SPECIAL EVENT STATIONS PLANNED FOR LONDON 2012 OLYMPIC AND PARALYMPIC GAMES

Some special event call signs will be activated to celebrate the London 2012 Olympic and Paralympic Games: 2O12L from London, England and 2O12W from Barry, Wales. The London 2012 Inspire program has granted the Radio Society of Great Britain (RSGB) -- Great Britain's IARU Member-Society -- use of the "Inspire mark" for these stations. Both stations will be on-the-air for the duration of the Games, July 27-August 12. Read more here <http://www.arrl.org/news/special-event-stations-planned-for-london-2012-olympic-and-paralympic-games>.

==> + EXECUTIVE COMMITTEE TO MEET THIS WEEKEND IN MISSOURI

The ARRL Executive Committee will meet Saturday, March 24 in St Louis, Missouri. Agenda items include a review of the ARRL policy on repeater coordination, a look at how the mandated study on Amateur Radio -- as outlined in Section 6414 in the just-passed payroll tax legislation -- will be implemented, the first periodic review of the National Broadband Plan Committee report, discussion of the proposed changes to the FCC's rules as set forth in report from the ARRL Electromagnetic Compatibility Committee and more . ARRL President Kay Craigie, N3KN, serves as chairman of the Executive Committee. Click here <http://www.arrl.org/news/executive-committee-to-meet-this-weekend-in-missouri> for more information, including a link to the meeting's agenda.

==> SOLAR UPDATE

Tad "The Sun has long been set
<http://www.poets.org/viewmedia.php/prmMID/21699>" Cook, K7RA, reports:
Solar activity declined this week - the average daily sunspot numbers
were off by more than 13 points to 75.1, while the average daily solar
flux dropped more than 32 points to 102.1. Solar flux values have also
dropped below 100 for the past two days; they are expected to remain
there until March 28. The next short-term peak in solar flux is
expected at the 135 level for April 3-6. The predicted solar flux for
March 22 is 95. On March 23-26, expect 90, then 95, 100 and 100 on
March 27-29, 130 on March 30-April 2, then 135 on April 3-6, and 130,
120, 115 and 105 on April 7-10, and 100 on April 11-15. The predicted
planetary A index is 7 on March 22, 5 on March 23-27, 10 on March 28, 8
on March 29-31, 5 on April 1-2, 8 on April 3-4, 5 on April 5-9, then
12, 5, 5, 15 and 10 on April 10-14, and 5 again on April 15-23. Look
for more information on the ARRL website on Friday, March 23. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by William Wordsworth's The Sun Has Long
Been Set <http://www.poets.org/viewmedia.php/prmMID/21699>.

==> + TAPR OPENS "INTEREST LIST" FOR HERMES SDR

Tucson Amateur Packet Radio (TAPR) announces the opening of the
"interest list" for the openHPSDR Hermes single-board Software Defined
Radio. The Hermes interest list is used by TAPR to determine the number
of Hermes boards to manufacture in the pending initial production run
this spring. Hermes is a long-awaited addition to the openHPSDR project
lineup, advancing through four prototypes while evolving from a
USB-based to an Ethernet-based transceiver in about two years. Hermes
is a Direct-Down-Conversion receiver, a Direct-Up-Conversion 500 mW
transmitter and a gigabit Ethernet interface all on one board. Also on
board is an RF-quiet switch-mode power supply, which allows Hermes to
run from a single 13.8 V dc source. Read more here
<http://www.arrl.org/news/tapr-opens-interest-list-for-hermes-sdr>.

==> THIS WEEK IN RADIOSPORT

This week:

- March 24-25 -- CQ WW WPX Contest (SSB)
- March 26 -- QRP Homebrewer Sprint
- March 28 -- SKCC Sprint
- March 28-29 -- CWops Mini-CWT Test

Next week:

- March 31-April 1 -- Missouri QSO Party
- April 1 -- UBA Spring Contest (SSB)
- April 3 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest

Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 23-24 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-2>, Lewiston,
Maine
- April 7 -- ARRL North Carolina State Convention

Amateur Radio Newsline(tm) Report 1806 - March 23 2012

Amateur Radio Newsline report number 1806 with a release date of March 23rd, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio and social networks respond following an earthquake in Mexico; an A-P-R-S equipped ocean buoy is released off the coast of Alaska; Missouri hams could be hit hard by a proposed distracted driving law; London Olympic ham radio stations are announced and the birds are back. Find out what we mean on Amateur Radio Newsline(tm) report number 1806 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO AND SOCIAL NETWORKS RESPOND TO MEXICO EARTHQUAKE

Amateur radio operators and the social media have responded in the wake of an earthquake that hit Southwest Mexico on March 20th. Bill Pasternak, WA6ITF, is in the newsroom with what we know so far:

--

What has been described as a powerful and prolonged earthquake rocked parts of Mexico on Tuesday, March 20th. The 7.6 magnitude temblor near the Pacific Coast resort town of Acapulco. According to news reports, some homes were toppled near the quakes epicenter. Electricity and telephone communications was lost for a time. But despite the quake's power, Mexico's President Felipe Calderon and officials across the country said that there were no reports of serious injuries.

While there was some damage to the nation's internal communications infrastructure, Mexico's connection with the outside world for the most part remained unscathed. So far nothing has been heard about activation of any domestic Mexican ham radio emergency group. As we go to air, the only international ham radio operation we have heard about is a group called the International Radio Emergency Support Coalition. IRESC President, Urcun Canel, TA0U, in Istanbul, Turkey worked with about 8 or 9 hams in Mexico passing early damage assessment reports to the European continent. Some of this communications audio was posted to Facebook:

--

Actuality audio communications. Hear it by downloading the MP3 audio file of this newscast at www.arnewsline.org

--

You can hear the entire communications session at tinyurl.com/iresc-mexico-quake. But the real story in this case is the response by the people in the affected areas.

While telephone and cellphone service was jammed as is the case after events like this, broadband connections were still open and quite useful. Anyone watching or listening to broadcast news reports often heard tweets from residents of the quake hit area being quoted as news sources and giving short eye-witness assessments via Twitter.

Also, broadcast news organizations world-wide were asking people with relatives in the quake zone to call in or post to the stations website the latest news they might have. In other words, news organizations were literally handling health and welfare traffic that until a year or two ago was primarily the domain of radio amateurs involved in emergency communications.

Quite a change from day's gone bye.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

More in future Amateur Radio Newsline reports. (ARNewsline, published news reports with audio from IRESC Facebook posting)

**

RESCUE RADIO: CONNECTICUT ARES FRONT AND CENTER ON EMCOMM PREPAREDNESS

The role of amateur radio in emergency communications continues to grow and will become even more vital in the future. That was the message from Connecticut Section Emergency Coordinator, Wayne Gronlund, N1CLV, at the annual meeting of that states ARES groups over the weekend of March 17th and 18th.

According to Gronlund, a series of natural disasters in 2011 showcased the importance of amateur radio in emergency situations. These included tropic storm Irene, a pre-season nor'easter in October, and the tornadoes that swept western Massachusetts last summer.

Illustrating his remarks with a Power Point presentation, N1CLV noted that the snowstorm in particular strained the system because phone and electrical service were disrupted for up to two weeks. Especially in the Farmington area.

These two disasters led to formation of Governor Deniel Malloy's two-storm study inquiry. Among the panel's recommendations is holding a real time training exercise this year. One that would involve municipalities, the Red Cross and ARES to determine what assets are

available and what improvement is needed.

Such a state-wide exercise is now scheduled for July 28th to the 30th and will involve amateur radio resources. More is on the web at tinyurl.com/ct-rescue-radio. (Hartford Examiner)

**

LEGAL HAPPENINGS: PROPOSED MISSOURI DISTRACTED DRIVING LAW HAS NO EXEMPTIONS FOR ANYONE

Missouri drivers including hams, C-B operators, emergency response personnel and even someone just tuning a vehicles A-M radio could find themselves standing before a judge. This if a new distracted driving law is enacted as proposed to that states legislature. Matthew Chambers, NR0Q is here with the rather strange details:

--

If you were to get pulled over this morning and told that you were getting a ticket for distracted driving because you took a sip of coffee during your morning commute would you be surprised. If a Missouri Senate Bill written by Senator Bill Stouffer, of Saline County passes, this is what Missouri drivers could be facing.

Senate Bill 717 would make it a class C misdemeanor to "Fail[s] to give full time and attention to the operation of the motor vehicle; Fail[s] to maintain a proper lookout while operating a motor vehicle; or Engage[s] in any other activity which causes the operator to be distracted from the primary mission of driving such motor vehicle."

There are no exemptions for hands-free devices, two-way or CB type radios, or for operators of emergency vehicles or law enforcement personnel. If passed as written, the police officer writing a ticket to enforce this would most likely also have to write themselves a ticket for distracted driving as well.

For the Amateur Radio Newsline, I'm Matthew Chambers, NR0Q near Macon, Missouri.

--

While it may sound funny to think of a police officer having to cite himself for using his departments radio communications system, it might one day happen in the "show me" state. The rather short but complete text of this proposed law is on-line at tinyurl.com/mo-distracted-driving. (NR0Q)

**

RADIO RESEARCH: ICE GOAT 1 APRS BUOY GOES TO SEA OFF ALASKA COAST

A group of Oceanography and Aeronautical engineering students from the U-S Naval Academy have deployed a radio equipped ocean buoy rigged to monitor weather in the harsh conditions of the arctic. Named Ice Goat

1, the buoy was placed off of the coast of Point Barrow, Alaska. Once the winter ice melts the buoy will begin its sea voyage.

In addition to its scientific monitoring gear, Ice Goat 1 carries an APRS beacon operating on 145.825 MHz. The position packets can be relayed via the International Space Station digipeater. However, as the ISS only rises 1.5 degrees above the horizon at arctic latitudes reports of direct reception of the 145.825 MHz beacon are being sought from any Alaskan, and eventually Pacific Northwest amateur radio stations that may be in range of Ice Goat 1. Reception reports go by me-mail to wb4apr(at) amsat (dot) org. (AMSAT, WB4APR)

**

RADIOSPORTS: LONDON OLYMPIC COMMEMORATIVE HAM RADIO STATIONS ANNOUNCED

Some special event call-signs will be activated to celebrate the London 2012 Olympic and Paralympic Games.

The London station, 2012L will be active through the duration of the games. It will be located at the historic Eltham Palace, south-east London on and will operate all modes on 160 through 2 meters. More information about it is on the web at www.2O12L.com.

The Welsh station 2O12W will be operational on all bands from 160 meters through 23 centimeters and all modes including SSTV and satellites. It will be located at Whitmore Bay, on Barry Island, More information on the web at www.2O12W.com

2O12L and 2O12W will go on the air July on 27th. The Radio Society of Great Britain has been granted use of the games Inspire trdemark for these stations. Special QSL cards will be available to all stations contacted. (G4IRN)

RADIO RULES: TOWERS VS. BIRDS - CATS GET THE BLAME

The birds are back. New interim regulatory procedures will take effect soon for certain new towers to address bird kills. Yet the issue remains a sensitive one for many people in broadcasting, two-way radio and others who own and maintain tall lighted tower structures. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

A new report from the FCC is likely to be scrutinized by anyone involved in the debate. Among its assertions is that by best estimate communications tower strikes by avian creatures do kill 6.6 million birds a year in the United States. Even so, while proposed regulatory changes may affect the total somewhat, bird deaths from towers are, and will remain, only a tiny fraction of bird deaths from all causes.

The report also notes that while communications towers contribute to the overall adverse impacts of all human activities on bird populations, communications tower collisions are only responsible for approximately 0.3 percent of the more than 2 billion annual bird deaths that currently occur due to cats and other predators. In addition, these deaths occur against a backdrop of high natural mortality to migrating birds due to a number of factors. Although the absolute number of birds killed at communications towers is large, towers are a relatively minor contributor to total human-caused avian mortality, and the impact of these deaths is likely even smaller when considered in the context of high natural mortality.

These findings are part of a Federal Communications Commission report assessing the environmental impacts of its Antenna Structure Registration System. The report was prepared by the Maryland based firm the URS Group for the FCC's Wireless Telecommunications Bureau.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The report is likely to continue the ongoing debate over what the permanent tower registration rules and procedures should be. You can read the details at tinyurl.com/The-Final-PEA. (FCC, CGC, RW)

**

RADIO LAW: FCC SEEKS INPUT ON EMERGENCY SHUTOFF OF CELLULAR SERVICE

The FCC wants to know how you feel about the government or private enterprises using its ability to order a shutdown of broadband communications systems in times of emergencies or perceived emergencies. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Federal Communications Commission's Public Safety and Homeland Security Bureau and Wireless Telecommunications Bureau are jointly seeking comment on issues related to intentional interruptions of Commercial Mobile Radio Service by government authorities for matters deemed in the interest of public safety. The issue stems from Bay Area Rapid Transit's shut-down of cellular telephone service on August 11th of last year in the face of political and social protests taking place in the San Francisco area.

According to General Docket Number 12-52, any intentional interruption of wireless service, no matter how brief or localized, raises

significant concerns and implicates substantial legal and policy questions. The service interruption last summer drew sharp criticism, and state and local governments have recently grappled with how to address possible future events.

The FCC says that it is concerned that there has been insufficient discussion, analysis, and consideration of the questions raised by intentional interruptions of wireless service by government authorities. As a result, Docket 12-52 seeks comment on the legal constraints and policy considerations that bear on an intentional interruption of wireless service by government agencies for the purpose of ensuring public safety.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

General Docket Number 12-52 caries a commentary cutoff date of April 30th and a reply comment date of May 30th. The entire text is on line in Adobe PDF format at tinyurl.com/turn-off-cellphones.

(FCC)

**

REGULATION: CLERICAL ERROR LEADS FCC REQUESTS MODIFICATION OF HAWAII HAMS LICENSE

In one of those awkward "oops someone goofed moments," the FCC has been forced to issue an order that proposes modifying the license of Todd Wilson, WH6DWF, of Honolulu, Hawaii, from General to Technician.

No, Wilson did nothing wrong. In fact he appears to simply be the innocent victim of a clerical error by the administering Volunteer Examiner. It happened this way:

Back in November of 2011, the ARRL V-E-C sent an electronic data file to the FCC, requesting that the agency issue a Wilson a General class license which it did. A few weeks later in January 2012, the ARRL V-E-C notified the FCC that Wilson's information was incorrect and he did not qualify for a General class license. The ARRL V-E-C also requested that the FCC to modify Wilson's license to show him as a Technician class license holder.

On March 15, the FCC issued an Order of Proposed Modification, seeking to change Wilson's license class from General to Technician. In its order the FCC said that granting General class amateur radio privileges to Wilson had been improper. That the grant of General class operator privileges to Wilson was erroneous because he was not eligible to receive examination credit for one of the elements an applicant must pass in order to be granted a General class operator license. Rather, he appears to be currently authorized to operate with General class operator privileges due to an error made during the application

process.

But it may not be over yet. Under the law, Wilson has until April 14th to appeal the modification order by submitting a written statement containing sufficient evidence to show that the modification would not be in the public interest. If he fails to do so, the license modification back to Technician class will come into effect. (FCC)

**

ENFORCEMENT: A SECOND $25000 FINE ISSUED TO AN UNLICENSED CALIFORNIA BROADCASTER

In what may well be a time record between FCC actions, the Commission has reaffirmed a second $25,000 fine against California resident Gabriel Garcia. This time for not allowing a commission inspection of various unlicensed radio stations in the San Jose area.

As reported last week, in May 2011, the Enforcement Bureau's San Francisco office originally issued a $25,000 penalty because it said Garcia was operating illegal stations on three frequencies in the San Jose area and apparently interfering with the Aviation Radio Services band. The commission said that Garcia did not respond to the notice, so the fine has now progressed into a Notice of Forfeiture.

Now the FCC has affirmed the second $25,000 forfeiture based on Garcia's refusal to give its inspectors access to the properties from which the stations were allegedly operating. This, to permit physical inspection of the equipment being used.

If Garcia fails to pay the two fines in the allotted 30 days each, the matters will likely be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: FCC INVESTIGATING 450 - 470 MHZ INTERFERENCE IN PA

The FCC has issued a Notice of Unauthorized Operation and of Interference to Licensed Radio Stations to a pair of Lurgan, Pennsylvania residents. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the details:

--

In a letter to the unnamed parties, the North-East Region Enforcement Bureau in Philadelphia stated that it had received a complaint from a licensed telecommunications provider of interference in the 450 to 470 MHz band. Also, that they had traced the interference to a radio transmitting device operating in Lurgan, Pennsylvania.

On February 17th agents confirmed by direction finding that the source of the interference was emanating from a residence in Lurgan. During an equipment inspection, agents confirmed that the device causing the

interference was designed to jam radio transmissions.

In its letter to the Lurgan residents, the FCC notified them that unauthorized operation of a radio transmitting device designed to jam radio communications must cease immediately. It warned them that the continued operation of such a device may result in seizure of the offending equipment and/or a court order prohibiting them from operating such devices. Also that this type of unauthorized operation could subject them to substantial monetary forfeitures and criminal sanctions including imprisonment.

The two people involved in this matter were given 10 days from receipt of the notice to provide information regarding the entity from whom they purchased the device, including copies of any receipts or invoices. They were also given the opportunity to respond with any other information that they believe relevant to the notice.

Fr the Amateur Radio Newsline, I'm Heather Butera-Hpwell, KB3TZD, not far away in Berwyck, Pennsylvania.

--

The two Lurgan residents were also advised that the Notice of Unauthorized Operation they received or their response to it would not preclude the FCC from pursuing additional sanctions based upon its investigation of this incident. (FCC Northeast Enforcement Bureau)

WORLDBEAT: CHELMSFORD NAMED UK BIRTHPLACE OF RADIO

The United Kingdom now has a city named as the birthplace of radio. At least in that nation. Jeremy Boot, G4NJH, is here with the details:

--

Chelmsford, acknowledged as the birthplace of radio and home to the Marconi Company for many years, is one of three new cities created to mark the Queen's Diamond Jubilee.

This year also marks the 100th anniversary of the establishment by Marconi of the first purpose built radio factory in New Street, Chelmsford in 1912. New Street is marked with a blue plaque noting the historic significance.

And this comes to you from G4NJH in Nottingham.

--

As an asaide, for those who never heard the term the Queen's Diamond Jubilee, this will be an extended weekend from June 2nd to the 5th to celebrate the 60th anniversary of Queen Elizabeth the 2nd. The Queen came to the throne on February 6, 1952 and her coronation took place on June 2nd 1953. (RSGB)

**

HAM RADIO IN SPACE: HAMSAT VO-52 RECOVERY SUCCESSFUL

Some good news about the HAMSAT VO-52 ham radio satellite. A report received from the ISRO Satellite Centre in Bangalore, India on March 14 says HAMSAT is back on the air and operating properly.

According to VU2WMY commands to reactivate Dutch-built PE1RAH orbital transponder on HAMSAT were sent during an ascending pass over India. The commands were acknowledged and confirmed by return telemetry. At the same time the beacon signal was heard loud and strong in Bangalore.

Stations in Europe and North America reported good signals from VO-52 immediately after the transponder was activated. Two-way contacts were soon completed through the HAMSAT VO-52 transponder. (VU2WMY)

**

HAM RADIO IN SPACE: NEW HAM-SAT GROUP FORMED IN CUBA

Hector Martinez, CO6CBF reports that the Cuban Amateur Radio Federation has created its first official Satellite Group. CO6CBF says that he along with CM2ESP and CO7WT worked to form the group and made the formal recognition request to the Federation headquarters that was approved on March 3rd.

The official name of the organization is the Grupo de Radioaficionados para Operaciones Satelitales. Its principal mission is to promote amateur radio by satellites in Cuba and motivate Cuban hams to operate on the satellites. Its first meeting is being planned for Havana in the not to distant future.

(CO6CBF)

**

ON THE AIR: UK MUSEUM STATION TO COMMEMORATE SINKING OF THE TITANIC

Special event station GB100MGY will be on air from April 6th to the 26th. This to mark the 100th anniversary of sinking of the Titanic in 1912.

This operation will take place from the Fort Perch Rock Marine Radio Museum at New Brighton in the UK. In addition to the regular HF bands the planners of GB100MGY have received special permission from UK telecommunications regulator Ofcom to use the callsign on 502 kHz. If you do not have gear to transmit on 502 kHz, crossband QSO's will be available to 3.566 or 7.066 Mhz from April 12th to the 18th as propagation permits.

For more information on this special event operation, please take your web browser to www.fortperchrockmarineradiomuseum.co.uk. (Via e-mail)

**

RADIOSPORTS: WORLD-WIDE IRON HAM CONTEST RESCHEDULED TO DECEMBER

The World-Wide Iron Ham Contest, which was originally planned to take place in June, has now been re-scheduled. In order to avoid having two South American contests in the same day the Araucaria Dx Group decided to move the Iron Ham competition to the last full weekend in December. As a result, the World-Wide Iron Ham Contest will begin on Saturday December 29th at 12:00 UTC and end on Sunday December 30th at 11:59 UTC. More on this event in both English and Portugese is on line at www.araucariadx.com/ih. (PY5EG)

**

DX

In DX, The Buddies in the Caribbean mini-DXpedition group will be operational from Montserrat between April 8th to the 16th, with a new group of operators who have never experienced the other side of a pileup. Because of severe baggage limits on the flight from Antigua to Montserrat they will be limited to low power radios and Buddipole portable antenna systems. There will be several villa stations in operation on 160 through 10 meters using CW, SSB, and RTTY or PSK. At the same time, several teams will be battery-only, field portable either from Montserrat beaches or scenic mountain tops. QSL via Logbook of the World, eQSL, or mail to the operator's home callsign.

DL7BC will be active from slas FH from Mayotte Island March 20th to 6th. Please QSL as directed on the air.

WA2YUN is currently operational portable KH9 from Wake Island and will be active another year or more. Activity is on the Nigh Frequency bands including 160 and 80 meters. He has also been active on 6 meters. QSL via K2PF.

F4DTO and F4GFE will be active from Albania as ZA100I between April 22nd to the 29th. Operations will be on 40 through 10 meters on SSB only. QSL via F4DTO, direct or by the bureau.

Members of the Malaysian Amateur Radio Transmitter Society and the 9M4SDX Team will be active as 9M0L from Pulau Layang Layang Island, East Malaysia, between April 10th and the 24th. The team will have 4 stations using Spider Beam antennas. QSL direct to the 9M0L Team Penang, PO BOX 125, GPO 10710, Penang Island, Malaysia or by the bureau to Malaysian Amateur Radio Transmitter's Society.

Lastly, W7GJ and ZL1RS will once again team up to do a 6 and 2 meter EME DXpedition to Niue between September 9th and the 21st, W7GJ will use the callsign ZK2GJ, while ZL1RS will probably use his old callsign of ZK2RS. QSL ZK2GJ via W7GJ and ZK2RS via ZL1RS direct only.

**

THAT FINAL ITEM: CREATING THE HAM RADIO TRIATHLON CONTEST

And finally this week, a new radiosporting event will begin in 2013. And it has its roots in sports history. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

It all started back in August of 2011. That was about when it occurred to Mike Balaskas, SV5BYR of Dodcanese, Greece, that a big Greek sponsored radiosport event was missing from international ham radio contest calendar. By the end of that September Balaskas' idea had matured and so the Ham Radio Triathlon Contest was born.

For those of you who do not follow the world of sports, a triathlon involves completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word.

But unlike the world of athletics, those planning the Ham Radio Triathlon DX Contest had to change things a bit to make this activity become reality. In trying to simulate the original Triathlon athletic event, planners chose three major ham radio modes for the competition. For the initial outing these will be SSB, CW and RTTY.

The Ham Radio Triathlon will be a 24 hour non-stop event that will take place the fist full weekend of February. It will debut next year on Saturday, February 2nd of 2013. And from what we have read of the proposed rules winning this one won't be easy but it sure looks like a lot of fun.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, on this side of the Atlantic and the Western part of the United States reporting from Scottsdale, Arizona.

--

SV5BYR says that there is still a lot of work to be done and more details to be announced. We suggest that you keep an eye on triathlon-dx-contest.blogspot.com in the coming months to learn more. (SV5BYR)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm David Black, KB4KCH, at the Southeast Bureau in Birmingham Alabama saying 73 and we thank you for listening.

WIANEWS WEEK COMMENCING MARCH 25 2012.

ACMA makes new Commercial Radio Standards

wHO PLAYS HAM RADIO

It's to the Holyland Contest

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAR 25 2012.

ACMA makes new Commercial Radio Standards

The ACMA has made new Commercial Radio Standards that strengthen the rules
on advertising and the disclosure of commercial influence on commercial
radio programs.

'The new standards begin 1 May and reflect the ACMA's recent decision to
continue regulating both commercial influence in current affairs programs
and advertising on commercial radio,' said ACMA Chairman, Chris Chapman.

The standards were developed following the ACMA's review and extensive
consultation with industry and the public seeking comment on the proposed
reforms.

'This reform package strengthens protections for listeners while at the same time reducing the regulatory burden on industry,' Mr Chapman said.

(Emma Rossi, Media Manager, ACMA)

It's to the Holyland Contest

21st time in a row, yes its the annual Holyland Contest.

Each year, more radio amateurs from all continents and countries world wide, participate in this extraordinary contest. Each one hopes to add some new squares to his existing collection in order to obtain the most exquisite Award. Therefore, it is with the greatest pleasure that, we announce the Holyland Contest 2012, and invite all Radio Amateurs and Short Wave Listeners to participate.

This year's contest will start on Friday 20 and end on Saturday 21 April 2012 from 21.00 UTC until 21.00 UTC.

Special Trophies and New certificates will be issued to participating Radio Amateurs and SWL's for different classes and modes of operation. Mark 4ZOX contest manager says " We are happy to announce that last years, digital modes were a huge success as well, and will continue with this mode in the present contest. As usual, we invite, the entire Amateur Radio Community to be on the bands, knowing full well, that propagation at times is not in our favor, nevertheless we will demonstrate and exercise, the spirit of friendship between all Radio Amateurs.

Thanking you for your cooperation, see you in the "contest".

Speaking of contests... The Trans Tasman.

Don't believe all you read on our front page news this week.

NO the date was NOT incorrect, BUT it had has changed.

SO YES it has been wrong of late on this news and even AR Magazine had a different date again.

BUT thae date we had been broadcasting had been supplied prior to a new contest manager taking over from Bruce Renn.

Felix will have more on this, plus the NEW date and much changed rules later.

wHO PLAYS HAM RADIO

tHE DXCC Country/Entity Report ISSUED THIS WEEK shows that acccording to the Amateur Radio Cluster Network, for the week of Sunday, 11 through Sunday, 18 March there were 226 countries active!

Not a bad roll up!!!

Were you on RF?

IF NOT WHY NOT!

What use is an F-call?

Recently I had the opportunity to setup my radio in the bush. Having been around the metropolitan area for most of my Amateur Life to-date, that was a whole new, and I might say, very positive experience.
Laying out radials
across the landscape was a challenge and having set-up against the corner of the veranda of the house where I was staying meant that I could only put them out in 270 degrees, the owner frowning on the notion of running 12 meter radials through the house for some reason.

The silence was amazing, no man-made noise, no clicking or buzzing from nearby appliances, overall worth the effort!

Honesty requires me to point out
that the local atmospherics conspired to actually making contacts on 80 and 40 meters nigh-on impossible. At the time I was unable to determine what caused the problem and research since then indicated all manner of possible causes, ranging from background cosmic noise to the LCD TV in the next room with several other options in between. Armed with that knowledge I'll spend some effort hunting next time around.

I can recommend that you pick up your radio once in a while, put it in your preferred mode of transport and place yourself in another location to experience other conditions. It's a learning opportunity every time.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Birthplace of radio becomes a city

Chelmsford, acknowledged as the birthplace of radio and home to the Marconi Company for many years, is one of three new cities created to mark our Queen's Diamond Jubilee.

This year also marks the 100th anniversary of the establishment by Marconi of the first purpose built radio factory in New Street, Chelmsford in 1912. New Street is marked with a blue plaque noting the historic significance.

AMSAT-NA RECEIVES OKJ TO RE-DISTRIBUTE KEPS

AMSAT's Ray Hoad, WA5QGD has announced that the organizations request to re-distribute US Air Force Space Command Keplerian elements from SpaceTrack has been approved for the period April 1, 2012 to April 1, 2013.

EXTRA-GALACTIC MILESTONE FOR SOUTH AFRICA'S KAT-7 TELESCOPE

South Africa's KAT-7 telescope, a seven-dish array which is a precursor to the much larger MeerKAT telescope in the Karoo and to the Square Kilometre Array, has reached another major milestone by observing the radio emission from the neutral hydrogen gas (HI) in a nearby galaxy. Hydrogen gas emits radio emission in a spectral line at a very specific frequency of 1420 MHz.

The astronomers pointed the telescope towards a galaxy called NGC 3 109 - a small spiral galaxy, about 4,3 million light-years away from Earth, located in the constellation of Hydra. The observation allowed them to see the HI radio emission of this galaxy, as well as to see how this galaxy is moving. Where the gas is moving towards us, the frequency of the spectral line is Doppler-shifted upwards; where the gas is moving away, the frequency is shifted down. In this way, astronomers can map the way in which all of the gas in the galaxy is moving.

International effort at sea gets UT1FG/MM back on satellites

John, K8YSE shared an international amateur radio goodwill success story in getting Captain Yuri Bodrov, UT1FG/MM back on the air after a power supply failure at sea.

UT1FG/MM was enroute aboard his cargo ship from a Pacific port in Nicaragua bound for Montreal Canada via the Panama Canal and into the Gulf of Mexico. Yuri, an avid 6 meter and satellite operator, reported that his 12 volt power supply had failed shortly after leaving port.

John wrote, "The bad news was relayed amongst those of us who had been following Yuri and working him in wet grids as he traveled. Brainstorming started with ideas tossed around via emails. One idea was to buy a power supply and ship it Fedex to Yuri's agent in Panama and hope it got there in time but Yuri felt that there would not be enough time for that to happen. We only had a few days."

Searching with Google and QRZ achieved contact with Captain Manolis Joannou, HP1CQ, also a sea captain and president of the Panama Canal Amateur Radio Association. Manolis was able to find a power supply that could operate off the 220 VAC ship mains and provide 12 volts to Yuri's IC-706 radio.

Captain Manolis made his way via a motor launch to Yuri's ship and hand delivered the new power supply. The two Captains spent an hour together before parting. Yuri was back on the air, working satellites from the Gulf of Mexico.

For a full story, complete with photos visit:
http://www.papays.com/sat/power/ut1fgpanama.html

==========

NEWS FROM ARNEWSLINE USA

HAM RADIO AND SOCIAL NETWORKS RESPOND TO MEXICO EARTHQUAKE

Amateur radio operators and the social media have responded in the wake of an earthquake that hit Southwest Mexico on March 20th. Bill Pasternak, WA6ITF, is in the newsroom with what we know so far:

What has been described as a powerful and prolonged earthquake rocked parts of Mexico on Tuesday, March 20th. The 7.6 magnitude temblor near the Pacific Coast resort town

of Acapulco. According to news reports, some homes were toppled near the quakes epicenter. Electricity and telephone communications was lost for a time. But despite the quake's power, Mexico's President Felipe Calderon and officials across the country said that there were no reports of serious injuries.

While there was some damage to the nation's internal communications infrastructure, Mexico's connection with the outside world for the most part remained unscathed. So far nothing has been heard about activation of any domestic Mexican ham radio emergency group. As we go to air, Sunday 25, the only international ham radio operation we have heard about is a group called the International Radio Emergency Support Coalition. IRESC President, Urcun Canel, TA0U, in Istanbul, Turkey worked with about 8 or 9 hams in Mexico passing early damage assessment reports to the European continent. Some of this communications audio was posted to Facebook:

Actuality audio communications. Hear it by downloading the MP3 audio file of this newscast at www.wia.org.au

You can hear the entire communications session at tinyurl.com/iresc-mexico-quake. But the real story in this case is the response by the people in the affected areas.

While telephone and cellphone service was jammed as is the case after events like this, broadband connections were still open and quite useful. Anyone watching or listening to broadcast news reports often heard tweets from residents of the quake hit area being quoted as news sources and giving short eye-witness assessments via Twitter.

Also, broadcast news organizations world-wide were asking people with relatives in the quake zone to call in or post to the stations website the latest news they might have. In other words, news organizations were literally handling health and welfare traffic that until a year or two ago was primarily the domain of radio amateurs involved in emergency communications.

Quite a change from day's gone bye.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

BAD BATTERIES MAY HAVE CAUSED BLT-28 FAILURE

Failure of the batteries that powered the ham radio payload of a high altitude balloon that was designed to float from Texas to China seems the likely cause of a total communications failure with the near space project. Amateur Radio Newsline's Heather Butera-Howell, K-B-3-T-Zed-D,

is here with the rest of the story:

The South Texas Balloon Launch Team lofted the high altitude scientific balloon experiment known as BLT-28 on February 11th from near Katy, Texas. The balloon was supposed to rise to over 100,000 feet and float for several days and hopefully reach its target of Nanjing, China. But as reported here on Newsline, contact was lost with the balloons APRS tracker just south of the Louisiana coast at an altitude of 45,763 feet.

Andrew MacAllister, W5ACM, is part of the group that launched BLT-28.

W5ACM notes that the power supply was made up of commercial 1.5 volt lithium cells. According to post flight experiments, MacAllister says that several of the same type of batteries were put directly on some dry ice where they went from 1.5 volts down to two tenths of a volt. And when warmed up, they did not return to normal output.

For the amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD,near Pittsburg, PA.

BILL BEFORE CONGRESS TO LET ASTRONAUTS KEEP SPACE SOUVENIRS

A dispute between NASA and some former astronauts over ownership of space artifacts has led to a bill in Congress that would give the Mercury, Gemini and Apollo astronauts "full ownership rights." This, to items such as checklists and personal logs from their missions. Amateur Radio Newsline's Don Wilbanks, AE5DW, has the rest of the story:

Known as H.R. 4158 the proposed legislation grows out of an effort last year by Apollo 13 Commander Jim Lovell to sell the lunar module activation checklist that had been used to convert the moon lander into a space lifeboat on the periled 1970 Apollo 13 mission. The sale brought record-setting $388,375 but it was put on hold after the National Aeronautics and Space Administration demanded proof that the former astronaut owned the item.

Now comes H.R. 4158 that was introduced by Representative Ralph Hall of Texas. Hall is the chairman of the House Science, Space and Technology Committee. He measures co-sponsor was Representative Eddie Bernice Johnson, also of Texas. It has since amassed an additional fifteen co-sponsors.

In a letter to heir congressional colleagues the two key sponsors wrote that the legislation would allow the first generation of astronauts to retain spaceflight artifacts that have been in their possession. In many cases for more than 40 years.

Under the proposed measure, astronauts from the Mercury, Gemini and Apollo programs would be allowed to keep items such as personal logs and checklists. The only thing off limits would be rock samples gathered on those early lunar missions. The so-called “Moon Rocks.”

After meeting with Lovell and several other former astronauts last month, NASA Administrator Charles Bolden said that these are American heroes. He called them fellow astronauts and personal friends who have acted in good faith. As such, Bolden says that they are committed to working together to find the right policy and legal paths forward to address outstanding ownership questions.

H.R. 4158 has bi-partisan support and is expected to make it all the way through the Congressional rule making process.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

This was not the first time that NASA has challenged the sale by an astronaut of a piece of space memorabilia. In 2010, NASA challenged Apollo 14 astronaut Edgar Mitchell's attempt to sell a camera he took to the moon. Mitchell eventually agreed to donate the camera to the Smithsonian's National Air and Space Museum.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

WW FISTS TITANIC SPRINT April 15
VK/ZL AM/CW on ANZAC DAY April 25
VK/ZL Trans Tasman Contest 80metres Phone May 12
VK Shires Contest June 9-10
ZL NZART Memorial Contest July First full weekend
VK/ZL Trans Tasman Contest 80+160metres July 21
VK Remembrance Day Contest August 11-12
WW International Lighthouse Lightship Wknd August 18-19

The VK-trans/Tasman contest will run this year as two contest:

The 80m Phone contest on 12 May, and

The 80m and 160m Combined contest on 21 July.

The Combined contest includes categories for:

- 160m phone,
- 80m CW,
- CW on both bands,
- Digital modes on both bands, and
- various combinations of these, including
- an overall category for both bands and all modes except 80m phone.

Rules can be found on the VK/Trans-Tasman contest page on WIA.ORG.AU
This is now the primary website for both of the 2012 contests.

The ever popular 80m phone contest remains much the same, with the
most significant changes being a simplification of the group bonus
rule, where groups can now be made from any SIX call areas of VK and
ZL combined. See the rules for details.

Combining 160m phone and the two CW and digital contests on the one
night should provide plenty of activity for all interests, and allow
clubs to set up multi-multi stations for that big effort!

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

HERE WE GO AGAIN - OR NOT

PLANNED MALI DXPEDITION ON HOLD DUE TO POLITICAL UNREST

Some news in the world of DX. This with word that
YET ANOTHER planned DX operation being put on indefinite hold.

Two weeks ago members of the "Italian Dxpedition
Team" announced that they were planning to be
active as TZ5T from Mali between April 12th to
the 27th. However, their Pilot station Art
Lorenzo, IK7JWY, has now issued a statement that
the situation of civil war in Mali between the
government and Tuareg insurgents is
worsening. Because of this and other concerns
Mali authorities will not issue licenses to radio
amateurs who may be targeted because of radio equipment.

For this reason the DXpedition has been postponed
until a yet to be determined later date. For
updates please check in regularly at www (dot)
i2ysb (dot) com on the World-Wide-Web.

(SOURCED IN PART TO ARNEWSLINE)

The current XW1A and XW◆ZJZ operations from Laos have been approved for DXCC credit. Bill Moore, NC1L, who heads up the DXCC Desk at ARRL headquarters made the approval official on Tuesday, March 13th.

Down the road a bit comes word that DK9FN will once again return to Temotu
Province, active as H40FN between this December 22nd and January 7th of 2013.
QSL H40FN via HA8DD.

F4CYZ iS operational from Morocco as CN2YZ through years end. His activity will be from the city of Tangier especially on the weekends. The Mediterraneo DX Club is supporting his activities and is also providing a Web site with a log-check.
Its in cyberspace at www.mdxc.org/cn2yz

San Francisco Amateur Radio Club will be holding a Special Event Station - W6G - to celebrate the 75th Anniversary of the Golden Gate Bridge on May 26, 2012 at 2000z to May 27, 2012 at 2200z
Details on www.sfarc.org.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

BUOYS ON 10 METERS

The source of some mysterious weak signals on 29.684 MHz with an 81.9 Baud and 130 Hz shift have been located. According to the February IARU Region One newsletter, the signals came from the Spanish coastal area and were audible across all of Europe but only during band openings and only by directional antennas.

It turns out the source of transmissions by Datawell buoys. These buoys, produced in the Netherlands are used for measuring water temperatures and wave heights. They are designed to transmit with 75 milliwatts on frequencies between 27 and 40 MHz.

Dick Van Empelen, PA2GRU, of Heemstede in the Netherlands has since visited the Datawell Company and has informed them that the buoy transmissions on the amateur service 10 meter band are illegal. The operations chief promised to inform all Datawell offices about the situation.

MEDIA WATCH

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

GREECE TURNS OFF 11 MEDIUM WAVE TRANSMITTERS

The Administrative Board of the Greek Public Broadcaster has ordered the switch-off of eleven medium wave transmitters. This as a result of new austerity measures due to the financial situation being faced by that European nation. This leaves only nine medium wave transmitters with their respective Greek Public Radio programs in operation.

CELEBRATING MORSE CODE

New York's QSY Society Amateur Radio Club will be hosting a special event station at the Samuel F. B. Morse Estate at Locust Grove in the city of Poughkeepsie. This in celebration of his creation of the Morse Code in 1832. The operation will run from 8:30 a.m. to 1:30 p.m. Eastern Daylight Time on Saturday April 14th using the special event callsign K2QS. Transmissions will be centered on 7.034 on 40 meters and 14.034 MHz on 20. Hams making contact with K2QS will be eligible for a special commutative QSL card. QSL requests go to David Ruth at 48 Hoof Print Road, Millbrook, New York, 12545.

(KB2VJP VIA ARNEWSLINE)

WW SPECIAL INTEREST GROUPS --- Internet Linking of Repeaters

IRLP TOPIC CHANNELS INAUGURATED

The long-awaited Internet Radio Linking Project or IRLP Topic Channels have now gone live. IRLP-users are now able to log onto reflector channels allocated for interests ranging from DX'ing to music, media, history and many others.

For those not aware, the Internet Radio Linking Project was the result of research and development by Dave Cameron, VE7LTD, back in 1998. This as a way of using the Internet to interconnect repeaters world-wide. With the advent of IRLP Topic Channels the concept has developed into a global discussion real-time forum on almost any topic of interest to those signed on.

For up-to-date information on the IRLP Topic Channels please visit www.irlptopics.net To locate an IRLP node near you go to status.irlp.net on the world-wide-web.

WW SPECIAL INTEREST GROUPS --- ILLW

ILLW registrations ahead of time

The entries to this year?s International Lighthouse and Lightship Weekend in August are slightly ahead of expectation, although only 160 have registered and half the countries are so so far represented.

Australia remains in the lead with 35 registrations just ahead of Germany on 33, followed by the USA on 21 and England 14.

Others come from Argentina, Brazil, Chile, Curacao, Denmark, Finland, France, Honduras, Ireland, Isle of Man, Italy, Netherlands, New Zealand, Northern Ireland, Polland, Portugal, Puerto Rico, Scotland, South Africa, Sweden and Wales.

The next months are expected to see a lot more seafearing nations added to this fun event.

To enter do visit the website at illw.net for the 15th annual International Lighthouse and Lightship Weekend held on August the 18th and 19th.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 17th-March, through Friday, 23rd-March there were 229 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S0, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2O, ENGLAND & WALES (Special Event 2012 London Olympic & Paralympic Games). Look for the following special event callsigns to be activated to celebrate the 2012 London Olympic and Paralympic Games:
2O12L - Members of Cray Valley Radio Society (CVRS) will activate the London, England, station through the duration of the Games, and will be located at the historic Eltham Palace, southeast London. Activity will be on 160-2 meters using all modes. More information is available on the Web at: http://www.2O12L.com
QSL via G4WNF. Contact the Press Officer, John Warburton, G4IRN at: press@2o12l.com

2O12W - Members of Barry Amateur Radio Society (BARS) will activate the Welsh station from Whitmore Bay, Barry Island, Vale of Glamorgan, Wales, and will also be active on all bands (160m-23cms) and on all modes, including SSTV and satellite. More information is available on Web at: http://www.2O12W.com
Contact station manager Glyn Jones, GW0ANA, at: glyndxis@talktalk.net

For updates, both operations will have Twitter and Facebook pages. See above Web pages for information. A special QSL will be available. John, G4IRN, Publicity Officer for Project Echo, states [edited], "Amateur radio operators everywhere will be able to share in the Olympic experience by making contact with the stations and to exchange greetings messages with visitors and Games participants who visit the station --- the team's aim is to make a contact with as many of the Games participating countries as possible..... The project aims to leave a lasting legacy by encouraging visitors to learn more about radio communications and the social, career and recreational benefits that it brings. Of course, visiting hams will be made very welcome at the stations."

3V, TUNISIA. Operators Hrane/YT1AD, Milos/YT3M, Zlatko/Z30A and Ash/KF5EYY will be active as 3V8BB during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single entry. QSL via YT1AD.

4J, AZERBAIJAN. Members of the "Safari DX Activators" club will once again be active as 4J0SFR and 4J5T from the Natural Reserve Shahdag (4JFF-019) [new one] between March 23-24th. Activity will be SSB using a Kenwood TS-450 and Windom antenna. QSL both callsigns via 4J5T.

5D, MOROCCO. Operators Stefano/IK2QEI and Matteo/IK2SGC will be active with the special callsign 5D5A from CN3A contest station during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single entry. QSL via IV3ZXQ or LoTW.

6W, SENEGAL. Tony, F8ATS, will be active as F8ATS/6W from Le-Calao, La Somone, between March 30th and April 7th. Activity will be holiday style probably on all HF bands. QSL via the Bureau is preferred.

9M6, SPRATLY. Pekka, OH2YY, who was recently active as 9M6AAC from the Hillview Gardens club station in East Malaysia, will be active as 9M6/OH2YY from Pulau Layang Layang (Swallow Reefs - AS-051), Spratly Islands, between Friday morning March 23rd and Monday evening, March 26th. On Friday and

Monday, Pekka informs OPDX that he will be on 40-10 meters SSB, focusing 17 and 12 meters, and on Saturday & Sunday participating in the CQWW WPX SSB Contest. QSL via his home callsign to: Pekka Ahlqvist, Vapaalanpolku 8B, 01650 Vantaa, Finland (or by the SRAL Bureau).

A2, BOTSWANA. Operators Frosty/K5LBU (A25CF), Keith/VE7MID (A25KW), Don/VE7DS (A25DS) and Joel/N5JR (A25JR) will continue to be active from the Lotsane Safari Lodge until March 27th. Remember the group plans to be active in the CQWW WPX SSB Contest (March 24-25th) as A25HQ. They will have about 3 rigs and a log periodic plus wire antenna covering 160 meters and up. It was also mentioned that they would use an inverted L with amp and a beverage antenna. K5LBU will handle QSL cards for A25HQ and A25CF. QSL all others via their home callsigns direct.

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW WPX SSB Contest (March 24-25th) as a Multi-? entry. QSL via LoTW or CQ9K. Operators mentioned are: Joe/CT3BD, Luis/CT3DL, Joe/CT3DZ, Luis/CT3EE, Duarte/CT3EN, Miguel/CT3IA, Tiago/CT3KU, Jose/CT3KY, Jose/CT3NT, Jose/CT1EEB, Tony/CT1FFU and Nuno/CT1FJO.

DAYTON HAMVENTION (Press Release - DX Dinner). [edited] "The SouthWest Ohio DX Association (SWODXA) is pleased to announce that Don Greenbaum, N1DG, will be the speaker for the DX Dinner on Friday, May 18th, at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409. Don is well known to most DXers. He first became licensed as WN2DND at age 11 in 1962. In 1996 he changed his call to N1DG. He has been either a pilot, a QSL manager, or a team member on many DX trips. He was inducted into the CQ Magazine DX Hall of Fame in 2006, and is a founding member of the CW Operators Club. He is also the Treasurer and a Director of the Northern California DX Foundation. Don's work, which can involve camel racing as well as auto racing, takes him to many interesting places around the world. Along with his radio experiences, he should provide an interesting, humorous, entertaining presentation. There will be a cash bar starting at 5:30 P.M., with dinner served at 7:00 P.M. The program will also include the DXpedition of the Year award, the announcement of the CQ Hall of Fame inductee, and the presentation of many exciting door prizes. For ticket information, and a list of the door prizes, go to <http://www.swodxa.org>. Dinner ticket sales have been brisk. Seating arrangements will be finalized by April 15th, so ticket orders should be in soon to ensure seating requests can be honored. We look forward to an excellent dinner with great fellowship, and hope you join us. For more information and to order dinner tickets, visit <http://www.swodxa.org>.

DL1630, GERMANY (Special Event/Contest Op). Look for the special event station DL1630Y to be active in the CQWW WPX SSB Contest (March 24-25th) and between May 1st and July 31st. During the WPX contest, operator Johannes, DK8JB, will be active as a Single-Op/Low-Power entry. QSL via the Bureau or eQSL. Activity is to celebrate the 30th anniversary of the DARC's OV Duisburg-Huckingen (DOK L16) radio club. For more details, see: http://www.darc.de/l16

E21, THAILAND. Champ, E21EIC, will be active during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band/Low-Power entry. JA stations QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at: http://www.e21eic.net

E51, SOUTH COOK ISLANDS (Reminder). By the time you read this, the E51M DXpedition team, which is going to North Cook Islands, should be active as E51EWP from Rarotonga, South Cook Islands, between now and March 26th, and again between April 11-14th. Activity will be on all bands, including 60m, using CW, SSB, but with an emphasis on RTTY because there is a high demand for RTTY. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. For more details, see the E51M Web page at: http://www.manihiki2012.de

E51, NORTH COOK ISLANDS (Reminder). Operators (and members of the 3D20CR) Jan/DJ8NK, Uwe/DJ9HX, Werner/DJ9KH, Hawa/DK9KX, Hans/DL6JGN, Ron/PA3EWP and Leszek/SP3DOI will be active as E51M from Manihiki (OC-014) between March 28th and April 10th. Activity will be on 160-6 meters using CW, SSB and RTTY. All equipment, except the transceivers, are already on Manihiki. In all, they have eleven vertical antennas and a small 4 element beam for 6m. They plan to set up 5 stations using K3's with 500W amps. QSL via DJ8NK, direct or by the Bureau. Online QSL Requests Service (OQRS) for the Bureau and direct cards can be made after April 20th. The E51M Web page is available at: http://www.manihiki2012.de/index.html

EB8, CANARY ISLANDS. Operators Pekka/EA8AH, Juan/EA8CAC, Manuel/EA8ZS, Sal/EA5DY, Toivo/ES2RR, Olli/EA4BQ/OH0XX, Oscar/EA1DR, Jaakko/OH1MA, Jussi-Pekka/OH6RX and Carlo/IK1HJS will be active as EB8AH from Magic Mountain on Gran Canaria Island (AF-004, DIE S-005, WLOTA L 0969) during the CQWW WPX SSB Contest (March 24-25th) as a Multi/Multi entry. QSL via LoTW.

FM, MARTINIQUE. Gil, FM5FJ, will be active during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via KU9C.

FP, ST. PIERRE & MIQUELON. Eric, KV1J, will once again be operating from the Island of Miquelon (NA-032, DIFO FP-002 WLOTA 1417, Grid GN17) as FP/KV1J between July 10-17th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK31 (but primarily CW, SSB and RTTY). He will generally be on the highest frequency band that is open, and he may try 6 meters if there is an indications of openings. Also, look for him on the satel-lites, weather permitting. Eric will also be in the IARU HF Contest (July 14-15th) as a Single-Op/All-Band/Mixed-Mode/High-Power entry. QSL via KV1J, direct or by the Bureau and also LoTW. For more details and updates, check out his Web page at: http://www.kv1j.com/fp/July12.html

II9, ITALY (Operator Corrections). The II9K Contest Team will be active from Sicily (EU-025, IIA SC-001, MIA MI-107, WLOTA 1362) during the CQWW WPX SSB Contest (March 24-25th) as a Multi-Single/High-Power entry. They will be using a new antenna setup improvement for the contest. Operators mentioned are Giuseppe/IT9HBT, Girolamo/IT9GNG, Rino/IT9FXY, Vincenzo/

IT9ECQ, Mike/IF9ZWA, Sal/IW9FRA, Domenico/IW9GTD, Davide/IW9HII and
Dario/IT9RDZ. QSL via IT9HBT.

IOTA NEWS.....
AS-175. (Update) Prasad, VU2PTT, informs OPDX on March 21st: "The
AT2DW team on Bet Shankhodhar Island has over 4000 QSOs and
should have their amp running by now. The amp could not be
used earlier due to school children camping close to the
vertical antennas who have now departed and the team did not
want to risk any accident. The amp will hopefully help them
to work the more distant areas especially NA. They will be
actively looking for more QSOs to NA and SA when openings are
noted to give this new one to IOTA chasers there. The team has
been active on all bands 80m through 10m and logs are being
uploaded to Club Log whenever a reliable Internet connection
is available. See <http://www.clublog.org/charts/?c�2DW> for
the searchable log, statistics and other log information." The
expedition Web site is at: http://www.dxcoffee.com/at2dw

EU-146. Marcel, PD5MVH, will be active as homecall/p from Goerree
Overflakkee Island (WLOTA 3501) between May 19th and June
2nd. Activity will be mainly on 14245 and 28555 kHZ, and
as well as 144.300 MHz. QSL via his home callsign, direct
or by the DARC Bureau.

SA-039. Members of the Radio Club Uruguayo and the Uruguay DX Group
will be doing a joint operation and be active as CW5GI from
Gorriti Island on March 30-31st and April 1st. This will be
only the 2nd operation from this island after the 1st one,
CW4R, a week ago. Operators mentioned are Jorge/CX1SI, Gustavo/
CX2AM, Wilson/CX2RU, Humberto/CX3AN, Francisco/CX3BV, Gustavo/
CX3CE, Luis/CX4AAJ, Mario/CX4CR, Ghis/CX5DNT (ON5NT), Jorge/
CX6VM, Carlos/CX7CO and Rainer/CX8FB. QSL via ON5NT.

MJ, JERSEY. Kazu, JK3GAD, will be active as MJ0CFW from Jersey (EA-013) during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band/ Low-Power entry. QSL via LoTW or via M0CFW.

NH7, HAWAII. Operators "Yukon John"/KL7JR and XYL Claire/WL7MY will once again be active from the Big Island (OC-019, HI-025S) between April 1-15th, and using the callsign NH7DX. Activity will be on 80-10 meters, and they are celebrating the 18th anniversary of the U.S. Islands awards program. QSL via KL7JR (QRZ.com address).

P4, ARUBA (SA-036). Andy, AE6Y, will once again be active as P49Y during the CQWW WPX SSB Contest (March 24-25th) as a Single-Op/All-Band entry. QSL via AE6Y or LoTW.

PY, BRAZIL (Also CX). Ghis, ON5NT, informs OPDX that he is "enjoying the nice weather in Porto Alegre, South Brazil, for the moment", but will be flying to Montevideo, Uruguay, on March 27th, to join the DXpedition team to Gorriti Island (SA-039) for a three day operation (See IOTA NEWS above). Look for Ghis to possibly be active as PY3/CX5DNT from Porto Alegre until April 14th. QSL via ON5NT. ADDED NOTE: Prior to the IOTA operation, ON5NT will be active as CX5DNT between March 27-29th. QSL via ON5NT

JX0O QSL STATUS (Update to OPDX.1045). Stan, SQ8X, reports that the QSL cards were expected to be delivered from his printing shop around Wed- nesday this past week. Once received, the QSL shipment will start. He states, "To compensate for the long time that operators have been waiting, I decided to redesign cards and to make it even more attractive. What kind of changes - let it be a small surprise."

PS0S ON LOTW. Cesar, PY2YP, announced this past week that he was able to obtain the 2000 PS0S, St. Peter & St. Paul Rocks, log from the operators and uploaded the log into the LoTW. He also stated, "I am

talking with a few other expeditioneers to the Rocks to have their logs and do the same. Stay tuned."

QSL RECEIVED VIA LoTW: 3B8MM, 7P8PB, CR6K, CU6AY, CX4ACH, E76C, EF8R, EI80IRTS, EU5A, G4SOF, HB9CVQ, HH2/HB9AMO, HI8PLE/7, J38A, JR7WFC, JT5DX, KH2L, LA5VSA, LY3M, M6T, PR5B, PT7ZC, RA6MQ, RU3GF, RZ6BS, ST2AR, SV4FFK, T96C, TG7/NC2N, TK4LS, US6EX, V44KAI, VP2EC, VP5/WA0MHJ, YU1FW, ZD7XF, ZF2AG/ZF8, ZF2LC and ZL7/VO1AU

QSLS RECEIVED VIA MAIL: A31IO, CN2R, FK8CP, FR5FD, HV50VR, JY4NE, PP5/KH0WF, T88XC, UA3KW, VP2MTL, VVP6T, P8DNT, VU2PAI, ZD7XF and ZV5AJT

QSLS RECEIVED VIA THE BUREAU: 5T5BV, 8P9NX, CT1BYK, DB3KE, DL1JK, DO8SAB, DU7/DK9SC, EA1AUS, EA1BPA, EA8EU, EB3JT, ES0IC, IT9CWA, IW1GJH, IZ3LEF, JA0HNN, JA2ACI, JA2GSD, JA6ATL, JA8BNP, JE2TLZ, JF1PTX, JH3RKB, JH3TXF, JI3OGI, OM3BC, ON5PO, PA3GON/LX, PA3GWH, RK3DXW, SP1DMD, SP1MWK, SP3CUG, SP7FFY, SQ1EIX, UA6JGG, UR2MO, UR5IFP, UR5MED, UT5EAM, UU7JN, WT6X, YJ0MM, ZL4AS and ZP6CW

ST0R VIDEO. Now available on the International DX Association, Inc., (INDEXA) Web page is a 40 minute video on the ST0R DXpedition at: http://www.indexa.org/dx_videos.html

TC3, TURKEY. Operators Can/TA3GO, Hakan/TA3HM and Emin/TA2FE will be active as TC3C from Izmir during the CQWW WPX SSB Contest (March 24-25th) as Multi-One entry. QSL via TA3HM.

TO7, MAYOTTE. Hartwig, DL7BC, has been active from Mayotte (AF-027) since March 21st. He was originally active as FH/DL7BC, but as of March 23rd, he began using the callsign TO7BC (through April 6th). Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 80-10 meters plus participation in CQWW WPX SSB Contest. QSL via his home callsign, direct or by the Bureau. For more details, visit it his Web site at: http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

V7, MARSHALL ISLANDS (Update OPDX.1054). Jim, K4FW, informs OPDX that there has been another delay for his trip to Kwajalein Island (OC-028) due to the launch window being moved towards the end of April or end of May/early June. Jim works for the Orbital Sciences Corporation and works with the Pegasus launch vehicle. More specifically, as the Launch Panel Operator (LPO) and is part of the flight crew on the Orbital's L-1011.

ZQ3, GIBRALTAR. Operators/brothers Mike/ZB3M and Ed/ZB2ER will activate the special callsigns ZQ3M and ZQ2ER, respectively, from Gibraltar between May 5th and June 10th. Activity is to celebrate the Diamond Jubilee of Queen Elizabeth II. QSL via ZB3M direct only. NO BUREAU or NO ELECTRONIC QSLs.

The following stations are expected to be active in the
CQWW WPX SSB Contest (March 24-25th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2012 CQWW WPX SSB Contest.
For a more detailed listing (and up-to-date changes/corrections) in HTML
format, please visit Bill's Web page at:

SOTA EVENT: Activation of Pinnacle Mountain on Saturday 24 March

Posted: 22 Mar 2012 06:10 PM PDT
http://forums.qrz.com/showthread.php?339189-SOTA-EVENT-Activation-of-Pinnacle-Mountain-on-Saturday-24-March&goto=newpost

On march 24, 2012 the cabot stars club will be sponsoring the first

ever summits on the air activation of pinnacle mountain using the club

call, w5str. Operators in the central arkansas area, and in fact

worldwide will be able to hear the stars club sota team on the both

phone and digital modes. The following frequencies will be in use

plus or minus a few khz as necessary: 2m fm 146.520 monitored

continuously 2m ssb 144.200 15:00z-16:00z 18:00z-19:00z 10m 28.450 15m
21.325

17m 18.125 20m 14.325 40m 7.215 operations will take place on whichever

of these hf bands presents the best propagation. Following standard

convention, our 2m single side band operator will point our beam

north at the top of the hour, east at quarter after, south at half

past and so on. All amateur radio operators are encouraged to try

to make contact with the team by whichever band/mode they wish. You

can use these contacts to gain points toward a summits on the air

award certificate or trophy. Find out more about the sota awards

rules at www.sota.org.uk.

Trans-Atlantic Amateur Radio on 7, 10 and 144 MHz

Posted: 23 Mar 2012 02:24 AM PDT
http://forums.qrz.com/showthread.php?339226-Trans-Atlantic-Amateur-Radio-on-7-10-and-144-MHz&goto=newpost

Trans-Atlantic Amateur Radio on 7, 10 and 144 MHz

The Project Blue Horizon 6 high-altitude transatlantic balloon flight is scheduled for Friday, March 23 at 2300 EST (0300 Saturday UT) from Owego, NY transmitting on 7.1023 and 10.1466 MHz CW and 144.390 MHz FM APRS.

The Project Blue Horizon team is attempting to break current Amateur Radio high-altitude balloon record for duration and duration (57 hours 2 minutes). The team currently estimate a 4400 mile flight spanning 100 hours.

Please see http://www.projectbluehorizon.com/ for detailed flight path information.

The payload will be carried beneath a 54,000 cubic foot capacity helium-filled balloon cruising between 85,000 and 100,000 feet.

During the flight amateurs worldwide are encouraged to monitor the N2XE CW telemetry beacons at 7.1023 and 10.1466 MHz. The balloon is also equipped with an APRS beacon at 144.39 MHz using the call sign KD2AUD.

Amateurs can send reports via e-mail to pbh18.data@gmail.com or manually enter received data points at http://www.projectbluehorizon.com/

More information about the program is at the Project Blue Horizon website. Launch and flight updates will also be available on Twitter @PBHVI

NOTE: If you or anyone else knows a Ham operator in the Azores who can communicate with the payload please send the contact information to pbh18.data@gmail.com Blue Horizon will require communications with the payload as it approaches the Azores.

http://forums.qrz.com/showthread.php?339223-ILLW-registrations-ahead-of-time&goto=newpost

ILLW registrations ahead of time

The entries to this year's International Lighthouse and Lightship Weekend in August are slightly ahead of expectation, although only 160 have registered and half the countries are so so far represented.

Australia remains in the lead with 35 registrations just ahead of Germany on 33, followed by the USA on 21 and England 14.

Others come from Argentina, Brazil, Chile, Curacao, Denmark, Finland, France, Honduras, Ireland, Isle of Man, Italy, Netherlands, New Zealand, Northern Ireland, Poland, Portugal, Puerto Rico, Scotland, South Africa, Sweden and Wales.

The next months ahead are expected to see a lot more sea-going nations added to this fun event.

To enter do visit the website at illw.net for the 15th annual International Lighthouse and Lightship Weekend held on August the 18th and 19th.

Apex School Phones NASA, 250 Miles Up:

Posted: 22 Mar 2012 05:27 PM PDT
http://www.eham.net/articles/27968

APEX -- For about 30 minutes more than 600 young students sat cross-legged with their eyes glued forward at Salem Elementary School's gymnasium quietly listening. It wasn't a movie that completely captured their attention, but a black handset and a satellite image. On the other end of the handset was NASA Astronaut Don Pettit and he was calling from space. Pettit and two other astronauts are living on the International Space Station for a mission that ends in May. At the time of the call- made 10 a.m. Wednesday via amateur radio-Pettit and his fellow crewmembers were traveling about 250 miles above Earth over the Indian Ocean near Australia at 17,500 miles per hour. The students created and asked their own questions about everything from space hygiene to scientific experiments.

//
Civic-Minded East Contra Costa Amateur Radio Club Operators Ham It Up:

Posted: 22 Mar 2012 05:24 PM PDT
http://www.eham.net/articles/27967

They don't play Words With Friends, but some have friends across the world. Their electronic accessories don't begin with "i." In the event of an actual emergency, you would be glad to have one for a neighbor. Ham radio operators have always been a subset of society, but with digital devices making everyone a communications guru of sorts, it's easy to forget this small segment of the population. Yet, for the civic-minded sort with a hankering to connect and serve, there's a local source for would-be radio folk. East County has an enclave of hams with a vivid social life. Delta Amateur Radio Club members meet in person at 7 p.m. the last Thursday of every month at the Pittsburg Environmental Center, 2581 Harbor St. They come together to swap stories and equipment and technical tips. Newcomers are welcome. "If you think you might like to become a ham, come to a meeting!" club president Mary-Jane Walker insisted. Or maybe take in a breakfast with members of the larger county club, club treasurer Drew Hanson said. The perception that amateur radio operators are shut-ins is untrue. Walker started hamming it up 30 years ago. Newly widowed, her daughter and son-in-law encouraged her to join them in their hobby. "I joined to meet people," Walker said. "I've made a lot of friends over the years."

//
Technology And Storm Spotter Training:

Posted: 22 Mar 2012 05:21 PM PDT
http://www.eham.net/articles/27966

Severe weather awareness week is upon us. Wednesday morning the emergency sirens were tested in the metro. But as we share our lives and storm stories through social media sites more and more, it's important to have a trained eye. George Bellairs has been tweeting long before Twitter even existed. "Communication has always been a two-way street," said Bellairs. "I've been a ham radio operator going on 17 years. I've been a storm spotter the same amount of time. Each season, you'll find Bellairs close to his ham radio. "The longer you're there the higher your skill level," said Bellairs. As a trained weather spotter, he relays severe weather conditions across Douglas County. "It's like being a trained driver on the streets. You have to know what you're doing to be observant," said Bellairs It's that kind of training that brought dozens to a spotter training class Wednesday night. "This is a great opportunity to get new information as far as the new technologies," said participant Travis Turner. "Now we have all this new technology that anybody and everybody can use," said Turner. He says what started as information coming solely from trained spotters on ham radio is now spreading to social media sites like Facebook and Twitter.

//
In High-Tech Age, Ham Radio Communication Has Advantages:

Posted: 22 Mar 2012 05:19 PM PDT
http://www.eham.net/articles/27965

He has to listen closely to hear through the static, but University of Pittsburgh student Geoff Wolf just barely can make out the strained beeps of Morse code emanating from somewhere in the south Asian country of Sri Lanka. Wolf of Harrisburg is a member of the Skyview Radio Society, an amateur ham radio group that draws members from throughout western Pennsylvania. Members meet at their station and clubhouse in New Kensington and broadcast both locally and throughout the world. "All you need is a radio, a wire and a power source," said Larry Kelley of Murrysville, one of about 80 society members. "People will get on and see how many folks throughout the world they can talk to." The society has been holding a series of classes this month for those interested in obtaining a first-level amateur radio license, classified as a technician license. Society radio officer Bob Bastone of East Deer said that while there are rocket scientists who are ham radio operators, "you don't have to be a rocket scientist to do it." In today's age of cellphones, the Internet and numerous other modes of communication, it might seem quaint to some that ham radio is still around. But ham operators have a distinct advantage over many forms of modern communication. Where cellphones, telephones, Internet-connected computers and even satellite phones must be routed through a variety of choke points and require electric power, ham radios can "go direct" and talk straight through to one another because each station is independent. That feature makes them indispensable from an

emergency-services standpoint.

Posted: 22 Mar 2012 11:51 AM PDT
http://www.eham.net/articles/27952

Tucson Amateur Packet Radio (TAPR) announces the opening of the "interest list" for the openHPSDR Hermes single-board Software Defined Radio. The Hermes interest list is used by TAPR to determine the number of Hermes boards to manufacture in the pending initial production run this spring.

//
New ARRL Membership Benefits Coming in June:

Posted: 22 Mar 2012 11:51 AM PDT
http://www.eham.net/articles/27951

The ARRL is excited to announce two new membership benefits that will be introduced in June 2012. In addition to the print copy of QST, all members will have access to an online digital edition of QST -- at no extra cost. You will be able to access QST from anywhere -- on nearly any computer, laptop, mobile device, smartphone and tablet (including Apple iPad, iPhone, iTouch and devices using the Android operating system). Members will also gain access to archived issues of QST from December 1915 to the present; previously, only issues through

2007 were available to members.

The Project Blue Horizon 6 high-altitude transatlantic balloon flight is
scheduled for Friday, March 23 at 2300 EST (0300 Saturday UT) from Owego,
NY transmitting on 7.1023 and 10.1466 MHz CW and 144.390 MHz FM APRS.

The Project Blue Horizon team is attempting to break current Amateur Radio
high-altitude balloon record for duration and duration (57 hours 2
minutes). The team currently estimate a 4400 mile flight spanning 100 hours.

Please see http://www.projectbluehorizon.com/ for detailed flight path
information.

The payload will be carried beneath a 54,000 cubic foot capacity
helium-filled balloon cruising between 85,000 and 100,000 feet.

During the flight amateurs worldwide are encouraged to monitor the N2XE CW
telemetry beacons at 7.1023 and 10.1466 MHz. The balloon is also equipped
with an APRS beacon at 144.39 MHz using the call sign KD2AUD.

Amateurs can send reports via e-mail to pbh18.data@gmail.com or manually
enter received data points at http://www.projectbluehorizon.com/

More information about the program is at the Project Blue Horizon website.
Launch and flight updates will also be available on Twitter @PBHVI

NOTE: If you or anyone else knows a Ham operator in the Azores who can communicate with the payload please send the contact information to pbh18.data@gmail.com Blue Horizon will require communications with the payload as it approaches the Azores.

http://forums.qrz.com/showthread.php?339223-ILLW-registrations-ahead-of-time&goto=newpost

ILLW registrations ahead of time

The entries to this year's International Lighthouse and Lightship Weekend in August are slightly ahead of expectation, although only 160 have registered and half the countries are so so far represented.

Australia remains in the lead with 35 registrations just ahead of Germany on 33, followed by the USA on 21 and England 14.

Others come from Argentina, Brazil, Chile, Curacao, Denmark, Finland, France, Honduras, Ireland, Isle of Man, Italy, Netherlands, New Zealand, Northern Ireland, Poland, Portugal, Puerto Rico, Scotland, South Africa, Sweden and Wales.

The next months ahead are expected to see a lot more sea-going nations added to this fun event.

To enter do visit the website at illw.net for the 15th annual International Lighthouse and Lightship Weekend held on August the 18th and 19th.

Jim Linton VK3PC

SARL NEWS - SUNDAY 25 MARCH 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

BOOK NOW FOR THE SARL NATIONAL CONVENTION

LEARN ABOUT SOFTWARE DEFINED RADIO

YOUR LICENCE FEE IS DUE NOW

IMPORTANT LICENSE INFORMATION

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

BOOK NOW FOR THE SARL NATIONAL CONVENTION

Have you booked for the 2012 SARL National Convention? If you have not, do it now. Here are some of the highlights. On Friday evening meet the locals and join an historical journey on "How SA's electronics industry started in Pinetown and the development of SSB in South Africa". On Saturday morning attend the SARL Annual General Meeting and on Saturday afternoon learn about how to build VHF/UHF antennas and get DXing with Log Book of the World. On Saturday evening is the awards dinner with a keynote address by Dr Andrew Collier of SANSA Space Sciences. On Sunday morning the convention is rounded off with a leisurely breakfast in the Japanese Gardens. Full details and a registration form can be found on www.sarl.org.za. Your hosts at the SARL National Convention are the committee and members of the Highway Amateur Radio Club.

SARL AGM DOCUMENTATION

The SARL AGM documentation is now available on www.sarl.org.za. The documents have also been mailed to members for whom the SARL does not have email addresses. Members with email addresses have received a mail and a link to the document. The SARL has received a fair number of undeliverable returns. If you did not receive an email about the AGM, please update the SARL records by sending your name, call sign, full postal address and email details to admin@sarl.org.za.

LEARN ABOUT SOFTWARE DEFINED RADIO

Learn about Software Defined Radio with the ABC of Soft Software Defined Radio just released by the ARRL. The 69 page soft cover book is an introductory guide to SDR and Digital Signal Processing (DSP) technologies. Written in a friendly style, it offers a straightforward look inside SDR and provides the foundation for those who want to understand the subject on a more fundamental level. As you read you will discover the basic principles of SDR, advantages to SDR technology and ways to utilise it in Amateur Radio - with the minimum of mathematics. It is available from the SA Amateur Radio Development Trust. Visit www.amateurradio.org.za and select books from the home page.

While talking about books the 2012 ARRL Handbook and the Antenna Books are still available by mail order. Both books are hard cover versions. Another new book available from the website is Basic Radio - Understanding the key building blocks, an ideal book for RAE student who wants to know a little more about receivers, transmitters and antennas.

YOUR LICENCE FEE IS DUE NOW

ICASA has started mailing license renewal notices. The license fee of R120 is due on 1 April 2012. You may also renew for five years at a reduced fee of R501. If you do not receive a renewal notice, the SARL recommends that you pay by using the license number on last year's invoice and your call sign. Also mail the payment notification plus your address to KMashile@icasa.org.za. It is essential that in all payments to ICASA you include your call sign as a payment reference. Also remember to send any postal and email address changes to admin@sarl.org.za

IMPORTANT LICENSE INFORMATION

Approximately 1 700 call signs have been marked by ICASA as "lapsed". This is as a result of the substantial cleanup that ICASA undertook during the last year. This is a significant number of lapsed callsigns and many Amateurs have sometimes unwittingly allowed their licences to lapse. You may well be affected. As an example there are 43 paid up members of the SARL who no longer have valid licences.

For more information, you are urged to visit www.sarl.org.za where you will find more information and what to do.

RTA DATES FOR 2012 ANNOUNCED

The SARL Radio Technology in Action symposium dates have been announced. This year's RTA programme will be of a more practical nature and is aimed at increasing your amateur radio experience. The programme will be finalised in the next two weeks, still giving you the opportunity to send in your suggestions and speakers proposal. Have you considered being a speaker at an RTA? Send your suggestions to rta@sarl.org.za.

The 2012 RTA dates are: 21 July Durban; 18 August Cape Town; 1 September Port Elizabeth; and 29 September Gauteng.

AMATEUR RADIO TODAY FREQUENCY CHANGE

>From Monday (tomorrow) the frequency of Amateur Radio Today will change. The 19:30 CAT transmission will be broadcast on 3 230 kHz. Reception reports are invited to artoday@sarl.org.za.

The Sunday transmission at 10:00 CAT will be on 17 570 and 7 205 kHz.

ICE GOAT 1 APRS BUOY GOES TO SEA OFF ALASKA COAST

A group of Oceanography and Aeronautical engineering students from the US Naval Academy have deployed a radio equipped ocean buoy rigged to monitor weather in the harsh conditions of the arctic. Named Ice Goat 1, the buoy was placed off the coast of Point Barrow, Alaska. Once the winter ice melts the buoy will begin its sea voyage.

In addition to its scientific monitoring gear, Ice Goat 1 carries an APRS beacon operating on 145,825 MHz. The position packets can be relayed via the International Space Station digipeater.

LONDON OLYMPIC COMMEMORATIVE STATIONS ANNOUNCED

Several special event call signs will be activated to celebrate the London 2012 Olympic and Paralympics Games. The London station, 2012L will be active through the duration of the games. It will be located at the historic Eltham Palace, south-east London and will operate on all modes on 160 through 2 metres. More information about it is on the web at www.2O12L.com.

The Welsh station 2O12W will be operational on all bands from 160 metres through 23 centimetres and all modes including SSTV and satellites. It will be located at Whitmore Bay, on Barry Island. More information on the web at www.2O12W.com.

2O12L and 2O12W will go on the air on July 27th. The Radio Society of Great Britain has been granted use of the games Inspire trademark for these stations. Special QSL cards will be available to all stations contacted.

CONTEST NEWS

SARL 80 METRE CLUB CONTEST, PHONE

The second contest in the series will be run on Wednesday 28 March starting at 17:30 UTC and ending at 18:30 UTC with phone activity

between 3 603 and 3 650 kHz and between 3 700 and 3 775 kHz. Single operator or multi-operator stations can participate. The exchange is an RS report and a consecutive serial number starting at 001. One point is earned per contact and log entries must be submitted by midnight on Wednesday 4 April to zs4bfn@netactive.co.za.

CONTESTS IN APRIL

In April, no less than three contests will take place, details appear in the Diary of Events.

SARL OFFICE CLOSED

Remember, the SARL office will be closed during March as Mariska Faasen is overseas on holiday visiting family. Between Henry Chamberlain and Francois Botha they will attend to emails and telephone messages. Please send emails to the usual address admin@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is dropping off now that huge sunspot 1 429 has rotated out of view of the Earth. It sure was fun while it lasted.

If you want to do your own frequency predictions the expected effective sunspot number for the week will be around 57.

All the bands from 20 to 10 m will provide lots of DX fun with even some 6 m openings possible.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

28 March - SARL 80 metre club contest, phone, 17:30 UTC - 18:30 UTC. 4 April - log entries for the SARL 80 metre club contest, phone to be in by midnight to zs4bfn@netactive.co.za. 5 April - SARL 80 m QSO Party 17:00 - 20:00 UTC. 6-9 April - Western Cape Antique Wireless Association Ekspo near Stanford, contact John, ZS1WJ, on 082 673 5337 for more information. 7 April - Autumn RaDAR Contest 12:00 to 18:00 UTC. 14 April the Autumn QRP Sprint 12:00 to 15:00 UTC. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON

THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Fritz, ZS6SF.

Thank you for listening, 73. /EX

Sussex Tech Becomes Radio Active; Amateur Radio, Electronics Expo April 21:

Posted: 23 Mar 2012 06:16 PM PDT
http://www.eham.net/articles/27970

Ham radio operators and electronics enthusiasts will gather at Sussex Technical High School in Georgetown Saturday, April 21, for the annual Amateur Radio & Electronics Expo. The event, often referred to as a hamfest, features equipment displays, demonstrations and forums that focus on advances in technology and radio communications. The gates open at 6:30 a.m. for the flea market, and doors to the expo open at 7:30. Admission is $5. CBers, electronics hobbyists, boaters and everyone who has an interest in communications and electronics are welcome to attend this yearly event. Electronics equipment, accessories, parts and related items will be offered for sale by several national companies and by vendors in the outdoor flea market.

//
Propagation Forecast Bulletin #12 de K7RA:

Posted: 22 Mar 2012 05:00 PM PDT
http://www.eham.net/articles/27969

Solar activity declined this week. Average daily sunspot numbers were off by over 13 points to 75.1, and average daily solar flux dropped over 32 points to 102.1.

The death has occurred of Michael Hoban, EI5DCB. Funeral took place Wednesday March 21st.

Ar dheis De go raibh a anam dilis.

IRTS 80th Anniversary AGM & Rally

The annual dinner of the IRTS takes place on Saturday April 21st, with the Rally and AGM on the following day. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. As dinner tickets and rooms are distributed on a first come first served basis, you are encouraged and advised to act now to avoid disappointment. The annual rally, on Sunday April 22nd, will also have its favourites and many new and novel exhibitors.

This is a must attend event in the 80th Anniversary year of your national society. Full details of this event are on the IRTS web site www.irts.ie

Dinner tickets can be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. The Fairways Hotel can be contacted on 042 9321500 or www.fairways.ie

---

Revised DXCC Fee Structure

Listeners who are involved in the DXCC programme will be aware that there have been a number of administrative difficulties with the programme in recent months. In particular, there have been delays in processing applications for DXCC credits at certain times, for example after major contests and DXpeditions.

In an effort to overcome these difficulties in the future, ARRL has announced a new fee structure for DXCC applications, one of the aims of the new structure being to encourage frequent smaller applications for

DXCC credits. To achieve this, the premium charged for second and subsequent applications in each year will be dropped.

Later this year, ARRL plans to have an online system for QSL card applications in place: while the cards will still need to be checked by a field checker, it will be possible to generate online the application form to be submitted to the field checker; this, of course, will greatly speed up the eventual processing of the application, as the DXCC staff will not have to perform the data entry.

Shannon Basin Radio Club

The Shannon Basin Radio Club is holding a meeting on Wed 28th March at 20:30 in Hannons Hotel, Roscommon.

It is planned to give practical demonstrations on computerised logging, dx cluster and Logbook of the World.

All members are requested to attend and visitors are welcome. For more info see www.shannonbasinradioclub.com

Lough Erne Rally next Sunday 1st April

The thirty first Lough Erne Amateur Radio Rally will be held next Sunday 1st April. The location is again the SHARE Centre near Lisnaskea, in County Fermanagh. Doors open at 11.30 The traditional strong attendance of radio amateurs and experimenters is expected from across Ireland. The Radio Amateur Old Timers Association is hoping to recruit many new members at the rally. There are more details in the April issue of Echo Ireland, and on the Club website www.learc.eu

---

North Cork Radio Group

The North Cork Radio Group will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

Special Event Stations for the London 2012 Olympic and Paralympic Games

Some special event call-signs will be activated to celebrate the London 2012 Olympic and Paralympic Games: 2O12L (Two Oscar One Two Lima) from London, England and 2O12W (Two Oscar One Two Wales) from Barry, Wales. The Radio Society of Great Britain has been granted the 'Inspire mark' for these stations by the London 2012 Inspire programme. The London station, 2012L will be active through the duration of the Games,

located at the historic Eltham Palace, south-east London on 160m-2m, all modes. More information is available on the website http://www.2O12L.com or contact the Press Officer, Mr. John Warburton G4IRN at press /at/ 2o12l.com.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thumbs Up for Amateur Radio:

Posted: 24 Mar 2012 06:15 PM PDT
http://www.eham.net/articles/27973

Malacca: With the internet, e-mailing, Skype-styled personal and family voice calls and not forgetting the indispensable cellphone extensively hogging the communication limelight, amateur radio (HAM radio) still continues to be tagged as an 'evergreen hobby' minus the loss of appeal. Testifying to this proud outlook are some 50 faithful and new members of the Malacca Amateur Radio Community (MARC) led by co-ordinator Heng Lye Huat. The group is also continually encouraging school and college students as well as young working professionals and retirees to join the fold and is scoring encouraging response. Established 30 years ago by the late William Tan, MARC which is affiliated to the Malaysian Amateur Radio Transmitter Society (MARTS) is now spearheaded by his wife Jenny Yong (9M2JS) and sons Eugene and Terrence. The group continues to thrive enthusiastically over related facets and aspects like constructing, experimenting and communicating using radio equipment.

Emergency Team Honors 2:

Posted: 24 Mar 2012 06:13 PM PDT
http://www.eham.net/articles/27972

The Shelby County Office of Preparedness Reserve Program, under the leadership of Community Emergency Response Team coordinator Eugene Jones, recently honored two of its outstanding members -- Willie Hollinger of Cordova and Alexander "Ham" Hilliard of Bartlett. Hollinger and Hilliard were applauded for going above and beyond to teach the public about the importance of disaster preparedness and disaster communications. A reserve since 1995, Hollinger serves as the public education and CERT officer. With more than 25 years of experience, he is known for his kindness, gentle humor, generosity, and depth of public safety knowledge. Hollinger has taught countless number of students how to survive disasters as a certified CERT instructor. He has created several videos of regional and national disasters that are shown during the CERT classes. He also has built many of the life-size props used during the hands-on portion of these classes.

RAC Bulletin 2012-020E - Section Emergency Coordinator appointed for
Quebec Section
2012-03-24

It is with a great deal of pleasure that I announce the appointment of
Normand Pitre VE2NHK CEC as Section Emergency Coordinator for the
Quebec Section effective immediately. Normand has shown great interest
in emergency communications and ARES, and is eager to learn more. He
recently earned his RAC Certified Emergency Coordinator designation,
and is eager to chat with any members of the Quebec Section that might
have an interest in establishing a new ARES unit.

Normand resides in Saint Zotique, QC and I would like to wish him the
very best. Welcome Normand

Gilles Lariviere VA2SGL
Section Manager - Quebec

Doug Mercer VO1DTM/VO1DM CEC
Chief Field Services Officer

EmcommWest and Voice-over-IP Conference May3 2012

Posted: 24 Mar 2012 08:28 PM PDT
http://forums.qrz.com/showthread.php?339478-EmcommWest-and-Voice-over-IP-Conference-May3-2012&goto=newpost

THE NEXT ANNUAL VoIP TOPICAL CONFERENCE IS FRIDAY MAY 4, 2012

at the Grand Sierra Resort in Reno. http://www.emcommwest.org/

Since 2001 Nevada Amateur Radio Repeaters, Inc. (NARRI) sponsored the
Annual VoIP IRLP Conference that is held in the Spring. Prior to 2012 the
conference was held in Las Vegas as a separate event. Now it is part of
EMCOMMWEST event. Each year the meeting has broadened its scope and now
includes all the major VoIP systems in use by the amateur radio community,
i.e., IRLP, Echo link, EchoIRLP, All Star, D-Star and DV Dongle. Report on
success of the Pacific Division D-Star Emcom Net held on Western Reflector
REF014B. See the program for topical speakers.

Here is a summary of details:

Place: Grand Sierra Resort Conference Area

The conference area is in the lower level - take elevator down from main
floor.

>Date: Friday May 4, 2012

Time: 9 am to Noon and 1 to 4:30 pm

Program: elaborates on the various VoIP systems with presentations and
demonstrations.

See past VoIP conference session at
http://www.narri.org/voip_conference.html

Venue: 10th Annual Topical VoIP Conference

Cost: $25 per person. No one allowed without payment, no exceptions.

RSVP: Pre-Registration is Required by April 16, 2012.

Registration: Not available at this time. Will begin on February 1st.

Hotel Rooms: www.EmcommWest.org/accommodations.html

Please direct your questions to Kent W7AOR,w7aor@narri.org or phone 702-452-4412.

It is the hopes of NV Section leadership that this combo will alternate yearly between Reno and Las Vegas. Look forward to seeing you in Reno for the 10th annual VoIP Conference and EmcommWest.

Kent W7AOR, VoIP Conference Chair

GB2RS NEWS

Sunday 25th March 2012

The news headlines:

* AROS Coordinator appointments

* Questions for the RSGB AGM

* British Legion Special Event

Following the vacancy advertised in RadCom and the RSGB website, Keith Bassett, G7NBU has been appointed as the new AROS Coordinator. Mario Brashill, G2DPA has been appointed as a deputy. Together they bring significant experience and skill to the Amateur Radio Observation Service with its broad challenges of investigating matters that might bring the amateur services into disrepute, The Board would like to thank the other candidates who applied for the position and also John Rogers, M0JAV for his temporary role in managing AROS whilst the vacancy was filled.

For those unable to attend the RSGB AGM on 21 April in Bedford, it is now possible to table a question for the meeting. Whether you would like to ask a question at the AGM or the afternoon discussion session you can now submit the question online. The questions will be tabled, subject to available time, and you will receive a personal reply after the AGM. To place your question, go to www.rsgb.org and click on the appropriate heading under RSGB Articles and Statements. If you are able to attend and wish to stay for lunch, you can also register an interest at www.rsgb.org.

The British Legion was founded on 1 July 1921 and members of South Derbyshire and Ashby Woulds Amateur Radio Group are planning a special event station to mark the event. They are looking for other amateur radio groups to join in. Any club that is interested should contact Jacqui, 2E0JQY by e-mail to m3jqy@netcom.co.uk.

On 9 March the RSGB learnt that Bluefin, also known as Amateur Radio Insurance Services, was leaving the amateur radio insurance market. The RSGB has no direct involvement with amateur radio insurance and this announcement was unexpected. The RSGB is aware that other brokers are interested in offering amateur radio insurance and hopes that an announcement on a new insurance provider might be made by 31 March when Bluefin ceases to take on new business. Any developments will be announced on the RSGB website www.rsgb.org.

The Hermes SDR project that was detailed in RadCom in May 2010 by Phil Harman, VK6APH and Steve Ireland, VK6VZ is one step closer to fruition. There is now an interest list so that the number of boards to be manufactured can be determined. Hermes is a Direct-Down Conversion receiver, a Direct-Up-Conversion 500mW transmitter and a gigabit Ethernet interface all on one board. Also on board is an RF-quiet switch- mode power supply, which allows Hermes to run from a single 13.8V DC source. You can register your interest at www.hansdr.com.

1 And now for the details of rallies and events for the coming week

Spring Militaria & Electronics & Radio Amateur Hangar Sale will he held today, 25 March, at the Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and there will be, civil, military & vintage radio equipment, vehicle spares & more. Contact Rod Siebert, 01270 623 353.

The Devon & Cornwall HAMFEST also takes place today, 25 March, at The Engine House, Compton Park, Callington PL17 8EA. There will be trade stands and special interest groups. Compton Park is a peaceful, simple unspoilt site formerly the site of an old Cornish tin mine, with the old Cornish steam engine house and the Engine House Tea Rooms. More information from Dereck, M0YDW, via e-mail to disco5live@btinternet.com.

The Lough Erne Amateur Radio Club Annual Rally will take place on 1 April at The Share Holiday Village, Lisnaskea, Co. Fermanagh BT92 0EQ. Doors open at 11.30am. There will be trade stands and a Bring & Buy. Details from Iain on 02866 326 693.

Also on 1 April the South Gloucestershire Amateur Radio Rally will be held in the Scout Activity Centre, Woodhouse Park, Almondsbury, Bristol BS32 4LX. Doors open at 10am. There will be trade stands as well as a Bring & Buy. Talk in is on S22. More details from Stan Goodwin, G0RYM on 07833 517 370.

Now for the news of special events

The Medway Amateur Receiving & Transmitting Society will be on air from Tuesday 27 March to Saturday 31 March activating Fort Amherst in Chatham Kent. This is part of their 90th birthday celebrations and they will be using special callsign GB5MW. More details can be found at www.cashota.co.uk or www.g5mw.org.uk/.

And now the HF DX news compiled from 425 DX News and other sources

Hartwig, DL7BC will operate as TO7BC from the Indian Ocean island of Mayotte until 6 April. QSLs go via his home callsign.

An international team will activate the callsign E51M from the North Cook Islands from 28 March to 10 April. They will operate on all bands, 6 to 160m, using CW, SSB and RTTY. The QSL manager is DJ8NK.

Kevin, 2E0WMG/P, will be active in SSB on 10 to 80m from Lundy Island, which is Worked All Britain square SS14, from 27 to 31 March. QSL via

his home callsign either via the bureau or direct.

Retu, OH4MDY will be active as XV2RZ from Vietnam until 16 April. He says that this time he will pay special attention to digital modes. QSL via his home callsign, direct only.

Nine operators from the Verona DX Team will be active from the Franciscan mission at Cumura, Guinea- Bissau until 6 April. The operation will concentrate on 144MHz EME using the callsign J52EME, but a couple of stations will be active on 10 to 80 metres using the callsign J52HF. There will also be 6m activity. HF activity will concentrate on RTTY and CW. QSL via I3LDP, direct or via the bureau.

2 Now the contest news

This weekend is the SSB leg of CQWW WPX. The 48 hour contest finishes at 2359UTC today, 25 March. Everybody works everybody exchanging a report and serial number. Expect the contesting bands to be congested and some pretty large serial numbers to be exchanged across the 1.8 to 28MHz bands. The 50MHz UK Activity Contest takes place on 27 March from 2000 to 2230UTC. Using all modes on the band the exchange is signal report, serial number and locator.

Also on 27 March the SHF UK Activity Contest take place from 2000 to 2230UTC. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

At 90 minutes in duration it may be a short contest, but make no mistake, the 1st RoPoCo contest on 1 April is quite challenging. The maximum permitted power is 100 watts with no QRP or high power categories and the basic format is that in your first QSO you send your full postcode and for all subsequent QSOs you send the postcode you received in your previous QSO. If you receive a postcode that you know is erroneous, for example a corrupted version of your own postcode, record it as received and give it to your next QSO partner as is. Provided you are not the person to introduce an error, you'll get points for the QSO, because it is the accuracy of the exchange that is important. This all takes place on the 3.5MHz bands from 1900 to 2030UTC.

Activity on 70MHz continues to grow with the 1st 70MHz contest taking place on 1 April from 0900 to 1200UTC. Last year 156 stations took part from six different call areas. It's a race to accumulate as many kilometres worked as possible, with no multipliers. Using all modes the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 16th to the 22nd of March, compiled by Neil Clarke, G0CAS on Friday the 23rd of March.

This week was much quieter than recent weeks. Most of the sunspots groups visible were small and mostly quiet. However, some groups did produce several C class solar flares and on the 17th an impulsive M1

solar flare took place which had very little effect on propagation. Solar flux levels varied little and averaged 101 units. The 90 day solar flux average on the 22nd was 122, that's three units down on last week. X-ray flux levels for the period averaged B2.1 units with very little daily variation. Geomagnetic activity started at `active' levels with an Ap index of 21 and 22 units on the 16th and the 17th respectively. Activity then declined to quiet levels for the remainder of the period. The average was Ap 11 units. Solar wind speeds declined from 720 kilometres per second on the 17th to 360 by the 22nd. Particle densities were low throughout the period. Bz during the disturbance varied between minus and plus 7 nanoTeslas and on the quieter day between minus and plus 3 nanoTeslas. MUFs tended to fall short of expectations during the past week. For seasonal reasons north-south HF paths held up reasonably well but east-west paths were relatively poor.

And finally the solar forecast. During the second half of the week the return of old region 1429 which produced 14 M class and 2 X class solar flares on its last rotation is expected to rotate into view. Solar activity is expected to be low to moderate at first but could then increase to higher levels later in the week. Solar flux levels should increase from around the 110 mark to into the 130's by next weekend. Geomagnetic

3 activity is expected to be mostly quiet but a slight increase around midweek could take place due to a small coronal hole. Any Earth directed coronal mass ejections would increase activity. MUFs during daylight hours at equal latitudes should be about 26MHz for the south and 23MHz for the north. Darkness hour lows should be around 9MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of about 25MHz. The optimum working frequency with a 90 per cent success rate will be around 20MHz. The best time to try this path will be between 1000 and 1600 hours.

And that's all for this week from the propagation team. 73 de Neil, G0CAS.

NEWS FOR NORTHERN IRELAND

RAOTA, the Radio Amateur Old Timers Association, is looking for more members and will have a stand at the Lough Erne Rally on Sunday 1 April. RAOTA seeks to keep alive the pioneer spirit and traditions of the past in today's amateur radio. Its friendly local gatherings and nets on the bands, the hundred issues to-date of its quarterly journal, OT News and RAOTA's other publications make an important, historic and technical treasure of amateur radio lore that remains pertinent today.

NEWS FOR SCOTLAND

On Tuesday 27 March Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 28 March Glenrothes & District Radio Club is having a round-table discussion involving members' radio-experiences and raising radio problems. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Wednesday 28 March Lothians Radio Society is having a talk on homebrew microwave construction by Dr. John Cooke GM8OTI. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Thursday 29 March Aberdeen Amateur Radio Society is On the Air as well as a Morse class. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 29 March Paisley Amateur Radio Club is having a talk on rigging by 2M0BZZ. Contact Bill Anderson, 2M0BZZ, on 01505 613 633.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Advance news from The Lymington Community Centre Radio Club. An Intermediate training course will be starting at the Lyminton Community Centre, New Street, Lymington SO41 9BQ on Wednesday 18 April at 7pm. For further information please contact Keith Cromar, G8MZF by e-mail to m0lccandg8mzf@googlemail.com.

On Sunday 25 March Bromley & District Amateur Radio Society continues its Foundation course. Details from Andy, G4WGZ, on 01689 878 089.

On Monday 26 March Bedford and District Amateur Radio Club is holding a club net on GB3BF from 8.30pm. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Monday 26 March Maidstone YMCA Amateur Radio Society is having a training and discussion evening. More information from Howard Vicary, G0RJN, by email to hvicary@hotmail.com.

8 On Monday 26 March Norfolk Amateur Radio Club is holding a club net from 7.30pm on GB3NB, everyone is welcome. Details from Chris Danby, G0DWV, on 01603 898 678.

On Tuesday 27 March Bedford and District Amateur Radio Club is having a wireless workshop on making an antenna. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 27 March Brede Steam Amateur Radio Society is in the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 27 March Chelmsford Amateur Radio Society is holding a club net from 8.30pm. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 27 March Dorking & District Radio Society is having a talk on the Aspects of valve audio amplifiers design and performance by Keith Thrower. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 27 March Harwell Amateur Radio Society is having a shack activity night Details from Malcolm, G8NRP on 01235 524 844.

On Tuesday 27 March Home Counties ATV Group is having a talk on the Analogue to Digital Television switchover at Crystal Palace by Noel G8GTZ. Details from Pete, G8FRC on 01189 695697.

On Wednesday 28 March Chesham & District Amateur Radio Society Club is having a setup and demonstration of the FT-726. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 28 March Hastings Electronics and Radio Club is holding a talk on The Talking Newspaper by Graham, G4NTB. Details from Gordon, on 01424 431 909.

On Wednesday 28 March Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday 28 March Newbury & District Amateur Radio Society Radio has a presentation on the 2012 Olympics by Tom Grady, G6IGA. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday 28 March Norfolk Amateur Radio Club is having a talk on T32C and the story of Christmas Island and the biggest ham radio expedition in history by Michael Wells, G7VJR. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 29 March Bedford and District Amateur Radio Club is holding a club net on GB3BF from 8.30pm. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Thursday 29 March Bredhurst Receiving and Transmitting Society is holding a club night. Details from Andrew, M6AAE, on 07403 325 075.

On Thursday 29 March Lowestoft & District PYE Amateur Radio Club is having a club night at the shack. Details from Lee, 2E1LJL, on 01502 564 242.

On Thursday 29 March Shefford & District Amateur Radio Society is watching a video on The Secrets Of Bletchley Park. Details from John Burnett, M6JBU, on 07860 804 793.

On Friday 30 March Fort Purbrook Amateur Radio Club is having a RAYNET presentation by Mark Elbourn, 2E0EFA. Details from Mick Ponsford, M0GWD on 02392 366699

9 On Friday 30 March Wimbledon & District Amateur Radio Society is having a talk entitled Our Visit to Namibia by Jim, G4WYJ. Contact Andrew Maish, G4ADM, on 02083 353 434.

NEWS FOR THE SOUTH WEST On Monday 26 March Bristol RSGB Group is having a talk by Roger Davis, G3IUZ on 60 years in and out of radio. Details from Robin, G3TKF, on 01225 420 442.

On Monday 26 March Exeter Amateur Radio Society is having a club night at the Moose Centre. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 26 March Weston Super Mare Radio Society is holding a Morse class. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 28 March Thornbury & South Gloucestershire Amateur Radio is planning the club rally with Stan, G0RYM. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 29 March South Bristol Amateur Radio Club is having a South Gloucestershire rally briefing. Details from Andrew Jenner, G7KNA, on

07838 695 471.

On Thursday 29 March Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday 30 March Torbay Amateur Radio Society is having a presentation night. Entry is by ticket only. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Thursday 29 March Aberystwyth & District Amateur Radio Society is having a club night on the Air on 145.500 then 145.550. Details from Ray, GW7AGG, on 01970 611 853.

On Friday 30 March Newport Amateur Radio Society is closed for school holidays. More information from Ross Clare, GW3NWS, on 01633 880 146.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
19 - 25 March 2012

Solar activity has been at low to moderate levels for the past seven days. The largest event of the period was a M1 x-ray event on 23 March at 1940 UTC from Region 1445 (S24, L=026, class/area Fho/280 on 25 March). Region 1445 rotated onto the southeast limb of the solar disk late on 23 March and has since dominated in solar activity, producing multiple C-class x-ray events. Region 1444 (N19, L=067, class/area Cao/060 on 25 March) emerged on 23 March and has also been active, producing multiple C-class x-ray events. Both Regions, 1445 and 1444, produced CMEs on 25 March, however very little effect is expected here at Earth. The remaining regions on the solar disk remained rather quiet and stable.

No proton events were observed at geosynchronous orbit during the summary period.

The greater than 2 MeV electron flux at geosynchronous orbit was at predominantly high levels for the duration of the summary period. However, on 23 and 25 March, moderate levels were observed.

The geomagnetic field ranged from quiet to active levels with an isolated period at minor storm levels at high latitudes. On 19 March, predominantly quiet levels were observed with an isolated active period measured early in the day, in response to the arrival of a CME from 15 March. Quiet conditions prevailed from 20 March to late on 22 March, when a solar sector boundary (SSB) crossing was measured by the ACE spacecraft. Following the SSB, quiet to unsettled levels were seen from 22 - 23 March. On 24 March, active levels with an isolated minor storm period was observed as a small coronal hole high speed stream (CH HSS) moved into a geoeffective position. This CH HSS was short lived with measurements by the ACE spacecraft indicating a quick rise in solar wind speeds to around 500 km/s followed by a quick decrease to nominal background levels. On 25 March, activity returned to quiet levels.

Note: There is a gap in data from the GOES 15 spacecraft from late on 21 March through mid 23 March. This gap can be seen in the GOES 15 x-ray plot.

Forecast of Solar and Geomagnetic Activity
26 March - 21 April 2012

Solar activity is expected to be at low to moderate levels. Predominantly low levels are expected from 26 - 28 March, when old Region 1429 rotates back onto the northeast limb. M-class flare probabilities are expected to increase from 28 March - 11 April as old Region 1429 progresses across the solar disk. A return to low levels is expected to prevail for the remainder of the period, 12 - 21 April.

No proton events are forecast from 26 - 30 March. An increase to a slight chance for proton events is forecast from 31 March - 11 April as old Region 1429 populates the visible disk. A return to background proton flux levels is expected from 12 April - 21 April.

Electrons, greater than 2 MeV, are expected to be at normal to moderate levels from 26 - 28 March. From 29 March - 03 April, moderate to high levels are expected. From 04 - 13 April, a return to normal to moderate levels is expected. Moderate to high levels are expected from 14 - 18 April. A return to normal levels is expected for the remainder of the period.

The geomagnetic field is expected to be at mostly quiet levels from 26 - 27 March. Quiet to active levels are expected from 28 -29 March in response to the effects of a CH HSS. Predominantly quiet levels are expected from 30 March - 12 April. An increase to quiet to active levels is expected from 13 - 14 April in response to a CH HSS. Quiet levels are expected to prevail for the remainder of the period.

2O12L Ham Radio Eltham Palace

Posted: 26 Mar 2012 02:15 AM PDT
http://forums.qrz.com/showthread.php?339611-2O12L-Ham-Radio-Eltham-Palace&goto=newpost

2O12L - that's Two Oscar One Two London - will be the callsign of the London ham radio station celebrating the London Olympic Games and Paralympics.

We will be based at Eltham Palace, which is in the London Borough of Greenwich, one of the six ☐host boroughs☐ for the Games.

We plan to make at least 60,000 contacts during the seven weeks operating on the air. Visitors may view an exhibition about radio communications and electronics, and sit down at the radio and make contact with amateur radio operators right around the world. We are also offering ☐bite-sized☐ talks giving an overview of radio and its importance in the modern world.

Radio hams from around the world are encouraged to visit 2O12L, which is easily reached by bus from Greenwich.

Please bookmark this site and check back often, for updates as the project progresses. Follow us also on Facebook and Twitter.

WPX contest - China stations

Posted: 25 Mar 2012 07:28 PM PDT
http://forums.qrz.com/showthread.php?339586-WPX-contest-China-stations&goto=newpost

Hi all,

I participated in this weekend's CQ WPX SSB contest mostly to get some new DX stations in my log but also to help out giving some points to the guys and gals on there. With a whopping total of 55 contacts, I'm not getting any plaques anytime soon. The conditions overall, especially on 15m, were impressive. I know the big guns come out to play on contest days but I have never heard JA's being S9+10 at 10PM ET on 15m. As is typical for any day of the week, 20m was a zoo. 10m and 80m were also in great shape.

What was up with the Chinese stations? There were a few B1, B3 and B7 stations that were simply booming into NA. I mean S9+ solid. I pointed my ho-hum 3el Yagi at them and keyed off several 1500W bursts in their direction... nothing. Several other stations, including some of the big boys, had similar experience. It was so bad I thought for a minute they had been banned from contacting NA stations for some reason. But I did hear a few station get through so something else might have been going on.

I stayed on and listened to their exchanges and while others in EU and NA were already in the near 3K QSO counts, the Bx stations where low 1K count. The few that made it through had to repeat their exchanges several times - odd to hear such huge/clear signals having to ask "again, again?" over and over. A few stations, including myself, sent "Bx loud but deaf" type comments to the DX clusters so it was widespread.

So what are the theories here? Local QRN/QRM in Bx land? Unlikely it was happening to the entire country. Problems with receive filter availability maybe? Language barrier? The guys calling spoke fluently and were certainly compressible. Any Bx station on this forum that can comment?

73,

Julio

Special Callsign GB100MGY
2012-03-25

Good afternoon,

We have obtained and will be operating GB100MGY callsign on all amateur bands from FORT PERCH ROCK MARINE RADIO MUSEUM NEW BRIGHTON WIRRAL U.K. Dates from 6th April until 26th April on CW and SSB.

We also have special permission to use above callsign on the 501khz-504khz band from the 12th April until 18th April and will be transmitting on 502khz cw and for those people without a 500khz band licence a crossband qso on 3566 khz or 7066khz as propagation conditions permits.

This event is to mark the 100th anniversary of the TITANIC disaster in 1912. We are also having a special overnight operation on 14th/15th April the date Titanic was sunk, this will be concentrated mainly on the 502khz as it was the 500khz band where the Titanic made her CQD and later on the SOS distress calls/messages.

We are hoping for a POND HOP to East coast area of Canada on the 502khz band with suitable conditions at that time. Please ask your amateur radio friends in Canada to listen out for us and include our callsign in your news bulletins.

Many thanks and 73 de John Hudson M0CMW

P.S.: our websites are:-http://www.fortperchrockmarineradiomuseum.co.ukand also for this event ishttp://www.gb100mgy-fortperchrock.co.uk.

Eliminating The Middleman in the Information Revolution:

Posted: 25 Mar 2012 05:44 PM PDT
http://www.eham.net/articles/27977

Rob Duerr gets his information about crime in Edmonton direct, unfiltered and unexpurgated -- from his bank of high-tech police scanners. EDMONTON -- While the multitudes muddle along with traditional information sources (newspapers, television, radio stations, or their dot-com equivalents), while the rest of us cop that next fix from the billion-brained beasts of Facebook and Twitter, the few, the proud, the very, very skeptical prefer to get their news in a somewhat less-conventional way. By eavesdropping on the cops. Rob Duerr earns his daily bread repairing and installing CB and Ham radios for trucking companies, by programming police scanners for local newsrooms in search of, well, the news. He then goes home and, you guessed it, listens to police scanners or talks on his ham radio with other guys who, often as not, also listen to police scanners. This guy is tuned in, turned on and plugged in. All day, every day.

//
Philip D. Ingraham, W2OSY (SK):

Posted: 25 Mar 2012 05:37 PM PDT
http://www.eham.net/articles/27976

Philip D. Ingraham (Phil) of 175 Deerland Ave., Painted Post, NY, expired on Friday, March 23, 2012, at Founders Pavilion in Corning, NY. He was born on December 11, 1916, at Hornell, NY, the son of Robert and Ratie Ingraham. His parents; two brothers, Robert and Lee; and a daughter, Sandi Slater, have predeceased him. Phil is survived by his loving wife, Beatrice (Bea) of 69 years; a nephew, Robert Ingraham of Vancouver, CA; a niece, Helen Francis of Silver City, NM; and a great nephew, Kevin Crowe, of Tucson, AZ. Phil graduated from Painted Post High School in 1936. He worked for Painted Post Post Office and Quigley's Drug Store prior to enlisting in the U.S. Army Air Corps in 1942. Phil married Beatrice Mathews in 1942 in St. Louis, MO, near Scott Field, IL, where he was stationed at the time. He served in the South Pacific for nearly three years. He was a M/Sgt. In the Army Airways Communications System in the U.S. Army Air Force and was honorably discharged in 1945. He was an Amateur Radio Operator (W2OSY). He was the first radio operator to be licensed in Painted Post by the Federal Radio Commission (now the Federal Communication Commission). This took place in 1934. Phil enjoyed life, he

loved people, ham radio, traveling, photography, children, animals, and birds. He enjoyed writing poetry over the years and had several poems published. He worked at Corning Radio and Corning Building Co. prior to being employed by Corning, Inc. He retired from Corning, Inc. in 1976 having been employed at their laboratories as an electronic technician in Corning and Sullivan Park. He had 20 years of active service before an accident whereby he had to take a disability retirement. He was a member and an Ordained Deacon in the First Presbyterian Church in Painted Post where he has been a member since 1945. He sang in the Church Choir, was at one time a member of the Barbershoppers, and loved playing the electronic organ at home. He was a member of the American Legion and the VFW in Corning.

MyGAREC 2012 is announced

Posted: 27 Mar 2012 07:35 AM PDT
http://forums.qrz.com/showthread.php?339762-MyGAREC-2012-is-announced&goto=newpost

MyGAREC 2012 is announced

The Global Amateur Radio Emergency Conference (GAREC), now coined as 'MyGAREC 2012', will be held at the Thistle Port Dickson Resort, Negeri Sembilan, from November 12 to 14. It attracts participants from around the world.

The first GAREC was in 2005 and is the premier annual event attended by those with an interest in amateur radio providing emergency communications during training exercises or in response to disasters.

MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference in Vietnam (November 5 to 9) which has as its theme disaster relief communications.

General information including information on the venue, registration fees and the tentative agenda and the registration forms will be posted on the website www.mygarec2012.com by the end of this month.

This website will be updated frequently to keep all updated with the latest news and program changes.

Among the draft topics to be discussed are the HF Emergency Operating Procedure, the Future of GAREC, presentations from the three regions of the IARU and also some presentations from societies with recent disaster relief communications operations.

For more information you may also email info@mygarec2012.com

GP3ZME/P Guernsey EU-114 160M-24GHZ June 22-27

Posted: 26 Mar 2012 12:59 PM PDT
http://forums.qrz.com/showthread.php?339682-GP3ZME-P-Guernsey-EU-114-160M-24GHZ-June-22-27&goto=newpost

Hi

Following the success of last years expedition giving many stations a new one the Telford and District Amateur Society will be visiting the Island of Guernsey Between June 22-27 2012 and operating on.

HF 160 Meters to 10 Meters.

VHF 50MHZ 70MHZ 144MHZ

UHF 1.3GHZ SHF 2.3GHZ 3.4GHZ 5.7GHZ 10GHZ 24GHZ.

You may follow the DX Expedition on twitter 2W0ZJA will be tweating updates frequencies etc. http://twitter.com/#!/@2W0ZJA .

VHF talk back and ON4KST chat will also be used. Locator Square of the camping site is IN89QK but members of the group may well move around the island looking for the best paths to UK EU etc.

Taking Part In Following Contests Over the Weekend of the 23-24 June

1.3Ghz and 50MHZ (cw) contests

UKug Contests 24th June

5.7GHz Cumulative 24th June

10GHz Cumulative 24th June

24GHz Cumulative 26th June

SHF UKAC 2.3Ghz -24Ghz

The 70MHZ Station if operational will be QRO still to be confirmed.

We will be going at the peak to the es season so 50mhz will be a priority currently we only have a two element beam for 6 metres can we fit a 5 in ?

The main objective of the Expedition is to have fun especially on SHF.

You can read the clubs newsletter detailing last years expedition by clicking on the link below

http://www.tdars.org.uk/library/News...0October11.pdf

More details and qsl information can be found under http://www.qrz.com/db/gp3zme gp3zme on qrz.com with a half hour youtube film of last years activities.

Cheers

Paul

Clemson University Field Demo Friday 3/30

Posted: 26 Mar 2012 09:57 AM PDT
http://forums.qrz.com/showthread.php?339656-Clemson-University-Field-Demo-Friday-3-30&goto=newpost

Here's the announcement we sent out around campus:

Friday March 30th, starting around 2pm, the Amateur Radio Club will be setting up a station on Bowman field to demonstrate portable radio equipment and to help prepare our club to offer emergency communications in event of a natural disaster. We will be using battery power to run an HF radio, and a simple wire dipole antenna, all of which can be set up in less than 15 minutes and will allow us to communicate to people in many parts of the world. Anyone is welcome to stop by and check out the equipment and learn about the hobby of amateur radio. If you've ever found yourself interested in radios, antennas, electronics or just talking to interesting people around the world, this event is for you.

Look for us on 20m, we'll try to hang around 14.280, beginning around 1800Z until about 2100. The intended audience will be students in related EE classes whose profs announce the event, and various passersby/frisbee players who are out enjoying the sunshine. We'll be operating under the club call WD4EOG.

Apex Students Talk with Space Station:

Posted: 26 Mar 2012 06:06 PM PDT
http://www.eham.net/articles/27978

Last Wednesday, students at Salem Elementary in Apex came together in the school's multipurpose room for a once-in-a-lifetime event. Fourteen students, six of them winners of the school's science fair a few weeks earlier, made their way onto the stage for their turn to ask a question of astronaut Don Pettit 241 miles up and on the other side of the Earth aboard the International Space Station. The event, more than a year in the making, was made possible by NASA's Teaching from Space and the Amateur Radio on the International Space Station ARISS) project. Astronauts periodically take a few minutes out of their schedule to talk with students around the world about their research and what it is like to live and work in space. Last week Salem Elementary got its turn. This week students at California Polytechnic State University, San Luis Obispo, are scheduled to connect with astronaut Dan Burbank aboard the ISS.

421. The ARRL Contest Update for March 28, 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-28 05:09:42 UTC
From: ARRL Web site <memberlist@www.arrl.org>

```
**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

March 28, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Peanut Whistle Parade - QRP ARCI, ARS Spartan and LP Spring Sprints
- VHF Spring Sprints - 2 Meter
- Ex-state-ic About QSO Parties
- Colossal Construction
- A Score of Silent Sounds
- 2011 Sweepstakes and EME Online Writeups
- Give Sore Feet the Boot
- Handling Harmonics Handily
- A Call From A Two

==> NEW HF OPERATORS - THINGS TO DO

Why not give QRP contesting a try during the next couple of weekends?
The QRP ARCI has one of its biggest QRP contests of the year in April
(the other is in October) and there are a pair of fun sprints, too.
VHF+ contesters get a sprint of their own, too, with the 2 meter
edition.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

PU5DCB was operating on 10 meters - not 15 meters. PU-prefix stations
are not permitted to operate on 15 meters and are limited to 100 watts.
(Thanks, Luc PY8AZT)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

March 31 - April 1

- Worldwide EME Contest
- FOC QSO Party--CW
```

- Lighthouse Spring Lites QSO Party
- MO QSO Party
- ARS Spartan Sprint--CW (Apr 3)
- OK1WC Memorial Contest (Apr 3)

April 7 - 8

- SNS and NS Weekly Sprints (Apr 6)
- Montana QSO Party
- LZ Open 40 Meter Contest--CW
- PODXS 31 Flavors Contest
- QRP ARCI Spring QSO Party--CW
- SP DX Contest
- EA RTTY Contest
- VHF Spring Sprints (Apr 9)
- Low Power Spring Sprint--CW (Apr 9)
- NAQCC Monthly QRP Sprint--CW (Apr 11)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

State QSO parties are getting more popular every year with the bands taking on the sounds of a major domestic contest during the largest of them. This spring also features a pair of the new breed - regional QSO parties. Pioneered by the 7th district's 7QP <http://www.codxc.com/> and now joined by the New England QSO Party <http://neqp.org/>, the first weekend in May has become a "mini-Sweepstakes" of sorts with the Indiana QSO Party <http://www.hdxcc.org/inqp> joining the fun, as well. Several of the individual states in the 7th and 1st districts have had irregular sponsorship for QSO parties and the solution has been to combine forces into a larger contest. To help sort out the location codes, county codes have been devised by each contest. If you plan on participating, it would be a good idea to check these out ahead of time! In fact, for any state QSO party using counties or parishes as multipliers, be sure you use the right abbreviations as they are not always just the first three letters of the name! You'll also have to figure out a logging strategy as your logging software is designed to do one contest at a time - one PC log, two paper logs? Three laptops and three CW interfaces all "Y-ed" together? The mind boggles! At any rate, have fun as you put some of the nation's more interesting counties in your logs.

June may be the start of summertime here in the northern hemisphere but it is the dead of winter south of the equator and prime Top Band season! To take advantage of those good conditions "down under", Tree N6TR has announced the "Summer Stew <http://web.jzap.com/k7rat/stew.rules>" version of the Stew Perry contest to run on June 16th and 17th. As regulars on the band will attest, there is DX to be worked year-round on 160 meters and with the improvements in receiver and antenna technology of recent years, the band can be lively at any time of year.

CQ Magazine has announced a short delay
<http://cqnewsroom.blogspot.com/2012/03/update-on-logbook-of-world-and-cq.html>
in the launching of support for the CQ WPX award program through the
ARRL's Logbook of the World (LOTW). Watch for additional updates on the
status of this long-awaited expansion of LOTW with more support for CQ
awards on the way.

The current edition of the Twin City DX Association's Grey Line Report
<http://www.tcdxa.org/newsletter.html#newsletter> includes an interview
with two members of the HK0NA team that set a new record of more than
190,000 QSOs from a "tent and generator" DXpedition. In the same issue
is the story of how an existing Rohn 55 tower is converted into a
rotating tower without having to take it down and reinstall it from
scratch. This "in place" conversion was even done solo! Ol�! (Thanks,
Lynn W4NL)

Where do I point the beam? A perennial (if not daily) question for the
DXer - which direction - is often answered by an "azimuthal" map
showing the great-circle path to anywhere from your QTH. You can buy
one but the AZ_PROJ web site <http://www.wm7d.net/azproj.shtml> can
whip up a custom map for you in a few minutes. Start with the "Short
Form" version to get a feel for the program - enter your latitude and
longitude, select "Whole World" and 2500 km/cm for the whole map to fit
on one sheet of letter-sized paper. Press "Generate Map" and voila! The
"Long Form" process allows much more customization - warning - making
custom maps is quite addictive!

Thanks to the efforts of Don KQ6FM and Kevin N0IRW there are four new
30-second video PSA's <http://www.arrl.org/video-psas> available from
the ARRL Public Relations Department. These can serve double-duty as
the sound track alone is also good for radio PSAs all by itself. There
is also a 15-second PSA. (Thanks, ARRL PR Manager, Allen W1AGP)

The FCC Office of Engineering and Technology in conjunction with the
Wireless Telecommunications Bureau and the Office of Strategic Planning
recently hosted a two-day workshop
<http://www.fcc.gov/events/workshop-spectrum-efficiency-and-receivers-day-1>
discussing the characteristics of receivers and how their performance
can affect the efficient use of spectrum and opportunities for the
creation of new services. Key topics included current practices for
receiver design, case studies involving interference due to receiver
characteristics, and approaches for promoting interference avoidance
and efficient use of spectrum, given the current receiver base and
potential future deployments. (Thanks, Steve K9HY)

Those West Coasties not making the the trek to the Dayton Hamvention
this year might consider the Bay Area's May 19th and 20th Maker Faire
<http://makerfaire.com/>. Attracting huge crowds over the past couple
of years, a Maker Faire features all manner of do-it-yourself (DIY) and
hands-on activities, including ham radio. There are a number of
mini-Faires springing up everywhere from China to Lubbock, TX - there's
one in Los Angeles as you can see on the web site. If a Faire is coming
to your area, why not sponsor a ham radio exhibit? The DIY community is

a motivated, interested population who would be very interested in ham radio!

Sky and Telescope magazine recently noted the passing of Norman Edmund <http://skypub.com/normanedmund>, founder of Edmund Scientific. During my (and I suspect other's) early days in ham radio, the Edmund Scientific catalog with all of its lenses and magnets was nearly as well-thumbed as those from Fair Radio Sales, Burstein-Applebee, Allied Electronics, to name a few. Edmund Scientific <http://www.scientificsonline.com/> is still busily stimulating young minds although their product line has a much broader focus these days, so to speak.

Thanks to Mark K6UFO, I just completed reading The Sun Kings <http://www.amazon.com/The-Sun-Kings-Unexpected-Carrington/dp/0691141266/ref=sr_1_1?ie=UTF8&qid=1332862949&sr=8-1>
by Stuart Clark. It's a very well-written history of how sunspots were discovered to be linked to geomagnetic disturbances here on Earth through the actions of solar flares. This was heady stuff in the days before the electron was even known to exist! The book begins with a recounting of the October 2003 flares, one of which occurred during CQ WW SSB when I was on the air - it was a memorable experience.

No, not an April Fool's article - Cambridge University researchers have figured out how to "unprint <http://www.cam.ac.uk/research/news/use-a-laser-save-a-tree/>" laser-printed documents by using - not surprisingly - a laser to vaporize the toner. No word on what happens to said vaporized toner but the process doesn't seem to hurt the paper.

IEEE Antennas and Propagation Magazine features a regular historical column and the Dec 2011 issue's was particularly good - "The Father of Radio: A Brief Chronology of the Origin and development of Wireless Communications <http://ieeexplore.ieee.org/xpl/freeabs_all.jsp?isnumber=6157696&arnumber=6157716>". While most radio histories look back no farther than Maxwell, this paper takes the story all the way back to 1785 when Coulomb's experiments with static electricity. IEEE members may be able to access this paper directly and others can request it through their local library.

Hank N8XX checks in with the news that "DL8WAA has created a free software application called LM <http://contestsoftware.com/e/home.htm> that makes it very easy and fast to type in a paper log and convert it into a Cabrillo file that can be mailed to the log robot. The LM software can also read ADIF files and convert them to Cabrillo format."

Web Site of the Week - Colossus was the world's first electronic, programmable computer, built to decipher encrypted messages during World War II. England's National Museum of Computing is rebuilding Colossus <http://www.elektor.com/news/play-a-part-in-history-sponsor-a-valve.2078243.lynkx?utm_sour

ce=UK&utm_medium=email&utm_campaign=news>
and needs sponsors to help fund the project. Would you like to sponsor
a "valve"? (British jargon for vacuum tube) See if you can find the
Contest Update on the sponsorship page - I think I funded one cathode.

WORD TO THE WISE

Social climber - a helper that talks incessantly while on the tower.

==> SIGHTS AND SOUNDS

If you are of an age when just the word "mimeo" evokes certain aromas,
you will recognize all the sounds in this article about "tech sounds
<http://www.itworld.com/business/260490/20-iconic-tech-sounds-next-generation-wont-know>"
that have vanished but are still around as sound clips here and there.
That one lost sound is that of manually tuning an AM radio through the
band says a lot about why people don't "get" radio they way they used
to. How many hams got their first glimmer of DX Goodness listening for
thosea fluttery AM signal after sunset?

The Northern California Contest Club (NCCC) held it's annual awards
dinner on March 12th and handed out a lot of recognition! This online
album of photos
<https://picasaweb.google.com/rawilson/2012NCCCAwardsDinner?authuser=0&feat=directlink>
by Bob N6TV captured a lot of familiar call signs.

The Contest University <http://www.contestuniversity.com> travels
around the world and the most recent campus appeared in Italy as shown
by this collection of photographs
<http://www.hamradioweb.org/forums/showthread.php?t=13805>. (Thanks,
Tim K3LR)

When your gift is misunderstood <http://www.wimp.com/dadipad> there are
usually some interesting moments. (Thanks, Trey N5KO)

>From the "We Can Dream" department come these photographs
<http://www.cqdx.ru/ham/ham_radio/alliss-module-the-largest-fully-rotatable-sw-antennas-in
-the-world-by-5n7q/>
of the world's largest fully rotatable shortwave antenna in the world.
If you've wondered why 5N7Q is so loud, you might be able to find out
here.

==> RESULTS AND RECORDS

The PDF version of Initial Results
<http://www.arrl.org/contest-results-articles> for the 2011 ARRL
November Phone Sweepstakes has been posted. An expanded writeup with a
searchable online database and the Log-checking Reports will be made
available sometime in early May. Sweepstakes pins have all been shipped
and Clean Sweep mugs should ship in early April. The web version of the
ARRL's 2011 EME Contest by Jeremy W7EME is also online. (Thanks ARRL
Contest Branch Manager, Sean KX9X)

How is activity holding up in Sweepstakes
<http://www.arrl.org/sweepstakes>? Here are the submitted log totals

for the past three years:

YEAR CW PHONE
2007 1261 1571
2008 1420 1871
2009 1553 2047
2010 1464 1783
2011 1404 1826
That's a ~10% increase for CW and ~14% increase for Phone. In all ARRL contests, submitted logs are up by ~19% over the same period.

Please upload your ARRL DX CW and Phone contest pictures and stories to the ARRL Soapbox <http://www.arrl.org/soapbox> web page! This is a great time to do it while the weekends are still fresh in your mind - and you can still find the photos on your hard drive. The results authors (N4YDU for CW and N0AX for Phone) can use your material to add color to the writeups. Regional authors for the Phone version can really make good use of these interesting local and regional stories!

Congratulations to the Potomac Valley Radio Club <http://www.pvrc.org> for a third-straight Unlimited Sweepstakes Gavel with nearly 300 logs. Participation is crucial - the NCCC and the SMC have also grabbed some gavels with a big turnout strategy. Plus - it's a heckuva lotta fun, expecially for new contesters who can definitely make a contribution to their clubs!

Preliminary results for the recent North American RTTY Sprint are posted <http://ncjweb.com/> on the National Contest Journal website and the final results article will be in the May/June issue. LCRs (Log Check Reports) can be requested from NA RTTY Sprint Manager, Ed W0YK <rttysprintmgr@ncjweb.com> to understand how your raw score was modified by log checking and how to improve your technique for the next contest!

Much is made of high-rate operation and that set George W2VJN to musing about rates in prior years. "In the mid to late 60s I had a rate meter in the center console of my station. It incremented each time I sent the QSL msg. The full scale was based on 50 QSOs/hr and it reset to zero every 15 minutes...it was a good incentive to watch while operating. Later, I redesigned it to go to 100." These were the days when 40 QSOs was a great hour!

OPERATING TIP

Another rule reminder - as remote operating becomes easier, note that there are specific rules about using remote stations for ARRL, CQ, and other contests. Read those rules! If you have questions about what is and is not allowed, contact the sponsor of the contest for clarification.

==> TECHNICAL TOPICS AND INFORMATION

Climbing season is almost upon us and little is more aggravating aloft
than sore feet. Popular Mechanics recently reviewed eight brands of
work boots
<http://www.popularmechanics.com/home/reviews/news/work-boots-to-kick-every-job-in-the-tee
th?click=main_sr>
for different jobs. While none of the reviewed models has a steel shank
- very useful for standing on tower rungs for hours - the companies
represented here have a wide variety of boots that may provide a "best
fit" to your preferences.

Online Tutorial Department

- Ohm's law and basic circuit operation is relatively straightforward
from the electronic point of view but magnetic circuits are much less
familiar. This online tutorial about magnetic circuits
<http://www.nxtbook.com/nxtbooks/ubm/edn_20120315/#/24> by Kevin Craig,
PhD will help explain some of the terms and how they relate to more
familiar electronic analogs.
- This great three-part series on impedance matching was published by
Lou Frenzel W5LEF in Electronic Design magazine. Part 1
<http://electronicdesign.com/article/communications/Back-To-Basics-Impedance-Matching-101-
63946>,
Part 2
<http://electronicdesign.com/article/communications/back-to-basics-impedance-matching-part
-2>,
Part 3
<http://electronicdesign.com/content/tabid/57/catpath/communications/topic/back-to-basics-
impedance-matching-part-3-73564>.
(Thanks, Al AB2ZY)
- All you ever wanted to know about coordinate systems
<http://www4.wittenberg.edu/maxwell/csr.html> is explained in this
tutorial by Associate Professor Dan Fleisch of Wittenberg University
- The "2012 Annual Reference Guide" from In Compliance magazine has an
informative tutorial
<http://www.incompliancemag.com/index.php?option=com_content&view=article&id=739:using-fer
rites-to-suppress-emi&catid=26:design&Itemid=130>
entitled "Using Ferrites to Suppress EMI". More interesting material
for your interference toolbox! (Thanks, Dave K1FK)

Mike W0BTU has created an informative web page on Beverage antennas
<http://www.w0btu.com/Beverage_antennas.html> - especially how to build
and control a two-wire Beverage. Everything from binocular-core
transformers to an explanation of how to use a pulley to equalize
tension on parallel wires is covered here.

(c)Alan Friedman/ avertedimagination.com
<http://www.avertedimagination.com/>

Solar activity may have been "spotty" lately but when a big spot
group like 1429 comes roaring around the limb of the Sun, it's fun to
watch them. Solar watcher Cliff Shuttlewood describes this "plant pot"
solar telescope <http://www.britastro.org/iandi/shuttlewood.htm> that
can be made with a prism, eyepiece, and a little shop work. Solarscope

kits <http://solarscope.com/> are also selling briskly these days.

What watts are inside a 40-watt LED bulb? You can find out from this EDN "teardown <http://www.nxtbook.com/nxtbooks/ubm/edn_20120315/#/22>" of a typical LED bulb.

Another "Oh, By The Way" from Glenn K6NA about using Nyloc nuts - "Always have a few regular hex-nuts in your shirt pocket, so when the antenna comes up to you on the tower you can quickly spin on a couple of regular nuts to hold things together. Then you can relax and add all the Nylocs to finish it off. If using stainless steel hardware, you must use some anti-seize on the threads... but now you have a problem. The compound should be confined to just the seating area where the Nyloc nut will reside (i.e. below the nylon). The controlled application on the male thread should be done with a very small acid-brush so the nylon part of the nut will not reach the anti-seize. If you later back-off the nut, it will drag a little anti-seize up the entire thread (good, during removal). Ideally a new Nyloc nut should replace the old one, after cleaning the bolt-threads first." Glenn also recommends the Nuts, Bolts, Fasteners and Plumbing Handbook by Carroll Smith.

Steve K1SG recommends the Brother P-Touch Label Printer for equipment labeling. "You can connect it to your computer via a USB port, change font and size, print onto either white or clear substrate, and all the letters come out in nice, straight lines. After applying the labels to a panel, I give them a couple of light coats of Krylon for protection." Steve Watkins recommends the decal kits <http://www.pulsarprofx.com/decalpro/> from Pulsar Professional.

Lynn N7CFO noted this interesting soldering aid from Schmartboard <http://www.schmartboard.com/index.asp?page=schmartsolder> that helps out with learning to solder closely-spaced leads. While it's pricey, it may be a good way to help get started until you develop the skill. In fact, the small loop technique used by the kit can be used with small-diameter solder off a spool, as well.

If you are concerned about animals stepping into holes for conduit or other vertical rods and tubes, Bob W7LR describes "metal mushrooms" made from farm castoffs that cover his winter-time Beverage support pipes. "The covers are made of farm harrow disks with a metal rod welded on to go down into antenna support pipes. The pipes stick up a bit and so the cover keeps the horses from tripping on the pipes, and are sturdy enough if they walk on them."

Trying to figure out where to place your tower? Debby N7FL has solved her problem, "I find it handy to have my tower close to the house so when elements blow off the beam in high winds, the gutter catches them."

Technical Web Site of the Week - Tracking down a knotty sub-harmonic problem

<http://wiki.k1ttt.net/%28S%28ity0gz3hln02dbv2bcbtryig%29%29/2008%20Maintenance%20and%20Upgrade%20Blog.ashx#daiwameter>
led to David K1TTT discovering unbypassed diodes and poor shielding techniques in a Daiwa power meter's 12-volt power input circuit. RF picked up by the power cord was rectified and mixed by the diodes, generating all manner of products. A single 0.01 uF capacitor at the connector solved the problem. This reinforces the need to bypass diodes and rectifiers connected unfiltered to external leads of any sort in order to prevent creating your own RFI. (Thanks, Tim K3LR)

==> CONVERSATION

With the annual tomfoolery festival at hand, what better than a bit of lyrical licentiousness from L1AR?

"A Call From A Two"

Cashed in from Johnny's "A Boy Named Sue <http://www.youtube.com/watch?v=_rleFAS_B04>" by Dr Beldar

My Elmer left town in seventy three
And he didn't leave much behind for me
Just a beat-up ol' rig and an case of gassy tubes.
Now, I don't blame him cause he run and hid
But the meanest thing that he ever did
Was before he left, changed my call to a two!

Well, he must o' thought that was quite a joke
And it got a lot of laughs from a' lot of folk,
It seems I had to fight each pileup through.
Some four would giggle and I'd get red
And some five would laugh and I'd smack my head,
I tell ya, life ain't easy if your call's a two.

Well, I General'ed quick and I Extra'd mean,
My fist got crisp and my ears got keen,
I'd roam from band to band with maxed-out gain.
But I made a vow on my amplifiers
That I'd put mobile rigs in all my cars
And find that lid who gave me that radio name.

Well, down on 75 in mid-July
And I just tuned up and my log was dry,
I thought I'd go and call a short CQ.
>From a one by three all buckshot 'n mud,
There came a signal that chilled my blood
>From the dirty, mangy dog who made me a two.

Well, I knew that voice was my Elmer man
>From old reel-to-reels I'd kept on hand
And I knew that I could just go and QSY.
He was broad and raw and sounded old,
But I called him back as my blood ran cold

And I said: "My call's a two! How do you do!
Now you're gonna die!!"

Well, I punched up the gain with extra highs
And he started to fade but to my surprise,
He disabled ALC and blasted right into my ear.
But I turned up my drive to red LEDs
And we clobbered a net that was runnin' up three
Yellin' and a' cussin' in the crud like a couple CB'ers.

I tell ya, I've worked bigger lids
But not since you and I were kids
He splattered like a fool, he warn't no audiophile.
I heard him laugh and then I heard him cuss,
He went for his key but I used mine first,
He sent a shaky AS and I knew he smiled.

And he sent: "Son, this band is rough
And if a ham's gonna work it, they gotta be tough
And I knew I wouldn't be there to help ya along.
So I got ya that call and I moved my hide
To a quiet QTH with no RFI
And it's the number two helped to make you strong."

He sent: "Now you just fought one hell of a fight
And I know you hate me, and you got the right
To not send a QSL, I wouldn't blame you if you do.
But ya ought to thank me, before I die,
For the contacts in ya log made you Honor Roll high
Cause I'm the son-of-a-lid that got you that two."

I got all choked up over what he'd done,
And I called him Elmer, and he called me his son,
And I came away with a different point of view.
And I think about him, now and then,
Every time I call and every time I win,
And if I Elmer anyone, I think I'm gonna get 'em
An eight or six! Anything but a two! I still hate that call!

73, Ward N0AX

==> CONTESTS

28 March through 10 April 2012

An expanded, downloadable version of QST's Contest Corral in PDF format
<http://www.arrl.org/contest-calendar> is available. Check the
sponsor's Web site for information on operating time restrictions and
other instructions.

HF CONTESTS

FOC QSO Party--CW, from Mar 31, 0000Z to Mar 31, 2359Z. Bands (MHz):
1.8-28, 50+. Exchange: RST, name, FOC nr if member. Logs due: 7 days.

Rules <http://www.g4foc.org/>

Lighthouse Spring Lites QSO Party--Phone, CW, Digital, from Mar 31, 0001Z to Apr 8, 2359Z. Bands (MHz): 1.8-28. Exchange: ARLHS number or serial, name, S/P/C. Logs due: 12 days. Rules <http://arlhs.com/>

MO QSO Party--Phone, CW, from Mar 31, 1800Z to Apr 1, 0500Z and Apr 1, 1800Z to Apr 1, 2359Z, multiple operating periods. Bands (MHz): 1.8-28. Frequencies: CW 1.820 and 40 kHz from band edge; Phone--1.880, 3.825, 7.220, 14.250, 21.380, 28.350. Exchange: RS(T), serial, MO county or S/P/C. Logs due: May 1. Rules <http://www.w0ma.org/>

ARS Spartan Sprint--CW, from Apr 3, 0200Z to Apr 3, 0400Z. Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

OK1WC Memorial Contest--Phone, CW, from Apr 3, 1600Z to Apr 3, 1659Z, first through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50,144, Frequencies: Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

SNS and NS Weekly Sprints--CW, from Apr 6, 0200Z to Apr 6, 0300Z. Bands (MHz): 1.8-14. Weekly on Thursday evenings local time. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/rules.html>

Montana QSO Party--Phone, CW, Digital, from Apr 7, 0000Z to Apr 8, 0000Z. Bands (MHz): 1.8-28, 50-432, Frequencies: CW-1.81, 3.54, 7.035, 14,04, 21.05, 28.05 SSB - 1.845, 3.810, 7.244, 14.262, 21.365, 28.325. Exchange: RS(T), S/P/C or MT county. Logs due: May 31. Rules <http://www.fvarc.org/>

LZ Open 40 Meter Contest--CW, from Apr 7, 0400Z to Apr 7, 0800Z. Bands (MHz): 7. Exchange: 6-digit serial and serial from previous QSO. Logs due: 10 days. Rules <http://www.lzopen.com/>

Japan International DX Contest--CW, from Apr 15, 0700Z to Apr 16, 1300Z . Bands (MHz): 1.8-28. Exchange: RST, JA prefecture or CQ Zone. Logs due: 30 days. Rules <http://jidx.org/>

PODXS 31 Flavors Contest--Digital, from Apr 7, 12 Noon to Apr 7, 6 PM. Bands (MHz): 14. Frequencies: 14.070-14.080. Exchange: S/P/C and name or 070 number. Logs due: May 9. Rules <http://www.podxs070.com/>

QRP ARCI Spring QSO Party--CW, from Apr 7, 1200Z to Apr 8, 2359Z. Bands (MHz): 1.8-28. Frequencies: QRP calling frequencies. Exchange: RST, S/P/C, power or QRP ARCI number. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

SP DX Contest--Phone, CW, from Apr 7, 1500Z to Apr 8, 1500Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or SP province. Logs due: Apr 30. Rules <http://www.spdxcontest.info/>

EA RTTY Contest--Digital, from Apr 7, 1600Z to Apr 8, 1600Z . Bands (MHz): 3.5-28. Exchange: RST, serial or EA province. Logs due: Apr 21. Rules <http://www.ure.es/contest>

Low Power Spring Sprint--CW, from Apr 9, 1400Z to Apr 9, 2000Z . Bands (MHz): 1.8-28. Exchange: RST, grid square, category. Logs due: 30 days. Rules <http://alexanderkorda@hotmail.com/>

VHF+ CONTESTS

Worldwide EME Contest--Phone, CW, from Mar 31, 0000Z to Apr 1, 2400Z. Bands (MHz): 144, 10G+. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

FOC QSO Party--CW, from Mar 31, 0000Z to Mar 31, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, name, FOC nr if member. Logs due: 7 days. Rules <http://www.g4foc.org/>

OK1WC Memorial Contest--Phone, CW, from Apr 3, 1600Z to Apr 3, 1659Z, first through fourth Monday of each month; see website for bands. Bands (MHz): 3.5, 50,144, Frequencies: Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

Montana QSO Party--Phone, CW, Digital, from Apr 7, 0000Z to Apr 8, 0000Z. Bands (MHz): 1.8-28, 50-432, Frequencies: CW-1.81, 3.54, 7.035, 14,04, 21.05, 28.05 SSB - 1.845, 3.810, 7.244, 14.262, 21.365, 28.325. Exchange: RS(T), S/P/C or MT county. Logs due: May 31. Rules <http://www.fvarc.org/>

VHF Spring Sprints--Phone, CW, Digital, from Apr 9, 7 PM to Apr 9, 11 PM. Bands (MHz): 144. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

Welsh Politician to Visit Amateur Radio Station

Posted: 26 Mar 2012 11:42 PM PDT
http://forums.qrz.com/showthread.php?339737-Welsh-Politician-to-Visit-Amateur-Radio-Station&goto=newpost

Conservative North Wales Assembly Member, Mark Isherwood has been invited by MW1CFN to better understand modern amateur radio by visiting a welsh station.

Mr. Isherwood readily accepted the invitation, whereby it is hoped a positive image of our hobby can be put forward.

mark-isherwood.jpg

John Rowlands, MW1CFN says "Mark Isherwood is a very hard working politician and takes a genuine interest in the activities within his area. He is enthusiastic to find out more about a hobby that is not always as well-presented in the public imagination as it could be."

Mr. Rowlands continues "In particular, it is clear that permitted development rights within the planning system, despite some lobbying by the RSGB, have yet to accommodate the needs of the amateur community in the UK, despite the widespread popularity of the hobby. I hope Mr. Isherwood's visit will mark the beginning of a process to clarify and improve planning law for amateurs throughout the UK.

Mr. Isherwood's visit is currently being arranged with his office, and likely to take place in a few weeks' time.

AMSAT NEWS SERVICE

ANS-085

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Volunteers are needed to help at the AMSAT booth at Dayton. Gould WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor http://www.amsat.org/amsat-new/hamve...012/Dayton.php for the latest AMSAT at Dayton news and developments.In this edition:

* AMSAT-NA BOD Nominations Due

* ARISS Mentor Introduction at Dayton 2012

* NASA'S GRAIL MOONKAM Returns First Student-selected Lunar Images

* Satellite Operation Planned for UK Olympic Special Event Station

* Masat-1 Experiment Required Silent Mode for a Short Period of Time

* HAMSAT VO-52 User Reports Requested

* Satellite Shorts From All Over

* 2012 AMSAT-NA Symposium Update

* New Feature For SatPC32 Adjusts Doppler From Satellite Point of View

* ARISS Status Report - 19 March 2012

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors have terms expiring this year: Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternates for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

ARISS Mentor Introduction at Dayton 2012

AMSAT and ARRL are teaming up during the 2012 Hamvention to recruit new ARISS (Amateur Radio on the International Space Station) mentors. Friday and Saturday (May 18 & 19) at 4pm in the ARRL stage area AMSAT will explain the need for additional ARISS mentors and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups. We encourage anyone interested in helping make future school contacts with the ISS successful to please attend.

[ANS Thanks the ARISS Team for the above information]

NASA'S GRAIL MOONKAM Returns First Student-selected Lunar Images

WASHINGTON -- One of two NASA spacecraft orbiting the moon has beamed back the first student-requested pictures of the lunar surface from its onboard camera. Fourth grade students from the Emily Dickinson Elementary School in Bozeman, Mont., received the honor of making the first image selections by winning a nationwide competition to rename the two spacecraft.

The image was taken by the MoonKam, or Moon Knowledge Acquired by Middle school students. Previously named Gravity Recovery And Interior Laboratory (GRAIL) A and B, the twin spacecraft are now called Ebb and Flow. Both washing-machine-sized orbiters carry a small MoonKAM camera. Over 60 student-requested images were taken aboard the Ebb spacecraft from March 15-17 and downlinked to Earth on March 20.

"MoonKAM is based on the premise that if your average picture is worth a thousand words, then a picture from lunar orbit may be worth a classroom full of engineering and science degrees," said Maria Zuber, GRAIL mission

principal investigator from the Massachusetts Institute of Technology in Cambridge, Mass. "Through MoonKAM, we have an opportunity to reach out to the next generation of scientists and engineers. It is great to see things off to such a positive start."

GRAIL is NASA's first planetary mission to carry instruments fully dedicated to education and public outreach. Students will select target areas on the lunar surface and request images to study from the GRAIL MoonKAM Mission Operations Center in San Diego.

The MoonKAM program is led by Sally Ride, America's first woman in space, and her team at Sally Ride Science in collaboration with undergraduate students at the University of California in San Diego. More than 2,700 schools spanning 52 countries are using the MoonKAM cameras.

"What might seem like just a cool activity for these kids may very well have a profound impact on their futures," Ride said. "The students really are excited about MoonKAM, and that translates into an excitement about science and engineering."

Launched in September 2011, Ebb and Flow will answer longstanding questions about the moon and give scientists a better understanding of how Earth and other rocky planets in the solar system formed.

NASA's Jet Propulsion Laboratory in Pasadena, Calif., manages the GRAIL mission for NASA's Science Mission Directorate in Washington. GRAIL is part of the Discovery Program managed at NASA's Marshall Space Flight Center in Huntsville, Ala. Lockheed Martin Space Systems in Denver built the spacecraft.

To view the student-requested images, visit: http://images.moonkam.ucsd.edu

For more information about MoonKAM, visit: https://moonkam.ucsd.edu

For more information about GRAIL, visit: http://www.nasa.gov/grail

[ANS thanks NASA and Michael Williams, K9QHO for the above information]

Satellite Operation Planned for UK Olympic Special Event Station

This week John Warburton, G4IRN announced The Radio Society of Great Britain will activate two special event callsigns to celebrate the London 2012 Olympic and Paralympic Games:

2O12L (Two Oscar One Two Lima) from London, England2O12W (Two Oscar One Two Wales) from Barry, Wales

The London station, 2012L will be active through the duration of the Games, located at the historic Eltham Palace, south-east London on 160m-2m, all modes. More information on the web site: http://www.2O12L.com

The Welsh station 2O12W will also be active on all bands from 160m to 23cms and all modes including SSTV and satellite from Whitmore Bay, Barry Island, Vale of Glamorgan, Wales. More information on web site: http://www.2O12W.com.

2012L and 2012W go on the air on 27th July 2012.

[ANS thanks The Radio Society of Great Britain and Southgate News for the above information]

Masat-1 Experiment Required Silent Mode for a Short Period of Time

Masat-1 (MO-72) recently has been switched to a 'silent mode' on March 16, March 21, and March 22 to perform long term, sensitive electromagnetic measurements which require the switching off the satellite's transmitter. In silent mode, all RF transmission from the satellite is turned off, while the satellite receiver makes the required measurements. After these experiments regular telemetry transmission resumed operation.

MO-72 Call sign: HA5MASAT

TX frequency: 437.345 MHz

Modulation: CW (120 char/min.), 2-GFSK (625 and 1250 bit/s) TX

power: 100 and 400 mW

Soundcard software to capture and decode the GFSK telemetry can be downloaded from: http://cubesat.bme.hu/en/radioamatoroknek/ The latest keplerian elements are also available on this site.

[ANS thanks the Masat-1 Team and AMSAT-UK for the above information]

HAMSAT VO-52 User Reports Requested

AMSAT-India Secretary Nitin, VU3TYG says the user feedback form (in Word format) requested by VO-52 controllers has been posted on the web for download from: http://www.amsatindia.org/reports/VO-52-Feedback.doc

HAMSAT VO-52 controllers at ISRO thanked amateur radio operators for the reports received after VO-52 was reactived with the Dutch Transponder. They are in the process of documenting anomaly analysis and Transponder 2 Switch ON' report containing the feedback from users.

Reports are requested to be sent in the Word format as attachments to e-mail sent to: tprangan@istrac.org and copied to wmy@isac.gov.in.

[ANS thanks AMSAT-India Secretary Nitin, VU3TYG and Mani, VU2WMY at India ISRO Satellite Centre for the above information]

Satellite Shorts From All Over

AMSAT to facilitate student satellite contacts at Dayton. All students attending the 2012 Dayton Hamvention are encouraged to come by the Satellite Demonstration Area just outside of the Ball Arena entrance and make a contact using the amateur satellites. There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes will try to get as many students as possible to complete contacts. There are lists of satellite pass times in the satellite demonstration area and at the AMSAT booth (BA444-BA449). (Gould, WA4SXM)
NASA released a new narrated animation depicting the planned 2014 launch of

the Orion spacecraft on the Exploration Flight Test-1 (EFT-1) mission to a 3600 mile altitude orbit:http://tinyurl.com/OrionOrbitTest (YouTube) Full article at: http://tinyurl.com/OrionArticle (UniverseToday)
Paul, 2E1EUB says his next mobile satellite operations as 2M1EUB from his van will be starting March 24 for 7 days from the east coast of Scotland. Main operations are planned for AO-7 Mode A/B and other satellites as available. Paul will post his latest information on amsat-bb and also on the lookup at QRZ.com for 2M1EUB.
The Project Blue Horizon 6 high-altitude transatlantic balloon flight took off on Friday, March 23 at 2300 EST (0300 Saturday UT) from Owego, NY transmitting on 7.1023 and 10.1466 MHz CW with the N2XE call sign and 144.390 MHz FM APRS using the KD2AUD call sign. Please send reports via e-mail to pbh18.data@gmail.com or manually enter received data points at http://www.projectbluehorizon.com/ More information is available on their web page.
Congratulations to Rick Walter, WB3CSY, for earning VUCC Satellite certificate #228 with 165 confirmed grids. Rick wrote, "I would like to thank the many satellite operators who continually take time to stop during their travels and give us rare grids. It would be much more difficult to obtain this prestigious award without their help."
The next Hudson Valley Satcom Net is Thursday March 29, 8:00PM EDT (UTC-4) on the 146.97 MHz Mt. Beacon ARC Repeater and also on the N2EYH-L Echolink Node. More information at: http://www.hvsatcom.org and http://www.wr2abb.org/ (Stu, WA2BSS)
Watch the BBC video of UKube-1, planned to launch in 2013: http://www.bbc.co.uk/news/uk-scotlan...-west-17439236 UKube-1 will carry a set of AMSAT-UK FUNcube boards that will provide a 435/145 MHz linear transponder for SSB/CW amateur radio communications. See also: http://www.uk.amsat.org/5933
John, K8YSE reported that Yuri, UT1FG/MM, who has been so active on the birds may be off the air for a short time. He is navigating the St. Lawrence Seaway and has been too busy to operate on the satellites. There are many inspection requirements for a ship coming into the Great Lakes and his duties are such that he does not have much free time. He will be in Montreal shortly. All of his equipment is working fine. Yuri will be operating as time permits.
The Winter 2012 TAPR Packet Status Register Journal now available for download: http://www.tapr.org/psr/psr117.pdf. You can download previous editions from http://www.tapr.org/psr.html. This quarterly Journal is full of Technical, Non-Technical and User Digital information and articles.
Watch a video of time lapse images from the ISS showing how stars appear from space: http://vimeo.com/ajrclips/starsfromspace. A jaw dropping flight of the ISS over the aurora can be viewed at: http://tinyurl.com/AuroraGreatLakes
USAF and Lockheed have Satellite Problems Too: http://tinyurl.com/milsat-rescue At least their problems had a happy ending.
New Echolink Net. Saturday evenings at 8pm Eastern. The NET is titled "SATCHAT". Check in at the AMSAT Conference on Echolink and join the conversations about satellites, ask questions and hear what other people in the country are doing for satellite activity. It is hosted by Vince Waelti,

K9TSU. Stop by and add your experiences to the group.

[ANS thanks everyone for the above information]

Symposium 2012 Monday Trip to the Kennedy Space Center

Those attending the 2012 AMSAT Symposium and interested in a Monday Trip (Oct 29) to the Kennedy Space Center please contact Martha via email: martha at amsat.org.

The trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus.

[ANS Thanks Gould, WA4SXM for the above information]

New Feature For SatPC32 Adjusts Doppler From Satellite Point of View

Erich, DK1TB has added a new feature into SatPC32 V12.8b which will allow adjustment for doppler shift between two separate stations so each will appear to be on the same frequency. From a ground station point of view each station will see a different doppler shift unless they are located physically near each other. What is desired is that both stations will appear on the same frequency from the satellite receiver's point of view.

The whole idea of doppler correction is to be at a constant frequency within the satellite receiver passband. To do that you have to adjust your uplink frequency constantly. And you have to adjust your downlink frequency to continue to hear yourself or someone else using full doppler correction.

Erich has now added the option of seeing the frequency you are on at the satellite receiver. This is a common frame of reference so if you tell someone you'll be on 435.845 at the satellite, they can be on that same frequency even though your terrestrial dial frequencies will be much different. Just adjust your receiver or use the up/down buttons in SatPC32 to set your frequency shown in the "Sat" window. That frequency will remain constant as your uplink and downlink are controlled by SatPC32.

Staying at a constant frequency at the satellite allows many stations to share the bird without drifting into each other. And being able to know exactly where you are in the passband without doing the calculation in your head gives you more time to concentrate on making a successful QSO.

This feature is implemented by loading a patch file for SatPC32, V12.8b which can be found in the "downloads" link at: http://www.dk1tb.de - Scroll down to Section 7, Patches.

Erich, DK1TB donates the proceeds from the sale of SatPC32 to AMSAT. When you purchase this software you are helping AMSAT. You can download the software from the SatPC32 website at: http://www.dk1tb.de/ A CD-ROM with the software is available from the AMSAT Store: http://www.amsat-na.com/store/item.php?id=100017 To activate the downloaded version of the program, you can purchase a registration code via the AMSAT

online store or by calling the AMSAT office. See:
http://www.amsat-na.com/store/item.php?id=100020

[ANS thanks John Papay, K8YSE for the above information]

(ARISS) Status Report March 19, 2012

1. Upcoming School Contacts

Centre de Formation de la Base Airienne de Payerne, Switzerland had an Amateur Radio on the International Space Station (ARISS) contact on Wednesday, March 21 at 08:39 UTC. The contact was held in the museum "Clin d'Ailes", located on the Payerne Swiss Airforce Base that has on display military aeronautics exhibits from the second half of the 20th century. Mr. Claude Nicollier, HB9CN, who is the first Swiss astronaut and president of the Museum Foundation, attended the event. The Clin d'Ailes Swiss Air Force Museum Ham Radio Club, holding callsigns HB4FR and HB9SPACE, set up its radio for the contact. Students launched a stratospheric balloon equipped with video and photo cameras and sensors and beacons two weeks prior to the event. After the ARISS contact, they presented the videos, photos and the analysis of the recorded sensor data.

Salem Elementary School in Apex, North conducted an ARISS contact on Wednesday, March 21 at 14:09 UTC via station VK5ZAI in Australia. This contact is part of a comprehensive education plan which will pique students' interest in Science, Technology, Engineering and Math (STEM).

2. Liberty Junior High Radios Don Pettit on ISS

Students attending Liberty Junior High School in Burbank, Illinois experienced a very successful Amateur Radio on the International Space Station (ARISS) contact on Wednesday, March 14. Over 800 students, teachers and guests were present as students put their questions to astronaut Don Pettit, KD5MDT on ISS. The ARISS contact highlighted the school's comprehensive education plan covering Science, Technology, Engineering and Math (STEM) subject matter. Other activities students participated in included investigating thermal properties of different materials, building models of the ISS and exploring the cast distances of space and the effect of distance and radio waves.

3. Belgium Contact Successful

An Amateur Radio on the International Space Station (ARISS) contact was held on Friday, March 16 between Middenschool de Regenboog Bree in Bree, Belgium and on-orbit astronaut Andri Kuipers, PI9ISS. A newly licensed 14 year girl operated the radio during the event while students had all 15 of their prepared questions answered. The contact was carried out as part of a curriculum covering the micro-gravity environment, history of manned spaceflight, commercial spaceflight and the construction of the ISS.

4. Leone Acciaiuoli Students Question ISS Astronaut

On Sunday, March 18, Dan Burbank, KC5ZSX fielded ten questions from youth attending the Istituto Tecnologico Statale Trasporti e Logistica "Leone

Acciaiuoli" in Ortona, Italy via an ARISS contact. Approximately 200 people were in attendance, including representatives from two television stations. AMSAT-Italia also provided coverage, streaming video on the Internet. The contact complemented science courses taught at the school such as Navigation, Astronomy, Mathematics, Physics and Satellite Communications and was a featured activity during the International Day of Planetaria.

5. ARISS-U.S. Schools Selected

The NASA Teaching From Space office received 27 U.S. proposals for ARISS contacts that will be scheduled during the second half of this year. The U.S. Selection Committee reviewed the proposals and selected 18 schools for these contacts. The schools will be notified of their status earlythis week.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.73,

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** DXCC: ZP; 2M EME

Greetings from Paraguay! Sadly today's operation trying for VE, VK, ZP,
and JA only gave us a few broken sequences that could be decoded.

My next dates both look good for EU and maybe for the U.S.

April 3 1930z (my moonrise) for as long as our battery holds out.

April 6 2130z (my moonrise) again for a long session.

I would prefer not to take skeds for these two dates. I will try to work
whoever has the best decode. The frequency will be 144.141 and I will
transmit first.

The weekend of April 7th and 8th is not possible for me. I hope the 3rd
and 6th will produce a lot of QSOs and a new country for many of you!

73 and hope to work you, de Steve ZP9EH
SOURCE MOON-NET

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: J5; square IK21DT; start 2012-03-23

LATEST NEWS by Renato, I3EJ, dated 2012-03-25:

They had first QSO with I3MEK on sunday at 19.30; problems with power
line. Monday on air at moon rise on 144.

NEWS by Lucio, I3LDP, dated 2012-03-13:

Another update prior to departure for J5.
The whole team is very excited waiting for the departure.
Today visas arrived from the Consulate of Guinea Bissau.
We are preparing the equipment.
Latest tests are positive, also the home-made 5 elements
LFA antenna for 6 m works perfectly and we'll try to use it
on EME in the last days of the expedition, when the Moon conditions
will be better, with HM preamplifier and Acom 1000 PA.
We are still waiting for the 430 preamplifier, while the TX
system is ready with antenna and 700W amplifier by ITB mod. Colibri'.
144MHz are ready: antennas are OK as is the Pre by WA2ODO and 1Kw PA
by Nico of ITB mod. Colibri'.
HF are OK with 2 Kenwood 590s, antennas: 3 el. for 10/15/20 mt and Spiderbeam
(WARC frequencies), Delta Loop, Dipole for 40/80/160 mt.
We'll operate all modes on HF, in order of preference: CW, RTTY, PSK31, SSB.
A microscope for the Cumura hospital was purchased with the received donations.
The calls J52EME for EME activities and J52HF for HF and
6m (tropo and sporadic-E) are confirmed.
For more info see our website http://www.ari.verona.it/veronadxteam/en/ or
http://www.mmmonvhf.de/

We expect to listen to you in the pile-up from Guinea Bissau ! 73

Lucio I3LDP Team Leader Verona DX Team

Hello OM,
everything is ready for the J5 Guinea-Bissau DXpedition.
We finally received all the permits from the authorities in Bissau.
The calls J52EME for V-UHF and J52HF for HF are confirmed.
Two groups will operate simultaneously, with preference to the most
difficult communications, ie EME.
After much work we can announce that we'll be active on:
144 MHz with 2x8 xpol, preamplifier gift of WA2ODO, amplifier ITB
Colibrï¿½ 1kw.
432 MHz with 2 homemade LFA antennas 18 elements, yet to be found
preamplifier, amplifier ITB Colibrï¿½ 600w.
50 MHz, homemade LFA antenna 5 elements, amplifier ACOM 1000, homebuild
preamp MGF1302.
In the beginning was our intention to just operate 2m EME, but we have
received many requests for both 70cm and 6m, so we hope to please everyone.
In the first few days we'll be active on 144 MHz EME and HF, with some
jump on 6m Supertropo and ES. Then we'll pass on 430 and 50 MHz. We'll
try to satisfy everyone.
Just on arriving a group will start to create an internet connection
for the hospital, so we can use it too.
Frequencies:
144,130, 432.900 and 50.200. We'll call always in the even period.
Thanks for the help that you'll can give to our humanitarian/ham-radio

expedition.
Renato I3EJ we'll keep you informed during the DXpedition on our site:
http://www.ari.verona.it/veronadxteam/en/index.htm
and email questions to: veronadxteam@ari.verona.it

See you soon from J5 !

Hermann DL2NUD, and Peter DJ4TC will try to be active from Vietnam on EME

LATEST NEWS by Hermann, DL2NUD, dated 2012-03-13:

Hermann did send the latest information about RIG QRGs and Activity Times:
144.144 MHz 17el yagi, db6nt preamp, hlv2000 beko
432.090 MHz 38el yagi, db6nt preamp, 50 W
1296.120MHz 62el yagi, db6nt preamp, 400 W
They will try to be qrv: 28.3 - 10.4 in OK10 / 12.4 - 20.4 in OK20

MAIN NEWS:

The Team plan to be qrv from 28.03. until 20.04. as XV4HP (DL2NUD) and as
3W4TC(DJ4TC).
Maybe 2 Squares will be activated: OK10 and OK20 from Island of Phuqouc on
2m 70cm und 23cm
More Infos will follow if closer the dates...

SOURCE: tnx to Hermann, DL2NUD, direct to MMMonVHF

FG4KH back again QRV 144 MHz EME

LATEST NEWS from Phil, F1DUZ, dated 2012-03-17:

Operation details :
Call sign : FG4KH
Rig: FT897D, LNA, SSPA 500w, 2x10Xpol DK7ZB
QRG: 144,116 MHz , if any changes due to birdies I?ll advise you
FG4KH TX always 1ST Period
If necessary, I repeat sequences 3 times but not more. If I do not
receive confirmation after 3 times, I jump to another station so you
will have to call me again.
Usaually I do not send 73
No restriction, you can call any time
Don?t forget to spread out between ï¿½ 600Hz.
In this second activity I will try to satisfy all but in first those
who are not in the first log.
It is an holiday style activity,you will find infos on MMMonVHF about
schedule, events and quick log. All others infos and complete log
will be in the expedition web site (see the link below).
See you soon from French West Indies
73

E2E EME-DXpedition in Thailand around April 2012
Karsten will try to setup a MMMonVHF DXBlog to spread his latest News.

LATEST NEWS from Swen, HS0ZFZ, dated 2011-12-24:

The Radio Amateur Society of Thailand Under the Patronage of His
Majesty the King - HS1A - The clubstation of RAST ? HS0AC ? was
submerged by 2m of waters during the previous century flood ? which
was in the media worldwide - I believe ? some pictures of the club
station after the water tide was gone ? www.qsl.net/RAST or RAST
forum.com RAST and HS0AC lost equipment worth around 200,000 USD
(150.000 Euro) incl. our mainstation rig FT-1000 MK Mark V ? which
is believed will not be able to be repaired. RAST settle up an
account for donations to help the clubstation getting back on air
soon. Donations could be done directly to the club or via paypal
to donate@rast.or.th (wrong in the Newsletter!).
There is also a EME activation ?E2E? planned
during April to help to raise some funds for HS0AC

** DXCC: EY; square MM48; start 2012-04-27

>From April 27 untill April 29, Frank, DL8YHR, and Rene, PE1L, will be
active from Tadzjikistan via EME. The callsign is EY8ZF the locator is

MM48jn near the city of Dushanbe and Dushanbe airport.
Frequencies: 144.134 and 432.090, EY will TX always first.
They will be on N0UK logger. They are only 2.5 moonpasses QRV so do not
miss them. Check the logger for last minute changes in frequency.
More info on:
http://www.emelogger.com/ey/default.asp?page=eme

SOURCE: Frank, DL8YHR and Rene, PE1L, direct to MMMonVHF

** DXCC: 5X; square: KJ60; start 2012-05-25

After some very successfull DXpeditions to the Gambia past year (C56EME
with
361 inits on 144 MHz, a worldrecord, and 11 inits om 432 MHz), Bonaire
(PJ4X)
and Curacao (PJ2/PE1L), Rene, PE1L will now try again to make
Moonbounce QSO's
from Uganda on 144 MHz and 432 MHz. Uganda the pearl of Africa.
This time Eltje PA3CEE will join the party again. He was also joining in
Kenya
(5Z4EME 2009), Mauritius (3B8EME 2010) and the Gambia (C56EME 2011).
Don't change a winning team!
We will be QRV moonbounce 2 meter as 5X1EME, a special moonbounce permit is
requested.
If all ok we will have a small 70cm setup with us.

From May 25th (Eltjes birthday!) 5X1EME will be active
from Uganda on 144 MHz moonbounce. The locator will be KJ60gh, near
Kampala on
the equator.

The plan is to leave May 21st and build up the station before the
weekend. It's
just the two of us but we know what we are doing.
It's a hard job to get the license there. Callsign is still a bit
insecure but
we have good faith in obtaining 5X1EME.
We want to be active at least during two whole weekends when there is
good activity in combination with good moon conditions.
Last operation presumably June 3rd.

Internet possibility is unsure but we try to send at least once a day a
update
via MoonNet, MMMonVHF and our mailinglist.

If internet will be low, we will try (one way) communication through
Twitter: http://twitter.com/#!/PA3CEE and
http://twitter.com/AtleticoTeamExp in order to inform with short messages.

Frequency:
We always TX and RX 144.134 MHz

We use 1 minute periods and we will TX always first.

Setup:
2 x 8 Xpol yagi
400 watt amplifier and a low NF preamp (WA2ODO)

Welcome to Uganda moonbounce site! http://www.emelogger.com/uganda

This is our fourth DXpedition to Africa. Africa came into our blood. We
have to
come back as often as possible. We can't resist....

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012

Hello! Well, I wanted to provide as much advance time as I could so you could
mark your calendars and/or get everything in your 6m station optimized by the
end of August As those of you know who completed JT65A mode contacts with
me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be
active during our common moon windows - especially during the optimum days of
the month for 6m EME. The callsign is not in hand yet (but assured by email),
and the QTH has not been finalized, but all the plane tickets have been purchased
(as usual, any contributions are VERY welcome), and the equipment (a KX3 portable
transceiver with compatible 6m amplifier) is in the works. As soon as the license
is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:

http://www.bigskyspaces.com/w7gj/Niue2012.htm

I don't know if it will be possible to find a QTH that provides my usual preference
for a takeoff shot over water on moonrise. However, that is not necessary to work
NA stations during their moonsets (I will be elevating), so we will get the ground
gain on YOUR end for that And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset
over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period,

as we did together from E51 and 3D2; Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

Fisher's Ghost Amateur Radio Club Hosting Exhibition at Library:

Posted: 27 Mar 2012 05:54 PM PDT
http://www.eham.net/articles/27984

Did you know there was such a thing as social networking long before Facebook or Twitter were even dreamed of? Amateur radio enthusiasts have been using electronics to communicate with people across the globe for nearly a century. The Fisher's Ghost Amateur Radio Club will be displaying a range of electronic devices at Campbelltown Library until March 31. Club treasurer Lynn Kelly said the group's members had provided a grand collection of about 30 radio devices dating back as far as the 1930s.

//
New Ham Radio Club Hosts 'Field Day' March 31:

Posted: 27 Mar 2012 05:53 PM PDT
http://www.eham.net/articles/27983

When disaster strikes and traditional communications, like telephones, are knocked out, ham radio operators are among the first to step in to fill the gap. About 30 area operators have started a new club, called the Grayson County Amateur Radio Society. It will be hosting a field day from 8 a.m. to 1 p.m. Saturday, March 31, at the merchants' building at the Grayson County Fairgrounds. Club secretary Roy Herman said the primary goal for the field day is for members to practice emergency preparedness. But it's also a chance to demonstrate what they do, and what can be done, with ham radios and a chance for those interested in becoming operators to ask questions and get some hands-on time with equipment. "This is a great opportunity for people to get hands-on experience, especially young people," he said. Besides having a radio set up for local communications, the operators may be able to reach their international counterparts depending on weather conditions, he added.

//
Getting The Word Out When All Else Fails:

Posted: 27 Mar 2012 05:51 PM PDT
http://www.eham.net/articles/27982

In times of emergencies, seconds and minutes matter. It's especially true in an area where vast forests, high ridges and low-lying areas can cripple normal radio and cell phone reception. And in turn, delaying or losing

contact can be the difference between life and death. That's about to change at Cumberland Falls State Resort Park, thanks to a United States Army MARS radio repeater which will be permanently installed within two to three months. The repeater will be placed on top of the park's water tower, which is located near the Dupont Lodge. Being atop one of the park's highest places will give an outstanding signal, and will link the region to state Emergency Management headquarters in Frankfort. In addition, the repeater will connect with trained amateur radio, or "ham radio" operators in the region, which can be used not only for severe weather spotting, but to alert the park on local, state and national emergencies. An added bonus will be the repeater's use in getting out emergency information on incidents affecting the park.

WIANEWS WEEK COMMENCING APRIL 01 2012.

WRC 12 ACMA DEBRIEF

RAOTC ON AIR MONDAY

Titanic - GB100MGY will be on 502 kHz

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING APRIL 1 2012.

WRC 12 ACMA DEBRIEF

The Australian Communications and Media Authority are holding an Industry
Debrief on the outcomes of the World Radiocommunication Conference 2012
Monday April 23.

Over 3000 participants, representing 165 out of ITU's 193 Member States
attended the four-week Conference.

The ACMA led a delegation of 41 representatives from government and industry
at WRC-12. The ACMA has managed a four year preparatory process leading to
the WRC where Australia developed positions relevant to all WRC-12 Agenda
items.

The ACMA Industry Debrief on WRC-12 is open to all interested persons and
will provide a comprehensive overview from the delegation representatives

of the outcomes of all Agenda items. A dominant feature of this conference was the Agenda for the next to be held in 2015. There was a strong sentiment to ensure the next WRC is not delayed and includes numerous issues of significance, perhaps none more so than Agenda item 1.1 to consider new candidate frequency bands for IMT and mobile broadband applications. or WRC-15.

The Industry Debrief will be held on Monday 23 April at the National Library Theatre Canberra from 10 am to 4 pm.

To register to attend the Industry Debrief please contact natalie.rissanen@acma.gov.au

Mention you heard about it on WIA National News, oh and all registrations must be received by 13 April for catering purposes.

LISTEN HEAR

If you are interested in how your signal is being received elsewhere, Grant, VK2GEL, would like to publicise the availability of remote controlled receivers located both within Australia and worldwide.

Please go to globaltuners.com for free sign up

RAOTC

Hello everyone, this is Clive VK6CSW with a reminder that tomorrow Monday April 2nd the Radio Amateurs Old Timers Club of Australia's monthly News and Information Bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions will be on 20 metres on 14.150 MHz upper side band at 0100 UTC beamed north from Melbourne for the eastern states and at 0200 UTC beamed westward for Western Australia.

Numerous local relays will take place on both VHF and lower HF frequencies. To find the times and frequencies for your area please visit the RAOTC website at www.raotc.org.au

Everyone, RAOTC Members and non-members alike, is invited to listen to this interesting half-hour of Old Timer news, information and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday April 2nd.

73 from Clive VK6CSW.

HAMS ACROSS AUSTRALIA.

VK1

The CRARC Committee has been offered the opportunity to have a familiarisation visit to the studio complex of Radio 1RPH the Radio Print Handicapped Network station on 1125AM in Canberra.

This is open to CRARC members, and family/friends on a first-come basis.

The event is being organised by Peter Ellis VK1PE who is a volunteer at
Radio 1RPH.

Please book via email to Committee@crarc.ampr.org

An early response will very helpful in planning the groups and timings so
please respond quickly.

Get along to the Urunga Radio Convention, it's on again this Easter weekend
that is Sat 7th and Sun 8th April at the Senior Citizens Hall Urunga.

The longest running Fox Hunt Field day in Australia with 2 days of
Fox Hunting, quizzes, raffles, and preloved gear, displays, Inquiries
welcome. Free tea and Coffee available for those registering,
(Numbers required for optional meal on Saturday night , (notify Committee)

The old cups from the early days are on display at the convention, and other
times at Ocean View Hotel where some of the early conventions were held.

An adjoining lounge for those that want to get away from the activities.

"Urunga" is a quiet village ideally suited to "Fox hunting" It's a very
relaxing Environment on the Kalang River, and has old style charm, ideal
for families.

Close by is Coffs Harbour and Bellingen, or perhaps a drive on "Waterfall
Way" to Dorrigo and the National Park Skywalk, picnic areas and lookouts,
Visit the Golf or Bowling clubs, or walk to the Ocean on the meandering
Footbridge for a spot of "surf fishing"

check "Urunga Radio Convention" web page.

Police Roundup http://www.vicpolicenews.com.au/

ANZAC day activation.

Leading the day in Victoria will be Mick VK3CH and tagging along will be
Johnno VK3FMPB and John VK3FEZZ. They will be situated at the old
Army Apprentices' school at Balcombe in Mount Martha, using Mace Oval
and the car park next to the oval.

These are about 200-300 metres south of Uralla rd., the Peninsula pistol
club, (the old Army 25m rifle range) and adjacent to Tal Tals Cr.

If you get as far south as the Balcombe Grammar school you are too far south.

A variety of bands including 40m hopefully 80m and VHF just for the fun of it including any other Mick (3CH) can come up with on the day.

If anybody could give them a call or even go down and say hi it will be appreciated.

More on AM for ANZAC Day later with Felix, VK4FUQ.

(VK3FMPB)

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP and I've been thinking.

I prepared this item back on the last day of the John Moyle Contest with the rain pouring down outside. The monsoon covering much of the north of the continent whilst a cyclone is wetting down the Pilbara. Current weather forecasts indicate more inclement weather to come.

Whilst contests provide a group activity for many clubs, I wonder how effective and how much participation is going to be available if the meteorologists are correct in that we should expect more dramatic weather more regularly?

Is there a solution to what could be a continuing disruption to contesting?

I'm not sure that we can find an answer to what must remain a conundrum.

Maybe all we can do is take things as they come and just accept that participation may continue to fall.

I'm Geoff Emery and that's what I think......how about you?

CLUBBING

Submitting news items

If you would like to submit news items for inclusion in the QNEWS broadcasts, please email your item in text to qnews@wia.org.au

Submit audio, read "how to submit items" on the weekly WIA news page. http://www.wia.org.au/members/broadcast/upload/

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of QNEWS.

HERVEY BAY

Hi, I'm Norm VK4NP, President of the Hervey Bay Amateur Radio Club and I'm inviting all presidents and executives to mark your calendars for a weekend to remember, as the Hervey Bay radio club presents the WIA presidents lunch to be held on the 21st of July 2012 in Hervey bay. Come and meet WIA president Michael Owen and other members. Also, president and executive members of the QLD advisory committee. Now that takes care of Saturday the 21st, now for Sunday the 22nd , come meet and greet at a free barby at the club house of the Hervey bay radio club, where we will be on air for the wia Queensland , 100th anniversary .
So mark your calendars guys, see you there.

2012 ROSS MEET THEVOICE BBQ REPORT

A beautiful Autumn Sunday perfected a wonderful day of fellowship at Ross a couple of Sunday's ago for those 70 Amateur Radio enthusiasts who signed the registration book with their family and friends bringing the total in attendance to an estimated 135.

Next year 2013, why not join them for the day or the week end, Ross has some very affordable accommodation available, cottages, Caravan Park, Motel, Hotel, but be aware there is a Town Market day on the Sunday that seems to attract the YL's!

Enquiries for 2013 may be addressed to Cedric VK7CL.

http://www.sewingcircle.org/

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

(EPISODE 1106)

Recently I had the opportunity to see some amateurs operating a special event station. Among the operators were a few young faces who had come into the hobby via the Scouts. Chatting away without a worry in the world I thought about an incident that I experienced a few months ago.

At the time I was set-up with my kit, parked, sitting in my car with my squid-pole making a 12 meter tall beacon for all manner of interested people to come past and ask me what I was catching with my fishing rod - which generally resulted in a good natured ribbing and a conversation about Amateur Radio, talking across the world, not unlike CB radio, building stuff and having fun.

Contrast this with a man and his two young charges who wide eyed approached and shuffled about wanting to ask questions. The man was not nearly as interested, in fact his whole demeanour was negative from the start. "What is that?" the young ones asked. "Well it's a big radio antenna that I use to

talk to people across the world."

His response was: "I don't need that, I
have a mobile phone." "Well, yes, but this will work in places and at times that a mobile won't." "Well, I don't need that." And with that the man stalked off towing his charges with him.

The thing that struck me in this interaction was that his charges were all but crestfallen. I wondered what their life might look like if the people around them had a sense of wonder and curiosity.

It occurs to me that the Amateurs I've met all appear to have that spark of curiosity and I wondered how many of them had noticed it.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Titanic - GB100MGY will be on 502 kHz

GB100MGY will be operating on 502 kHz from the Fort Perch Rock marine radio museum in the Wirral, UK during the Titanic commemoration.

Their website says:

"We have "special permission" from OFCOM to use the 501 to 504 kHz band from 12th to 18th April at FPR using GB100MGY. Please listen out on around 502 kHz CW. We will be on air on this frequency most evenings and overnight on 14th/15th April, the anniversary of the Titanic's sad demise.

We will be using Marine radio equipment from Marconi, JRC, Nera with a long wire between fort and lighthouse and a 6oo foot loop aerial around the fort.

For those of you without 500kHz we will be doing cross band QSO's on 3566 kHz or 7066 kHz. We also have a Kenwood TS570 100 watts transceiver which will be used on a vertical aerial for QSO's on all other amateur bands both CW and SSB.

GB100MGY

http://www.gb100mgy-fortperchrock.co.uk/

Peter Ellis VK1PE brings us a story of very complicated digital communications from the scientific world.

VK1PE:

The scientists and engineers at Fermilab near Chicago were having a little fun when they did this experiment. They used their neutrino beam to communicate.

Neutrinos are smaller than a millionth of that of an electron, the next lightest particle. About 50 billion natural neutrinos pass through your body every second, without affecting you.

Fermilab's neutrino beam is one of the most intense high energy neutrino beams in existence. A particle accelerator directs pulses of 120 GeV (billion electron volt energy) protons onto a carbon target every 2.2 seconds in pulses of about 8 microseconds long, and the collision produces huge quantities of highly energetic mesons that decay into muon neutrinos and other particles. The particle beam is then passed through 240 meters of rock, which absorbs all particles except the neutrinos. The average energy of the neutrinos is about 3 GeV. The MINERvA (Main INjector ExpeRiment for v-A) detector sees the neutrinos, and is designed to measure more than 16 million neutrino events during four years of beam time, or about one event every 8 seconds. During the neutrino communications experiment, the accelerator beam was being run at half intensity for the two hours of the experiment, in preparation for scheduled downtime, so one would expect a detection rate of about one every 16 seconds.

Dr Dan Stancil of North Carolina State University designed the experiment, after a former PhD student suggested the technique. He used on-off keying to send the word "neutrino" in a 5-bit subset of conventional ASCII code. This message of 40 bits was encoded using the NASA/ESA Planetary Standard, and then combined with a 64-bit pseudo-noise synchronization sequence, forming a 156 bit transmission which was transmitted by the neutrino beam for over 3,000 cycles. The data showed 15 frames to clearly be correctly synchronised, and the results from those frames were combined for the purpose of extracting the message. If any events were detected during a particular 8 microsecond pulse, it was counted as a 1, and otherwise as a zero bit.

Information theoretic analysis showed considerable robustness of the message transmission. After using the embedded error-correcting code, the effective information transmission rate was about 0.37 bits/pulse. Sending the message only three times would produce an accurate copy at the receiving end, but even two cycles gave 99 percent accuracy. When corrected for the message containing only 40 bits of information, the experimental data rate was estimated as roughly 0.1 bits per second.

Fermilab has shown that long-distance communication using neutrinos is possible, but only just, with current technology.

Important SOUTH AFRICAN licence information

Approximately 1,700 South African amateur radio callsigns have been marked by ICASA as 'lapsed'. This is as a result of the substantial clean-up that ICASA undertook during the last year.

This is a significant number of lapsed callsigns and many SA Amateurs have sometimes unwittingly allowed their licences to lapse. Those tuned in in ZS land right now may well be affected. As an example there are 43 paid up members of the SARL who no longer have valid licences.

For more information, you are urged to visit
www.sarl.org.za where you will find more information and what to do.

BBC TV - Wireless Power

The BBC TV show Click has examined how wireless charging could boost the electric car.

Imagine driving an electric car that recharges its batteries as it's being driven along the road. It may seem a distant dream but as Dan Simmons reports the technology that allows electric toothbrushes to charge without wires is being developed to provide power for a whole range of devices.

Nikola Tesla pioneered the idea of wireless power over a century ago.

NEWS FROM ARNEWSLINE USA

CREATING THE HAM RADIO TRIATHLON CONTEST

A new radio sporting event will begin in 2013. And it has its roots in sports history. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

It all started back in August of 2011. That was about when it occurred to Mike Balaskas, SV5BYR of Dodcanese, Greece, that a big Greek sponsored radio sport event was missing from international ham radio contest calendar. By the end of that September Balaskas' idea had matured and so the Ham Radio Triathlon Contest was born.

For those of you who do not follow the world of sports, a triathlon involves completion of three continuous and sequential endurance events. And as you have already guessed, it is a Greek word.

But unlike the world of athletics, those planning the Ham Radio Triathlon DX Contest had to change things a bit to make this activity become reality. In trying to simulate the original Triathlon athletic event, planners chose three major ham radio modes for the competition. For the initial outing these will be SSB, CW and RTTY.

The Ham Radio Triathlon will be a 24 hour non-stop event that will take place the first full weekend of February. It will debut next year on Saturday, February 2nd of 2013. And from what we have read of the proposed rules winning this one won't be easy but it sure looks like a lot of fun.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, on this side of the Atlantic and the Western part of the United States reporting from Scottsdale, Arizona.

SV5BYR says that there is still a lot of work to be done and more details to be announced. We suggest that you keep an eye on triathlon-dx-contest.blogspot.com in the coming months to learn more.

ICE GOAT 1 APRS BUOY GOES TO SEA OFF ALASKA COAST

A group of Oceanography and Aeronautical engineering students from the U-S Naval Academy have deployed a radio equipped ocean buoy rigged to monitor weather in the harsh conditions of the arctic.

Named Ice Goat 1, the buoy was placed off of the coast of Point Barrow, Alaska. Once the winter ice melts the buoy will begin its sea voyage.

In addition to its scientific monitoring gear, Ice Goat 1 carries an APRS beacon operating on 145.825 MHz. The position packets can be relayed via the International Space Station digipeater. However, as the ISS only rises 1.5 degrees above the horizon at arctic latitudes reports of direct reception of the 145.825 MHz beacon are being sought from any Alaskan, and eventually Pacific Northwest amateur radio stations that may be in range of Ice Goat 1. Reception reports go by e-mail to wb4apr@amsat.org

RSGB

Hermes SDR project

The Hermes SDR project that was detailed in RadCom in May 2010 by Phil Harman, VK6APH and Steve Ireland, VK6VZ is one step closer to fruition. There is now an interest list so that the number of boards to be manufactured can be determined.

Hermes is a Direct-Down Conversion receiver, a Direct-Up-Conversion 500mW transmitter and a gigabit Ethernet interface all on one board. Also on board is an RF-quiet switch-mode power supply, which allows Hermes to run from a single 13.8V DC source. You can register your interest at www.hansdr.com

VK Remembrance Day Contest August 11-12
WW International Lighthouse Lightship Wknd August 18-19

FISTS have sponsored a Titanic 24 Hour Sprint on Sunday the 15th April 2012. (0001 to 2359 U.T.C).

All licensed Amateur Bands except the WARC Bands.

Recognising the 100th anniversary of the loss of the RMS Titanic on the 15th April 1912. This event is to be a standard exchange, between stations.

Scoring: -
10 Points for any Titanic special events station
5 Points for a FISTS HQ Station (GX0IPX, GX3ZQS, MX5IPX, VK2FDU, ZL6FF, JL3YMV, KN0WCW)
3 Points for a FISTS Affiliated Club Station
2 Points for a FISTS Member
1 Point for a Non Member

Logs: - To include Date/Time/Call/Name/QTH/QRG/FISTS No/or Non Member Points.
by e-mail to m0bpt@yahoo.co.uk
in Excel/csv/tabbed word document format if possible.

To be received no later than 30th April 2012.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The DX Century Club (DXCC) is the premier Amateur Radio operating award.

Available to hams around the world, tens of thousands of awards have been issued since 1945 under the modern award program.

In 2012 the DXCC program is not only still thriving, but it is growing, both in participation and in numbers of award options. The addition of Logbook of the World and soon, the addition of an Online DXCC Application utility, will continue to help the program grow.

Some special event call signs will be activated to celebrate the London 2012 Olympic and Paralympic Games:

2O12L from London, England and 2O12W from Barry, Wales.

The London 2012 Inspire program has granted the Radio Society of Great Britain (RSGB) -- Great Britain's IARU Member-Society -- use of the "Inspire mark" for these stations.

Both stations will be on-the-air for the duration of the Games, July 27-August 12.

Museum Warships preparing for AM and CW on ANZAC Day -

Terry VK3UP has advised HMAS Castlemaine Museum Ship will be operational again this year for AM and CW on ANZAC Day.

Col VK4CU has confirmed that the Queensland Maritime Museum Association museum ship HMAS Diamantina VK4RAN will yet again be operational during AM and CW on ANZAC Day - mainly on CW on 7020 and 14051kHz.

Look out too for the special event station VI4MGY operational during Sunday 15th April, the 100 anniversary of the sinking of the Titanic.

It's also hoping that Museum Ships HMAS Whyalla,
HMAS Vampire and many other museum ships and military museums get up on

air for AM and CW on ANZAC Day.

Philippine Amateur Radio League 50th anniversary special event

Look for special event station 4G0LD to be active during 2012.

Activity is to celebrate the 50th anniversary of the Philippine Amateur Radio League (PARL).

QSL via the Bureau.

Also, the P.A.R.L. is sponsoring a commemorative Diploma for amateur radio stations that have established two-way communications with at least 12 QSOs with PARL members.

Look for more details at:
http://www.dx1l.dxhams.net/events.htm

GB80PW Practical Wireless 80th year

In the UK Ofcom have issued the special callsign GB 80 PW to Practical Wireless magazine. This special callsign is to celebrate the publication's 80th year in print.

Practical Wireless Magazine
http://www.pwpublishing.co.uk

Denmark has the Presidency of European Union from 1st January to 30th June 2012 and the callsign 5P12EU will be activated during this period. QSL cards will be available and there is an award scheme for working or hearing this callsign. For all details on QSLing, the award scheme and logs, check out www.5p12eu.dk.

9H3PP

>From Malta 9H3PP May 26th and 27th during the CQ WW WPX CW Contest. Activity outside of the contest will be on 6 and 12 meters, possibly 17 meters. qSL via HA5PP.

ZS4U will be operational portable 9Q6 from the Republic of the Congo until April 5th. Activity will be limited, probably mainly on the weekends and some days during the week.

Listen out for him between 1200 and 1600 UTC on 40 through 6 meters using CW, SSB and PSK31. QSL via his home callsign zs4u.

The special call sign EI100T has been issued for the year 2012 to commemorate the 100th sinking of the Titanic and Cork Radio Club members will operate EI 100 T throughout the year.

The main Titanic event will happen over the weekend of April 13/14th.

Christchurch ATV Station

Peter Robinson ZL3TJH runs an Amateur TV station in New Zealand's 615 MHz (Channel 39) amateur radio band. You Tube has a video telling how that allocation is threatened by the sell-off of TV frequencies.

ZL3TJH operates ATV from a corner of a bedroom at his Cashmere home. This amateur TV station is unique in New Zealand, but it needs community support if it is to survive the changeover from analogue to digital transition in 2013.

Those in the Casmere Zone can view the station on 615.25 MHz or on channel 39 UHF.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Mon Mar 26 marked the 99th anniversary of the first reported use of Amateur Radio in Emergency Communications.

Herbert Akerberg a 15 year old High School student was reported to use his radio in Columbus, Ohio during a flood. Akerberg went on to serve in the Army during WW I and worked at W.P.A.L. Radio in Columbus.

In 1942 the WPAL station building became the first location used by Universal Radio. Akerberg moved from WPAL to become V.P. of affiliate relations for CBS Radio and later the same office for CBS T.V.

MyGAREC 2012 is announced

The Global Amateur Radio Emergency Conference (GAREC), now coined as 'MyGAREC 2012', will be held at the Thistle Port Dickson Resort, Negeri Sembilan, from November 12 to 14. It attracts participants from around the world.

The first GAREC was in 2005 and is the premier annual event attended by those with an interest in amateur radio providing emergency communications during training exercises or in response to disasters.

MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference in Vietnam (November 5 to 9) which has as its theme disaster relief communications.

General information including information on the venue, registration fees and the tentative agenda and the registration forms will be posted on the website www.mygarec2012.com by the end of this month.

This website will be updated frequently to keep all updated with the latest news and program changes.

Among the draft topics to be discussed are the HF Emergency Operating Procedure, the Future of GAREC, presentations from the three regions of the IARU and also some presentations from societies with recent disaster relief communications operations.

For more information you may also email info@mygarec2012.com

WIA Annual Conference Mildura

May 25th, 26th and 27th 2012

Details for the WIA 2012 Annual Conference being held in Mildura are on wia.org.au

Host club is Sunraysia Radio Group, led by Garry Briant VK3KYF and Noel Ferguson VK3FI.

WIA Members who register for the event will be able to participate in a range of fascinating and memorable activities.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

==> + ON THE AIR: NTIA -- NO OBJECTION TO ADDITIONAL DATA MODES ON 60
METERS

In response to requests for clarification from the ARRL, the
National Telecommunications and Information Administration (NTIA) has
confirmed that it has no objection to the use of a broader range of
data emissions by amateurs on the five 5 MHz frequencies on 60 meters.
ARRL's original understanding was that the NTIA preferred that the use
of 2K80J2D emission be limited to Pactor III. The NTIA now says that
that is not the case. Read more here
<http://www.arrl.org/news/ntia-no-objection-to-additional-data-modes-on-60-me
ters>.

==> + ON THE AIR: ONLINE DXCC APPLICATION TO DEBUT APRIL 2

Beginning April 2 at 12:01 AM EDT (0401 UTC), the ARRL's new Online
DXCC tool will be ready to accept applications, allowing hams to supply
the data from traditional paper QSLs in a digital form to apply for a
new DXCC award or endorsement. Submitting a DXCC application using
Online DXCC is easier than making a paper application, saving both time
and money. Read more here
<http://www.arrl.org/news/online-dxcc-application-to-debut-april-2>.

==> + JOE WALSH, WB6ACU, IS AN ANALOG MAN

Grammy Award winning rock-and-roll legend Joe Walsh, WB6ACU, returns
with Analog Man, set to be released June 5. This is Walsh's first solo
album since 1992's Songs for a Dying Planet. According to Walsh's
website, Analog Man is both modern and timelessly soulful, packed with
Walsh's wit, charm and chops; it delivers an incredibly raw and
intimate sound. "It's been 20 years and I have a lot to say," Walsh
```

explained. "These songs [on Analog Man] come from the heart."

No stranger to the analog way of life, Walsh -- an ARRL Life Member -- enjoys operating on 75 meters AM. AM -- or amplitude modulation -- has been around the amateur bands since the 1930s. Its advocates say that AM offers a warm, rich audio quality that provides for more personal interaction and that AM's simplicity circuit design encourages hands-on restoration, modification and homebrew construction to an extent no longer found among contemporary radios. Many hams who operate AM say they enjoy the simple, roomy electrical and mechanical designs of the older radios, claiming that they can more easily be modified and tinkered with than their modern counterparts. Other enthusiasts claim that these vintage radios sound better than their silicon descendants, saying that the tube audio from vintage gear is "warmer" and more aesthetically pleasing than the audio produced by the typical modern transceiver. Read more here
<http://www.arrl.org/news/joe-walsh-wb6acu-is-an-analog-man>.

==> + ARRL HQ: TWO POSITIONS OPEN AT ARRL HQ

The League is currently looking to fill two open positions at ARRL Headquarters in Newington. One position is in the Membership and Volunteer Programs Department and the other is in the Education Services Department. Travel is required for these full-time positions.

MVP Awards and Programs Assistant

This person who fills this position will assist in all activities found within the MVP Department, with initial priority given to assisting with Logbook of The World (LoTW
<http://www.arrl.org/logbook-of-the-world>) support functions. Other duties include supporting the DXCC and other awards programs, W1AW station operations and contesting program support. Candidates should hold an Amateur Extra class license, participate in contests and DXCC, and be an experienced user of LoTW. A Bachelor's degree is preferred. Click here
<http://www.arrl.org/files/file/About%20ARRL/Employment/Awards%20and%20Programs%20Assistant%20%282%29.pdf>
for a job description.

Education Services Instruction and Resource Coordinator

The person who fills this position will, among other duties, identify, review and organize resources needed by license instructors, teachers and Scout leaders, develop curricula/lesson plans, instructional media for instruction of ham radio license and other ham radio related topics (including radio science and basic electronics topics for use by classroom teachers) and develop an orientation course for license instructors and materials for instructor training. Candidates should hold an Amateur Extra class license (or be willing to achieve this within one year from date of hire) and a wide range of operating experience. Experience with instructional media is a plus. A Bachelor's

degree, along with teacher certification (and/or experience as a teaching or training professional) with Amateur Radio, electronics, science or technology subjects is required. Click here <http://www.arrl.org/files/file/About%20ARRL/Employment/FT%20Ed%20Svcs%20Instruction%20and%20Resource%20Coordinator-announce%20Mar12%20%282%29.pdf> for a job description.

How to Apply

To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org>, or complete the application <http://www.arrl.org/files/media/News/Revised_Employment_Application.pdf>, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer.

==> + QST AUTHOR SERIOUSLY INJURED

Commander Richard Paton, USCGR (Ret) -- author of "Radio's Role in the Titanic Disaster" in the April 2012 issue of QST -- was seriously injured in a motorcycle accident in Tolland, Connecticut on March 22. He is in the Intensive Care Unit at Hartford Hospital.

"It was a great shock to hear the news," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Dick and his wife Carol live in the same town that I do and sit right behind me at church. I knew nothing about his article until it was in print, because I was in Geneva attending WRC-12 while the April QST was being put together. My congratulatory e-mail reached him while he and Carol were on a cruise in the Pacific. The accident occurred soon after they returned home."

Commander Paton, 67, was injured when his motorcycle collided with an automobile. At last report the accident was still under investigation.

"While Dick is not a radio amateur, his extensive maritime experience and inquiring mind combine to lead him to be curious about many of the things that intrigue us as hams," Sumner said. "I hope ARRL members who enjoyed his contribution to QST will join me in keeping Dick in their thoughts and prayers as he fights to recover."

==> SOLAR UPDATE

Tad "Never did Sun more beautifully steep <http://www.poets.org/viewmedia.php/prmMID/15877>" Cook, K7RA, reports: Eight new sunspot groups appeared this week, but the average daily sunspot number declined four points to 71.1, while the average daily solar flux rose by less than two points to 103.7. On March 22, three new sunspot groups appeared, numbered 1441, 1442 and 1443. Two more groups appeared on Friday, 1444 and 1445, while 1442 vanished from view. On March 24, group 1441 disappeared, and on March 25 new group 1446 emerged. On March 26, groups 1440, 1443 and 1446 faded away, but

1442 -- not seen since four days earlier -- re-emerged. On March 27, group 1444 disappeared and 1447 appeared, and on March 28 new group 1448 arrived. For the short term, planetary A index is predicted to be 10 on March 29, 5 on March 30-April 9, then 12 on April 10, and back to 5 on April 11-12, then 15 and 10 on April 13-14, followed by 5 on April 15-23. The solar flux prediction shows flux values of 110 and 115 on March 29-30, 120 on March 31-April 2, 125 on April 3-5, and a big jump to 140 on April 6. On April 7-11, the predicted solar flux is 130, 125, 120, 110 and 105. On April 12-15, the predicted solar flux is 100. It then goes to 105 and 110 on April 16-17, and back to 100 on April 18-21. Another broader peak of 140 is predicted for May 1-3. Look for more information on the ARRL website on Friday, March 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by William Wordsworth's Composed upon Westminster Bridge, September 3, 1802 <http://en.wikipedia.org/wiki/Composed_upon_Westminster_Bridge,_September_3,_1802>.

==> + ARRL TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, April 6. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Monday, April 9 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> LUXEMBOURG ISSUES STAMP TO CELEBRATE 75 YEARS OF AMATEUR RADIO

Founded in 1937, the Réseau Luxembourgeois des Amateurs d'Ondes Courtes (RL <http://www.rlx.lu/index.html>) -- that country's IARU Member-Society -- is celebrating its 75th anniversary. In honor of this milestone, Luxembourg's Entreprise des Postes et Télécommunications (P&TLuxembourg) has issued a .60 € postage stamp <http://www.pt.lu/portal/lang/en/Philatelie/stamps/pid/4292> (about 80 cents in US currency); P&TLuxembourg is that country's government owned corporation for mail and telecommunications. This is one of three commemorative stamps issued by Luxembourg in 2012 .

==> THIS WEEK IN RADIOSPORT

This week:

- March 31-April 1 -- Missouri QSO Party
- April 1 -- UBA Spring Contest (SSB)
- April 3 -- ARS Spartan Sprint

Next week:

- April 6 -- NCCC RTTY Sprint
- April 7 -- LZ Open 40 Meter Sprint Contest; PODXS 070 Club PSK 31 Flavors Contest (local time)

- April 7-8 -- QRP ARCI Spring QSO Party; SP DX Contest
- April 11 -- NAQCC Straight Key/Bug Sprint
- April 11-12 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 7 -- ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest-1>, Raleigh, North Carolina

6W, SENEGAL
Tony,F8ATS/6W, plans to become QRV from the Le Calao in holiday style
between Mar 30 and Apr 7. QSL via bureau to his homecall.

A3, TONGA, OC-049
Haru,JA1XGI, will be on the air as A35XG working mainly in CW and only
some SSB and digital modes on 20m-6m from Apr 2-9. Listen for him on:
SSB: 14175, 18135, 21260, 24940, 28450 kHz
CW: 10115, 14015, 18080, 21015, 24895, 28015 kHz
Data: 10140, 14088, 18102, 21088, 24920, 28088 kHz.
His equipment includes an IC 7000, a 2 ele yagi and a fishing rod ant.
QSL via homecall, LoTW. See also: http://www.geocities.jp/a35xgtonga

CN, MOROCCO
Richard,F8FGU, will be QRV as CN2RN in CW and SSB on HF from the
Atlas Mountains (Khenifra) in Morocco (Loc IM72er) from Apr 3-30.
QSL via homecall.

F, FRANCE
Elio,F/IZ2RLJ, and Max,F/IK1RGI, will be QRV from a glacier at the
Mont Blanc (4000m a.s.l.) on Mar 31 (or Apr 14). They plan to work
on 14277 kHz or 14287 kHz starting at 1400 UTC,
on 7167 kHz or 7177 kHz starting at 1500 UTC,
on 3667 kHz or 3677 kHz from 1600 UTC and from 1800-1900 UTC.
Their equipment is a FT-857, a 17Ah battery and a 10m fishing rod wire.

JA, JAPAN
The special event station 8J10SAI is activated until Mar 31 to mark
the 10th anniversary of the city of Saitama (capital of the prefecture
Saitama) in Kanto region on Honshu (AS-007, WLOTA 2376).QSL via bureau.

The special event station 8J6O is on the air till Dec 31 and celebrates
the 70th anniversary of the city of Omura (JCC 4205) in the prefecture

Nagasaki on Kyushu Island (AS-077, WLOTA 0963). QSL via bureau.

The special event station 8J7EQ remembers last year's big earthquake in
Japan in all modes on HF until Sep 30. QSL via bureau.

The special event station 8J7FUKKO is supporting the reconstruction
after the big earthquake and Tsunami of the city of Kesennuma (JCC 605)
in the prefecture Miyagi/Tohoku region on Honshu (AS-007, WLOTA 2376)
until Mar 11, 2013. QSL via bureau.

The special event station 8N1TW is active until Jul 28 to mark the
completion of transition to digital terrestrial TV broadcasting in JA.
"TW" implies Tower. QSL via bureau.

KH6, HAWAII, OC-019
"Yukon John",KL7JR, and his XYL Claire,WL7MY, are celebrating the
18th anniversary of the "US Islands Awards Program" signing NH7DX from
Big Island (OC-019, HI-025S) on 80-10m from Apr 1-15.
QSLs only direct via KL7JR, see QRZ.com. See: http://www.usislands.org

ON, BELGIUM
Flemish HAMs remember the centennial of the Titanic tragedy by
putting the three special event stations OO100MGY (QSL via ON3RAD),
OR100MGY (QSL via ON6KNH) and OT100MGY (QSL via ON4PRA) on the air
from Apr 1-30. See also: http://www.racd.be

PA, THE NETHERLANDS
Dick,PA2GRU, will sign PH100MGY to mark the centennial of the Titanic
tragedy as well from Apr 1-28. QSL via PA3CAL.

PJ2, CURACAO, SA-099
Jan-Willem,PJ2/PA7JWC, and YL Monique,PJ2/PD7DB, are working holiday
style in SSB/CW/RTTY/PSK on 80m-10m from the Piscadera Bay Resort on
Curacao (SA-099, WLOTA 0942, FK52MC) from Apr 2-9.
QSLs via homecalls, LoTW. See also: http://www.pa7jwc.nl

PY, BRAZIL
Ghis,ON5NT, plans to join the DXpedition to Gorriti Island (SA-039)
for three days starting on Mar 27 (see below at IOTA news).
After that he may show up as PY3/CX5DNT from Porto Alegre until Apr 14.
QSL via ON5NT.

XV, VIETNAM
Hermann,DL2NUD (XV4HP), and Peter,DJ4TC (3W4TC), plan to activate
Vietnam via EME from Grid Loc OK10 between Mar 28 and Apr 10 and from
Grid Loc OK20 from Apr 12-20. They will use 17 ele yagi, DB6NT preamp,
HLV 2000 Beko on 144.144 MHz; a 38 ele yagi, DB6NT preamp, 50 watts on
432.090 MHz and a 62 ele yagi with DB6NT preamp on 1296.120 MHz.

WORLD AMATEUR RADIO DAY
Apr 18 is the "World Amateur Radio Day". The International Amateur
Radio Union (IARU) was founded 87 years ago. The first amateur radio

satellite OSCAR 1 was launched into space on Dec 12, 1961, and the
second one OSCAR 2 on Jun 2, 1962.
Several IARU members will activate different special event stations
(e.g. 6H6IARU, 3G73IARU and LZ1WARD) throughout the year.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Mar 26 DIG-PA Contest
Apr 1 UBA Spring Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
EU-005, G/M, Great Britain: Somem members of the Medway Amateur Receiving &
Transmitting Society are using the special callsign GB5MW until Mar 31
from Fort Amherst (CASHOTA G449, Loc JO01GJ, WLOTA 1841). This call is
celebrates the 90th anniversary of the club. QSL via G5MW.
See also: http://www.cashota.co.uk and http://www.g5mw.org.uk

EU-022, JX, Jan Mayen Island: Svein,LA9JKA, is working from Olonkin Base
on Jan Mayen (EU-022, WLOTA 1454) from Mar 29 until Mar 20, 2013.
He will sign JX9JKA in all modes on all HF bands during his spare time.
QSL only direct via LA9JKA, no eQSL. Log will be uploaded to the LoTW.

EU-115, EI/GI/MI, Ireland: The special event station GI100MGY is working
from Belfast in April. MGY was the callsign of the Titanic which was
built in belfast in 1911. GI100 is a rare special prefix which was
issued for the project "WhiteStar". Activities are planned in all modes
on 80m-10m. They will make a radio silence for two minutes on Apr 15
at 01:47 am to remember the Titanic and their casualties. They will
work mainly in CW on Apr 14/15. QSL via GI4FUE (direct/bureau).

SA-039, CX, Maldonado/Rocha Department group: Some members of the Radio Club
Uruguayo and the Uruguay DX Group will use the callsign CW5GI from
Gorriti Island (WLOTA 2172, Loc GF25MA) on Mar 30/31 and Apr 1.
This is only the second time this island is activated. QSL via ON5NT.

NZART Headquarters Infoline Issue 248

30 March 2012
NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· From the President ZL1TGC

· Radio Scouting and IRLP

· FMTAG report

· UHF-VHF-SHF Contest Manager

· Jock White Field Day Report & Results

Debby says…All branch secretaries should this week, receive the branch circular which includes membership figures and remits for discussion.

Also included is the criteria for various awards that can be presented in recognition of members both within a branch and at national level. Please consider nominations and forward to me before 1 May 2012.

Talk soon….Debby ZL2DL

Repeater licensing from November 2012

A decision from February Face to face Council meeting which will have an impact on several branches is that repeater and beacon licences currently held in the name of NZART will be handed back to those Branches who own and operate our many repeaters, beacons and fixed links.

The current system of invoicing and renewals means a heavy administrative workload for FMTAG and also at headquarters at a time when subscription renewals are also being processed. This will mean that this coming November when the individual licences are up for renewal, each branch will receive the licence renewal invoice direct from the MED.

Branch secretaries will need to be aware of this and ensure that payment is made by the due date. Failure to do so may result in the licence being cancelled.

FMTAG will be contacting the Branches concerned to let them know of this change in licence ownership and to assist with the changeover.

If your Branch does not want to make payment direct to the MED, then the licence can stay in the name of NZART.

You will be advised of the requirement to make payment to NZART for the licence, and once paid, the fee will be paid to MED – this is the same as the process we have been using for the past several years, with one small change – your Branch will be invoiced for the full amount of the licence and the prompt payment discount offered by the MED will be retained by headquarters to offset the administrative overhead.

Can I encourage your Branch to look at taking ownership of the licence(s) when you receive the details from the FMTAG Secretary.

Vaughan ZL1TGC

NZART President

Radio Scouting IRLP Calling Channel

Radio Scouting and Jamboree on the Air now has a common meeting place for IRLP (Internet Radio Linking Project) contacts. Scouts and Scouters may simply connect an IRLP node to Node 9091, which is a dedicated Topic Channel for Radio Scouting. If you're looking for a contact, after connecting make yourself known by IDing and indicating your interest in a Radio Scouting or JOTA contact. Remember, "live" repeaters are involved, so please use proper identification procedures.

If no one is available, it's OK to remain connected. The next person to connect will similarly ID and a QSO can be established. Since this is a single channel, it's recommended that once contact is made, the two stations mutually agree on IRLP nodes, disconnect from the Topic Channel and connect to the agreed upon nodes. For detailed information on available IRLP repeaters in your area, how IRLP works and operating guidelines, visit www.irlp.net

A recommended time for calling has initially been established for 1800Z (1100 PDST, 1400 EDST). This time was selected for weekend activities, such as Radio Merit Badge events, as well as contacts during Summer Camp. Another suggested time is 0100Z (1800 PDST, 2100 EDST). The evening schedule should accommodate most scouts and scouters during the evening hours. The Radio Scouting/JOTA Topic Channel is available for use 24/7.

The Topics Channel will initially be set up for IRLP only and will soon have connectivity via EchoLink.

For more information about Topic Channels, see http://www.irlptopics.net/ The K2BSA Amateur Radio Association sincerely appreciates the resources provided by Kent Johnson, W7AOR, on the Western Reflector Annex, to Michael Bloom, W7RAT, for coordinating this Channel, and to the Oregon Internet Radio Group for implementing the

Topic Channels Project.

FMTAG Notes for HQ Info Line 248

PROPOSAL

Branch 74 Wellington VHF has applied for an APRS Digipeater at Kaiwharawhara Hill, located at TOPO50 BQ31 494.93 316.03. The transmit and receive frequency will be 144.575 MHz in accordance with the band plan. An engineering investigation, in accordance with MED PIB38, confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

The current status of Applications can be viewed on the NZART website:

http://www.nzart.org.nz/nzart/fmtag/fmtag-apps-being-processed/

FROM THE VHF-UHF-SHF CONTEST MANAGER

THE NEXT FEW CONTESTS

The next contest is the Low Band Contest, 50 MHz to 440 MHz, on Saturday the 14th and Sunday the 15th of April 2012. This is the weekend after Easter. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Hibernation Contest, all bands 50 MHz and up, on Saturday the 9th and Sunday the 10th of April 2012. This is the weekend after Queen's Birthday weekend. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 4th and Sunday the 5th of August 2012. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz with Contest Log in the subject line, or by post to:

Contest Manager

Amateur Radio Newsline(tm) Report 1807 - March 30 2012

Amateur Radio Newsline report number 1807 with a release date of March 30th, 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The next Global Amateur Radio Emergency Conference to be hekd in Malaysia; 1700 South African hams let their licenses lapse, World amateur Radio Day to celebrate 50 yesrs of ham radio in space, Japan to launch five new hamsats, DXCC is going on-line and Roving Reporter Pierre Pulinmyleg returns with a truly out of this world April 1st story. Find out where Pierre is this year on Amateur Radio Newsline(tm) report number 1807 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: MY GAREC 2012 TO BE HELD IN MALAYSIA IN NOVEMBER

The 8th Global Amateur Radio Emergency Conference now coined as MyGAREC 2012, will be held from November 12th to the 14th in Malaysia. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

Among the draft topics to be discussed at My GAREC 2012 are High Frequency Emergency Operating Procedures, presentations from the three regions of the IARU and presentations from societies with recent disaster relief communications operations. Also to be discussed will be the future Global Amateur Radio Emergency Conference itself.

GAREC began in 2005 and is now the premier annual event attended by those with an interest in amateur radio providing emergency communications during training exercises or in response to disasters. As such it attracts participants from around the world.

General information including information on the venue, registration fees and the tentative agenda and the registration forms will be posted on the website www.mygarec2012.com by the end of this month. That website will be updated frequently to keep all updated with the latest news and program changes. For specific information you can e-mail to info (at) mygarec2012 (dot) com

For the Amateur radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

MyGAREC 2012 has been timed to immediately follow the IARU Region 3 Conference to be held in Vietnam from November 5th to the 9th. It too has as its theme disaster relief communications.

(VK3PC, MyGarec 2012 Team)

**

RESTRUCTURING: NTIA SAYS PACTOR III IS NOT THE ONLY DIGITAL MODE FOR 60 METERS

Some breaking news for those who operate the 60 meter band. In response to requests for clarification from the ARRL, the National Telecommunications and Information Administration says that it has no objection to the use of a broader range of data emissions by amateurs on the five 5 MHz frequencies on 60 meters.

In an e-mail response to ARRL Chief Executive Officer David Sumner, K1ZZ, Karl Nebbia, the Associate Administrator of the NTIA Office of Spectrum Management, stated, that his organization had no interest in limiting the types of emission used by the amateurs as long as the data emission does not exceed the 2.8 kHz bandwidth as generated by the upper sideband transmitter.

Nebbia referred all further inquiries to the FCC, which he says sets the conditions for use of the five 5 MHz frequencies by radio amateurs.

The ARRL said that its original understanding was that the NTIA preferred that the use of 2K80J2D emission be limited to Pactor III. The NTIA now says that that is not the case.

But it's not all peaches and roses. This is because the requirement of only one signal per channel remains, as well as the prohibition against automatic operation. Also, the FCC continues to require that all digital transmissions be centered on the channel-center frequencies, which the Report and Order defines as being 1.5 kHz above the suppressed carrier frequency of a transceiver operated in the Upper Sideband mode. The ARRL says that this is typically the frequency shown on the frequency display.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Berwyck, Pennsylvania. (NTIA, ARRL, others)

**

WORLDBEAT: ICASA SAYS OVER 1700 SOUTH AFRICA HAM LICENSES HAVE LAPSED

The Independent Communications Authority of South Africa says that approximately 1700 amateur radio call signs have been marked as having lapsed by the regulatory agency. This is as a result of a substantial cleanup that the ICASA undertook during the last 12 months.

According to the South African Radio League, this is a significant number of former callsigns and that it is likely that many amateurs have unwittingly allowed their licenses to lapse. As an example SARL

says it has 43 paid up members who no longer have valid licenses.

If you are a South Africa radio amateur and believe you might be one of these people whose license inadvertently lapsed, the South African Radio Leagues advises to visit its website where you will find more information and what to do. The URL is www.sarl.org.za. (SARL)

**

HAM CELEBRATIONS: WORLD AMATEUR RADIO DAY TO CELEBRATE 50 YEARS OF HAM RADIO IN SPACE

April 18th is World Amateur Radio Day and celebrates the 87th anniversary of the founding of the International Amateur Radio Union, IARU. Now it has been announced that the theme of this years World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space."

The name and the theme were chosen in remembrance the launching of OSCAR 1 on December 12, 1961 and OSCAR 2 on June 2, 1962. Several IARU Member Societies have already announced special event stations for various dates during April to celebrate these two early ham radio in space milestones.

Callsigns known as we go to air include 6H6IARU, 3G73IARU and LZ1WARD. The EARD suffix standing for World Amateur adio Day. (IARU-R2)

**

HAM RADIO IN SPACE: JAPAN TO LAUNCH AMATEUR RADIO SATELLITES

Big news on the ham radio space scene. This with word that the Japan Aerospace Exploration Agency has announced the upcoming launch of five amateur radio satellites. This, on two launches taking place this spring and summer. Amateur Radio Newsline's Stephen Kinford, N8WB, is here with more:

--

The first launch is the H2A that takes place on May 17th. It will carry the amateur radio satellite HORYU-2.

This will be followed on July 21st when the HTV3 mission. It will deliver the JEM-Small Satellite Orbital Deployer or J-SSOD to the International Space Station. That unit will enable small satellites to be deployed from the ISS using the Japanese Experiment Module robot arm.

The Japanese amateur radio satellites WE-WISH and FITSAT-1, along with San Jose State University's TechEdSat and Vietnam's F-1 will also be delivered to the I-S-S on this mission. Plans are for them to be deployed to orbit on September 20th.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, in Wadsworth, Ohio.

--

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (JN1GKZ, Southgate)

**

CHANGING TIMES: ON-LINE DXCC

A new DXCC tool that brings the program partially on-line is to debut on April 2nd. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Actually, initial word of the DXCC going on-line came not from the ARRL but rather from the Ohio-Penn DX newsletter and was later confirmed by the ARRL DXCC desk. And in a nutshell, here's how it's going to work.

Using an Online DXCC Application, the candidate can select the cards that he or she would like to have checked by a card checker at his or her convenience. The person then types that data into a form which can be saved and retrieved at any time until submitted and make an application for DXCC.

When completed, the applicant will be able to print the list of cards and take the list -- and the cards -- in the same order that they are entered into the form -- to a card checker. He or she will check the cards, note any changes and send the form to ARRL HQ.

For the most part, the card checker's job is exactly the same as before, except he or she does not need to collect a payment. This is because the applicant can pay the DXCC fee on-line.

Once submitted, DXCC staff will have access a given file, make any changes noted by the card checker and process the application.

And oh yes, the good news: The Online DXCC Application will have rates that are half those of a traditional paper QSL application that is sent to ARRL HQ.

More detailed information is on-line at tinyurl.com/dxcc-online

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom, in Los Angeles.

--

The bottom line: Submitting a DXCC application on-line should be easier than making a paper application, saving both time and money. (DXCC, OPDX)

**

**

ENFORCEMENT: UNLICENSED BROADCASTER IN PUERTO RICO HAS FINE REDUCED

The operator of an unlicensed FM broadcast station in Puerto Rico has been able to convince the FCC to reduce a fine levied against him based on financial hardship.

After being handed a Notice of Apparent Liability in the amount of $15,000, Eleuterio Lebron of Guayama, Puerto Rico responded to the regulatory agency last September. In his note to the agency he claimed that he was not trying to violate the FCC rules or the Communications Act when he operated an unauthorized station on 88.5 MHz. He went on to say that he thought he could use his Ramsey model PX50 transmitter legally without a license because it was marketed as being Part 15 compliant.

However in its findings the FCC disagreed with Lebron interpretation of Ramsey's marketing. It noted that Part 15 compliance wasn't mentioned. It also stated Lebron's ignorance of the rules doesn't justify or mitigate the violation. Especially as he had been warned before that the transmissions were illegal.

However the agency did reduce the penalty to only $1500 based on documentation submitted by Lebron's backing up his assertion that the original $15,000 penalty amounted to a financial hardship that he could not pay. While it accepted this as a viable reason to reduce the fine, the commission warned Lebron that any future violations may result in higher monetary forfeitures that may not be reduced based on his financial circumstances.

Payment of the reduced fine was due within 30 days of Lebron being officially notified of the FCC's decision in the case. (FCC)

**

RESTRUCTURING: FCC FORMS BROADBAND SPECTRUM RE-ALLOCATION TASK FORCE

The Federal Communications Commission is proposing to re-allocate another 40 MHz of spectrum out of mobile satellite services spectrum for broadband, and has formed an Incentive Auction Task Force. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

This is a committee loaded with some well known names in the field of telecommunications. Its purpose will manage the auction process to restructure current broadcast television spectrum for future broadband use.

Ruth Milkman, the former Wireless Bureau chief who is now special counsel to the FCC chairman, will head up the task force. Among others she will be joined by Rick Kaplan, who now heads the FCC's Wireless Division; Julius Knapp, head of the Office of Engineering and Technology; FCC Chief Economist Marius Schwartz; Chief Technologist Henning Schulzrinne and General Counsel Austin Schlick.

Along with the formation of the task force the commission also issued a Notice of Proposed Rulemaking to open up 40 MHz of spectrum in the 2 GHz Mobile Satellite Services band for wireless broadband. The proposed rules would allow flexible use of the targeted spectrum and reflects the directives in the National Broadband Plan.

For the amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

A related Notice of Inquiry seeks comment on more strategies to free up additional spectrum as well. (FCC, TVT)

**

HAM HAPPENINGS: ARRL SPONSORING WEBINAR TO HELP YOU PUBLICIZE FIELD DAY

The ARRL Public Relations Committee will be holding a free Webinar on Thursday evening April 12 for Public Information Officers, radio club officers and anyone else wanting to join in. This, to teach the easiest and most effective way to write a press release for Field Day and actually get it noticed by the mass media in your home region.

The webinar will begin at 9 pm Eastern Daylight Time and will run for about 90 minutes. Several experts in mass media communications will be on hand to teach the tricks of the trade in dealing with radio, television and print publications.

Pre-registration is required. To reserve a spot simply take your web browser to tinyurl.com/arrl-field-day-webinar or directly at https://www3.gotomeeting.com/register/278619454.

Space is limited so if you want to take part you need to sign up today. (ARRL PR Committee)

**

HAM HAPPENINGS: MICROWAVE UPDATE 2012 PUTS OUT CALL FOR PAPERS

This years Microwave Update Conference will be held October 18th to the 21st in Santa Clara, California. Hosted by the 50 MHz and Up Group, a first call is going out to solicit conference papers, presentations and workshops on technical and operational aspects of microwave weak signal amateur radio. This covering the centimeter, millimeter and sub-millimeter to light wavelengths. Tutorials and overviews are also welcome to summarize current know how and to help

and encourage newcomers. For more information on submitting papers as well as all other aspects of the conference please go www.microwaveupdate.org on the World-Wide-Web. (WZ1V)

**

HAM HAPPENINGS: ESPN EMPLOYEES CREATE THE WORLDWIDE AMATEUR RADIO CLUB

Current and former employees of the Entertainment and Sports Network, better known to the public as ESPN, have formed the Worldwide Amateur Radio Club. Located on the grounds of the ESPN facility in Bristol, Connecticut, the group has now been granted the club call WE1SPN .

At present the club has about 40 members. Inaugural operations were to take place on 7.177 MHz at 21:00 UTC on March 29th. This opening gala was to include trying to contact as may radio clubs at Disney theme parks as possible.

The Worldwide Amateur Radio Club is the latest bin a long series of broadcast industry based employee recreation entities. It joins similar employee groups at the CBS, NBC, ABC and Fox networks as well as at a number of broadcast stations nationwide and world-wide.

More about WE1SPN can be found by checking the listing page for their callsign on QRZ.com. (KE6ZGP)

**

HAM HAPPENINGS: SOUTH AFRICA WESTERN CAPE ANTIQUE WIRELESS ASSOCIATION EXPO

South Africa's Western Cape section of the Antique Wireless Association of South Africa will be holding an Expo over Easter weekend from April 6th to the 9th. Location ids the farm owned by John and Judy Martin, ZS1D, and ZS1JEG and located near the town of Stanford. Featured will be a large display of radios of yesteryear and associated equipment. Also a classic radio station will be in operation. Talk-in is on 145.5 MHz simplex as well as on the 145.725 Hermanus repeater. Those planning to attend are encouraged to bring an antique radio to exhibit. (SARL)

**

NAMES IN THE NEWS: VE3CBR APPOINTED PIO FOR RAC NATIONAL FIELD OFFICE SECRETARIAT

Some names in the news. Radio Amateurs of Canada has announced that Alan Bauld VE3CBR has been appointed Public Information Officer to the Field Organization National Secretariat. VE3CBR resides in Stittsville, Ontario just outside Ottawa, and brings with him an extensive background in both management and amateur radio. His appointment is effective immediately. (RAC)

**

NAMES IN THE NEWS: RSGB APPOINTS NEW AROS COORDINATOR

The Radio Society of Great Britain has announced the appointment of Keith Bassett, G7NBU has been appointed as the new Amateur Radio Observation Service or AROS Coordinator with Mario Brashill, G2DPA appointed as a deputy. The RSGB says that together they bring significant experience and skill to the Amateur Radio Observation Service with its broad challenges of investigating matters that might create a negative public of amateur radio. (RSGB)

**

NAMES IN THE NEWS: ANDY SENNITT TO RETIRE FROM RNW END OF APRIL

Andy Sennitt who edited the now closed Radio Netherlands Media Network weblog says that he will be retiring from that international broadcaster at the end of April. Sennitt says that during his last weeks at Radio Netherlands that he will be writing a series of articles reflecting on the changes in international broadcasting since he started appearing on the Media Network radio show in 1981 as well as looking ahead to the coming decade.

This perspective will be published on the Radio Netherlands English language website. Sennitt asks that if you have any memories of Radio Netherlands or any other international broadcasters that you would like to share, please e-mail them to him. He can be reached at at MediaNetwork (at) rnw (dot) nl. Sennitt adds that he will try to include them in the articles as is possible. (Media Network)

**

NAMES IN THE NEWS: WO4W SAYS BETTER TORNADO WARNING SYSTEM NEEDED

In an interview with National Public Radio, veteran T-V meteorologist James Spann, WO4W, recently highlighted the limitations he and his colleagues face when covering tornadoes. Spann, who has become something of a severe weather pundit during his time at Birmingham Alabama's ABC 33/40, says that we are not as good as we think we are, and we have to accept that and work on it and be better.

WO4W says that television stations must stream their long form tornado coverage in a way that is accessible to all portable devices, not just some of them. And says Spann, its important to make the stream easy to find either via a web page or app. You can hear the story on National Public Radio's All Things Considered at tinyurl.com/npr-tornado-alert.

James Spann has long been an outspoken critic of the siren only warning process and the public's over-reliance on them. Following the April 2011 tornado outbreak he wrote a long blog post about the siren mentality titled "The Warning Process Must Be Fixed." Its on the web at tinyurl.com/spann-tornado-warning (NPR)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

THE FINAL FRONTIER: NASA ANNOUNCES ISSLIVE! APP

NASA has announced the release of the ISSLive! app for iPhone, iPad and Andoid devices. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--

The ISS Live! app delivers live streaming data from the International Space Station. Users can take a virtual 3-D tour of the Mission Control Center and the space station, and view mission control console displays with real-time data. Interactive educational lessons using the data, as well as crew and science timelines with individual crew member, social media and international science experiment details are also available via the app.

The space agency calls ISSLive! an innovative, interactive application that provides a novel way to learn about the International Space Station while on the go. To learn more and find links to download the ISSLive! app, visit spacestationlive.jsc.nasa.gov. That's where you will find the icons for the iPhone App Store and the Android Market.

I'm David Black, KB4KCH, from the South-East bureau in Birmingham, Alabama.

--

Once again that URL is spacestationlive.jsc.nasa.gov. (NASA)

**

RADIO IN SPACE: NASA CONSIDERING LAGRANGE POINT OUTPOST

NASA is pressing forward on assessing the value of a human-tended outpost near the far side of the moon. One that would embrace international partnerships as well as commercial and academic participation,

According to SPACE.com, William Gerstenmaier is NASA's Associate Administrator for Human Exploration and operations. And in a February 3rd memo Gerstenmaier says that a team is being formed to develop a cohesive plan for exploring a spot in space known as the Earth-moon Lagrange point.

Lagrange points sometimes called liberation points, are places in space where the combined gravitational pull of two large masses roughly balance each other out. This would allow a spacecraft or other object

to essentially park in that spot without being pulled toward either one of the masses.

A pre-memo NASA appraisal of Lagrange Point EML-2, which is near the lunar far side, has spotlighted this destination as the leading option for a near-term space study. EML-2 could serve as a gateway for exploration of multiple destinations including near-lunar space, our own moon, asteroids, the moons of Mars and ultimately, the red planet itself. (Space.com)

**

ON THE AIR: CELEBRATING THE US ISLANDS AWARD PROGRAM

On the air listen out for KL7JR and XYL WL7MY who will be active from the Big Island of Hawaii between April 1st to the 15th. This venture is in celebrating the 18th anniversary of the U.S. Islands Awards program. Operation will be on 80 through 10 meters using the callsign NH7DX. QSL via KL7JR (Southgate)

**

ON THE AIR: HAM RADIO COMMEMORATES THE BATTLE OF SHILOH BATTLE

While a bit short notice, word that the NorthEast Mississippi Amateur Radio Club will be operating a special event station March 30th and April 1st. This in honor of the 150th anniversary of the Civil War Battle of Shiloh, in Tennessee.

The ham radio commemorative will have two stations set up on the grounds of the Shiloh Military Park. Frequencies used will be in the lower part of the General class SSB portions of the High Frequency bands which include the Technician frequencies on 10 meters. Certificates and QSL will be available after the operation has concluded.

The ham radio operation will be held in conjunction with a special reenactment held by Blue Gray Alliance. For more information please e-mail event coordinator Charles Buster, NA5MS to cebuster (at) ms (dot) metrocast (dot) net. (NA5MS)

**

RADIOSPORTS: THE 2012 HOLYLAND CONTEST APRIL 20 - 21

The 2012 Holyland Contest sponsored by the Israel Amateur Radio Club is slated to begin on Friday, April 20th at 21:00 UTC and conclude on Saturday April 21st at 21.00 UTC. Special trophies and newly certificates will be issued to participating hams and SWL's for different classes and modes of operation. The Israel Amateur Radio Club adds that it invites the world-wide ham radio community to be on the bands during the contest as an exercise in the spirit of friendship between all radio amateurs. More about the contest is on line at www.iarc.org. (4Z0X)

**

DX

In DX, F8ATS will be active portable 6W from Senegal between March 30th and April 7th. Operations will be holiday style probably on all HF bands. QSL via the Bureau is preferred.

DL7BC will be on the air from Mayotte through April 6th using the callsign TO7BC on 80 through 10 meters. QSL to his home callsign, either direct or via the bureau.

OH4MDY will be active as XV2RZ from Vietnam until April 16th and says that this time he will pay special attention to digital modes. No frequencies or operating hours are known. QSL via his home callsign, direct only.

ZB3M and ZB2ER will activate the special callsigns ZQ3M and ZQ2ER from Gibraltar between May 5th and June 10th. This operation is to celebrate the Diamond Jubilee of Queen Elizabeth II. QSL via ZB3M direct only. No bureau or electronic QSL's will be accepted for this one.

An international team will activate the callsign E51M from the North Cook Islands from March 28th to April 10th. They will operate on 160 through 6 meters using CW, SSB and RTTY. The QSL manager is DJ8NK.

Lastly, KV1J will be operating from Miquelon Island stroke F-P between July 10th and the 17th. His activity will be on 160 through 6 meters using CW, SSB, RTTY and PSK31. He will generally be on the highest frequency band that is open, and he may try 6 meters if there is an indications of propagation. Also, look for him on the satellites, weather permitting. QSL via KV1J, direct, via the bureau or electronically using Logbook of the World.

(Above from various DX news sources)

THAT FINAL ITEM: STRANGE MORSE FROM SPACE

And finally this week, it appears as if radio astronomers have discovered mysterious sources of extremely high-powered radiation across the universe. Amateur Radio Newsline's Newsline's space-faring, roving reporter Pierre Pullinmyleg, says that hams are helping to unravel the mystery.

--

Scientists at NASA say the Fermi space telescope has discovered hundreds of super-high-energy gamma ray sources at the very top end of the electromagnetic spectrum, and that more than a third of them are complete mysteries. Adding to the mystery is the pattern of these gamma rays on spectrograms, showing short bursts of energy that resemble dots and longer ones that look like dashes.

Several radio astronomers who are also radio amateurs noticed these patterns and performed two sets of calculations with amazing results. The frequencies on which the gamma ray sources were discovered correspond with the two-billionth harmonic of 20 meters, and distance calculations show that, had the signals originated on Earth and been re-radiated back toward us, the dates of origin always seem to match up with the dates of major CW contests here on Earth.

One spectrogram currently making the rounds in ham radio astronomy circles clearly shows a pattern which, in Morse code, would read: "Di-dah, di-dah-dah-dit, di-dah-dit, di-dit, di-dah-di-dit," followed by a space and "di-di-dah-dit, dah-dah-dah, dah-dah-dah, di-dah-di-dit." Another reason, they say, to know code.

Reporting from near Alpha Centauri, this is Pierre Pullinmyleg for Newsline.

--

More details on the Fermi Space Telescope's findings and current sample spectrograms are available online at science dot nasa dot gov. We are told that the spectrograms Pierre alluded to in his report are not scheduled to be released until sometime after the 1st of April, in the year 2112. (Pierre Pullinmyleg Annual April 1st Technology Report)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the nominating period for the 2012 Amateur Radio Newsline Young Ham of the Year Award is now open. Full details and a downloadable nominating form are on our website at arnewsline.org/yhoty.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

CQ columnist Fred Maia, W5YI, SK

Posted: 30 Mar 2012 08:08 AM PDT
http://forums.qrz.com/showthread.php?340155-CQ-columnist-Fred-Maia-W5YI-SK&goto=newpost

CQ columnist Fred Maia, W5YI, a leading amateur radio journalist, educator and pioneer of volunteer examining, passed away on March 28 after a battle with cancer.

Maia, 76, published "The W5YI Report," dubbed "America's Oldest Ham Radio Newsletter," from 1978 to 2003, and has been a CQ contributing editor since 1985. His regulatory affairs column, first titled "Ticket Talk," then "Washington Readout," offered news and perspective on FCC and ITU (International Telecommunication Union) actions, and helped untold numbers of hams wend their way through often-confusing mazes of the volunteer examining and vanity call sign systems.

"Fred was one of those unusual people who was more focused on doing the job than he was on getting credit for doing it," noted CQ Publisher Dick Ross, K2MGA. "His 'job' was to help this hobby grow, and he succeeded admirably."

Maia was also a driving force in amateur and commercial radio licensing and education materials since late 1970. He was the first Volunteer Examiner Coordinator appointed by the Federal Communications Commission in 1984, and his W5YI-VEC group grew into the nation's second-largest VEC after the ARRL. Fred served as President of the W5YI-VEC until his retirement in October of 2000. In 1986, he founded The W5YI Group to develop, publish and sell amateur and commercial radio license study materials. Fred also formed National Radio Examiners to provide examination services as a Commercial Operator License Examination Manager (COLEM), and co-wrote a commercial radio licensing study manual with Gordon West, WB6NOA.

As a longtime member of the National Conference of Volunteer Examiner Coordinators (NCVEC) and its Question Pool Committee (QPC), which develops and maintains the question pools for amateur radio license exams, Fred was deeply involved in many of the changes in amateur radio licensing over the past quarter century. This includes the phased elimination of Morse code requirements for amateur licenses and the current system of three license classes, Technician, General and Amateur Extra.

A resident of Arlington, Texas, Fred was a graduate of the U.S. Air Force Radio Operator□s School, and was first licensed as an amateur radio operator as a teenager in Rhode Island, where he grew up. He is survived by

his wife, Doris, and two daughters. A memorial service will be held,
3:00pm, Saturday March 31, 2012 at Moore Funeral Home, 1219 North Davis
Dr. ,Arlington, TX 76012.

Around the World 28 MHz Balloon

Posted: 30 Mar 2012 12:46 AM PDT
http://forums.qrz.com/showthread.php?340118-Around-the-World-28-MHz-Balloon&goto=newpost

Around the World 28 MHz Balloon

A long duration balloon mission that is using 6 Party Balloons to carry a
50 gram amateur radio 28.222 MHz CW beacon, is hoping to go around the
world.

The ballon was released at 2330 UT (1930 EDT) March 29, from Annapolis in
Maryland and started it's journey heading SE at 6 knots. By 0300 UT, March
30, it had reached a speed of 60 MPH (96 km/h).

It has no APRS, just the 28.222 MHz CW telemetry system and it is hoped to
locate it by signal strength and beam headings only.

The mission is to give an insight into constant-pressure balloons and
especially the use of common mylar party balloons as a fixed volume
envelope. Unfortunately, these balloons have a high mass and so the
theoretical maximum altitude no matter how many balloons are used is only
about 26,000 feet and that is with no payload other than the fixed balloon
mass.

The payload weighs about 50 grams. The team are targeting 6 party balloons
3' in diameter which should give a float altitude around 16,000 feet. The
Telemetry will be in CW on 28.222 MHz (USB DIAL) and will contain Battery
voltage, inside and outside temperatures, and surface luminosity of the
ocean/clouds. It has no GPS. The team will rely entirely on DF bearings and
signal reports.

EMAIL DF reports to W3ADO@homeside.to

Be sure to include:

Your LAT/LONG

Time of observation

Quality of heading (subjective 1 to 10)

The CW string copied

If you have APRS you can uplink your beam heading via APRS.

As the balloon is only flying at 16,000 feet or so it will be vulnerable to
weather. The battery is expected to have a lifetime of about 10 days.

Further information including details of CW telemetry at

http://aprs.org/balloons.html

CWops Announces the CW Academy

Posted: 29 Mar 2012 12:07 PM PDT
http://forums.qrz.com/showthread.php?340044-CWops-Announces-the-CW-Academy&goto=newpost

Whether you□re a newbie who wants to learn Morse code for the first time, a re-tread who wants to clean the rust off your key or a roadrunner who wants to break the 20 wpm wall, the CW Academy has a place for you.

The CWA was created by the CWops club in August, 2011 to provide a place for students of all levels to work with mentors, on and off the air, to learn or improve their CW language skills. It□s fun and, better yet, it□s free!

□For nearly four years I've been trying to learn CW on my own with some small degree of success,□ says Gary, W4GDC. □I was able to send and receive about 8 words per minute with some accuracy. About a month ago I was browsing the CWops website□s CW Academy page and decided to ask for a mentor. Jack W0UCE contacted me within a few days and we arranged a first session. All went well so we set up a regular mentoring schedule. To my surprise I was able to copy 20 wpm within two weeks.□

Following a contact in the ARRL□s Rookie Roundup Pete, W1RM, suggested to Tom, KC9RXI that he enroll in the CWA. Recently, Pete received this email: □Thank you for telling me about the CWops academy. Art, K6XT, is a wonderful mentor. Art□s expertise, thoughtful suggestions and encouragement have made me a better CW operator. For the last three months Art and I have had weekly on air contacts on 30 meters.□

Michael, KF7ADB was a □no-code□ ham, licensed in 2009. But he was intrigued by the dits and dahs that he heard at the low end of the bands. He knew he had to learn CW. □It didn't come easy, but within a few months I managed to learn the code well enough to have a slow-speed QSO and not embarrass myself too much,□ he wrote us. □Over time my CW skills improved but I hit a plateau at about 13WPM. By this time I had also picked up several bad habits, including having to write each character down on a notepad as I heard it. When the other person stopped sending, I□d look down at what I had written on my notepad and hope it made sense.□ After about three weeks of nightly on-air sessions with a CWA mentor Michael was able to copy 30 wpm in his head. This □ opened up a number of opportunities for me in the world of amateur radio, including CW DXing and being invited to operate (at a big) multi-op CW contest (station).□ His improved skills also allowed Michael to become a member of CWops, #869.

Currently, the CW Academy is working with about 35 students and more than 40 club members are serving as mentors. Both numbers are growing each week.

Check-out the CW Academy at: www.cwopsacademy.org and let us help you get up to speed!

Radio Astronomy Special Event

Posted: 29 Mar 2012 02:37 PM PDT
http://forums.qrz.com/showthread.php?340061-Radio-Astronomy-Special-Event&goto=newpost

Special Event Station to Mark Radio Telescope Rededication

The National Radio Astronomy Observatory (NRAO) Amateur Radio Club will operate Special Event Station W9GFZ on Saturday, March 31, and Sunday, April 1, to mark the official renaming of the Very Large Array (VLA) radio telescope as the Karl G. Jansky Very Large Array.

The new name honors Karl Jansky, who founded radio astronomy by discovering radio emission from the center of the Milky Way Galaxy while investigating short-wave noise at Bell Telephone Laboratories in 1932. The club's callsign, W9GFZ, is that of Grote Reber, who, after learning of Jansky's discovery, designed and constructed the first purpose-built radio telescope in his Illinois backyard in 1937.

The special event station will be operated from NRAO's Domenici Science Operations Center in Socorro, New Mexico. It will operate on the lower portions of the General HF bands. The operation will begin at 2100 UTC on March 31, and continue while propagation lasts. It will resume at 1500 UTC on 1 April.

QSLs should be sent to:

NRAO Amateur Radio Club

http://forums.qrz.com/showthread.php?339916-This-is-the-weekend-for-Merit-Badge-In-A-Day-And-A-Ham-To-Stay-Over-200-Boy-Scouts&goto=newpost

As seen at CambriaRadio.com this is the weekend for Merit Badge In A Day And A Ham To Stay. :rolleyes:

There will be a Ham Shack for ham radio operations by the scouts and other areas for merit badge work and VE Testing. Operating frequencies are posted at CambriaRadio.com and http://www.qrz.com/db/k3b

Over 200 boy scouts and 50+ scout leaders will be attending as well as many hams from around the area with the support of at least 2 ARC's. This event sure has grown from the simple idea it started as. Please visit CambriaRadio.com and http://www.qrz.com/db/k3b for more detail. Many cool things on the agenda.

TO RECEIVE A QSL CARD FROM THIS EVENT, LOG YOUR QSO ON YOUR QSL CARD OR ON A SLIP OF PAPER, SEND IT WITH YOUR S.A.S.E TO: SPECIAL EVENT K3B PO BOX 53 MINERAL POINT PA, 15942 ANY CARDS RECEIVED WILL BE SCANNED AND POSTED ON OUR RESULTS WEB SITE. WE HOPE TO REACH AROUND THE WORLD. You may also request a .PDF format QSL via e-mail by sending your contact detail to K3B@CambriaRadio.com (in the subject line enter: QSL REQUEST K3B) http://www.qrz.com/db/k3b

Questions can be sent to KB3REA@CambriaRadio.com or by calling Herb at 814 254-6383

Talk in on KC3DES 145.210- PL 123... Radio Operations Controlled By Dave N3YFO N3YFO@CambriaRadio.com

FREE VE Testing for the Scouts Conducted by Scott N3XCC N3XCC@CambriaRadio.com

When: March 31- April 1, 2012

Where: New Germany Grove

Time: 0800 -1630

Cost to the scouts $0.00

QST de W1AW
Special Bulletin 2 ARLX002
From ARRL Headquarters
Newington CT March 30, 2012
To all radio amateurs

SB SPCL ARL ARLX002
ARLX002 Fred Maia, W5YI, (SK)

The holder of one of the best-known US Amateur Radio call signs,
Frederick (Fred) Maia, W5YI, died of cancer Wednesday, March 28. He
was 76 and was a resident of Arlington, Texas.

Fred was a leading Amateur Radio journalist for nearly 35 years and
a pioneer of the volunteer examining program adopted by the FCC in
1984.

Maia published "The W5YI Report," dubbed "America's Oldest Ham Radio
Newsletter," from 1978 to 2003, and has been a CQ contributing
editor since 1985. His regulatory affairs column, first titled
"Ticket Talk," then "Washington Readout," offered news and
perspective on FCC Regulations and ITU actions. His final column
will appear in the May 2012 issue of CQ.

After the FCC adopted volunteer examining for all levels of Amateur
Radio licensing in 1984, Fred became the first Volunteer Examiner
Coordinator (VEC) appointed by the FCC. Fred subsequently founded
The W5YI Group in 1986 to develop, publish and sell amateur and

commercial radio license study materials. In the realm of FCC commercial radio licensing, Fred formed National Radio Examiners to provide examination services.

Maia served as President of the W5YI-VEC until his retirement in October of 2000 when he sold The W5YI Group study material products to Master Publishing, Inc. The retail operations were purchased by General Manager Larry Pollock, NB5X, newly appointed President of the W5YI-VEC and National Radio Examiners organizations. Maia continued writing "The W5YI Report" newsletter until July 2003.

A graduate of the US Air Force Radio Operators School, Fred was an avid CW operator. He was first licensed as a teenager as W1NTK in Brockton, Massachusetts, where he grew up. Maia was later licensed as W5UTT, and held DXCC CW awards and EU-PX-A CW. He was a member of QCWA and Life Member of the ARRL.

For several decades, Maia also served on the National Conference of Volunteer Examiner Coordinators (NCVEC) as a member of the Question Pool Committee that oversees the development and maintenance of the Amateur Radio license examination question pools.

ARRL Chief Executive Officer David Sumner, K1ZZ, commented: "Amateur Radio is healthier today because of the tireless efforts of Fred Maia. While Fred did not always see things quite the same way as the ARRL, in my experience he always had the best interests of Amateur Radio at heart. He was a major figure who will be sorely missed."

He is survived by his wife, Doris, and two daughters. A memorial service will be held at 3 PM, Saturday, March 31, at Moore Funeral Home, 1219 North Davis Dr, Arlington, TX 76012.

8 Lucas County Hospitals Get New Emergency Radios:

Posted: 29 Mar 2012 06:46 PM PDT
http://www.eham.net/articles/28000

LUCAS COUNTY, OH (WTOL) - Eight Lucas County Hospitals are receiving a total of 12 upgraded two-way radios for emergency communications. The new radios replace single band units currently in use with dual band ones and allow the added option of digital communications. The radios were paid for by a U.S. Department of Health and Human Services grant. The grant proposal was submitted by members of Lucas County Amateur Radio Emergency Services (ARES).

//
Local Radio Operators Love To Ham It Up:

Posted: 29 Mar 2012 06:45 PM PDT
http://www.eham.net/articles/27999

The men and women at the Grand Prairie Ham Radio Operators Club don't start with their names when they introduce themselves. They start with their call signs. "KC5YHQ, Bob Glover." "K5NDX, Randy Geater." Long before there were cell phones, the Internet or e-mail, there was Ham radio, amateur radio operators who communicated worldwide. But even with all these breakthroughs in modern communications, Ham radio is still around, and there are ardent practitioners in Arkansas County. The Grand Prairie Ham Radio Operators Club met Saturday in Pendleton Park to participate in an event with another club broadcasting from Pinnacle Mountain near Little Rock. Before getting started, club president Randy Geater of Almyra read an e-mail outlining the procedure for the event. He gives the frequencies and times that the STAR (Small Town Amateur Radio) club will be using for the Summit on the Air." "This is a fun event for us," Geater said. At 10 a.m., Bob Glover starts tuning up the equipment, looking for the signal from Pinnacle Mountain. He works with two antennas, one omni-directional, another that operates in one direction "like a beam. It sucks the signal in." Eventually the contact is made, faint but clear. Tonya Geater, who is also an avid Ham radio operator, records it in the logbook.

Titanic, Role of Marconi Wireless Station Cross Paths At Cape Cod:

Posted: 29 Mar 2012 05:00 PM PDT
http://www.eham.net/articles/27997

The RMS Titanic and the Marconi wireless station on Cape Cod crossed paths a century ago on a dark day for history. At Cape Cod National Seashore, where the site of that wireless station remains, the sinking of the Titanic will be commemorated during a weeklong affair. The Titanic with her 2,240 passengers and crew set out from Southhampton, England, for what was expected to be a five-day crossing of the Atlantic to the Port of New York. But four days after departing on April 11, 1912, the Titanic plunged to the ocean floor after striking an iceberg in the North Atlantic. The fate of the steamship and the 1,500 souls lost is ingrained in the American memory, and has inspired countless books and films. A fact that surprises many is that Marconi's wireless station in Wellfleet played a significant role in the rescue of 740 survivors. Titanic 100 Years Later and Marconi's Wireless Technology is a week-long commemoration featuring programs by Cape Cod National Seashore, the Falmouth Amateur Radio Association, and the Chatham Marconi Maritime Center to remember the souls lost and interpret wireless communication. All activities are free and open to the public. In addition to films and special commemorative activities throughout the week, on certain days radio operators will communicate with others around the world to honor the role that Marconi's technology played in the rescue. Seven-hundred-and-forty passengers and crew were rescued by the Carpathia as a result of wireless messages sent from the Marconi Station. Today, the station site is preserved within Cape Cod National Seashore.

444. SO...what's happened to ham radio?

Newsgroup: rec.radio.amateur.misc
Date: 2012-03-31 18:12:42 UTC
From: Bob Myers <bobmyersco@gmail.com>
Message-ID: <24453108.1662.1333217562030.JavaMail.geo-discussion-forums@ynnk21>
Source record: 3311

Friends, consider me as someone who's been in a coma for the past 20 years, at least as far as ham radio is concerned. I've been licensed for nearly 40 years (started out with my Novice ticket - WN9MXR - and an HW-16 with a handful of 40m crystals, back in Indiana in the early 70s), but have been almost completely out of touch with the hobby for about half that time. I still have a valid license (an honest-to-Gawd Advanced, which I'm led to believe is somewhat rare these days, and I've been told that I could easily get an Extra now), but outside of occasionally checking in on one of the local repeaters via a 2m HT, I have, for one reason or another, just be unable to be active for a long, long time.

So now I'm looking to get back into things, but a quick glance around has been enough to tell me that a lot has changed since I've been away. So my question to everyone here (and especially other Olde Fartes like myself who have roots in the 70s or 80s but DIDN'T spend the last 20 years elsewhere): what's going on in ham radio these days? How does it compare with the hobby I remember? What's new, what hasn't changed, and what has, for better or for worse?

Thanks in advance,

Bob M. (KC0EW)

SARL NEWS - SUNDAY 1 APRIL 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

Your license fee is due now Online DXCC application to debut on 2 April

YOUR LICENCE FEE IS DUE NOW

The Amateur Radio license fee of R120 is due today. You may also renew for five years at a reduced fee of R501. If you do not receive a renewal notice, the SARL recommends that you pay by using the license number on last year's invoice and your callsign. Also mail the payment notification plus your address to KMashile@icasa.org.za. It is essential for all payments to ICASA that you include your callsign as a payment reference. Also remember to send any postal and email address changes to admin@sarl.org.za

TIME IS RUNNING OUT TO REGISTER FOR THE SARL NATIONAL CONVENTION

Have you booked for the 2012 SARL National Convention? If you have not, do it now. Here are some of the highlights. On Friday evening join a finger supper and an historical journey on "How SA's electronics industry started in Pinetown On Saturday morning attend the SARL Annual General Meeting and on Saturday afternoon learn about how to build VHF/UHF antennas and get DXing with Log Book of the World.

On Saturday evening join the annual the awards dinner with a keynote address by Dr Andrew Collier of SANSA Space Sciences. There will lots of prizes to be won in the lucky draw. On Sunday morning the convention is rounded off with a leisurely breakfast in the Japanese Gardens.

Full details and registration forms can be found on www.sarl.org.za. Your hosts at the SARL National Convention are the committee and

members of the Highway Amateur Radio Club.

PROMOTING AMATEUR RADIO

Promoting amateur radio will take centre stage this coming Wednesday, the 4th of April, at the Sacred Heart College in Observatory, Gauteng. The SARL was approached a few weeks ago to establish whether we could assist in making their school's science day more interesting by doing a display of what amateur radio is about and how it works.

Chris Gryffenberg, ZS6COG, who is already involved at the Sci Bono Centre and the Department of Education and Francois Botha, ZS6BUU representing Hamnet, put their ideas together and decided on a plan for the morning.

The Gauteng South Hamnet trailer will be on display and we anticipate going on air from around 9 am to 12:30 on the day, on both HF and VHF frequencies.

We wish to invite other operators around Gauteng and further afield to listen out for us on 40 m on Wednesday the 4th of April on the Hamnet frequency of 7,110 MHz and some local Johannesburg repeater frequencies. We would like to call you in so the learners can hear what our hobby is all about!

We will also get the youngsters to get the feel the hobby with some hands on experience on air.

So listen out for us on Wednesday morning from the Sacred Heart College in Johannesburg.

ONLINE DXCC APPLICATION TO DEBUT ON 2 APRIL

>From 2 April the ARRL's new Online DXCC tool will be ready to accept applications, allowing hams to supply the data from traditional paper QSLs in a digital form to apply for a new DXCC award or endorsement. Submitting a DXCC application using Online DXCC is easier than making a paper application, saving both time and money.

Using the Online DXCC Application, the user can select the cards that he or she would like to have checked by a card checker and, at his or her convenience, type that data into a form (which can be saved and retrieved at any time until submitted) and make an application for DXCC. When the application is finished, the participant will be able to print the list of cards and take the list and the cards (in the same order that they are entered into the form) to a card checker who will check the cards, note any changes and send the form to ARRL HQ. The card checker's job is exactly the same as before, except he or she does not need to collect a payment as the client can pay online. Once submitted, DXCC staff can access the file submitted by the client, quickly make any changes noted by the card checker and process the application. The Online DXCC Application will have rates that are half those of a traditional paper QSL application that is sent to ARRL HQ.

Keep in mind that QSL cards will still need to be checked if you use the Online DXCC Application, either by a DXCC Card Checker or sent to ARRL HQ for checking. Card checking in South Africa is done by SARL Awards Manager, Tjerk Lammers ZS6P.

Any radio amateur in the world -- ARRL member or non-member -- may use the Online DXCC Application.

JOE WALSH, WB6ACU, IS AN ANALOG MAN

Grammy Award-winning rock-and-roll legend Joe Walsh, WB6ACU, returns with Analog Man, set to be released June 5. This is Walsh's first solo album since 1992's Songs for a Dying Planet. According to Walsh's website, Analog Man is both modern and timelessly soulful, packed with Walsh's wit, charm and chops; it delivers an incredibly raw and intimate sound. "It's been 20 years and I have a lot to say," Walsh explained. "These songs come from the heart."

Walsh -- best known for his powerful guitar licks -- joined the Eagles in 1976 and is credited for bringing a harder rock sound to the band with the acclaimed Hotel California, The Long Run and Eagles Live.

No stranger to the analog way of life, Walsh -- an ARRL Life Member -- enjoys operating on 80 metres AM. AM -- or amplitude modulation -- has been around the amateur bands since the 1930s. AM offers a warm, rich audio quality that provides for more personal interaction. The simplicity of AM circuit design encourages hands-on restoration, modification and homebrew construction to an extent no longer found among contemporary radios. Many hams who operate AM say they enjoy the simple, roomy electrical and mechanical designs of the older radios, claiming that they can more easily be modified and tinkered with than their modern counterparts. Other enthusiasts claim that these vintage radios sound better than their silicon descendants, saying that the tube audio from vintage gear is "warmer" and more aesthetically pleasing than the audio produced by the typical modern transceiver.

A self-proclaimed analog man, Walsh refers playfully to the new digital age in the album's title track. He notes that he has adapted to the digital age, but says "I am what I am -- I'm an analog man." Walsh developed the album over the last 10 years, drawing on personal experiences to breathe life into each track. "I just really feel like it's all come together and finally I feel like a complete person and a complete musician," he said. "I think there is some confidence in there that I never had. That's what I was hiding Check out Analog Man -- the title track of Walsh's new album and details of his South African tour starting on 4 April in Cape Town at http://www.joewalsh.com/

CONTEST NEWS

CONSTESTS IN APRIL

SARL 80 m QSO Party and RaDAR Contests

The first leg of the SARL 80 m QSO Party will be run on Thursday evening 5 April from 17:00 to 20:00 UTC. It is a phone only contest using the segments 3 603 to 3650 and 3700 to 3800 kHz. The exchange is your call sign, an RS report and your name.

The first leg of the Rapid Deployment Amateur Radio or RaDAR Contest will be run on Saturday 7 April starting at 12:00 UTC and ending at 18:00 UTC. Activity is on all HF Contest bands, VHF and UHF using CW, SSB, AM, FM or any digital mode. The exchange is your call sign, your name, a RS(T) report, QTH and grid locator.

Find all the information on page 39 and 41 of the 2012 SARL Contest Manual, also the RaDAR Facebook page.

CLUB NEWS

The Hibiscus Coast Amateur Radio Club, ZS5HAC, held its annual general meeting on 25 March 2012 at Cinder City, Seapark, Port Shepstone. At this meeting the following office bearers were elected: Chairperson: Sid Tyler, ZS5AYC; Secretary: Herman Horn, ZS5LH; Treasurer: Brian Burger, ZS5AZH; Technical: Jan Coetzee, ZS5JC; Hamnet Liaison: To be appointed; Public Relations: Sid Tyler; Contest Managers: Jan Coetzee, ZS5JC; Light House Coordinator: Gawie Hoon: ZS5R; and Youth Coordinator: Emmerelda Coetzee, ZU5EM.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Currently only small, stable sunspots are facing the earth. The reappearance of Sunspot 1429, that was the source of many strong flares earlier this month, is eagerly awaited following a two week trip around the back side of the sun.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 74.

All the bands from 20 m to 10 m will provide lots of DX fun with 15 m providing the best openings with 10 m not far behind.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 5 April - SARL 80 m QSO Party and RaDAR competition 7 April - RaDAR competition 6-9 April - Western Cape Antique Wireless Association Ekspo near Stanford, contact John, ZS1WJ, on 082 673 5337 for more information. 20 - 22 April SARL Convention in Pinetown.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a

web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Fritz, ZS6SF.

Thank you for listening, 73. /EX

//
Wichita Man, (KD0IIF) Hopes to Win Lottery; Lightning Strikes Instead:

Posted: 31 Mar 2012 04:13 AM PDT
http://www.eham.net/articles/28010

Like a lot of other Americans, Bill Isles bought Mega Millions lottery tickets on Thursday.
Later he joked with a friend that he had a better chance of getting struck by lightning than winning the record jackpot. That night, Isles walked out into his backyard and got struck by lightning.
"It was like, flash, bang, instantly," he said. Isles, 48, wasn't hit directly, but a jolt was strong enough to knock him face-first to the ground, start his muscles twitching, make his heart beat irregularly and scramble his thoughts. Isles knows about lightning. He is a volunteer with Skywarn, a national organization of volunteers who provide local information about severe weather to the National Weather Service. On Thursday night, as storms moved through the Wichita area, Isles decided to go outside at his duplex at 6320 E. Orme, southwest of Kellogg and Woodlawn, and contact some of his storm-spotting buddies in the field on his hand-held ham radio. When he went outside about 9:30 p.m., the night looked harmless enough. "It looked like things were far enough off to the north, and there were only just a few raindrops," Isles said. "I would hear thunder, but I didn't see anything close. I thought I was OK." He remembers talking to a couple of friends on his radio.
"One minute I'm sitting there talking, and the next minute I'm down on my face," he said.
There was no warning, no feeling of an imminent electrical shock, no hair standing on end.

//
Communication Key when Weather Strikes:

Posted: 30 Mar 2012 05:44 PM PDT
http://www.eham.net/articles/28009

MOUNT VERNON -- When severe weather hits, maintaining lines of communication between responders is vital, but what if the towers are down, the cellular networks are compromised and the electrical power is out? When all else fails, amateur radio operators step up to the plate and get the messages through. Arlin Bradford, president of the Mount Vernon Amateur Radio Club and assistant emergency coordinator with the Knox County Amateur Emergency Radio Service talked with the News about the roles amateur radio

operators -- called hams -- play in the event of a natural disaster. First, hams assist in monitoring local weather conditions.

Titanic Exhibition to be Shown in New Tredegar:

Posted: 30 Mar 2012 05:42 PM PDT
http://www.eham.net/articles/28008

NEXT week an exhibition featuring a radio operator who received the SOS signal from the Titanic, will be shown in New Tredegar. The County Borough museum, the Winding House in New Tredegar opens its fascinating new exhibition on Friday April 6. The Titanic, the Mill and the Signal: Artie Moore and Titanic's SOS, focuses on amateur radio enthusiast, Artie Moore from Gelligroes Mill, who received RMS Titanic 's SOS signal, on his home-made radio receiver. The new exhibition will also explore the story of Titanic and some local links in this 100th anniversary year of her sinking.

Amateur Radio Plays Major Role in Severe Weather Alerts:

Posted: 30 Mar 2012 05:41 PM PDT
http://www.eham.net/articles/28007

The Capital Area Amateur Radio Emergency Response Team (CAARERT) was formed in direct response to the events of September 11th, 2001. Comprised of amateur radio operators, the volunteer group's sole purpose is to organize for emergency response. A part of that commitment is to provide storm spotting operations, called SKYWARN for Sangamon and Menard counties. John Anderson (W9TRC) is the current president of the organization. We talk today with its past president, Dick Drew. His callsign is K0HMO.

City Relaxes Rules for Personal Antennas:

Posted: 30 Mar 2012 05:40 PM PDT
http://www.eham.net/articles/28006

OTTAWA -- A compromise between the city and amateur radio enthusiasts means they'll get a bit more freedom to put up private antennas on their houses and in their yards, city council agreed Wednesday. The city doesn't directly regulate antennas on private property: that's Industry Canada's job, but the federal department gives municipalities a chance to say what they think. The rules are primarily meant to regulate cellphone towers, which companies like Bell and Rogers are building more and more of to try to keep up with demand for smartphone service, but they cover amateur radio antennas as well and ham radio operators said they were too restrictive. The compromise lets personal antennas be erected in front or side yards in urban or suburban neighbourhoods as long as they're shorter than 15 metres, less than three inches across and set back at least 1½ metres from property lines. (The rules are looser for bigger lots.) Bigger antennas would require public consultations so the neighbours could have their say before the city came up with its position.

[IARU-R2-News 176] More stations to be active on WARD
2012-03-31

On April 18, 2012 we will celebrate the World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union, IARU.

This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962.

For this reason there will be several special event stations from IARU's Member Societies active on different dates during April:

6H6IARU by the Federaci﷿n Mexicana de Radio Experimentadores who has commissioned this operation to Grupo DXXE. This station will be active from 13 to 18 April in all modes and bands. QSL via LoTW and N7RO, direct or bureau. Daily logs uploads will be available in ClubLog.

3G87IARU by the Radio Club de Chile. This station will be active throughout the month of April. QSL via CE3AA.

LZ1WARD by the Bulgarian Federation of Radio Amateurs also will be active throughout the month of April. QSL via bureau.

EL2RL by the Liberia Radio Amateur Association will be active on April 18, 2011 on 10, 15, 17 and 20 meters. Direct QSL to EL2BA.

HB9WARD by Union Schweizerischer Kurzwellen-Amateure to be active also on April 18, 2011. This first time callsign will be on the air by HB9JOE and a group of radio amateurs from Bern. QSL via HB9JOE.

HF87WARD by members of the SP-CFF (SP0CFF). This station will be active from April, 17 to 30. QSL via eQSL.cc and WFF LogSerach. For those who want to send card direct, please send SASE to: Polish Club Flora & Fauna, Suchacz, Wielmozy 5b, 82-340 Tolkmicko, Poland. They will even have an award for this operation.

We hope to hear from more special event stations to be active on April 18. So far stations from North America, South America, Europe and Africa plan to be active, If your national society or club will be active let us know:news@iaru-r2.org <mailto:news@iaru-r2.org>

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

'Four Days In May' - Dayton, OH (May 17-20, 2012)

Posted: 31 Mar 2012 10:27 AM PDT
http://forums.qrz.com/showthread.php?340328-Four-Days-In-May-Dayton-OH-(May-17-20-2012)&goto=newpost

'Four Days In May' or FDIM is the annual convention of the QRP Amateur Radio Club International

HolidayInn_300.jpg

It is held in Dayton, OH and runs concurrently with the Dayton Hamvention.

We kick off with a day of seminars on Thursday 17th May, this year speakers and subjects include -

Craig Johnson, AA0ZZ PIC MicrocontrollersJason Milldrum, NT7S Leveraging Free and Open Source Tools in HomebrewingEd Breneiser,WA3WSJ Pedestrian Mobile OperationGrayson Evans, KJ7UM Hollow-state HomebrewingJames Duffey, KK6MC VHF and UHF Weak Signal for the QRPerseminar_400.jpg

The seminars are followed by an optional Buildathon which includes a pizza party :p

Thursday evening ends with Show And Tell (your own projects), Meet The Speakers, Competitions and Vendor Night where traders will be selling everything from components to keys, from books to antennas, from tools to QRP kits . . .

On Friday we organise shuttle buses from our hotel to the Dayton Hamvention.

Friday evening includes a Home-construction competition and a new unique event - the Accessibility Challenge. We have challenged our visitors to design a kit that may be built by a visually impaired ham. QRP ARCI already supports blind hams by supplying the QRP Quarterly magazine in an electronic format. Our visually impaired members have expressed a desire to build a kit and we look forward to some novel entries !

On Saturday we have more shuttle buses to the Hamvention and a Grand Banquet in the evening. The banquet is where we have our raffle (for an Elecarft KX3 this year) and we give out door prizes - we already have 5 transceivers, 2 Begali paddles, a key, a mast, vouchers . . . One year we gave away over $10,000 in door prizes !

Our group and our convention covers a wide range of interests. Most of us are QRPers, but we all have a variety of interests including QRP, home-construction, backpacking, Software Defined Radio and just having fun.

Our venue is the Holiday Inn at Fairborn, just a few miles to the south-east of the Hamvention. There are several hotels in the area and lots of restaurants. With the shuttle buses and spouse activities we aim to turn a visit to the Hamvention into an easy and fun four day ham vacation.

Our website is at http://www.fdim.qrparci.org

Book online now and you will be entered into a draw to receive a 15m Transceiver Kit !

If you cannot make it to Dayton, check out our club at http://www.qrparci.org

4X/4Z, ISRAEL (Contest Event). The "2012 Holyland Contest", organized by the Israel Amateur Radio Club, will be held on 2100z, April 20th, to 2100z,

April 21st, on 160/80/40/20/15/10 meters and on modes CW, SSB and the Digital. It will provide a good opportunity to work many 4X/4Z stations toward the "Holyland Award". Full details are available on the Web page at: http://www.iarc.org/~4z1pf/Holyland%20Contest%202011%20booklet.pdf
The Contest Manager is Mark, 4Z4KX (E-mail: <mailto:4z4kx@iarc.org>)

6O, SOMALILAND (Press Release #1). Paul, N6PSE, sent out a press release on March 28th, stating [edited]: "The Intrepid-DX Group is pleased to announce our next DXpedition, as 6O3A from Hargeisa, Somaliland (Somalia), to take place from November 6-14th, 2012. The Intrepid-DX Group is the same group which brought you the recent ET3AA, ST0R and YI9PSE DXpeditions. Our primary objective is to activate Somaliland with a goal of providing as many DXers as possible a "new one" with this rare DXCC entity, and as a secondary objective, to give as many band-slots as possible. We will focus on North America, KH6, and ZL/VK during those periods when propagation is possible to those areas.
The team consists of twelve operators including: Co-Leader Paul Ewing/ N6PSE, Co-Leader David Collingham/K3LP, Dave Flack/AH6HY, Jun Tanaka/ JH4RHF, Dmitri Zhikharev/RA9USU, Darko Rusman/E70A, Krassy Petkov/K1LZ, Hrane Milosevic/YT1AD, Bill Beyer/N2WB, John Miller/K6MM, Al Hernandez/ K3VN and Bob Grimmick/N6OX.
Our QSL Manager is Joe, W3HNK. We will have OQRS available and will accept direct and Bureau QSL cards. We plan to upload our logs to Club Log on a daily basis.
You can find out more about our plans at our Web site at:
http://www.intrepid-dx.com/6o3a/
Thank you,
The Intrepid-DX Group."
According to their Web page, the multi-national team plans to have 5 stations active on at the same time on different bands. Activity will be on 160-10 meters, including 30/17/12 meters, using CW, SSB and RTTY.
Suggested frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 1845, 3780, 7065/7180, 14145, 18145, 21295, 24945 and 28495 kHz
RTTY - 7035, 10140, 18100, 21080, 18100, 21080, 24920 and 28080 kHz

The Pilot stations mentioned are Charles Vaughn/AA6G (West Coast Pilot) and Col McGowan/MM0NDX (EU, AF, OC & SA). Webmaster/QSL Designer is Roberto Filloy/EA2RY. On their Web page there is a band and mode survey available. The 6O3A team is looking for sponsors. Somaliland is ranked in "The DX Magazine's 2011 Most Wanted Countries World-Wide (Mixed-Mode)" as 40 (37/AS, 65/EU, 31/NA and 32/AF, OC & SA).

8Q, MALDIVES. Alex, UT5UY, will be active as 8Q7UY from Thulhagiri Island (AS-013) between April 12-21st. Activity will be holiday style on 80-10 meters using CW and SSB. QSL via UT5UY, by the Bureau or direct.

9M2 & 9M6, WEST & EAST MALAYSIA (IOTA Op). Victor, R6AF, is now active as 9M2/R6AF/p from Pulau Besar (AS-097), West Malaysia, until possibly April 5-6th. Also, look for him to be active as 9M2/R6AF/6 (he states), from Sabah, Borneo (OC-088), East Malaysia between April 8-11th. Activity

will be 40-10 meters mainly on CW but with some SSB. QSL via his home callsign.

C6, BAHAMAS. Look for Gabriele, I2VGW, to plan a "Bahamas Islands Round Trip" DXpedition. He already has in his hands the licence and callsign, so look for him to operate as C6AGW starting April 26th through May 6th, from New Providence main island (NA-001), as well as Bimini (NA-048) and Berry (NA-054) Island -- two quite rare and claimed IOTA references. He doesn't stop there, but before going back to Italy, he will activate Long Island (NA-001). So, make sure you copy and listen carefully to catch the right reference number and location. The press release states, "Please keep in mind that, this time, it will be a very holiday style operation (with his first mate and supporter that is his wife Roberta)." Gabriele will put a great emphasis on the Digital modes and the 30/17/12 meter bands, as well as SSB too. His C6AGW set up will be a new dipole to test, Icom 7200, vertical HF3 and a Buddipole. For further information and any updates, during the I2VGW's trip, please have a look at his DXpedition Web site at: http://www.mdxc.org/c6agw

D6, COMOROS (Update). A few more details on the upcoming D64K DXpedition were released this past week by Frabrizio, IW3SQY. A team of Europeon operators will be active as D64K from Comoros Islands (IOTA AF-007) in August 2012. Operators mentioned are Fabrizio/IW3SQY, Paolo/IV3DSH, Antonello/IT9YVO, Franco/IZ8GCE, Giorgio/IZ4AKS, Les/SP3DOI and Salvador C31CT/EA3QS. The team has already obtained all permissions, and the license has been sent to the DXCC Desk. It was mentioned that at the present time it is appropriate to maintain confidentiality about dates and locations for safety reasons given the delicate political situation on the island. The official D64K Web site will go ?online about a month before the DXpedition. Their license covers from 160 to 6 meters, so the guys will be active on all bands and modes, and they are even considering the possibility of working on 60m and 6m. The QSL Manager will be Paolo, IV3DSH. More details will be forthcoming. Watch the following for updates:
http://www.d64k.com
https://twitter.com/#!/D64K

DXU (Press Release #4 - Final) [edited]. "The 'DX University'&#65533; will take place at Visalia, California, on Friday, 20th April. It has quickly become a sell-out! Over 120 'Students' have already reserved their place so we have increased the room-size. Instead of shutting out late-comers everyone is now welcome to book their seat at this ground-breaking event, the first of its kind. But pre-registration is required and there's only three weeks to go! On the program are several of the world's most renowned DXers who will share their knowledge. Here are tips on making your DXCC or on achieving Honor Roll: something for everyone. Go to <www.dxuniversity.com> to register: this is your final call. We hope to see you in the Californian spring sunshine. DX IS ! Contact Wayne <n7ng@bresnan.net> or Roger <g3sxw@btinternet.com> with any queries."

GP3, GUERNSEY. Members of the Telford and District Amateur Society will once again visit the Island of Guernsey (EU-114, WAB Square WV27) and be

active as GP3ZME/P between June 22-27th. Activity will be on the following:
HF - 160 meters to 10 meters.
VHF - 50 MHz, 70 MHz, 144 MHz and UHF 1.3GHz
SHF - 2.3 GHz, 3.4, GHz, 5.7 GHz, 10 GHZ and 24 GHz.
Their Locator Square of the camping site is IN89QK, but members of the
group may well move around the island looking for the best paths to UK,
EU and etc. You may follow the DXpedition on twitter. David, 2W0ZJA, will
be tweeting updates, frequencies, etc... at: http://twitter.com/#!/@2W0ZJA
Also, the VHF talk back and the ON4KST chat will also be used. The team
plans to take part in the following contests:
* Over the weekend of June 23-24th: 1.3 GHz and 50 MHz (CW) contests
* UKug Contests: June 24th - 5.7 GHz Cumulative
10 GHz Cumulative
24 GHz Cumulative
June 26th - SHF UKAC 2.3 GHz - 24 GHz

For more details on what the operators did last year, view the URL
link to the club's October newsletter at:
http://www.tdars.org.uk/library/Newsletter%20October11.pdf
Also, check out QRZ.com (under GP3ZME) for pictures and a half an hour
YouTube video from last year's trip. For direct QSLs, please QSL via
M0PNN. For a Bureau card, QSL via G3ZME or E-mail info to:
buroqsl@pleasemail.me.uk

IOTA NEWS.....
AS-109. Operators Igor/UA9KDF, Valery/RG8K, Artyom/UA9KAM and possibly
others will be active as RT9K/p from Zhuravlinyy Island between
April 1-5th. The team will use snowmobiles to get to the
island. Activity will be on 80-10 meters. They will use a
Kenwood TS-590, Yaesu FT-857 and an ACOM-1010 amp into a
BiggIR (80-10m) and a Robinson RR-33 antenna. You will be
able to track them on their snowmobiles via APRS at:
http://aprs.fi/#!mt&#65533;admap&z&call&#65533;2FRT9K-14&timerange
600
All QSLs will be automatically sent by the Bureau. Direct QSLs
can be obtained via RX9KM. They will post their log online,
possibly one to two times daily on ClubLOG. Log search is at:
http://www.clublog.org/logsearch/RT9K/P

AS-154. A team of Hungarian and Turkish operators will be active from
Giresun Island between July 24th and August 1st. Activity will
be on all HF bands. Operators mentioned (with active callsign)
are Pisti/HA5OJ (TB2ZHI/0), Ed/HA5BWW (TA0/HA5BWW), Laci/HA5MA
(TA0/HA5MA), Karl/HA7PC (TA0/HA7PC), Feco/HA8KW (TA0/HA8KW),
Bekir/TA2RX (TA2RX/0), Ali/TA7EB (TA7EB/0) and Ali/TA7EM
(TA7EM/0). QSL via their home callsigns, direct or by the
Bureau. During the RSGB IOTA Contest (July 28-29th), the team
will use the callsign TC0HA. QSL TC0HA via HA5KHC, direct or
by the Bureau.

EU-008. Operators Graham/MM0GHM, Gordon/MM0GOR, Allan/2M0VNW, Peter/
GM7AAJ and Jason/GM7VSB will once again be active as GM7A
from Gigha Island (IOSA NH24, SCOTIA CS23) during the RSGB
IOTA Contest (July 28-29th). Activity will be on all HF bands.
QSL GM7A direct or by the Bureau.

EU-028. Guenter, DL3NBI, will once again be active as IA5/DL3NBI from
Giglio Island (IIA GR-002, MIA MI-036, WLOTA 0564) between May
15-23rd. Activity will be holiday style on the HF bands. QSL
via his home callsign, direct or by the Bureau.

EU-047. Sebastian, DL1AXX, will be active as homecall/p from Baltrum
Island (GIA N-006) between May 20-25th. Activity will be on
the HF bands using CW and SSB. QSL via his home callsign, the
Bureau is preferred.

EU-049. Fred, PA1FJ, will be active as SV8/PA1FJ/p from Samos Island
(GIOTA SAS-006, MIA MG-099, WLOTA 4163) between May 11-15th.
Activity will be on 40-10 meters SSB only. He will also try
6 meters SSB during E openings. QSL via his home callsign by
the QSL Bureau.

EU-095. Operators Ivano/I2RFJ, Alberto/IV3BSY, Tony/IZ2ESV and Andrea/
IZ2LSC will be active as TM1F from Ratonneau Island between
April 21-25th. They will have 3 stations active on 80-6 meters
using CW, SSB and the Digital modes. QSL is via IK2DUW. Visit
their Web page at: http://www.timpy.it/tm1f
The team also has a twitter account <@TM1F> to keep you updated
before, during and after their activities. The TM1F team also
has a video teaser link at: http://youtu.be/H5hq2_-Bkcs

EU-125. Francois, ON4LO, will be active as 5P4LO from Romo Island
(ARLHS DEN-074) between April 15-20th. Activity will be on
80-10 meters using SSB, RTTY and PSK. QSL via ON4LO, direct
or by the Bureau.

NA-092. Jim, WD5IYT, will once again be active from Mustang Island
(USI TX-011S, Nueces County, Texas) during the RSGB IOTA
Contest (July 28-29th) as a Single-Op/Mode-CW/Low-Power/
Island entry. He will be using a K3. QSL via LoTW, direct
(QRZ.com) or by the Bureau.

SA-048. A team of Venezuelan operators from the Grupo DX Caracas (GDXC)
will be active as YX5P from the rare Patos Island between April
19-22nd. Activity will be on all bands and modes. This will be
only the second time that a DXpedition will take place from
this island due to its remoteness and difficult access. The
first DXpedition (YY5P) was made by the GDXC 21 years ago which
makes it the most requested and sought after IOTA in Venezuela.
QSL via DM4TI. Visit the GDXC Web page at: http://www.gdxc.org

ISWL CALLSIGNS (For April). The following ISWL club callsigns will be
used throughout the month of April:
GX4BJC/A - Operated from Great Sutton, in Cheshire, by Geof, M0BAU.

(/A WAB Square SJ37 - England and IOTA EU-005)

MC1SWL/A - Operated from Guilsfield, in Powys, by Martin, GW4GNY.
(/A WAB Square SY21 - Wales and IOTA EU-005)

For more information, see <http://www.iswl.org.uk> or QRZ.com and eQSL.cc

JD1, MINAMI TORISHIMA. Harry, JG7PSJ, has announced that he plans to be
active as JD1BMH from Minami Torishima (OC-073) sometime in September.
The exact dates and plans are to be confirmed and forthcoming on his
Twitter and Web page at: https://twitter.com/#!/jd1bmh
http://sapphire.es.tohoku.ac.jp/marcus

PIRATE ALERT. Didier, F5OGL, reports that on March 24th and 25th, 2012, a station operating as TO4E, and sending he was on Europa Island (AF-009), was definitely a PIRATE. The last TO4E DXpedition to Europa was in 2003, and there has not been any authorized activity from this island since then.
He also mentions that this prefix block used in 2003 is no longer in use. Also, the prefix for Europa had been changed four years ago, and no licence has been issued to anyone. The access to Europa is forbidden except under special authorization. As a reminder, Europa and the other islands of the "Iles Éparses" (French Eparse Islands) are now under the "Terres Australes and Antartiques Francaises" (TAAF), and their prefixes have been changed to the following:
FT5Y - Terre Adélie (Antarctica) FT5G - Glorieuses (Glorioso) Island
FT5W - Crozet Island FT5T - Tromelin Island
FT5Z - Amsterdam Island FT5E - Europa Island
F5TX - Kerguelen Island FT5J - Juan de Nova Island

Just a reminder, the prefix blocks FR5/G, FR5/T, FR5/E and FR5/J are no longer used or exist. Didier, F5OGL, the QSL Manager for the TO5E 2003 DXpedition to EUROPA, will not answer the cards for this activity in 2012.

ST. PETER & ST. PAUL ROCKS LOGS (Update). Last week we mentioned that Cesar, PY2YP, was able to obtain the log of the 2000 PS0S St. Peter & St. Paul Rocks DXpedition from the operators and uploaded the log into the LoTW. He mentions this week that thanks to PT7AA and PS7KM, he was was able to receive from PT7WA the following logs:
ZY0SW May-14-1989 to May-20-1989 ZY0SK Feb-04-1994 to Feb-08-1994
ZY0SS May-14-1989 to May-20-1989 ZY0SK Feb-03-1997 to Feb-14-1997
ZY0SY May-17-1989 to May-18-1989 ZY0SG Feb-04-1997 to Feb-14-1997
ZY0SP Feb-03-1994 to Feb-06-1994
Cesar reports, "So far I have already uploaded only ZY0SG, I will do the remaining ones as soon as possible. In addition, I've written a skinny Web page for the Rocks at my own site <www.py2yp.com> with some more information. I hope to receive the 1978 (PY0RO and PW0PP) and 1991 (PY0SR and PY0SK) paper logs very soon. I am also trying to have the logs from PT2GTI operations."

UK POSTAL INCREASE. Tom, GM4FDM, reports that as of April 30th, the UK Postal system will increase the following:
* A 10gm (0.35 ounces) envelope (airmail type envelope and ONE QSL card) will now cost 87p to Europe and World Zones 1 and 2.
* A 20gm (0.70 ounces) envelope will cost 87p Europe and £1.28 for World Zones 1 and 2.
Therefore for a U.S. station to send for a QSL to a UK station (Great Britain and Northern Ireland) is 2 USDs (the absolute minimum for return postage), but if you use thick envelopes or expect MORE THAN ONE CARD in the same envelope, then depending on return weight, 2 USDs may be insufficient postage, so he would suggest 3 USDs.....

QSL RECEIVED VIA LoTW: 3G3O, 3XY1D, 5K3R, 8P5A, 9M8Z, C4W, CP1FF, DL1ZU, EA1PO, H22H, HR5/F2JD, IB1B, JF1SEK, JH1HIC, KG4SS, KH2L, LU5FR, LU8DY, MI0SAI, OJ0X, PJ4/NK1Z, RA1AOB, RN3ZIC, SP3SLO, SV9GPV, UX2KA, V47JA, VE3SZ, ZF2LC, ZY0SS and ZY0SW

QSLS RECEIVED VIA MAIL: 3D2R, 3D2YA, 3G3M, 4L1FL, 4S7AB, 4W0VB, 5H3EE, 5M2TT, 5W0OU, 5W0RE, 5W1SA, 5Z4HW, 7Z7AA, 8P9AA, 8Q7DV, 8R1EA, 9G5ZZ, 9J3A, 9M6JC, 9N7DX, 9N7MD, 9Q6AL, A41OO, A52DL, C31BO, CE3EEA, CE4A, CE9/VE3LYC (SA-031), CE9/VE3LYC (SA-097), CO6LC, CP4BT, CX5TR, D2AK, E51MAN, E51NOU, EA9EU, EI80IRTS, ET3AA, ET3JA, FG/DK9PY, FG/DL1CW, FO/N6JA, FP/G3ZAY, FR/DJ7RJ, FW5RE, GB4SEN, HC1HC, HK0/DL5YWM, HV0A, HV5PUL, HZ1MD/P, K6VVA/KL7, KG2A/VP9, KH2/N2NL, KH4/W5FJG, KH7Y, KL7RRC, OY1CT, PJ4/K5WE, PJ4C, PJ5/SP6EQZ, PJ5/SP6IXF, PJ7/W4BUW, PZ5T, ST0R, SU9VB, T32C, T6TL, T8CC, T8XX, TG9NX, TL0CW, TN2T, TO5G, TS7TI, TS8P, TU2T, TX3T, TX7M, V25AA, V63DX, V85TX, VE2IM, VP2MMM, VP5/W5CW, VR2XMT, XE2X, Z21BB, Z21BC, ZB2EO, ZD8F, ZD8W, ZF2AG/ZF8, ZF2AH, ZK2V and ZK3RE

QSLS RECEIVED VIA THE BUREAU: 5V7CC, 6W4/IZ1KHH, 9G5LM, 9Q50ON, A71DLH, BA4EG, C57R, CN2DJ, DL4JS/6W, DS5USH, ED9M, ET3AA, HB0/PC5A, OJ0B, PJ4/PG4M, TK/DF6ZY, TY1MS, V31WA, V5/DK1CE and XU7KOH

SV5, DODECANESE. Operators Giorgio/IZ4AKS and XYL Silvia/K1XYL will be active as SV5/IZ4AKS from the Island of Rhodes (EU-001) between April 9-16th. Activity will be limited as this is a business trip. QSL via IZ4AKS.

V3, BELIZE. Operators Henry/W5HNS, Jay/K0BCN and Marty/W5MRM will be active as V31WH, V31MX and V31MO, respectively, from Cay Caulker (NA-073). The team will arrive on July 23rd, and possibly be on the air that day. They will return to the U.S. on July 31st. Activity will be on 40-10 meters using a 5 band hexbeam and a 40m dipole, operating CW and SSB. Jay and Henry are the CW ops (as well as SSB) and Marty will operate on Phone. Nothing has been decided about PSK or RTTY yet. There will only be one transceiver, so they will not be on more than one band at a time. During the RSGB IOTA Contest (July 28-29th), they will sign V31MX and be on the contest allowed bands alternating SSB and CW (on 40m and up). QSL via their home callsigns or LoTW.

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Akio/JA7ZP (V63ZP) will be active from Pohnpei Island (OC-010) between May 25-29th. Activity will be on 40-10 meters and all modes. QSL via their home callsigns.

Also, look for V6A during the CQWW WPX CW Contest (May 26-27th) as a Single-Op/All-Band entry. Operator is JA7HMZ and QSL V6A via JA7HMZ.

VK9L, LORD HOWE ISLAND. Operators Pat/VK2PN and Miro/OK1NG, along with the help of Chris/VK3FY, will be active as VK9PN during the CQWW WPX CW Contest (May 26-27th) as a Multi-Op entry. QSL for operator's instructions. Pat and Miro will be on Lord Howe Island between May 23-30th. However, Chris will be there on a work assignment between May 27th and June 2nd. He will only be able to operate during the week and most likely during the evenings as work will take precedence. He will be active as VK9LHI after the contest. Modes most likely wil be CW, SSB and some RTTY. QSL via VK3HF.

WAE NEWS. Ric, DL2VFR, Chairman DX & HF-Contesting of DARC, informs that the Worked All Europe (WAE) committee has deleted Malyj Visotzkij (R1MV) as of 17th of February 2012, from the WAE-list. The entity is now transferred to the list of "Deleted WAE". The WAE-list and the corresponding award rules will be corrected accordingly.

WUST AWARD (ATTN. Number One DXCC Honor Holders!). The new DX award is availble and is being offered/sponsored by the Metro DX Club of South Suburban Chicago. The W.U.S.T. (Worked all U.S. Territories) is a signif-icant and unique award, and it requires submitting only 16 QSL cards with a user-friendly application. Some of these 16 WUST territories can be heard regularly, but many appear on the list of the 25 most wanted countries and can only be worked during a DXpedition to that location. Don't let this scare you away, however, because you can qualify for the basic award by confirming only 14 of the 16 territories. Your remaining two can be confirmed later and endorsements are available that will signify that you have reached the ultimate goal. The 16 WUST territories effective January 1, 2012 are: KG4 (Guantanamo Bay), KH0 (Mariana Islands), KH1 (Baker & Howland Islands), KH2 (Guam), KH3 (Johnston Island), KH4 (Midway Island), KH5 (Palmyra & Jarvis Islands), KH5K (Kingman Reef), KH7K (Kure Island), KH8 (American Samoa), KH8S (Swains Island), KH9 (Wake Island), KP1 (Navassa Island), KP2 (US Virgin Islands), KP4 (Puerto Rico) and KP5 (Desecheo Island). Confirmations can be on mixed bands and modes and there are no date restrictions. No, it's not as easy as you may have thought, but remember, this is a DX award. It's not a simple certificate acknow-ledging contact with a special event station or commemorating an occasion. You can proudly display this distinctive certificate in your ham shack and show it to fellow hams acknowledging your efforts in the world of DX. Remember, only 14 QSL cards get you started on the road to WUST and not 340 that are required to make number 1 on the ARRL DXCC Honor Roll. If you don't want to take the chance of mailing 16 valuable QSL cards, photo-copies of confirmations will be accepted. In addition, Logbook of the World confirmations are OK and must be verified by two licensed amateur radio operators. Plus, if you are "NUMBER ONE" on the ARRL DXCC Honor Roll and your station call appears on the list dated August 2010 (or later) you'll not be required to send any confirmations for the WUST award. Simply file an application along with 8 U.S. dollars or 4 valid IRCs. Mail your sub-mission to the Metro DX Club, 3810 N. Chamlin Drive, Morris, IL 60450.

Following the receipt of the original award for a minimum of 14 territories, endorsements for contact 15 and 16 are available for 3 U.S. dollars or 2 valid IRCs. For additional information, go online to:
http://www.metrodxclub.com/wust_award.htm
E-mail questions should be sent to awards@metrodxclub.com.
This award has been written up in "CQ", the K1BV Awards Directory at <http://www.dxawards.com/DXAwardDir/usa%204.htm> (listed under "T" for Territories), and "QRZ-DX".

ZL9, CAMPBELL ISLAND. The Hellenic Amateur Radio of Association of Australia (HARAOA) is organizing a DXpedition to ZL9 Campbell Island (OC-037), New Zealand, between November 17-30th. Campbell Island (ZL9) is Number 15 on the current DXCC most wanted list. The ZL9HR DXpedition team will consist of a total of nine (9) team members including Tommy, VK2IR (Team Leader), and John, VK3YP (Team Co-Leader). They are inviting any experienced operators who would like to attend this DXpedition to E-mail Tommy at <vk2ir@vk2ir.com> for more information. For updates and details, visit the Web site at: http://www.zl9hr.com

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 1st April 2012

IRTS 80th Anniversary AGM & Rally

Just three weeks remain until the 80th Anniversary IRTS AGM and Rally. As you can appreciate this is a very special anniversary and you are asked to make all reasonable efforts to attend. Dinner tickets are just 32, a reduction on previous years and represents great value for this very special dinner. B&B is 55 for single and a double is 65. The Venue is Fairways Hotel Dundalk, telephone 042-9321500. The radio rally and exhibition will be held in the large conference hall with lots of space to move about and to peruse at your leisure. It all happens over the weekend of April 21st & 22nd.

Dinner tickets can be bought now by contacting Thos EI2JD on 087-2953256 or email thoscaffrey /at/ hotmail.com or by contacting any IRTS committee member. A very warm welcome awaits you.

North Cork Radio Group

The North Cork Radio Group will be activating Mizen Head Visitors Centre again this year for Marconi weekend. The callsign, EI0IMD, will be on the air from 20th April - 22nd April inclusive. As you may know, Marconi Day is on 21st April this year and we will be operating over the full 24 hour period on this day in order that collectors of the Marconi Award will have the opportunity to add us to their list. Mizen Head is a beautiful location and well worth a visit.

Limerick Radio Club

Following the recent very successful Limerick Radio Club rally the following are the list of raffle prize winners.

Watson Wireless Weather station, donated by Gary O'Hanlon South East Communications, won by Roy Stewart

BHI DSPKR donated by Graham Somerville BHI UK, won by Brendan Kilmartin EI0CZ

AirVenture Flight Simulator Family Coupon donated by Eddie Ryan of AirVenture won by Roland E Hall EI6CZ

28A 12V PSU donated by Raymond Long of Long communications won by Stephen Boyd.

The 5Mhz Newsletter

The Spring Edition of The 5 MHz Newsletter has now been published and features information on the recent WRC-12 conference.

A subscription is not needed and the Newsletter can be freely read or downloaded from Google documents at http://tinyurl.com/7ylxz9z

A paper copy can be obtained by sending an SASE large enough to take folded A4 to the Editor, G4MWO, who is QTHR and on QRZ.com.

A chart is also maintained of current Worldwide 5 MHz Amateur Allocations. This can be found at http://tinyurl.com/82rwq2b

World Amateur Radio Day

On April 18, 2012 we will celebrate the World Amateur Radio Day on the 87th Anniversary of the founding of the International Amateur Radio Union, IARU. This year's theme for the World Amateur Radio Day is "Amateur Radio Satellites: Celebrating 50 Years in Space" in remembrance the launching of OSCAR 1 on December 12, 1961 and the launch of OSCAR 2 on June 2, 1962. For this reason there will be several special event stations from IARU's Member Societies active on different dates during April: 6H6IARU, 3G73IARU and LZ1WARD. If IARU's Member Societies plan to have a special event station for this reason in April let us now so we can publish the details before the end of this month. Send us an email to news/at/iaru-r2.org with the information.

Japan to launch Amateur Radio satellites

The Japan Aerospace Exploration Agency (JAXA) has announced the launch of five amateur radio satellites on two launches taking place in May and July. The first H-IIA launch takes place on May 17, 1639-1642 UT and will carry the amateur radio satellite HORYU-2. The second launch on July 21, 0218 UT of the HTV3 will deliver the JEM-Small Satellite Orbital Deployer (J-SSOD) to the International Space Station (ISS).

Titanic - GB100MGY will be on 502 kHz

GB100MGY will be operating on 502 kHz from the Fort Perch Rock marine radio museum in the Wirral, UK during the Titanic commemoration, April 14th & 15th.

Lough Erne Rally Today April 1st

The Lough Erne Radio Rally is on today at the SHARE Centre in County Fermanagh. Those planning to attend include two amateur radio presidents, Dave Wilson M0OBW, the RSGB President, with Peter Lowrie Mi5JYK, the Regional Manager And Eric Prince G3KPU, the President of RAOTA - the Radio Amateur Old Timers Association.

For more about how the rally visit:- www.learc.eu

South Eastern Amateur Radio Group

South Eastern Amateur Radio Group will operate as EI2WRC for the IRTS 2 metres Counties Contest on the bank holiday Monday (9 April) from Devils Bit. Members wishing to get involved should contact the club at; info/at/searg.com.

For those who have expressed interest in participating in Theory Classes leading to the Amateur Radio Licence with South Eastern Amateur Radio Group, there will be an information / planning session at our next general meeting which takes place at 8:30 p.m. on Monday 30 April in the Roanmore Centre, Cleaboy Road, Waterford. All are welcome!

The Geoparks communications weekend this year takes place on Saturday 26 and Sunday 27 May. South Eastern Amateur Radio Group will again operate from Tankardstown on the Copper Coast Geopark in Co. Waterford. The callsign is EI2GEO (pending approval). Activity will mainly be on HF. Anyone wishing to get involved should contact the club on info/ at/searg.com or phone Mark Wall on 087-6302026. For more information about the Geopark, visit www.coppercoastgeopark.com

For more information about SEARG visit the clubs web site on www.searg.com

Wording on Olympic QSL Cards:

Posted: 31 Mar 2012 05:05 PM PDT
http://www.eham.net/articles/28015

In view of all the restrictions associated with publicising the Olympics, members have been asking what wording may they use on QSL cards associated with the Olympic special prefixes. Through the RSGB the Olympic Brand office has confirmed that the phrase; "Amateur radio special event station to celebrate the London 2012 Olympic Games and Paralympic Games" is quite acceptable to use on ordinary QSL cards such as those associated with GOyxxx call and G2012xxx series.

//
Ham Radio Now - Episode 6: New Ham Band!

Posted: 31 Mar 2012 05:15 PM PDT
http://www.eham.net/articles/28014

The World Radio Conference, held in Geneva every four years or so, hammers out agreement on worldwide RF spectrum use for all countries and all services. Ham Radio has a little role to play, and interests to protect. Maybe not so little, at least to us. The ARRL's Brennan Price N4QX gives Ham Radio Now's Gary Pearce KN4AQ a detailed look behind the scenes of this major conference. This time around, Ham Radio came out pretty well: a new (albiet narrow, secondary) allocation at the bottom of MF - 472-479 kHz. And we fended off some potential interference from an oceanographic radar service. All in this edition of Ham Radio Now.

//
ARNewsline Report 1807 -- Mar. 30 2012:

Posted: 31 Mar 2012 05:21 PM PDT
http://www.eham.net/articles/28011

The following is a Q-S-T. The next Global Amateur Radio Emergency Conference to be hekd in Malaysia; 1700 South African hams let their licenses lapse, World amateur Radio Day to celebrate 50 yesrs of ham radio in space, Japan to launch five new hamsats, DXCC is going on-line and Roving Reporter Pierre Pulinmyleg returns with a truly out of this world April 1st story. Find out where Pierre is this year on Amateur Radio Newsline report number 1807 coming your way right now.

GB2RS NEWS

Sunday 1st April 2012

The news headlines:

* Did you know Ken Rowell G5RL?

* TEP observation beacons

* RSGB prepared to defend CW

Following the announcement a few months ago of the legacy from the late Ken Rowell, the Legacy Trustees, appointed to consider the way in which the bequest might be used, have held their first meeting. They are now asking for help from anyone who has any information on Ken Rowell, G5RL, his station, or any particular interests he had, that would help the Trustees to develop proposals on how his generous bequest could best be utilised. They are particularly anxious to obtain any photographs, letters or documents that would assist in this work. The Trustees are grateful for all the suggestions that have already been made regarding this legacy and will keep members informed of progress through RadCom. If you can help, please send any information to the Secretary to the Trustees, care of RSGB Headquarters, or to legacysecretary@rsgb.org.uk.

There are two new beacons on air from Namibia for TEP observations. They are active 24 hours a day from JG82IE, callsign V51VHF. Listen out for the 35 watt CW signal on 70.005 that uses a DK7ZB beam headed North, and the 144.430MHz CW signal into a 10 element DK7ZB beam, also heading North.

Some say that CW has been made obsolete by modern digimodes, which work well in conditions far too poor for the older mode. Now that Morse is no longer used in commercial radio traffic, the RSGB confirms that it would fight any moves to prohibit CW on amateur bands. The Society recognises that Morse gives much pleasure to thousands of operators, and will continue to support its use.

The Radio Security Service will hold its 16th reunion at Bletchley Park on Sunday 22 April in the Mansion Ballroom. Gates open at 10am and the meeting starts at 11am. All are welcome. The reunions are held to commemorate the 1,500-plus radio amateurs who used their special skills in the greatest secrecy in WW2 to monitor the German Secret Service, and thus facilitate numerous deceptions contributing to military successes, especially on D-Day. There will be a series of presentations

and there will be the opportunity to visit Hut One to view the large collection of communication equipment from the past. Booking is not required, but it will be helpful if you can let Stan Ames know if you hope to attend. You can contact him by email to RSSreunion@aol.com.

Ofcom has announced a GPS jamming exercise between 9 and 20 April near RAF Spadeadam in Cumbria. From 7am to 6pm there will be multiple jammers based within 5km of N55° 04.000' W002° 34.000', operating within the 24MHz band centred around 1575.42MHz. The total power used will be up to 10 watts EIRP. It is stressed that, as in previous exercises, Safety of Life operations will, at all times, take precedence over exercise activities.

The Spring Edition of The 5MHz Newsletter has now been published and features information on the recent WRC-12 conference. A subscription is not needed and the Newsletter can be freely read or downloaded from Google documents at http://tinyurl.com/7ylxz9z. A paper copy can be obtained by sending an SASE large enough to take folded A4 to the Editor, G4MWO, who is QTHR and on QRZ.com. A chart is also maintained of current Worldwide 5MHz Amateur Allocations. This can be found at http://tinyurl.com/82rwq2b On 24 March, sometime between 0230 and sunrise, in Kenninghall, Norfolk, Peter Lock, M0RYB had his red Land Rover Defender 90 X191 FVC stolen. Inside was an Icom IC-7000, serial number 1002538. The crime Number is 12618/12/0. If anyone has any information on the whereabouts of the radio, or vehicle, please contact Peter via doc.lock@tesco.net so that he can pass the information onto the police.

And now for the details of rallies and events for the coming week

The Lough Erne Amateur Radio Club Annual Rally will take place today, 1 April, at The Share Holiday Village, Lisnaskea, Co. Fermanagh BT92 0EQ. Doors open at 11.30am. There will be trade stands and a Bring & Buy. The RSGB President, Dave Wilson, M0OBW, will also be visiting the rally. Details from Iain on 02866 326 693.

Also today, 1 April, the South Gloucestershire Amateur Radio Rally will be held in the Scout Activity Centre, Woodhouse Park, Almondsbury, Bristol BS32 4LX. Doors open at 10am. There will be trade stands and a Bring & Buy. Talk in is on S22. More details from Stan Goodwin, G0RYM on 07833 517 370.

>From 10 April the Titanic Centenary event will take place from Charterhouse, Godalming. GR100MGY will be active for 6 days. There is free admission and free car parking on 14 and 15 April, 12 to 4pm. Contact G0EFO at michaelgs1@talktalk.net.

Now for the news of special events

On 8 April, GB50WVR will be on the air from the Keighley & Worth Valley railway, which is celebrating 50 years of the Preservation Society. More information, including QSL details, is on qrz.com.

GB100MGY will be on the air from 6 to 26 April from Fort Perch Rock Marine Radio Museum, New Brighton, Wirral in commemoration of the Titanic. They also have special permission from Ofcom to use this callsign on the 501 to 504kHz band. They plan to transmit and receive on 502kHz and, for those without a 500kHz band NoV, it will be crossband on 3566kHz or 7066kHz as propagation conditions determine. More on www.gb100mgy-fortperchrock.co.uk.

The centenary of the loss of RMS Titanic in 1912 will be commemorated with many activities taking place around the world, including a number in Godalming, Surrey, the birthplace of Titanic's Marconi Radio Officer, Jack Phillips. GR100MGY will be on the air from the grounds of Charterhouse school in Godalming. Operated by Wey Valley Amateur Radio Group, members of the public are invited to visit on 14 and 15 April from noon until 4pm. Visitors should come to the school on Hurtmore Road, GU7 2DX, during these opening hours and simply follow the parking signs.

And now the HF DX news compiled from 425 DX News and other sources

ON4AEO and several other operators from Belgium and South Africa will be active as 3DA0FC from Swaziland on 6 to 10 April. They plan to operate SSB, RTTY and PSK on 10 to 80m bands. QSL via ON4CJK, direct or bureau.

JA1XGI will be active as A35XG from Tongatapu, Tonga, which is IOTA reference OC-049, on 2 to 9 April. Activity will be on the 10 to 30m bands, especially 30, 17 and 12 metres using CW, SSB and digital modes. QSL via his home callsign, direct or via the bureau. GM6TW will be operating from the Inner Hebrides, IOTA reference EU-008, from 7 to 13 April. The main QTH will be the Isle of Jura, but will also be activations from Islay and Colonsay. QSL via M0UTD.

PJ2/PA7JWC and PJ2/PD7DB will be on the air from Curacao, which is IOTA reference SA-099, on 2 to 9 April. They will operate SSB, CW, RTTY and PSK on the 10 to 80m bands. QSLs via Logbook of The World are preferred or via home callsigns, direct and via the bureau.

Now the contest news

At 90 minutes in duration it may be a short contest, but make no mistake, the 1st RoPoCo contest today, 1 April, is quite challenging. The maximum permitted power is 100 watts with no QRP or high power categories. The basic format is that in your first QSO you send your full postcode and for all subsequent QSOs you send the postcode you received in your previous QSO. If you receive a postcode that you know is erroneous, for example a corrupted version of your own postcode, record it as received and give it to your next QSO partner as-is. Provided you are not the person to introduce an error, you'll get points for the QSO, because it is the accuracy of the exchange that is important. This all takes place on the 3.5MHz band from 1900 to 2030UTC.

Activity on 70MHz continues to grow with the 1st 70MHz contest taking place today, 1 April, from 0900 to 1200UTC. Last year 156 stations took part from six different call areas. It's a race to accumulate as many kilometres worked as possible, with no multipliers. Using all modes the exchange is signal report, serial number and locator.

The latest CW leg of the 80m club championships takes place on 2 April from 100 to 2030UTC. The exchange is signal report and serial number.

On 3 April the 144MHz UK Activity contest takes place from 1900 to 2130UTC. Using all modes on the band the exchange is signal report, serial number and locator.

The first leg of the SP DX Contest takes place on 7 and 8 April from 1500 to 1500UTC. Using both CW and SSB on the 1.8 to 28m bands, SP stations send a signal report plus a single character province code, while non-SP stations send a signal report and a serial number.

And now the solar factual data for the period from Friday the 23rd to the 29th of March, compiled by Neil Clarke, G0CAS on Friday the 30th of March.

Several small sunspot groups were visible every day. Only one group was large, which produced an M class solar flare on the 23rd, otherwise solar activity was at low levels every day with just a few C class solar flares taking place each day. However, on the 29th a large group was approaching the north-east limb and produced numerous large C class flares. This is the return of a region that produced 14 M class and two X class solar flares on its last rotation during the first two weeks of March. Solar flux levels increased from 101 units on the 25th to 112 by the 29th. The average was 105 units. The 90 day solar flux average on the 29th was 119, that's three units down on last week. X-ray flux levels varied little day to day and averaged B2.5 units. Geomagnetic activity was quiet until a weak coronal hole disturbance arrived around midday on the 27th and lasted for 24 hours. The Ap index on the 27th and the 28th was 15 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 330 kilometres per second on the 23rd to 510 by the 28th. Particle densities were low every day except for an increase to 20 particles per cubic centimetre by the 27th. Bz varied between minus 3 and plus 4 nanoTeslas and between minus 12 and 6 nanoTeslas during the disturbance. MUFs fell below forecast levels on several days, this is due to the coronal hole disturbance and seasonal decline. A radio aurora event took place from the afternoon 27th to the early hours of the 28th but contracts appear to have been confined to high latitudes.

And finally the solar forecast. This week the active side of the Sun is expected to be looking our way. Depending on how active the old region 1429 is, which is now back in view, that will determine the level of activity for the coming week. Moderate levels are a possibility. Solar flux levels should increase and be in the 130s later in the week. Geomagnetic activity should be quiet every day. However, there is a chance that later in the week activity could increase due to the

arrival of a coronal mass ejection. MUFs during daylight hours at equal latitudes should be about 26MHz for the south and 23MHz for the north. Darkness hour lows should be around 10MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 27MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 0900 and 1200 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 1 April Gloucester Amateur Radio & Electronics Society is at the South Gloucestershire Rally at Almondsbury. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday 2 April Friskney and East Lincolnshire Communications is running a club net on 144.165MHz USB from 7pm. Contact Chris, M0MFP, on 01507 442 240.

On Monday 2 April South Birmingham Radio Society is on the air. Contact Don, on 01214 581 603.

On Monday 2 April Welland Valley Amateur Radio Society is running a 2m club net on 145.275MHz FM from 2030UTC. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 3 April Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 3 April Friskney and East Lincolnshire Communications Club is having a talk by Rupert, 2E0BBQ on the night sky. Contact Chris, M0MFP, on 01507 442 240.

On Tuesday 3 April Lincoln Short-Wave Club is taking part in the 144MHz UK AC. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Tuesday 3 April Loughborough & District Amateur Radio Club is running an open forum on 2m & 160m DFs. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 3 April Wythall Radio Club is taking part in the 144MHz UK AC. Details from Chris, G0EYO, on 07710 412 819.

On Wednesday 4 April Friskney and East Lincolnshire Communications Club is running an M3 and M6 club net on GB3FR from 7.30pm. Contact Chris, M0MFP, on 01507 442 240.

On Wednesday 4 April Hucknall Rolls Royce Amateur Radio Club is forming a maintenance working party at the shack for antenna and mast work. Contact Dave Wilde, G1YAI, on 08454 639 640.

On Wednesday 4 April Lincoln Short-Wave Club is having a surplus equipment sale at the BSA Club. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 4 April Midland Amateur Radio Society is holding an open meeting, training classes and is on the air. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 4 April South Birmingham Radio Society is having a lecture in the Main Hall. Contact Don, on 01214 581 603.

On Wednesday 4 April South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550. On Wednesday 4 April Telford & District Amateur Radio Society is on the air and holding a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 5 April Hucknall Rolls Royce Amateur Radio is holding a fox hunt. Details from Dave Wilde, G1YAI, on 08454 639 640.

On Thursday 5 April Lincoln Short-Wave Club is running a club net on GB3LM from 20.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Thursday 5 April Salop Amateur Radio Society is having a talk on antenna modelling software by Ken Linney, G3UDA. Details on the club website at www.salop-ars.org.uk.

On Thursday 5 April South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 01214 581 603.

On Thursday 5 April Wythall Radio Club Wythall Radio Club begins its Easter contest at 1000. Details from Chris, G0EYO, on 07710 412 819.

On Friday 6 April Coventry Amateur Radio Society is having mini lectures. Contact John, G8SEQ, on 07958 777 363.

On Friday 6 April Friskney and East Lincolnshire Communications Club is holding a club net on GB3FR from 8pm. Contact Chris, M0MFP, on 01507 442 240.

On Saturday 7 April Lincoln Short-Wave Club is running its Saturday Mentor Scheme from 09.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Saturday 7 April Wythall Radio Club commences its weekend event operating a special event station at the Easter Steam Fair, Hanbury. Details from Chris, G0EYO, on 07710 412 819.

NEWS FOR THE NORTH OF ENGLAND On Sunday 1 April Hornsea Amateur Radio Club is taking part in the SSB RoPoCo. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 2 April Angel of the North Amateur Radio Club is having a talk on the development of the Airbus and its communications by Dieter Hohmann. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 2 April Bolton Wireless Club is having a talk on the small transmitting loop by John, G0UCP. For details, send an email to boltonwireless@gmail.com.

On Monday 2 April Hornsea Amateur Radio Club is taking part in the 80m CC CW. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Monday 2 April Sheffield Amateur Radio Club is having a social evening and taking part in the RSGB 80m Contest CW from the club station, G3RCM. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 3 April Chester & District Radio Society is holding its AGM. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 3 April Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836. On Tuesday 3 April Stockport Radio Society is having a club project night hosted by Bernard, G3SHF, Tom, M0DCG and Steve, G8YTP. More information from Nigel Roscoe, on 07973 312 699.

On Wednesday 4 April Denby Dale Radio Club is having a talk on the story of Castle Hill and Victoria Tower by Kirklees Ranger Julian Brown. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 4 April Durham and District Amateur Radio Society is having an operating evening. Details from David, M0BPM, on 01913 888 113.

On Wednesday 4 April Hornsea Amateur Radio Club is having a visit by G2DPA, the RSGB East Yorks DRM. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 4 April Wirral & District Amateur Radio Club is having a drink & waffle at The Irby Mill, Greasby. Details from Simon, G6XHF, on 01516 013 269.

On Thursday 5 April South Manchester Radio and Computer Club is having a talk on the Excalibur SDR by Ian, M0BXR. Details from Ron, G3SVW, on 01619 693 999.

On Friday 6 April Tynemouth Amateur Radio Club is having Morse tuition and putting G0NWM on the air. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND On Thursday 5 April Bangor & District Amateur Radio Club is holding its annual constructors contest. Bring along

something you've built and you could win a prize! Contact Mike, GI4XSF, on 02842 772 383.

NEWS FOR SCOTLAND The Scottish Borders Repeaters Group has announced an appeal for financial help after a rise in the site rental for GB3BE and GB3DU. Please see www.sbrg.co.uk for more details and how to help.

On Tuesday 3 April Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 4 April Glenrothes & District Radio Club is having a presentation on cryptography by Tam, MM0TGB. Details from Laurie, MM0LJA, via email to mm0ljasecgc@btinternet.com.

On Thursday 5 April Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Thursday 5 April Wigtownshire Amateur Radio Club is having a talk on the Story of the Titanic by Donald, MM6ODB. Details from Ellis Gaston, GM0HPK, on 07979 692 580.

On Friday 6 April Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Monday 2 April Bedford and District Amateur Radio Club is running a club net on GB3BF from 20.30. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Monday 2 April Braintree & District Amateur Radio Society is holding a rig clinic for working radios. For more information contact John, M5AJB, on 01787 460 947. On Monday 2 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Monday 2 April Burnham Beeches Radio Club is having an antenna workshop with G0SKA and G8XCK. Contact Dave, G4XDU, on 01628 625 720.

On Monday 2 April Norfolk Amateur Radio Club is running a club net on GB3NB from 19.30 and taking part in the RSGB 80m Club Championship CW. Details from Chris Danby, G0DWV, on 01603 898 678.

On Monday 2 April Southdown Amateur Radio Society is having a talk at Chaseley by Dave, G8PUO, on Saudi airport monitoring. Details from John, G3DQY, on 01424 424 319.

On Monday 2 April Surrey Radio Contact Club is holding its AGM. Contact John, G3MCX, on 02086 883 322.

On Tuesday 3 April Bedford and District Amateur Radio Club is preparing for its special event. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Tuesday 3 April Chelmsford Amateur Radio Society is talking about the RMS Titanic event. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 3 April Leiston Amateur Radio Club is having a talk by G4HUP and M0BCT on portable antennas. Details from Andy, G3ZYP, on 01394 460 441.

On Wednesday 4 April Chesham & District Amateur Radio Society is having a general meeting. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 4 April Havering & District Amateur Radio Club is holding its second business meeting. More information from John, M0UKD, on 07890 222 111.

On Wednesday 4 April Norfolk Amateur Radio Club is holding its AGM. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 4 April Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

On Thursday 5 April Bedford and District Amateur Radio Club is running a club net on GB3BF from 20.30. Details from Bob Leask, G3XNG, by email to g4ceo@talk21.com.

On Thursday 5 April Cray Valley Radio Society is having a presentation on amateur TV by John Stockley, G8MNY. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 5 April Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 5 April Horsham Amateur Radio Club is having a talk on frequency standards by Wally Blanchard, G3JKV. Details are on the web at www.harc.org.uk.

On Thursday 5 April Reading & District Amateur Radio Club is holding a wireless workshop and club night. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 5 April Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group. Contact Ralph, G1BSZ, on 01923 265 572. On Friday 6 April Mid-Sussex Amateur Radio Society is having a radio night and equipment testing evening. Details from Rob, 2E0RJA, on 01444 232 129.

On Friday 6 April Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 7 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

NEWS FOR THE SOUTH WEST First, advance news that Lymington Community Centre Radio Club will be starting an Intermediate course on Wednesday 18 April at 7pm. More details from Keith, G8MZF, email m0lccandg8mzf@googlemail.com.

Solent Repeater Group announced that GB3PC was reactivated on Sunday 25 March following site renovations by the landlord. The Group is asking

for any donations to help cover costs to be sent to Solent Repeater Group care of David Walker, G8UCY, 43 Wimborne Road, BH21 3DS.

On Sunday 1 April South Bristol Amateur Radio Club is attending the South Gloucestershire Rally. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Sunday 1 April Thornbury & South Gloucestershire Amateur Radio Club is at the South Gloucestershire Amateur Radio Rally. Contact Tony, G0WMB, on 01454 417 048.

On Sunday 1 April Trowbridge & District Amateur Radio Club is running a club table at the South Gloucestershire amateur radio rally. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Wednesday 4 April Thornbury & South Gloucestershire Amateur Radio Club is holding its AGM. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday 4 April Trowbridge & District Amateur Radio Club is having a talk by Chris Clarke, G0AQL, on homebrew antennas for garden and portable. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 5 April Saltash & District Amateur Radio Club is having an operating night at the Burrraton Community centre. Contact Brian, M0BHG, on 01752 844 321., m0bhg@yahoo.co.uk

On Thursday 5 April South Bristol Amateur Radio Club is looking at Bristol Wireless. Details from Andrew Jenner, G7KNA, on 07838 695 471.

NEWS FOR WALES On Tuesday 3 April Carmarthan Amateur Radio Society is having a display of repeater equipment. Contact Lloyd, 2W0LLT, on 01239 711 297.

On Friday 6 April Newport Amateur Radio Society is looking at station modifications. More information from Ross Clare, GW3NWS, on 01633 880 146.

460. Weekly Highlights of Solar and Geomagnetic Activity, 26 March - 01 April 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-04-02 15:30:09 UTC
From: SWPC.Webmaster@noaa.gov

:Product: Weekly Highlights and Forecasts
:Issued: 2012 Apr 02 1304 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
26 March - 01 April 2012

Solar activity was at mostly low levels during the period. Region
1451 (N17, L=306, class/area Cro/20 on 30 March), which is thought
to be old Region 1429, produced a C7 x-ray event on 29 March, the
largest event of the period. No other significant flares or
associated CMEs occurred.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit ranged
between normal and moderate levels off and on throughout the period.

Geomagnetic field activity began the period at quiet levels on 26
March and the first half of 27 March. Beginning around 0900 UTC on
27 March, conditions increased to unsettled levels over the next 12
hours, as the result of a sustained period of southward Bz near
-13nT. Shortly prior to 1800 UTC, a transition in polarity (SSBC)
was observed at the onset of weak Coronal Hole (CH) high speed
stream, with the NOAA planetary network of ground magnetometers
recording active levels over the next 9 hours so, ending at 0600 UTC
on 28 March. Individual high latitude stations recorded minor storm
levels simultaneously. From midday 28 March through the end of the
period on 01 April, geomagnetic activity remained at quiet levels.

Forecast of Solar and Geomagnetic Activity
02 April - 28 April 2012

Solar activity is expected to be at very low to low levels
throughout the period with a slight chance for M-class flare
activity.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal to moderate levels from 02 April through 13
April. Flux values are forecast to increase to high levels on 14
```

April and persist through 18 April, as the result of CH high speed stream effects. Flux values are expected to return to normal and moderate levels on 19 April, and remain so through the duration of the period.

Geomagnetic field activity is expected to begin the period at mostly quiet conditions and remain so through 03 April. On 04 April, quiet to unsettled conditions are expected as a small positive polarity CH is expected to move into a favorable position for a day or so. Predominately quiet conditions are expected again from 05 -10 April. On 11 April, high speed stream effects from recurrent negative polarity CH are forecast to bring unsettled and active conditions at mid latitudes and possible minor storm levels at high latitudes. This activity is expected to persist for 3 to 4 days. From 15 April through 23 April, conditions are expected to return to predominately quiet levels. A recurrent positive polarity CH is anticipated on 24 - 25 April, and is expected to increase activity to unsettled conditions. Mostly quiet geomagnetic conditions are expected from 26 April through the end of the period.

//
Dayton Hamvention MegALinK

Posted: 02 Apr 2012 01:16 AM PDT
http://forums.qrz.com/showthread.php?340611-Dayton-Hamvention-MegALinK&goto=newpost

Greetings!

Once again this year, K9NZF Systems☐ and the Chief Anderson Amateur Radio Club are proud to announce the Dayton Hamvention® MegALinK☐ special event wide area voice network for the 2012 Hamvention®. MegALinK☐ was conceived as a way to provide FM mobile voice coverage from central Indiana all the way to Dayton, Ohio, and now, in to and on the grounds of the Dayton Hamvention® itself!

After a successful trial run with a mobile simplex node in 2011, the on-site RF system has been upgraded to a stationary UHF VoIP-enabled repeater base station, providing portable coverage at Hara Arena itself, and wide-area connectivity via EchoLink®, IRLP, and RF to the other three MegALinK☐ core RF sites in Indiana, as well as any other stations that may wish to connect.

Core Sites participating in the K9NZF Systems☐ MegALinK☐ are the following:

WA9EOC Repeater

444.675/449.675 Carrier Squelch

EchoLink® N9DEZ-L (Closed - Connection by Permission Only)

IRLP Node 4465 (Primary IRLP Node - Open to All Stations)

Anderson, Indiana

I-70 Coverage from East Indianapolis to approximately IN-3 (I-70 Exit 123 in Indiana)

K9NZF Repeater

443.325/448.325 PL 103.5 Hz

EchoLink® K9NZF-R (Primary EchoLink® Node - Open to All Stations)

Modoc, Indiana

I-70 Coverage from IN-3 (I-70 Exit 123 in Indiana) to approximately I-70 Exit 21 in Ohio

KB9RRN Link

443.325 Simplex Narrowband FM DPL 325

EchoLink® KB9RRN-L (Secondary EchoLink® Node - Open to All Stations)

Greenwood, Indiana

Southwest Indianapolis Metropolitan Area Coverage

K9NZF Dayton Hamvention® MegALinK☐ On-Site Repeater

444.675/449.675 PL 131.8 Hz

EchoLink® K9NZF-L (Closed - For Linking & Control Purposes Only)

Dayton, Ohio

HARA Arena & Immediate Coverage Only

The Dayton Hamvention® MegALinK☐ On-Site Repeater is intended for portable coverage at the Dayton Hamvention®. It is closed to general amateur use by stations not participating in Dayton Hamvention® activities. All amateurs in route to or who are at the Hamvention® are welcome and encouraged to use the system to communicate with any other amateur on the system.

EchoLink® connectivity is also available to all interested stations, both single-user mode (PCs, tablets, and smart phones) and RF simplex links and repeaters through two EchoLink® nodes and one IRLP node. The primary EchoLink® node for stations wishing to connect is K9NZF-R, EchoLink® node number 443325. The secondary EchoLink® node for stations wishing to connect is KB9RRN-L, EchoLink® node number 541081. IRLP connectivity is available through the WA9EOC Chief Anderson Amateur Radio Club repeater by connecting to IRLP Node 4465.

It is recommended that stations wishing to connect over EchoLink® primarily connect to K9NZF-R (node 443325) as it features higher bandwidth capacity and serves as the hub of the Dayton Hamvention® MegALinK☐ system. K9NZF-L will be online as the Dayton Hamvention® MegALinK☐ On-Site Repeater, however it will not accept incoming connections in order to preserve all available bandwidth for the VoIP backhaul to the K9NZF Repeater master site. If all connection slots on K9NZF-R (node 443325) are full, please use the backup node, KB9RRN-L (node 541081).

Please make sure your EchoLink® or IRLP node is operating properly before connecting to the system. Stations connecting to the system whose nodes are operating improperly and/or causing unreasonable noise or interference (i.e. carrier-squelch operated repeaters or simplex nodes receiving co-channel or malicious interference) will be disconnected by the system control operators, and if necessary, permanently banned from the system.

Please direct any correspondence about the Dayton Hamvention® MegALinK☐ system to megalink@k9nzf.com, or visit our web site at

http://www.k9nzf.com. Thank you for your interest, and we hope to hear you on the system!

See you at Dayton Hamvention® 2012!

Legal Stuff: Dayton Hamvention® is a registered trademark of the Dayton Amateur Radio Association. EchoLink® is a registered trademark of Synergenics, LLC. MegALinK☐ and KleerKonnect☐ are trademarks of K9NZF Systems☐ with all rights reserved. Neither Dayton Hamvention® nor the Dayton Amateur Radio Association endorse or sponsor in any way the MegALinK☐ system. Neither MegALinK☐ nor K9NZF Systems☐ are affiliated in any way with Dayton Hamvention® or the Dayton Amateur Radio Association. The MegALinK☐ system is provided free of charge by licensed amateur radio operators to promote the hobby and amateur radio communications related to events at the Dayton Hamvention®. The MegALinK☐ system is open for use by all properly licensed amateur radio operators subject to the stipulations set forth by the system control operators.

NZART Headquarters Infoline Issue 34s

02 April 2012
NZART Website: www.nzart.org.nz

An oversight during preparation for distribution of infoline 248 meant the report on the Jock White Field Day was omitted.

Stuart’s report is included in this special issue, plus an updated results table.

2012 Jock White Field Day Report

A big thank you as always to all of you who went to the trouble to set up and operate field stations. Weather is a big factor in participation and was quite variable over the country. High winds and rain affected operation in the north while further south conditions were much better.

Propagation on 40 was probably the best we have experienced since the last sunspot cycle however DX contacts were markedly down on 80m this year.

This year was my first since taking over from Stan in 2006 where every field station has sent in their logs. All logs were in by the cut-off date allowing me to get this report out very early as well. Thanks you to all, this has probably halved my workload in processing entries.

Another bouquet: there were no reports received of splatter this year, and was my experience as well while operating. This is great to see (or hear!).

It was great to hear Christchurch back on, having missed 2011 for obvious reasons.

Kaikoura was activated by ZL1PY from Lake Tennyson in the remote Marlborough back country.

It was nice to hear a few new ones after an absence of several years: Nelson, Thames, North Canterbury and Wellington.

The Radio Electronics Group in the Waikato activated their new branch number (89) for the first time and I will modify the summary sheet to include them.

Sadly we were not to hear much of the voice of ZL6A as Jim was the head CW operator for the Nelson team.

There were a few absences this year: Papakura, Huntly, Tauranga Emergency, Inglewood and Titahi bay operated as a home station.

South Taranaki managed to take out the Patea trophy ahead of Napier and was a close thing.

This year there were 35 field station active, up from 32 in 2011, but down on the 37 in 2010.

There were the usual large teams at 1AM, 2QF, 2AB and 2KO.

Branch point numbers were lower than they would normally have been in the past for this many field stations as some teams dropped CW and/or 40 metres for this year.

Home Stations

It looked like with the absence of Jakey, ZL2JKY this year Gwynne, ZL1AAR might take out the home station section however Warren ZL2AJ appeared from no-where to scuttle that.

Operating Technique

This is probably a more important factor than your antenna in gaining more contacts for your team. It is in the best interests of everyone that contacts in Field day are made efficiently.

When conditions are good (on phone) there is no need to repeat the cypher, similarly callsigns don’t have to be used exhaustively once the initial contact is used. Obviously as band conditions change, or if there is QRM/QRN then repeats will be needed, sometimes a number of times.

Contacts needed to become a valid branch point

Note that 20 contacts are needed to achieve this on CW for field stations (50 on phone). I reduced from 25 points last year. There were three field stations affected by this rule, one made 19 contacts, however I was quite strict. Twenty contacts is only a little over one contact per hour for the entire event and should be achievable. I will not drop the number below 20 for reasons of fairness. Too few contacts mean many teams miss out on the chance to gain that branch point.

Thanks to Kapiti for persevering and making 51 phone contacts before going QRT.

Logs

The standard of logs this year were at a pretty high standard, I would request again that teams use the summary sheets off the NZART web-pages, having branch point callsigns on refill paper is not that helpful. See:

http://www.nzart.org.nz/activities/contest-rules/

I will be re-distributing some of the branches from sheet 3 to sheet 2 as the last sheet is getting quite crowded.

Team Comments

Great experience for our most junior member

Saturday very windy

Windy but no rain, not like 2011

We hoped there would be more stations on CW

Enjoyable FD we with favourable weather and good attendance by local and distance members

Rained during set up then stopped

Operated in a venue open to the public and FD turned into a most worthwhile PR event.

As per the definition of being competitive or social as branch likes or all points in between. We were!

Operated from a horse float

Having broken my leg whilst on Christmas holidays I was unable to compete this year with our branch: home station was next best.

ZL2.. was a very aggressive operator

Several hundred sheep in paddock, luckily only two ground radials pulled out

Less DX stations this year

40 m definitely up

Had to sleep in the 4WD at Lake Tennyson as wind too strong to put the tent up

Grateful to the stations that persevered with our sometimes very faint signals (QRP).

High winds and rain meant one station ended up at plan C: operating from the front lawn.

Disappointed not to hear more DX

While having dinner felt guilty about no one from the club participating do set up on the front lawn

Check Logs

Received with thanks from ZL2AYK and ZL2DW

Valid branch points (Multipliers)

Total: 90 (86 maximum available to field stations)

80m phone: 01 02 03 04 05 08 10 12 18 20 22 23 25 26 27 28 29 30 37 41 46 48 50 53 58 63 64 68 69 76 79 83 86 87 89

80m CW: 01 02 03 04 05 12 22 25 26 27 28 29 30 46 53 68 86 87

40m phone: 01 02 05 08 10 12 18 20 22 25 27 28 30 37 41 46 50 58 64 68 83 86 87 89

40m CW: 01 02 05 18 22 25 27 28 30 46 50 68 87

First Scottish-Built Satellite Ukube-1 to Launch in 2013:

Posted: 01 Apr 2012 05:08 PM PDT
http://www.eham.net/articles/28019

The first satellite to be built in Scotland is due to be launched next year. UKube-1 is being built at the West of Scotland Science Park in Maryhill, Glasgow. The United Kingdom Universal Bus Experiment, to give it its proper name, is a pilot programme from the UK Space Agency to test new technologies in space. A big idea, perhaps. But the trick is to think small. The underlying CubeSat concept came originally from America: to create a satellite 10cm by 10cm by 10cm. That gives you a volume of just one litre, but that can contain a surprising amount of science in low Earth orbit. It's a package which costs, by space exploration standards, relatively little to build and launch.

Roger Coulter, KT4HV (SK):

Posted: 01 Apr 2012 05:06 PM PDT
http://www.eham.net/articles/28018

COULTER, Roger Lee, 66, of Radford, VA, passed away on Friday, March 9, 2012. Roger was the third son of Marion Francis Coulter, Sr. and Margaret Thompson Coulter. He was born in Wheeling, WV on June 14, 1945. He was a member of St. Jude's Catholic Church in Radford and was a veteran of the U.S. Navy attached to the U.S. Marines as a medic. He was a graduate of Wheeling High School, a graduate of the Ohio Valley School of Nursing in Steubenville, OH and of the Shadyside School of Anesthesiology in Pittsburgh, PA. He was a member of the New River Valley Amateur Radio Club "KT4HV" since 1996 and was a national volunteer examiner coordinator for amateur radio for 14 years.

http://forums.qrz.com/showthread.php?340729-NWS-St-College-has-scheduled-the-SKYWARN-Spotters-Class-Monday-April-23rd&goto=newpost

Cambria County SKYWARN: Officially, the NWS St. College has scheduled the SKYWARN Spotters Class for Monday April 23rd @ 7:00pm EDT. The Location will be the Central Park Complex Auditorium, 110 Franklin St. in Johnstown, PA. Parking will be available behind CPC and Religious Book Store. The instructor will be Charles Ross, Senior Hydrologist NWS St. College, PA. This class is open to anyone. Please register/w Charles Ross via email to; charles.ross@noaa.gov cc; n3ssd@cambriaradio.com.

Pass the word...invite area hams and their family members, friends, Police, Fire, and EMS. Anyone should take advantage of this opportunity, not only hams.

N3SSD Mike

Canada issues its first Developmental License VX9GHD on the 5 meg, 60 meter
Band

Posted: 02 Apr 2012 09:58 AM PDT
http://forums.qrz.com/showthread.php?340664-Canada-issues-its-first-Developmental-License-VX9GHD-on-the-5-meg-60-meter-Band&goto=newpost

Industry Canada issues its first license on the new 60 meter developmental
band, VX9GHD to VE3FI Russ Hemphill today. Canadians have been waiting for
3 years for this new opportunity to join the USA, and Britain. This band
is badly needed for Emergency Communications, when conditions on 40 and 80
are not suitable for transmitting or receiving traffic. This license is
for one year, then it will be open to all canadian amateurs using their own
call sign.

Russ Hemphill VX9GHD/VE3FI

To All RADIO AMATEURS

BID: $ANS-092.01

Volunteers are needed to help at the AMSAT booth at Dayton. Gould, WA4SXM, is looking for volunteers to help man the AMSAT booth during the 2012 Hamvention. People are needed all 3 days for 2 hour shifts. Please send the days and times you are available to help as well as how many shifts you are willing to work via e-mail to wa4sxm at amsat.org. Monitor http://www.amsat.org/amsat-new/hamve...012/Dayton.php for the latest AMSAT at Dayton news and developments.

AMSAT Theme at Dayton 2012: Running with Fox

The 2012 Dayton Hamvention will be held this year on 18 - 20 May 2012. As has been the case for the many years Hamvention will be at the Hara Arena Complex on the north side of Dayton. AMSAT will occupy the same booths (444-449) in Ball Arena, right across from the ARRL area and just inside the door from the Satellite Demonstration area.

The AMSAT theme for 2012 is "Running with Fox". We will have multiple exhibits of the new AMSAT satellite on display.

Visit AMSAT's Dayton Hamvention page for all details on activities:

http://www.amsat.org/amsat-new/hamve...012/Dayton.php

Some of the activities will include:

Life size Fox models will be on display as well as diagrams of the modules inside the 10cm square satellite.Operational prototype of ARISSat-1 on display.AMSAT Thursday Night Get-together at the Tickets Pub & Eatery.The sixth annual AMSAT/TAPR Banquet will be Friday night May 18 at the Kohler Banquet Center. The price for the Banquet is $30. Seating is limited and reservations are required. Follow the links on AMSAT's Dayton page.The AMSAT Forum will be on Saturday May 19.

AMSAT/TAPR Friday Night Banquet

AMSAT/TAPR Banquet on Friday night, May 18 is one of the main AMSAT activities during the 2012 Hamvention at Dayton.

AMSAT is pleased to announce that Howard Long, G6LVB will be the featured speaker for the evening event. Howard will be talking about his FUNcube Dongle, the 64 - 1700 MHz Software Defined Receiver. This innovative USB device is the size of a thumbdrive and has an SMA antenna socket. Multiple SDR control and display software programs can be used with the FUNcube Dongle.

Banquet tickets will not be sold at the AMSAT booth during the Hamvention so reservations must be made through the AMSAT Store. Tickets are $30 apiece.

ARISS Mentor Introduction at Dayton 2012

AMSAT and ARRL are teaming up during the 2012 Hamvention to recruit new ARISS (Amateur Radio on the International Space Station) Technical Mentors and Ground Station Operators.

Friday and Saturday (May 18 & 19) at 4pm in the ARRL stage area AMSAT Vice President for Educational Relations Mark Hammond N8MH will explain the need for additional ARISS Technical Mentors and Ground Station Operators and the requirements and responsibilities needed to help provide a reliable conversation between astronauts and selected schools or groups.

Technical Mentors serve as an advising and coordinating liaison between NASA, the school or group making the ARISS contact, and the Ground Station Operators, who set up the satellite station at the contact location. We encourage anyone interested in helping make future school contacts with the ISS successful to please attend.

AMSAT to Facilitate Student Satellite Contacts

AMSAT is encouraging all students attending the 2012 Dayton Hamvention to come by the Satellite Demonstration Area just outside of the Ball Arena entrance and make a contact using the amateur satellites. There will be AMSAT volunteers there to explain how to make the contacts and during actual satellite passes will try to get as many students as possible to

complete actual contacts. There are lists of satellite pass times in the satellite demonstration area and at the AMSAT booth.

[ANS thanks Gould Smith, WA4SXM for the above information]

AMSAT-NA Board of Directors Nominations

It is time to submit nominations for the upcoming open seats on the AMSAT-NA Board of Directors. A valid nomination requires either one current Member Society, or five current individual members in good standing, to nominate an AMSAT-NA member for the position.

Three directors and two alternate directors have terms expiring this year. The director seats open for election are held by Tom Clark, K3IO; Lou McFadin, W5DID; and Gould Smith, WA4SXM. The alternate director seats open for election are held by Mark Hammond, N8MH and Patrick Stoddard, WD9EWK.

The three nominees receiving the highest number of votes will be seated as regular board members with two year terms. The two nominees receiving the next highest number of votes will be seated as alternate directors for one year.

Written nominations, consisting of names, calls and individual signatures, should be mailed to: AMSAT-NA, 850 Sligo Ave #600, Silver Spring, MD, 20910. They must be received no later than June 15th. No other action is required.

Nominations may also be made by electronic means including e-mail, FAX, or electronic image of a petition. Electronic petitions should be sent to MARTHA@AMSAT.ORG or faxed to 301-608-3410, and also must be received by June 15th. If using any electronic submission, there is a second, verifying step:

ELECTRONIC SUBMISSIONS WITHOUT THIS SECOND, WRITTEN VERIFICATION ARE NOT VALID UNDER THE EXISTING AMSAT-NA BYLAWS. A verifying traditional written petition MUST be received at the AMSAT-NA office at the above address within 7 days following the close of nominations.[ANS Thanks AMSAT Secretary Alan Biddle, WA4SCA for the above information]

QB50 CubeSat Proposal Deadline Extended to April 30

QB50 is a network 50 CubeSats in a 'string-of-pearls' configuration that will be launched together in the first half of 2015 by a single rocket, a Shtil-2.1, from Murmansk, Northern Russia into a circular 320 km altitude, 79 degree inclination orbit. (https://www.qb50.eu) The mission lifetime of individual CubeSats is estimated to be about three months.

The von Karman Institute for Fluid Dynamics in Brussels, Belgium is accepting CubeSat proposals from interested University and Research teams until April 30. The selection of 50 CubeSats for the exploration of the lower thermosphere, re-entry research and in-orbit demonstration of new technologies and miniaturized science sensors will be made by the Selection Committee in early June. Proposing teams will be individually notified of their election/non-selection shortly thereafter.

The 50 CubeSats will comprise an on-orbit network of:

About 40 atmospheric 2U CubeSatsAbout 10 2U or 3U CubeSats for In-Orbit Demonstration of science and technology payloads.

All 40 atmospheric 2U CubeSats and most of the 10 2U and 3U CubeSats for In-Orbit Demonstration will carry a set of standardized sensors for multi-point, in-situ, long-duration measurements of key parameters and constituents in the largely unexplored lower thermosphere and ionosphere. Once requirements for the standardized sensor package and network/communication requirements have been met the CubeSat team may use remaining on-board space or electronic capability to conduct their own additional research.

QB50 will also study the re-entry process by measuring a number of key parameters during re-entry, e.g. CubeSat on-board temperature and deceleration.

A single CubeSat is simply too small to also carry sensors for significant scientific research. Hence, for the universities the main objective of developing, launching and operating a CubeSat is educational. However, when combining a large number of CubeSats with identical sensors launched at the same time into a network, in addition to the educational value, fundamental scientific questions can be addressed which are inaccessible otherwise.

Networks of CubeSats have been under discussion in the CubeSat community for several years, but so far no university, institution or space agency has taken the initiative to set up and coordinate such a powerful network. The QB50 network can still fully achieve its mission objectives even if a few CubeSats fail.

Typically, a university builds a CubeSat and launches it into low Earth orbit. It also builds or already has available a ground station to track the CubeSat and enable uplink/downlink telecommunications.

The period in a low-Earth orbit (about 600 km altitude) is about 90 minutes, but the duration of a satellite pass over the ground station is approximately 10 minutes in the best case to no coverage at all for most of the 16 daily orbits. When supporting only one satellite project the ground station is not in operation 97% of the time. If a mission critical emergency occurs aboard the CubeSat it can be only addressed on single orbits within range of the dedicated ground station.

An international network, the Global Educational Network for Satellite Operations (GENSO), under development may well be set up in time for QB50. It would eventually comprise more than 100 ground stations in different parts of the world, providing a vastly improved uplink and downlink capability for all CubeSats. The international QB50 network in orbit would be the first major user of the international GENSO network on the ground. In case GENSO is not set up in time for QB50, CubeSat teams are encouraged to set up a subset ground station network comprising any number of ground stations.

The QB50 homepage can be accessed at: https://www.qb50.eu

[ANS thanks the QB50 Project for the above information]

SpaceDaily Posts Article Detailing RAX-2 CubeSat Scientific Success

An article posted on SpaceDaily.com gives additional details of the successful RAX-2 CubeSat scientific success. In their Solar Science section, "Researchers take first-ever measurement of auroral turbulence using a nanosatellite radar receiver", is an article furtherexplaining the scientific discovery. Read the full article on-line.

[Menlo Park CA (SPX) Mar 26, 2012] - Researchers from SRI International and the University of Michigan have taken the first-ever measurement of naturally occurring auroral turbulence recorded using a nanosatellite radar receiver. The research was done with support from the National Science Foundation (NSF) and NASA's Educational Launch of Nanosatellites (ELaNa) Initiative.

The distinctive radar echoes recorded on March 8 were taken with the Radio Aurora Explorer (RAX) CubeSat. The RAX nanosatellite measured turbulence over Fairbanks, Alaska that was a direct result of a geomagnetic storm triggered by the largest solar flare in the past five years.

The Earth's high latitude ionosphere, a region of the upper atmosphere associated with solar-driven aurora or "northern lights," becomes highly unstable when large currents flow during geomagnetic storms. RAX was specifically designed by SRI and the University of Michigan to measure this auroral turbulence from an orbital vantage point inaccessible to traditional ground-based radars.

"The RAX radar echo discovery has convincingly proved that miniature satellites, beyond their role as teaching tools, can provide high caliber measurements for fundamental space weather research," said Therese Moretto Jorgensen, Ph.D., Geospace program director in the Division of Atmospheric and Geospace Sciences at the National Science Foundation.

The project's mission was to use small satellites called CubeSats to remotely explore formation of charged particle filaments created in response to intense electrical currents in space.

These plasma structures, a form of turbulence called field-aligned irregularities (FAIs), can distort communication and navigation signals such as global positioning systems (GPS). During the recent solar flare, RAX measured FAI echoes using the Poker Flat Incoherent Scatter Radar (PFISR), an NSF research radar operated by SRI.

"The recently collected radar echoes allow us to determine the root cause and to possibly predict future disturbances in the auroral ionosphere - disturbances that can severely compromise communication and GPS satellites," said Hasan Bahcivan, Ph.D., a research physicist in SRI's Center for Geospace Studies, and principal investigator of the RAX mission.

A team of University of Michigan students under the direction of James Cutler, Ph.D., an assistant professor in the Aerospace Engineering Department, designed, built, and operated the satellite and gathered the

radar echo data.

RAX was the first CubeSat to be selected as part of an NSF program to use small satellites for space weather and atmospheric research. The RAX CubeSat is a three liter satellite weighing three kilograms. It was launched by NASA on October 28, 2011, and has since completed 18 experiments.

[ANS thanks SpaceDaily.com for the above information]

NASA Credits Increasing CubeSat Capability in O/OREOS Mission Success

Launched in November, 2011 NASA's Organism/Organic Exposure to Orbital Stresses (O/OREOS) nanosatellite has successfully carried microorganisms to a high-inclination, low-Earth orbit and monitored the effects of the space environment on their growth and metabolism.

Two populations of the microbe Bacillus subtilis into space. One set of microbes was a naturally occurring strain, and the second was a radiation-resistant mutant strain. The microorganisms were part of the Space Environment Survivability of Live Organisms (SESLO) project, which characterized the growth, activity, health and ability of microorganisms to adapt to the stresses of the space environment including exposure to a total dose rate of radiation nearly 15 times greater than that experienced in the orbit of the International Space Station.

In space, bacterial spores successfully germinated and grew after 14 days in orbit and again after 97 days. In microgravity, the cells generally grew and metabolized more slowly than their counterparts on Earth. Interestingly, the microorganisms grown at 97 days of exposure showed no significant difference in their growth parameters than those grown at 14 days. The study provides insight into how living organisms cope with life beyond our planet.

O/OREOS also carried another set of experiments: the Space Environment Viability of Organics (SEVO), which monitored the stability and changes in four classes of organic molecules during spaceflight.

"The full success of the O/OREOS mission demonstrates convincingly that cubesats can be cost-effective platforms for performing science research and conducting technology demonstrations," said Mary Voytek, senior scientist of NASA's Astrobiology Program at NASA Headquarters, in a statement from NASA.

"The capabilities of cubesats are growing steadily, making them good candidates to operate precursor experiments for missions on larger satellites, the International Space Station, lunar surface exposure facilities, and planetary exploration."

The full story can be accessed on SpaceDaily.com.

ARISS Contacts Receive Media Coverage

Media coverage of recent ARISS contacts can viewed on-line. The ARISS contact on March 21 with students at Salem Elementary in Apex, North Carolina had the opportunity to question of astronaut Don Pettit KD5MDT 241 miles (388 km) up and on the other side of the Earth aboard the International Space Station. Tony Hutchison, VK5ZAI provided the telebridge link to the ISS amateur radio station NA1SS.

Local television coverage on WRAL-TV and a report of the contact can viewed on-line at:

http://www.wral.com/weather/blogpost/10904028/

News 14 Channel coverage of the Apex ARISS contact is at:

Listen to an interview with some of the students:

http://www.wcpss.net/podcast/2012_ma...alem/index.mp3

Also on March 21 the Swiss Air Force Museum Clin d'Ailes, located on the Swiss Airforce Base in Payerne, Switzerland, established an ARISS contact with ESA astronaut André Kuipers, PI9ISS, aboard the International Space Station.

Astronaut André Kuipers operated with the ISS callsign OR4ISS. This was a direct contact performed by the Amateur radio Club station HB9SPACE, located in the museum. Two videos of this event can be viewed on-line at:

http://www.20min.ch/ro/videotv/?vid=244405&cid=120

http://www.20min.ch/ro/videotv/?vid=244395&cid=120

Southgate ARC provides detailed coverage of the HB9SPACE event at:

[ANS thanks ARISS, AMSAT-UK and Southgate ARC for the above information]

Satellite Shorts From All Over

The ESA□s Education Office has maintained frequent contacts with the student teams to follow the progress of their satellite operations after the February 13 launch of the Vega rocket delivering seven ESA-sponsored CubeSats into low Earth orbit. The status of the CubeSats is posted. Photos are posted also.
Call for Papers - Central States VHF Society 46th Annual Conference, Cedar Rapids, Iowa, July 26-28, 2012. If you would like to contribute a paper, presentation, or poster, please contact Rod Blocksome, K0DAS, CSVHF Conference Program Chairman as soon as possible with the title and a short description. You can reach Rod at k0das@arrl.net or at his callbook

address. Check CSVHFS web page for authors for more information.
The ARISS International monthly teleconference was held on Tuesday, March 20. The HamTV discussion covered the meetings that ESA and NASA are engaging in to ensure coordination of the project. Minutes have been posted.
TAMSAT Project Coordinator, Levent Sasmazel, WW2L posted good news about TAMSAT, Association of Amateur Satellite Technologies in Turkey completion of the Internal Housekeeping Unit processor of their satellite. Photos and a full description are posted on the AMSAT-UK web.
The WebSDR receiver is located at the Astronomical Observatory Department of □Stefan cel Mare□ University in Suceava, Romania has added coverage of 437.470 □ 437.515 MHz to enable reception of the Romanian amateur radio CubeSat Goliat. The original WebSDR receiver at this site provides coverage of the 3.5 MHz band. Tune in at: http://sdr.opt.ro:8901/ More information about the Goliat CubeSat is posted at: http://www.goliat.ro/
Light your fire. AMSAT-UK posted news about the STRaND-1 smart phone amateur radio CubeSat Plasma Propulsion Thruster. This system will be the first propulsive technology to provide very precise attitude control and pointing. Read the full article at AMSAT-UK.
The BBC TV Newsnight show covered Clyde Space and UKube-1 in a recent airing. UKube-1 is a 3U CubeSat being designed and produced by Clyde Space for the UK Space Agency. UKube-1 is the UK□s first CubeSat and will fly a total of 6 independent payloads. UKube-1 will carry a set of AMSAT-UK FUNcube boards providing a 435/145 MHz linear transponder and BPSK telemetry beacon.
Know when to duck ... NASA Jet Propulsion Labs has an on-line tool (with web, telnet, and e-mail interfaces) called the HORIZONS system which can be used to generate ephemerides for solar-system bodies. The Near-Earth Object Human Space Flight Accessible Targets Study (NHATS) and the HORIZONS system will allow prediction of the passage of Near Earth Asteroids. (These are scientific tools but offer a significant learning opportunity for citizen scientists.) Check out http://neo.jpl.nasa.gov/nhats/ - and - http://neo.jpl.nasa.gov/cgi-bin/nhats HORIZONS access is at: http://ssd.jpl.nasa.gov/?horizons
Echolink SATCHAT net control Vince Waelti, K9TSU announced the new schedule of the on-line net. SATCHAT will meet on the AMSAT Server on Echolink 1900-2030 hours CDT (UTC-5) on the first, third, and fifth Saturdays of each month. A few upcoming dates for the net: April 7, April 21, May 5, May 19, June 2, June 16. All interested amateur radio operators are invited to check in.
Watch the launch of ESA's ATV Edoardo Amaldi on an Ariane 5 rocket from Europe's Spaceport in Kourou, French Guiana, on March 23.
Check out this linked image. All those tiny points of light aren't stars; they're entire galaxies, seen by the European Southern Observatory's VISTA survey telescope located at the Paranal Observatory in Chile. ESO's UltraVISTA survey revealed over 200,000 distant galaxies. (UniverseToday.com)
Using state-of-the-art deep sea sonar, a team says they have found the Apollo 11 engines lying 14,000 feet below the surface. Plans to attempt to raise one or more of them from the ocean floor are under study. It is

unknown yet what condition these engines might be in because they hit the ocean at high velocity and have been in salt water for more than 40 years. Read more.
Yuri's (VE3/UT1FG/MM) ship was the first foreign ship to dock in Toronto for the 2012 shipping season. The event is celebrated in a ceremony and the captain is crowned with a 150 year old Beaver Hat on the ship. Yuri should be in Thunder Bay on April 1st. He expects to be there for several days. The next destination is Puerto Rico. Watch on YouTube. (via John, K8YSE)

[ANS thanks everyone for the above information]

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that please keep in mind the ham who produced a theatrical performance about puns. Reviews said it was a play on words.

The DXNL team wishes a happy Easter holiday to all its readers and their
families!

3DA, SWAZILAND
Filip,ON4AEO, XYL Kath,ON7BK, Sid,ZS6AYC, XYL Adele,ZR6APT, Gert,ZS6GC,
Jose,ON4CJK, YL Elna,ZS6EB, YL Steff,ON3AEO, Lucas,ZS6ACT, and
Herman,ZS5LH, all members of the Fox Charlie DXpedition Team, will be
active as 3DA0FC in SSB, RTTY and PSK on 80m-10m from Apr 6-10.
QSL via ON4CJK. Following frequencies were announced:
SSB: 3780, 7063, 14185, 18136, 21290, 24930, 28490 kHz
RTTY: 3590, 7040, 10149, 14084, 18104, 21084, 24924, 28084 kHz
PSK: 7038, 14072, 18102, 21072, 24922, 28122 kHz.
See also their webeite: http://3da0fc.tk

8R, GUYANA
Anderson,PY2TNT, and Alex,PY2WAS, with the support of the "Mediterraneo
DX Club" (MDXC) will be QRV as 8R1PY from Lethem in CW/SSB on 80m-10m
from Apr 5-8. QSL via PY2WAS, OQRS. See: http://www.mdxc.org/8r1py

9M, MALAYSIA
Vic,R6AF, is active in CW and some SSB on 40m-10m signing 9M2/R6AF/p
from Palau Besar/West Malaysia (AS-097) until Apr 5 or 6 and after that
as 9M2/R6AF/6 on Sabah, Borneo/East Malaysia (OC-088) from Apr 8-11.
QSLs via homecall.

9M0, SPRATLY ISLANDS, AS-051
Some members of the Malaysian Amateur Radio Transmitter Society (MARTS)
and the 9M4SD team plan to activate this rare DX as 9M0L from
Pulau Layang Layang (Swallow Reefs, AS-051) from Apr 10-24. The team
includes Tex-san,9M2TO, Neoh,9M2CLN, Tack-san,JE1CKA, Hajime,7K4QOK,
David,9M2PX, Yasuma,9M8YY, Nigel,G3TXF, Joe,JA1LZR, Takuto,9M2/JE1SCJ,
Miyama,JE1KUC, Naoyuki,JK1FNL, Hiroyuki,JP1TRJ, and Yutaka,JQ2GYU.
They will work with four stations in CW, SSB and RTTY on 160m-6m using

Spider Beams and a special Layang antenna mainly on following QRGs:
CW: 1811, 3511, 7011, 10121, 14011, 18071, 21011, 24891, 28011,
50101 kHz
SSB: 3791, 7081 (RX 7100+ for US), 14160, 18130, 21275, 24940,
28405, 50110 kHz
RTTY: 3521 (RX 3590+ for EU) 7031, 10141, 14081, 18101, 21081,
24921, 28081 kHz
QSL via bureau. See also: http://9m0l.legendchew.com

CY0, SABLE ISLAND, NA-063
Alan,VE1AWW, will be active as CY0/VE1AWW during his spare time from
April until June. QSL via homecall.

E5, SOUTH COOK ISLANDS, OC-013
Alan,VK4WR, and Graeme,VK4FI, are travelling to Rarotonga (OC-013) from
Apr 8-27 to produce some pile-ups as E51BKM and E51GMH in CW and SSB
on 40m-6m. QSLs via homecalls, unfortunately only direct.

F, FRANCE
The club of North Contentin (F6KFW) remembers the 100th anniversary of
the Titanic catastrophy by activating the special callsign TM5MGY in
all modes and on all bands on Apr 10. CW operation will be made with
a replica of the original Titanic Morse key. The suffix indicates the
of the Titanic's callsign MGY. QSL via F6KFW.

The special callsign TM27UFT will be aired in CW on HF/VHF during
the 27th meeting of the Union Francaise des Telegraphistes (UFT) in
Vineuil (Loc JN07qn) near Blois in central France (province Centre,
DPF 07; department Loir-et-Cher/41) from Apr 8-22.
QSL via F6ICG, Direct QSLs after July 15. See also: http://www.uft.net
---
The special callsign TM95BA remembers the battle of Arras 95 years ago
working on the bands on the weekends between Apr 7 and May 8.
QSL via F6IEO. See also: http://www.ref62.fr

G, ENGLAND
The sinking of the Titanic on Apr 15, 1912, triggered shockwaves around
the world since then and always touched the hearts of men. Remembering
the tragedy 15 OPs will activate the special event station GR100MGY
with two 400 watt transmitters and directional antennas on 3.5-28 MHz
from Apr 10-15. They will work mainly in CW, with some phone operation
during the public days on Apr 14/15. QSL via G3SXW.
See also: http://www.gr100mgy.org.uk

A few members of the Southampton Radio Club plan to hit the airwaves
as M100T from Apr 6-8 and every following weekend for the same reason.

The special event station GB100MGY will be active on HF in all modes
from the Fort Perch Rock Marine Radio Museum in New Brighton (EU-005,
WLOTA 1841) from Apr 6-26. They have also the special permission to
work on 501-504 kHz from Apr 12-18 with Crossband operation on 3566 kHz

or 7066 kHz. QSL via M0BZZ. See http://www.gb100mgy-fortperchrock.co.uk

KP2, US VIRGIN ISLANDS, NA-106
Mauri,KP2/AG1LE, wants to hand out a few IOTA points from Radio Reef (aka KP2M contest station) in Christiansted on St Croix (NA-106, USi VI002S, WLOTA 2477) from Apr 4-11. See: http://ag1le.blogspot.de

OZ, DENMARK, EU-030
Doc,OZ/DF1XC, and Joana,OZ/DJ5YL, will be QRV from Bornholm (EU-030) on 40m-10m from Apr 7-14. QSLs via homecalls.

PA, NETHERLANDS
PH4RTM/WHE is working in all modes on all bands from Apr 5-13 during the World Horticultural Expo (Welt-Garten-Expo FLORIADE) in Venlo taking place from Apr 5 until Oct 7. QSL via PH4RTM.
See also: http://www.floriade.com

PY, BRAZIL
The special callsign ZY2014WC marks the upcoming FIFA World Cup.
QSL via PS7KC.

VP2M, MONTSERRAT, NA-103
Budd,W3FF (VP2MFF), Guy,N7UN (VP2MUN), Paul,KB9AVO (VP2MVO), Larry,W7DGP (VP2MLR), Russel,N7QR (VP2MQR), Tom,K2GSJ (VP2MTM), and Chris,N2YYZ (VP2MYZ), will be active using 100 watts and Buddipoles from Apr 8-16. QSLs unfortunately only direct via homecalls, LoTW.

XE, MEXICO
The Federacion Mexicana de Radioexperimentadores (FMRE) celebrates its 80th anniversary with the special callsign 6D0LM.

XV, VIETNAM
Larry,W6NWS, is working as XV2W from Cai Be in CW, SSB, RTTY and PSK on 80m-10m until June 12. QSL via homecall.

Seihachi,JA7LU, signs XV2LU from Vung Tau in SSB and RTTY on 20m-6m from Apr 5-8. QSL via homecall, unfortunately only direct .

ISWL Club
The ISWL Club will be on the air with following callsigns in April:
OP Geof,M0BAU, as GX4BJC/A from Great Sutton in Cheshire (WAB Square SJ37, EU-005, LH-1841).
OP Martin,GW4GNY, as MC1SWL/A from Guilsfield in Powys (EU-005, WAB Square SY21, LH-0453). See also: http://www.iswl.org.uk

Preparations for Conway Reef
Hrane,YT1AD, is travelling to Fiji, Samoa and American Samoa to prepare his DXpedition in April. He wants to hit the airwaves as KH8/N9YU from Pago Pago (OC-045) on Apr 7-9, as 5W7A from Apia (OC-097) on Apr 9-11 and as 3D2R from Rotuma (OC-060) from Apr 13-20. On Rotuma he plans to meet Tevita Rokobaro,3D2TR, of Ministry of Tourism and Communication and donations from Mike K6MKF (antenna rotor) and by him (RF LPA 500W) will be handed over to the Rotuma High School Club Station (3D2RI) with

help during installation.

Deleted from WAE Countries List
Malyj Visotskij has been deleted from the WAE Countries List on Feb 17.

PIRATE: TO4E who alleged to be active from Europa Island (AF-009) on
Mar 24/25 was a pirate. The original TO4E DXpedition took place in 2003
and no other Ham radio licence for Europa has been issued since then.
Access to the island is prohibited generally. Furthermore they are
using other callsign blocks for four years now:
Terre Adelie: FT5Y
Crozet: FT5W
Amsterdam: FT5Z
Kerguelen: FT5X
Glorieuses: FT5G
Tromelin: FT5T
Europa: FT5E
Juan de Nova: FT5J
The callsign blocks FR5/G, /T, /E, /J does not exist anymore.
See also: https://twitter.com/f5nql

SILENT KEY: Fred Maya,W5YI, CQ columnist, examiner, trainer and author,
passed away at the age of 76 on Mar 28. See also: http://cqnewsroom.
blogspot.com/2012/03/cq-columnist-fred-maia-w5yi-silent-key.html
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Apr 7/8 QRP-ARCI Spring QSO Party
